BRITISH & FOREIGN ORDERS.

98712 Austria. Star of a Knight Grand Cross of the Order of Leopold, in the centre of a silver star a gold and enamelled cross with gold oak leaves in the angles. E. F. & R. 3 15 »

*** The Emperor Francis I founded on the 7th Jany. 1808 (the day after his marriage with his third wife, Louise of Modena) a new Order, named after the Emperor Leopold II., and extended it to all meritorious subjects, civil or military without regard to rank or birth.

The first distribution of the Order took place on 8th Jany. 1809.

98713 Belgium. Star of a Military Grand Cross of the Order of Leopold, silver star with gold and enamelled centre and gold cross swords. F. & S. 2 » »

*** This Order was founded on the 11th July 1832.

98714 Denmark. Cross of a Knight Commander of the Order of the Dannebrog, 3rd Class, gold and enamelled cross and crowns in the angles, above the cross F.R.VII crowned. V. F. & R. 5 15 »
98715 — Another 4th class, smaller size, with C.R.IX crowned above the cross. E. F. 2 15 »

*** A miracle according to popular belief, was the cause of the foundation of this Order. The tradition relates, that the knights of the Sword who was introduced into Livonia by Albert III. Bishop of Riga, were in 1219, so hardly pressed by the heathen Esthonians whom they had subjected, as to induce them to seek assistance at the hands of the King of Denmark, Waldemar II. The latter came, but in the battle his troops were sadly thinned and dispersed. They had already lost their ensign, and were about to flee, when suddenly a red flag bearing a white cross appeared from the Heavens, the sight of which inspired the Danes with renewed courage. They rallied their ranks and gallantly vanquished the enemy. Waldemar II., in commemoration of the event founded the Order of the Dannebrog.

98716 Greece. Gold Badge of a Grand Cross of the Order of the Redeemer, white enamelled cross of eight points, surmounted with the Royal crown and oak and laurel wreaths in angles; in the centre, bust of King Otho the Founder; on the reverse side a cross with arms in centre, C. V. F. & R. 9 » »

*** The decoration of the Order was changed in the eighties, and the bust of the Redeemer substituted for that of King Otho.

Founded on the 1st June, 1833, by King Otho, in commemoration of the deliverance of Greece. It is conferred both on natives and foreigners who either rendered important services during the War of Independence, or have distinguished themselves in industry, commerce, arms, arts or sciences.

98717 Hanover. Star of a Civil Knight Commander of the Royal Hanoverian Guelphic Order, 1815. Silver star with a gold and enamelled centre consisting of the white Horse of Hanover within the motto of the Order, surrounded by an oak wreath. V. F. & R. 3 15 »

*** Founded by the Prince Regent (George IV) in the name of his father George III., on the 12th August, 1815, his birthday, being also the anniversary (101 years), of the accession to the English throne of the Elector, George Louis.

(To be continued.)

MONTHLY

NUMISMATIC CIRCULAR

THE *Monthly Numismatic Circular* will be forwarded post free on receipt of half-a-crown (= 3 francs = 2 ½ marks = 60 U. S. A. cents, in P. O. O. or stamps) for one year's subscription.

Should any applicant not receive it regularly by post, please notify the omission to us, when it shall be at once rectified. All communications respecting the Numismatic Circular (either referring to its literary portion or to its catalogue of coins, &c. for sale) should be made to our West-End house, 17 and 18 Piccadilly, London, W., where all letters and orders will receive immediate attention.

Cheques crossed National Provincial Bank of England, Piccadilly Branch.

Any coins or medals can be had on approval if the applicant is known to us, or, if not, on receipt of references. Postage on coins, as a rule, is paid out.

Orders for coins from the annexed list will be executed in rotation, but preference will be given to clients who are willing to purchase outright, providing the coins answer to the description.

Coins not approved of can be returned.

LA *Circulaire mensuelle de Numismatique* sera adressée franco à toutes les personnes qui voudront bien en faire la demande en nous faisant parvenir 3 francs 20 centimes par mandat postal pour un abonnement annuel.

Nous prions nos correspondants d'adresser toutes lettres et communications relatives à la partie littéraire du journal ou au catalogue des monnaies et médailles, à notre établissement, 17 et 18, Piccadilly, Londres, W.; nous y répondrons immédiatement.

Les ordres seront exécutés à tour de rôle en donnant la préférence aux commandes effectives.

Toutes les pièces seront envoyées *à condition*, si le client le désire, mais le port de retour est à sa charge.

Les personnes qui ne nous seraient pas connues sont priées de nous fournir des références.

DAS *Numismatische Circular* wird portofrei, nach Empfang von 2 ½ Mark (3 Kronen ö. W.) als Jahresbetrag, geschickt.

Sollte jedoch ein Abonnent dasselbe nicht regelmässig erhalten, so bitten wir, uns gefälligst Anzeige davon zu machen, um weitere Unregelmässigkeiten zu verhüten.

Alle Mittheilungen, welche dieses "Numismatische Circular" betreffen (gleichviel ob dieselben sich auf den literarischen Teil oder auf das Verzeichnis der Münzen, &c. zum Verkauf beziehen), sollten an unser West End Etablissement, 17 und 18 Piccadilly, London, W., gerichtet werden, wo Briefe und Aufträge sofortige Erledigung finden.

Jede Münze oder Medaille wird zur Ansicht gesandt. Bestellungen werden nach Reihenfolge des Einganges effectuirt und Nichtconvenirendes zurückgenommen.

Rückporto zu Lasten der Herren Besteller.

Uns unbekannte Herren Sammler werden um Aufgabe genügender Referenzen ersucht.

GREEK COINS.
THE ANCIENT COINS OF SICILY.

(*Continued from col. 13427.*)

SEGESTA.

THE TRANSITIONAL PERIOD.

Little if any thing seems to be known of this city during the period 480 to 450 B.C., but from what is known of the periods before and after, we may imagine that war was generally waged with their old enemies, the Selinuntines. Probably that people are meant by the name Lilybæans with whom Diodorus Siculus informs us the Segestans were at war in 454 B.C. (XI, 86). He says "In Sicily a war broke out between the Segestans and the Lilybæans concerning the territory which bordered on the river Mazarus; they fought with the utmost fierceness, and each side suffered considerable losses without ceasing their animosity."

No town named Lilybæum existed at that date; Diodorus himself tells us there was no town there until after the destruction of Motya by Dionysius of Syracuse in the year 397 B.C. (XIII, 54; XXII, 10). Lilybaeum was only twenty-five miles east of Selinus, and may have then been a territory claimed by Selinus, and Diodorus may have spoken of the site by the name it afterwards bore. The river Mazarus is half-way between the two cities.

Segesta was about fifteen miles west of Eryx, and the fact that the citizens of Eryx copied the type of the hound on the coins of Segesta points to a friendly intercourse between these cities. Indeed one litra bears the inscription **ΕΡΥΚΙΝΟ** on one side and **ΣΕΓΕΣΤΑΙΟΝ** on the other.

The style of work on the coins of Segesta shews that they were imitations of Greek art, and were probably produced by native artists. It would be interesting to know when the spelling of the name with **Α** for **Ε** **ΣΑΓ(ΕΣΤΑ)** was introduced; it is found in nos. I and VIII in the following list of coins.

Again it is interesting to note the introduction of symbols in a town which was not Greek, and one wonders whether they signify that here also the magistrates supplanted the tyrants.

COINS OF TRANSITIONAL PERIOD.

Didrachms (normal weight: 134 grains).

We may roughly classify these coins in three classes; (*a*) those with a circlet round the head on the Obverse, (*b*) those without the circlet, (*c*) those with a symbol on the reverse.

I. Obv. **ϐΙΣΑΤΣϽΑΣ**. Head of the nymph Segesta, to right, her hair turned up behind under a broad diadem over which the ends fall: around the head a slight circlet or thin border, outside of which the legend is inscribed under the head: plain border. The edge of the coin is raised by the striking.

Rev. A hound, to right, standing, wearing a collar: border of dots.

II. Obv. **ϐΙΣΑΤΣƎϹƎΣ**. A similar head, but wearing earring, necklace, and sphendone: plain similar circlet around head, outside of which the legend is inscribed.

Rev. Similar hound standing to left: border of dots.

III. Obv. Head of Segesta to right, her hair rolled up behind and end falling back, around, a plain ring or circlet. No inscription.

Rev. **ϐΙΣΑΤΣΕΓΕΣ** within a plain circlet over the hound to right with his nose to the ground.

IV. Obv. **ΣΕΓΕΣΤΑΙΙϐ**. Head of Segesta to right, hair on forehead in three waves, hair on neck in thick roll bound twice, making three bunches of hair; N° 255, Tafel XVI, Cat. Dr Hirsch, XVI. no border.

Rev. Hound to left with head erect, underneath an object like a club leaning against forelegs: border of dots.

No 258, Tafel VIII, Cat. Dr Hirsch, No XVI.

V. Obv. Head of Segesta similar to the former, but no circlet or border around head. The legend is read from behind and runs over the head: plain border.

Rev. A hound standing to left similar to No II: border of dots.

VI. Obv. No legend. Head of Segesta, hair in a band broad at the back and narrowing up to a point over the forehead.

Rev. A hound to left wearing a collar and holding his nose near the ground: border of dots.

VII. Obv. **ΣΕΓΕΣΤΑΙΙϐ**. Head of Segesta, to right, wearing necklace, hair rolled.

Rev. Similar to No IV.

These coins are of somewhat barbarous style.

COINS WITH SYMBOLS.

VIII. Obv. **ΣΑΓΕ ƆƎΣ IB**. Head of Segesta, to right, her hair waved and turned up behind under a broad diadem.

Rev. A hound, to right, his nose to the ground; above, a young male head to right, diademed, hair long: border of dots.

A notable peculiarity on this coin is the portion of the dotted border, to left, of another die, giving the appearance of two dies being struck at once. This is the only instance known to the writer of such a peculiarity.

IX. Similar to No VI.

Rev. Similar to No VI but the hound to left: and above, a female head to left.

X. Obv. **ΣΕΓΕΣΤΑΙΙϐ**. Head of Segesta, diademed, to right, her hair rolled.

Rev. Similar type to Nos VI and VII; but above a female head, to right, with the hair turned up behind under a broad diadem: border of dots.

XI. Obv. Same inscription, but retrograde, similar type.

Rev. Similar type, but the hound with nose to the ground and same symbol above.

XII. Obv. Head of Segesta, to right, her hair in two waves over the forehead, and rolled up behind under a diadem.

Rev. A hound, to left, with his head erect, above, a barley corn.

No 364, Tafel IV, Cat. No XIII of Dr Hirsch.

As the eye in this example is formed in the archaic manner the coin is probably of the Transitional period between the Archaic and the Transitional.

XIII. In Adolf Holm's, *Gesch. Sic.* (Band III, p. 598) there is mention of the following type (illustrated, Tafel II, 14). Obv. Head of Nymph to left, her hair in net bound with pearl diadem, **ΣΕΓΕΣΤΑΙϐ**.

Rev. A hound with his nose near the ground, behind, three ears of corn. Weight: 7.3 grammes. 111 grains.

The eye of the Nymph is formed in the Archaic manner and the coin appears to belong to that period, or to the Transitional period.

To this period Adolf Holm attributes the Litræ which in the B. M. Catalogue are placed in the Archaic period.

XIV. Obv. **ϐΙΣΑΤϽƎΓƎϽ**. Head of Aphrodite Erycina? facing: border of dots.

Original from CORNELL UNIVERSITY

Rev. A hound to left; above, an object wrongly called a wheel of seven spokes (B. M. Catalogue, no 14, p. 131). But it is illustrated in A. Holm's work (Tafel II, no 13) and there instead of a wheel appears a conventional rose, or flower, with six petals; the specimen in the Brit. Mus. shows undoubtedly a rose.

XV. Litra, weighing only 9.5 grains. Obv. Head of Nymph to right broad diadem.

Rev. Hound to left wearing collar; above, a wheel of eight spokes.

XVI. Obv. Similar to last.

Rev. AT Ɜ ƎƆƎƜ. Hound to right; above a scallop shell. Weight of specimen, no 13, B.M.C., 10.7 grains.

MOTYA.

From the Phoenician inscriptions on the coins we gather that the meaning of the name Motya was probably the 'haven', or desired place of arrival or landing. The letters 𐤌 𐤕 𐤀 correspond to the Hebrew א ט מ, a root signifying to come to, to reach a place.

The first letter of the fullest inscription 𐤇 is the article corresponding to ה in Hebrew.

The ו is the sign of the passive, the place reached or arrived at.

The old Phoenician trading post, which gradually became one of their most important cities in Sicily, was built on the island now called San Pantaleo, or Pantaleo, about six miles to the north of Marsala, called in ancient times Lilybaeum.

The foundations of the old walls may still be traced around the entire island. The remains of the gates may also be seen, especially on the side towards the land. The embankment which connected the island-city with the land still exists, although under water, and is still used by the natives as a track for their waggons. When Motya was destroyed by Dionysius in the year 397 B.C., the Carthaginians soon afterwards founded Lilybaeum.

The causeway embankment connecting the city with the land was about three quarters of a mile in length. The city is thus described by Diodorus Siculus (XIV, 48).

"This city is situated on an island distant about six stadia from Sicily. It was famous for the beauty and great number of its well constructed houses and for the wealth of its inhabitants. A narrow causeway, the work of man, gave communication with the shore of Sicily."

The Greeks according to their usual custom derived the name Motya from that of a mythical woman, connected with their fables about Heracles, related by Stephanus of Byzantium (sub voce). In his description of the old inhabitants of Sicily Thucydides writes (VI, 2): "There were also Phoenicians living around the whole of Sicily, having occupied promontories on the sea coast and the small islands adjacent, for the purposes of trading with the Sicels: but after the Greeks sailed hither in great numbers by sea, in addition to those already there, they evacuated the greater part of them, and lived in Motya Solois and Panormos, near the Elymi, having united with them, both from confidence in their alliance, and because from that quarter the voyage from Sicily to Carthage is shortest."

Diodorus Siculus (XIV, 47) gives a similar account; speaking of the expedition of Dionysius in 397 he says "The Syracusans went to Eryx. Not far from this mountain was situated the city of Motya a Phoenician colony, which the Carthaginians had made the centre of their operations in Sicily."

The earliest mention of Motya appears to be that made by Hecataeus quoted by Stephanus of Byzantium.

The coins of this city were issued with Greek as well as with Phoenician inscriptions apparently at the same time. This fact may perhaps imply that a considerable number of Greeks dwelt in the city, or at any rate traded with the citizens. The coins with Phoenician inscriptions may have been meant for circulation in the city itself, and for its trade with Carthaginian merchants.

THE TYPES.

The eagle of Zeus with the serpent in his beak was also adopted by the citizens of Hipponium circa 379. One is tempted to think of the passage in Homer.

But the serpent may be a sea serpent as on the coins of Cumae (cf. p. 271 *Coins of Magna Graecia*).

The bird of Zeus being chosen as a type points to Greek influence in the mint and as the Phoenicians were slow to adopt a money currency it is probable that the first mint was in the hands of Greek workmen and artists.

The Phoenicians were not an artistic people and therefore naturally copied the coins of their enemies who had introduced the whole system of coinage.

The dolphin on the reverse of the obol was a natural symbol for a haven-city to adopt and it is hardly necessary to think of the coins of Zancle as being copied by the men in Motya; we find a dolphin at Baletium in Calabria, at Ardea, at Syracuse and at Hipana. The coins of this latter city are so similar that they point to some connection. On these coins the dolphin was probably rather an emblem of the sea than of Poseidon.

THE NYMPH.

The didrachms with Greek inscriptions bear on the obverse the head of a Nymph which probably represented the Korê or Nymph of the locality. Whether the artists who designed the type had any knowledge of the legend told by Stephanus of Byzantium seems doubtful. The design of a head surrounded by dolphins was probably copied from the well-known coins of Syracuse.

The nude rider on the Reverse of these coins is identified by Adolf Holm as one of the Dioscuri (Dioskur) (p. 601).

The didrachm with the hound on the Reverse shews how familiar the coinage of Segesta, Eryx and Panormus must have been to the citizens of Motya. If there was any connection between the dogs on the coins of these cities with the thousand dogs in the Temple of Adranus mentioned by Ælian (*Hist. anim.*, XI, 20), the popularity of the type in a Phoenician city would be explained.

Some writers regard Adranus as the same deity as the Phoenician Adramelech. (*Bochart. Geog. Sac.*, p. 530).

SILVER OBOL OF PERIOD 480-461 B.C.

Obv. Within wreath, head of nymph to right, her hair rolled.

Size .45 Weight 9.8 Purchased by B. Mus. at the Moore Sale, p. 314, *Num. Chron.*, III Series, Vol. X, 1890.

Rev. 𐤌 = MA the initial and final letters of the name Motya. Nymph standing to right before an altar, her left hand raised in adoration. In field to left, a scallop-shell.

COINS OF PERIOD 461-430 B.C. WITH GREEK INSCRIPTIONS.

II. Obol. Weight of specimen in Brit. Mus. 8.2 grains.

Obv. An Eagle, with closed wings standing to left on an Ionic capitol, holding in its beak a serpent; above, an ivy leaf: border of dots.

Rev. NOIAV TOM.

A dolphin to left, and a scallop shell below.

III. Didrachm; weight of specimen in Brit. Mus. 132.2 grs.

Head of a Nymph to right, her hair confined by a fillet passing four times round her head; around, four dolphins to right.

Only three are visible in the photograph in Adolf Holm's Tafel, IV. 9. and described " drei ".

Rev. **MOTVAION**. Naked male figure seated sideways on a horse galloping to left. In the Exergue, a tunny to left.

There is nothing in the exergue of the coin figured in Tafel IV. 9 of Ad. Holm's work. In B.C. Coll. placed under Fine Art period.

IV. Didrachm, weight of specimen in Brit. Mus. 127.5 grs. **MOTVAIOΝ**. The head of a Nymph to right, her hair tied at the back with a fillet; behind, a cray fish.

Rev. A hound standing to right, with his head raised and tail lowered; beneath a plant. The dog has a long sharp nose, small ears and long tail somewhat like a greyhound. The dog wears a collar.

TYPES OF THE COINS WITH PHOENICIAN INSCRIPTIONS.

The eagle which appeared on the coins with Greek inscriptions was also adopted or preserved as the Obverse type for those with Phoenician inscriptions, but the Reverse type was changed. On the Tetradrachms we see a crab as the Reverse type.

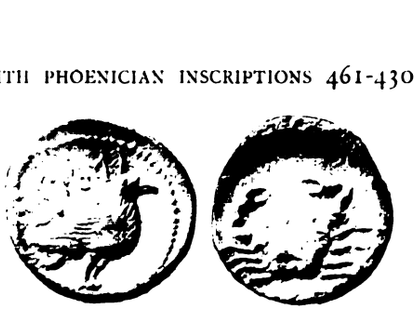
It does not seem absolutely necessary to regard this crab as a mere copy of the types of Acragas for we find a crab on the coins of Eryx, and in the chapter on the archaic coins of that city the crab type has been discussed.

The female head on the Didrachms with Phoenician inscriptions is probably the same nymph of the locality represented on the coins with Greek inscriptions.

The hound also appears in these Phoenician coins.

On the hemiobol the forepart of a bull swimming certainly points to the idea that the types of the eagle and crab were copied from coins of Acragas, for this swimming Bull is evidently copied from coins of Gela.

COINS WITH PHOENICIAN INSCRIPTIONS 461-430 B. C.



I (*a*). Tetradrachm, normal weight 268 grains; weight of specimen in Brit. Mus. 264. grains.

Obv. 𐤀𐤋𐤔𐤉𐤀. An eagle, standing, with closed wings, to right.

Rev. A crab.

I (*b*). Obv. Similar. Eagle smaller in proportion, and the letter 𐤉 (the article) omitted.

Rev. Similar, but beneath the crab a fish to right.

II. Didrachm normal weight 134 grs.

Weight of specimen in Brit. Mus. 124.5 grains.

Obv. 𐤋𐤔𐤊. Female head to right, wearing diadem almost covered by her hair rolled over it, and turned up behind.; behind, an ivy-leaf.

Rev. A hound to right gnawing a stag's head; above, head to right.

III *a*). Didrachm. Obv. 𐤀𐤓𐤔𐤊. Similar type.

Rev. A hound to right with his head raised; beneath him a plant.

III *b*.) Obv. Similar (same die).

Rev. Similar type but tail raised: no symbol: border of dots.

IV. Hemiobol. Weight of specimen in Brit. Mus. 5.3 grs.

Obv. Forepart of swimming man-headed bull to right.

Rev. 𐤀𐤋𐤔𐤊. Female head to right.

V. Obol Obv. Female head to right in a crown.

Rev. 𐤊 𐤀. A female figure standing to right before an altar. Scallop shell. Imhoof. Z. Mzk. gr. 255 Tafel VII, 5.

(*To be continued.*)

BIOGRAPHICAL NOTICES OF MEDALLISTS

Coin, Gem, and Seal Engravers, Ancient and Modern, with References to their Works.

B.C. 500 — A.D. 1900.

(*Including the names of several hitherto unpublished artists.*)

One-hundred-and-sixty second article.

(*Continued from col. 13452.*)

T

T. *Vide* **THIÉBAUD, JONAS.** Medallist, born at Neuchâtel 1690, pupil of Dassier, worked at Augsburg, where he died in 1769.

T. *Vide* **THIÉBAUD, JONAS PIERRE.** Son of the preceding, born in 1727; worked as a Coin-engraver and Medallist at Augsburg, Neuchâtel, later 1758-1761 at Soleure, and again at Neuchâtel 1762-1786.

T. *Vide* **TOMSCHÜTZ, SAMUEL.** Mint-warden 1825, later Mint-master at Frankfort-on-Main, 1841.

T. *Vide* **TIOLIER, PIERRE JOSEPH.** Medallist, born in London, 1763, died in 1819.

T. *Vide* **TIOLIER, PIERRE NICOLAS.** Medallist, Gem-engraver and Architect, son of the last, born in 1784.

T. *Vide* **TODA, GIOVANNI ANTONIO.** Medallist and Mint-engraver at Vienna, 1739-1765. *Vide* also **G. T.**

T. *Vide* **TANNER, JOHANN SIGISMUND** of Saxe-Gotha, came to London in 1733, at the request of Croker, died in 1775.

T. *Vide* **TRAMONTANO, GIOVANNI CARLO.** Mint-master at Naples and Aquila, 1476-1495. *Vide* also **I. T.**

T. *Vide* **THOMAS, BLANCHARD.** Mint-engraver to the Counts of Dezana, 1583.

T. *Vide* **THIRMANN.** Austrian Medallist, *circ.* 1717.

T. *Vide* **TREBBE IN LEMGO.** Mint-master for the copper coinage of Lippe 1812-1827.

Original from CORNELL UNIVERSITY

a memorial medal of Prince Amedeo of Savoy, 1890, the obv. of which is signed : **GIOV. VAGNETTI FECE IN ROMA 1890.**

TABERT, LUKAS (*Germ.*). Medallist of the second half of the seventeenth century, whose productions, contemporaneous with those of Erasmus Thomas Reuss and Karl Thauer, betray a mediocre taste and little technical ability. Tabert resided at Stettin. He engraved amongst others a memorial medal of the Electress Louise of Brandenburg, Princess of Orange, 1667, signed **LT**, for the dies of which Canstein was commissioned to pay him the sum of 24 Thalers (*Schaumünzen des Hauses Hohenzollern*, n° 180, p. 58).

TACCA, PIETRO (*Ital.*). Sculptor and bronze caster, early part of the seventeenth century; born at Carrara in 1577; died on 26. October 1640, near Florence. He worked with Giovanni da Bologna at the bronze statue of Henry IV., which he completed after his master's death He executed also the statue of Ferdinand I. de' Medici on the Piazza della Annunziade at Florence. No medallic works are directly traceable to him.

TADEL, P. H. (*Dutch*). Mint-master at Utrecht, 1874-1887; private mark, an axe.

TADOLINI, PETRONIO (*Ital.*). Mint-engraver and Medallist at Bologna, *circ.* 1775-1800. His full name or abbreviated signature : **P.T.**; — **P.T.F.**; **P.TAD.** occur on his medals. A 10-Zecchini piece of Pius VI., 1777, is signed **P.TAD.** and a Mezzo Scudo of the same Pope, 1782, **P.T.**

His best known medals are those of: — Giambattista Martini (Padre Martini), composer; memorial medal, 1784; — Franciscus Maria Zanotti, composer; † 1777; undated portrait-medal; — Francesco Zambeccaria, of Bologna; † 1812; — D^r Carlo Mondini, anatomist of Bologna; — Bolognese presentation medal to D^r A. Sacco, of Milan (1802), etc.

BIBLIOGRAPHY. — Zani, P. — *Punto dell' encycloped. di Belle Arti*, Parma, 1819-1820. — Bolzenthal, *op. cit.* — Cinagli, *op. cit.*

TAENNICHT, DANIEL (*Germ.*). Engraver of seals and armorial bearings of Breslau, died in 1668. A relative of the two following.

TAENNICHT, GEORG (*Germ.*). Engraver of seals and armorial bearings of Breslau, died in 1682, at the age of 48.

TAENNICHT, MICHAEL (*Germ.*). Engraver of seals and armorial bearings of Breslau, died in 1676, at the age of 32.

TAEUBNER, MARTIN (*Germ.*). Mint-master to Duke Georg Rudolph at Hainau; in 1622 joint Mint-master to the Silesian states (cf. Friedensburg, *Neuere Münzgeschichte Schlesiens*).

TAGLANG, JAKOB (*Germ.*). Mint-master at Zweibrücken, *circ.* 1590-1605.

TAGLANG, JOHANN HEINRICH (*Germ.*). Mint-master at Meisenheim and Zweibrücken, 1621, 1623, 1626. His initials **H. T.** or monogram occur on the coins.

TAGLIA, BATTISTO (*Ital.*). Seal-engraver of Genoa, who in 1488 was entrusted with the execution of the seal of the King of the Two-Sicilies, and is named in documents "maestro di fare cammei". (Cf. Babelon, *La gravure en pierres fines*, p. 248.)

TAGLIACARNE, JACOPO (*Ital.*). Gem-engraver of Genoa, is supposed by Mariette to have engraved the numerous portraits of Genoese nobles of that age, which it was then the fashion to use as seals. King remarks that "seeing he is one of the four particularized by Camillo, and omitted by Vasari, and that his reputation was already established before the date of 1502, his work necessarily belongs to the Quattro-cento school, and has nothing in common with these portraits — a theory resting on nothing better than Soprani's conjecture; and, what is a yet stronger objection, portraits or gems can hardly be said to have existed at all before 1500, much less to have been commonly in fashion" (King, *Antique Gems and Rings*, 1872, p. 416). Camillo (writing in 1502) says of Tagliacarne of Genoa, Anichini of Ferrara, Gio. Maria of Mantua, and Leonardo of Milan, that they were equal to any of the ancients in their profession; and furthermore stating that their works were diffused throughout all Italy, a sufficient proof of the previous length of time over which their labours had extended.

BIBLIOGRAPHY. — King, *op. cit.* — Babelon, *op. cit.* — Mariette, *op. cit.* — Camillo, Leonardo, *op. cit.*

TAGLIAPIETRA, FRANCESCO (*Ital.*). Administrator of the Mint at Cattaro, 1525-1526.

TAGLIONI, L. (*Ital.*). The signature **L. TAGLIONI CON. NEAP.** occurs on the ℞. of a Portrait-medal of D^r S. di Ruggiero of Salerno (a specimen exists in the Boston Collection).

TALANI, TERESA (*Ital.*). A clever Gem-engraver of Roman extraction, but who flourished at Naples in the latter years of the eighteenth century and early part of the nineteenth. Her signature **LA TALANI** is found on a number of beautifully engraved Portrait-cameos and intaglios. Two of her works which I have seen represent the one a Head of Plato, onyx cameo of two strata (Morrison Sale Catalogue, London 1898, lot. 237 A), and the other the conjoined busts of Napoleon I. and Josephine, cameo in agate (Kibaltchich Sale Catalogue, Paris, 1905, lot. 109). I have further seen also a very beautiful Portrait-intaglio by her of Lady Hamilton, in the character of a Bacchante, signed : **TERESA TALANI F.** *Vide* **LA TALANI** *supra.*

TALBOT, WILLIAM (*Brit.*). Mint-master under James II. His name is mentioned by Ruding in conjunction with those of John Trinder, Thomas Goddard, William Brumfield, Francis Rice, and Edward Fox (cf. Ruding, I, p. 35).

TALBOT, ALLAM & LEE (*Amer.*). Issuers of various Tokens, some of which are described in *Proceedings of the American Numismatic Society*, 1899, p. 17.

TALOT, E. (*Amer.*). This Engraver's signature occurs on a Medal for Military Merit of Maximilian I., Emperor of Mexico, undated. The medal is reproduced in A. Rosa, *Monetario Americano*, p. 403.

TALUET, FERDINAND (*French*). Sculptor, born at Angers, 13. November 1820; pupil of Mercier and David d'Angers; entered the Ecole des Beaux-Arts, 1842. He exhibited a large number of works of sculpture at the Paris Salon 1848-1894. By him are also some Portrait-medallions, modelled and cast in the manner of David d'Angers. (Cf. Chavignerie et Auvray, II, 539.) The latest were exhibited by him in 1903: M. Gauliar; — M. Sauvageot; — M. Montesquieu, etc.

TALPA, BARTOLOMEO (*Ital.*). Mantuan Painter, Decorator and Medallist, probably the same person as **BARTOLINO TOPINA**, surnamed 'the Philosopher', a pupil of Mantegna, who was frequently employed as decorator in the palaces and villas of the Gonzagas. The period of his activity is comprised between *circ.* 1484 and 1495. Fabriczy praises the strong, though perhaps somewhat prosaic characterisation and modelling of his medals. Two of these are signed; those of Marquis Federigo I. (1478-1484), Bust to l.; ℞. EPO. BARTVLVS. TALPA.; diam. : 82 mill.; and his son Gianfrancesco II. (after 1495). Bust to l.; ℞. VNIVERSAE. ITALIAE. LIBERATORI. — BARTVLVS. TALPA. Curtius on horseback full-armed leaping into a chasm in the Forum; diam. : 80 mill.

Beside these medals, Friedländer and later Armand followed by Bode and Fabriczy have ascribed to Talpa a beautiful unsigned medal of Julia Astalla, "the girl who, as a novella of Bandello tells us, having been outraged by a servant of the Bishop of Mantua, threw herself into the waters of the Oglio, and was honoured by the Bishop Lodovico Gonzaga with a monument in the public market place." (Fabriczy, ed. G. F. Hill, p. 49). Armand describes this medal, I, p. 83, n° 3 : Bust to l. of Giulia Astalla, head bare, &c.; ℞. VNICVM. FOR. ET. PVD EXEMPLVM. Phoenix on flaming altar; diam. : 64 mill. " D^r Bode (*Zeits. f bild. Kunst*, Nov. 1903, p. 38, points out that the connection of the medal with this story is conjectural." It is possible that Talpa was also the sculptor of the monument of Giulia da Gazzuolo (undoubtedly the same person as Giulia Astalla) in Gazzuolo.

" One of the most beautiful, and the most puzzling, though by no means the rarest, of all medals — the Giulia Astalla — is also in the Salting Bequest to the British Museum", writes Mr. G. F. Hill. The old attribution to Talpa has long been discarded as baseless; but no one has yet been able to place beside the medal any other which bears any resemblance to it in conception or execution.

M. de Foville has, indeed, ventured to place it in the Florentine group, though he admits that the artist "du style Florentin n'a gardé que la pureté et la poésie." To put it more prosaically, the

Marchese Federigo I. of Mantua.

Marchese Gianfrancesco II. of Mantua.

pose and expression of the charming figure are reminiscent of many a Florentine painting; but from any Florentine medal it is widely removed. Friedländer has wrongly been made responsible for the attribution to Talpa. It is true that he describes the piece in connexion with Talpa's work, but he does so only because he assumes

Giulia Astalla.

the possible identity of the girl with that Giulia who, according to Bandello's novel, having been outraged by a servant of the Bishop of Mantua, drowned herself and was commemorated by a public monument. But he admits the doubtfulness of the identification and the lack of resemblance in the medal to Talpa's style. Nevertheless, considering the appropriateness of the reverse — a phœnix, "unicum fortitudinis et pudicitiae exemplum" — to Bandello's

TANAGLIA, MAITRE or **MÉDAILLEUR A LA TENAILLE.** A uniface Portrait-medallion of Lorenzo de' Medici (diam. 90 mill.) bears under the bust a pair of pincers, 'tenaille'; hence the designation, Médailleur à la Tenaille, which the French authorities have given to the unknown artist of this medal.

The medal of Lorenzo de' Medici (*illustrated* Vol. IV, p. 6) shows his portrait, helmeted, and may have been executed on the occasion of the tournament which took place at Florence in 1468. Fabriczy, referring to this medal, states that "this medal has preserved to us the portrait of Lorenzo as a youth. Added to where possible greater ugliness, his features have something unbridled about them; the head is covered with a fantastic helmet. We know that in a tournament in 1469, given in honour of Lucrezia Donati, Lorenzo won a silver helmet surmounted by the figure of Mars as the prize of Victory. Notwithstanding the fact that, owing to artistic reasons, the figure of Mars is omitted, Armand's supposition that it was cast to commemorate the victory has much in its favour. It is strange, however, that its creator allowed the opportunity to escape him of specially indicating its connection with the tournament, instead of leaving the reverse without design. According to an attractive hypothesis of the writer mentioned above, if the pincers (tanaglia) in the lower section of our medal refer to the name of the medallist, he is to be looked for among the ancestors of the Tanagli, a goldsmith's family which still exists in "Florence". (Fabriczy, *Italian Medals*, ed. G. W. Hamilton, p. 121).

BIBLIOGRAPHY. — Armand, *op. cit.*, I, 51; III, 9.

TANCHETTE, EUGÈNE (*French*). Contemporary Sculptor, born at Nancy; pupil of Jouffroy and Mercié. He was a regular exhibitor at the Paris Salon from 1869 to about 1882 and also produced some Portrait-medallions.

TANGL, MICHAEL (*Germ.*). Mint-master at Passau, 1471.

TANNER, JOHN SIGISMUND (*Brit.*). Medallist, and Engraver to the London Mint for nearly forty years; was a native of Saxe-Gotha, and came to England in 1728; he died in David Street, London, on 14. March 1775. Walpole erroneously calls him John Christopher Tanner, a statement which no doubt misled both Nagler and Bolzenthal who distinguish between John Sigismund and John Christopher Tanner.

Little is known of the Engraver's early life; he practised carving and engraving for snuff-boxes, gun-locks, etc. in which he attained great efficiency. Not very long after his settlment in his country, the Master of the Mint, John Conduit, offered him employment as an Engraver at the Royal Mint, where he worked for some years under John Croker. On the latter's death in 1741 he became Chief-engraver.

Pattern Five Guinea piece 1773, by Tanner.

Tanner is responsible for the dies of the gold coins of 1739, the copper coinage of 1740, and for the silver coins with the 'old head', from 1743. He also engraved for Richard Arundell, master of the mint, dies in imitation of Thomas Simon's pattern coins of Oliver Cromwell, partly utilising the old punches (W. Wroth, *Dict. Nat. Biog.*, 1909, Ed., XIX, 358). The dies which are attributed to Tanner and are supposed to have been made in 1738, bear a privy-mark, which is found on others executed in connexion with the English coinage during his appointment.

Pattern Guinea, 1764.

Tanner's imitations of the Cromwell coins consist of the Half Broad, 1656 and 1658 (distinguished by the omission of the &c. in the obv. legend), Crown 1658, Shilling 1658, Sixpence 1658 (of somewhat larger size than Simon's original, which has led some to wrongly consider it as Ninepence). His so-called Two-shilling piece is merely an impression of his shilling die struck upon a heavy flan.

The 'Old head' coinage of George II. by Tanner comprises the following issues: *N*. Five Guineas 1746, 1748 and 1753; Two Guineas 1739, 1740, 1746-1748, and 1753; Guinea 1739, 1740, 1743, 1745-53, 1755, 1756, and 1758-60; Half Guinea 1740, 1745-47, 1750, 1753, 1755, 1756, and 1758-60; — *R*. Crown 1743, 1746, 1750 and 1751; Half-Crown 1743, 1745, 1746, 1750 and 1751; Shilling 1743, 1745-1747, 1750, 1752 and 1758; Sixpence 1743, 1745, 1746, 1750, 1751, 1757 and 1758. The silver coins, Crown to Sixpence of 1743, 1745 and 1747, with the exception of the "Lima" pieces, have roses on the reverse; the other dates are plain; — Æ. Halfpenny 1740-1754; Farthing 1741, 1744, 1746, 1749, 1750 and 1754.

John Conduit, 1737.

Tanner engraved also coin-dies for George III.; — *N*. Pattern Five Guineas, dates 1770, 1773 (*illustrated*). Varieties of 1770 realized £ 60.10.0 and £ 26.5.0 respectively, and one of 1773 £ 54.10.0 at the Murdoch Sale 1904; Pattern Five Guineas 1768, 1773 (£ 25 and £ 33 resp.); Pattern Guineas 1761, 1763, 1764, 1765;

Pattern Quarter Guinea 1764; none of these coins were struck for circulation. The dies for the later gold coins of this reign were made by Richard Yeo, and present an older bust of the king. There are also Pattern Shillings by Tanner of 1764 and 1775.

According to a memorial by Richard Yeo, the new coinage dies necessitated by the accession of George III. were not prepared by Tanner, who was suffering from weak eyesight and general debility, but by Yeo, and Tanner only superintended the engraving (Hocking, II, p. 26).

Among Tanner's best known medals are: George II. and the Royal Family, 1732 (obv. by Croker; Rx. by Tanner: signed **T**); — Jernegan's Lottery Medal, 1736 (signed on both sides **T**); — John Conduit, ✝ 1737 (signed on obv.: **TANNER. LONDINI F.** and on Rx. **T**); — The Copley Medal of the Royal Society, 1737 (**T.** on obv.); — Milton's Monument medal, for William Benson, 1737 (Bust of Milton on obv. and signature: **TANNER F.** Both the Conduit medal and that of the Jernegan Lottery were designed by Gravelot.

Wroth mentions that Tanner's puncheons and dies for medals, as well as those made by John Croker, were sold at auction by Gerard in Soho, London, on 18. June 1783 (Sale Catalogue in Department of coins, British Museum).

LEAVES FROM MY NOTE BOOK

ON WAR MEDALS AND DECORATIONS.

(*Continued from col. 13387.*)

Saint Clement Danes Volunteers.

The Saint Clement Danes Volunteer Corps was formed on May 1st. 1798 to preserve the peace within the limits of their own district. They consisted, at their formation, of two Companies of Light Infantry.

On the 3rd. of June 1799, Miss Edwards, the daughter of the Commandant — Captain Edwards — presented the Corps with their Colours which bore an Anchor and the words, ST. CLEMENT DANES ASSOCIATION. The Committee was formed of all the Officers and seven privates and the Corps was Brigaded with those of St. Andrew's, Holborn; St. George the Martyr; St. Sepulchre, and St. James's, Clerkenwell, their number was unlimited.

Officers.

Captain Commandant, Samuel Edwards.
Second Captain, William Sandby, Jun.
First Lieutenant, Richard Twining.
Second Lieutenant, John Paternoster.
Ensigns, John Prince, Benjamin Marshall.

Dress.

Coat, red turned up with blue.
Vest, white.
Pantaloons, white.
Helmet, black purple ribbon, with white feather tipped red.
Half-gaiters, black.
Breast plate, oval, in the centre an Anchor surrounded by the words ST. CLEMENT DANES ASSOCIATION.
Cartouche box, a star.

Bloomsbury and Inns of Court Volunteers.

This fine Corps was formed in the June of 1797, "to assist if required in effectuating every purpose that propriety and loyalty may justify". They consisted of six Companies besides the attached Corps, and formed a Committee of sixteen members chosen by ballot from the whole Corps.

On June 2nd. 1798, Lady Loughborough presented them with their Colours which were inscribed with the motto NOLUMUS MUTARI.

Officers.

Lieutenant Colonel, Samuel Compton Cox.
Major, William Watson.
Captains, James Trebeck; John Mitford; Arthur Palmer; James Trower; William Bouth; John Foster; Thomas Plumer.
Lieutenants, F. W. Sanobrs; G. Branwell; G. Brown; Edward King; Sir F. Eden, Bart.; S. N. Meredith; John Richardson.
Ensigns, Thomas Mills; Henry Richmond; Hon. Charles Agar; John Kirby, J. H. Newbolt; J. Bernard Bosanquet; James York.
Adjutant, William Harrison.
Surgeon, R. R, Pennington.
Sergeant Major, Charles Puller.
Secretary, Thomas Lane.
Clerk, Joshua Stafford.

Dress.

Coat, red, with yellow facings.
Breeches, white.
Vest, white.
Hat, round, black, with white feathers.
Breast plate, plain oval.
Buttons, plain on full dress. B.I.C.A. in cypher on undress.
Whole gaiters, black.
Cartouche box, a star.

THE WRECK OF THE "DELHI".

FRENCH OFFICERS AND SEAMEN REWARDED BY THE KING.

"In recognition of the gallant aid rendered by the officers and crew of the French cruiser *Friant*, on the occasion of the wreck of the Peninsular and Oriental Company's steamship *Delhi*, off Cape Spartel, on 13th December last, the King has been pleased to confer on the officer commanding the cruiser, Capitaine de Frégate André Paul Marie Lequerré, an honorary commandership of the Royal Victorian Order, and to appoint Lieutenant Charles Jérôme Alexandre Drujon to be an honorary member of the same Order (Fourth Class).

His Majesty has also conferred on the following officer and men, who formed the crew of the cruiser's steam barge which went to the assistance of the steamship *Delhi*, the gold medal for gallantry in saving life at sea: Lieutenant C. J. A. Drujon, Louis Boussard, Jacques Thomas, Albert Marius Durien and Jean Louis Le Camelec.

The King has also presented to the families of Joseph Noel Remond, Florent Emile Carel and Georges Marie Lagadec, the members of the crew of the barge who lost their lives on the same occasion, the gold medal for gallantry in saving life at sea which would have been conferred upon them had they survived.

The British Government, in token of their appreciation of the gallant conduct of the officers and crew of the *Friant*, have presented to the officers of the cruiser a piece of gold plate, and they have made a grant of £ 50 each to the families of the men who lost their lives". Vide Broad Arrow 2rd Feby. 1912.

KNIGHT OF THE CRESCENT.

LIEUTENANT COLONEL FOUNTAIN ELWIN, K. C., 44th Foot.

This distinguished officer was one of the Commanders of the forces sent to take Paris previous to its occupation by the allied forces.

He served in the Egyptian campaign of 1801 with the 44th Regiment, and witnessed the actions of the 13th & 21st of March. He was also with his batallion in the detached service after the Sand Hills were taken on the 13th, in driving back a strong picquet of the French, and two howitzer guns, which had kept up a destructive fire for a considerable time on the right of the line. He commanded a Company in the light battalion under Sir James Kempt, in the expedition to Naples in 1806. In 1813, he landed in Sicily in command of five Companies, and accompanied the expedition to Italy under Lord William Bentinck. He subsequently accompanied

Original from CORNELL UNIVERSITY

the British Army sent to drive the French from the Peninsula and there served until the termination of the war in 1814, being for the most part of the time engaged in the command of the left wing of the 44th regiment. During this period he served in the campaign on the east coast of Spain, including operations before Tarragona, and the blockade of Barcelona. He was twice wounded at Tudela, on the Ebro; once severely, and once slightly. His last service was before Paris, where with other infantry, he was in command of the 44th Foot. Ensign, April 27th 1798. Lieutenant, May 10th 1798. Captain, January 14th 1802. Major, June 4th 1813. Lieutenant Colonel, July 22nd 1830.

For his services in Egypt he was made a Knight of the Turkish Order of the Crescent and received the small gold medal of that Order. It is mounted in a gold rim and attached to a scarlet watered riband with gold buckle for wearing round the neck. The gallant officer resided at Peckham in London, and passed away at the age of 67 on the 8th Dec. 1846.

A VETERAN'S MEDALS.

In the February of last year, passed away a sturdy old Veteran at the ripe age of 85, in the person of Sergt. Major J. Tudor, who had served for over 21 years in the 68th Regiment (1st Bn. Durham Light Infantry) and 40 years in the Yeoman of the Guard. He received no less than eight Decorations and 3 bars, which form a very interesting and rare group; a small collection in themselves. This gallant old soldier served abroad from 1851 to 1866. He first went to Malta, on 19th March 1851, remaining there until the 7th August 1854, when he went with his Regiment to the Crimea; arriving in the August of that year and taking part in the actions of the Alma, Inkermann, and the siege of Sebastopol, for which services he received the Crimea medal with three bars, and the Turkish medal.

In May 1856 he left the Crimea and went to the Ionian Islands, and remained there until the 6th September 1857, afterwards going to the East Indies from the 9th March 1858 to the 21st November 1863. He next went to New Zealand arriving there on the 8th January 1864 to take part in the Maori War, until its close in the year 1866. During the War he gained the medal for Distinguished Conduct in the Field, and received the New Zealand War Medal with the dates 1864 to 1866. Returning to England he was shortly afterwards discharged to pension on the 24th May 1870 and received the Long Service and Good Conduct Medal. In the following year he was appointed Yeoman of the Guard, and advanced to the rank of Usher in 1898. He was present at the Diamond Jubilee of Queen Victoria and received the bronze medal. In 1902 he took part at the Coronation of His late Majesty, King Edward VII., which entitled him to the bronze medal and afterwards he received the Meritorious Service medal granted by that Monarch.

Medals.

Crimea, 3 bars — Alma, Inkermann, Sebastopol.
Turkish Crimea.
New Zealand 1864 to 1866.
Distinguished Conduct in the Field.
Long Service and Good Conduct.
Diamond Jubilee 1897.
Edward VII. Coronation 1902.
Meritorious Service (Edward VII).
Enlisted 7th June 1848.
Discharged to Pension 24th May 1870.
Length of Service 21 years, 352 days.
Appointed Yeoman of the Guard 1871.
Appointed Usher 1898.
Service in the Yeoman of the Guard, 40 years.
Died, 22nd February 1911; aged 85 years.

With the Group is a fine photograph of Sergt. Major Tudor in the quaint uniform of a Yeoman of the Guard apparently taken before 1897, as he is wearing only five of his medals.

The Delhi Durbar Medal 1911.

Obv. Busts of T. M. King George V & Queen Mary to left, crowned, within a wreath of Roses & Laurel.

Rx. Native inscription: — Durbar of George V. Emperor of India Lord and Master of the British Lands. Delhi Decr 1911.
Size 1 1/2 in diam.
Edge plain, with swivel ring for riband.
Riband, Garter blue with two narrow red centre stripes.

Delhi Durbar 1911.

Granted to Officers and men, Officials and others who assisted at the Coronation Durbar at Delhi, 12th Decr 1911.

St. George's Hanover Square Light Infantry.
St. George's Hanover Square Volunteers.

This Corps was formed late in the year 1792. On the 7th December Mr. Edward Foster called a meeting of the inhabitants, and they resolved to Arm for the protection of each other and the bringing to justice such persons as disturbed the peace or acted in any way contrary to the laws of the land, or to the interest of the Sovereign. This undertaking being more generally known, a meeting of the Nobility, Gentry and others took place at the *Festino Rooms*, Hanover Square, when a subscription was arranged to carry their plans more perfectly into effect. In 1794 his Majesty signed the Commission and Mr. Edward Foster was appointed to the Command. In 1796, additions were made to the Corps; and in 1797, four more Companies, to form a Regiment and two Flank Companies: but in April, 1798, after the result of a Court of Inquiry, his Majesty was pleased to appoint the Earl of Chesterfield Colonel, and the Hon. Henry Stanhope, Lieut. Colonel, in the room of Colonel Foster and Colonel Tyler who resigned. At this time the Corps numbered 630 Rank and File, 21 Drums, 30 Serjeants, 3 Field Officers, 7 Captains, 20 Subalterns and 5 Staff.

The St. George's were not joined to any other Corps. Their place of Arms and Parade was in North Audley Street and they received their Colours from Field Marshal, Sir George Howard, in Hyde Park on the 9th. February 1795.

This Regiment was frequently reviewed, but in the year 1798 their Royal Highnesses the Dukes of York and Gloucester reviewed them in Hyde Park and were pleased to honour the St. George's Hanover Square Volunteers with their highest approbation.

In February 1799 the whole Corps took the oath of Fidelity and were re-enrolled to serve under the General Officer in the London District whenever called upon. A yearly grant was made by the Crown to this Corps.

Officers.

Colonel, the Earl of Chesterfield.
Lieutenant-Colonel, The Hon. Henry Stanhope.
Major, Richard Harrison.

Temple Bar and St. Paul's Volunteers. Afterwards.
Loyal London Volunteers.

Formed in the February of 1798, to protect the Civil Magistrates and preserve the Peace of the City, they were composed of five Companies, two of which were a Grenadier and a Light Company, wearing green feathers.
This Corps used Bridewell Hospital for their Head-quarters and the Committee was chosen from among themselves by ballot. Mrs. Sylvester, wife of John Sylvester, Esq., Common Serjeant presented the Corps with their Colours on the steps of St. Paul's Church, which were consecrated at the altar of the same church by the Rev. Thos. Bowen, Chaplain to the Corps, and to Bridewell Hospital. They were joined with the Cordwainer's Ward, Queen Hythe, and Guildhall Associations. Independent of these, there was an Association of Civilians, making three Companies of 120 Rank and File, formed on the 26th. May, 1798, under Lord Elden, to confine themselves to Doctors Commons.

Principal officers of the Temple Bar and St. Paul's Volunteers.

Lieutenant Colonel, Jasper Atkinson.
Major, John Pooly Kingsenton.
First Captain, John Keysall.

Inscription : — ONE | CENT in two lines (with the central circular perforation between) within a wreath formed by two branches of olive, the lower portions of the branches being crossed and tied together by ribbon formed into a bow. Beneath the crossed branches the date, 1892, with the letter H (for Heaton) above it. The whole within an ornamented rim.

E. — Plain.

Similar coins are dated 1893, 1894, 1895, 1896, and 1897.

HENRY GARSIDE.

NINETEENTH CENTURY COUNTERMARKED TOKENS. STIRLINGSHIRE-BALFRON.

The George III Halfpenny illustrated below is countermarked " BALFRON : VICT : SOC(IET)Y " in a circle on one side only. This countermark does not appear in the series described in Mr. Davis's work on Nineteenth Century Tokens.

Friendly Societies or Box Clubs as they were called were common early in the nineteenth century. Mr. Davis describes countermarked tokens of the Galston Society (No. 58) and the Paisley Society (No. 112) and the Balfron piece was probably issued by such a Society formed among the persons employed in the Cotton Works there, and called the Balfron Victual Society.

Batty in his work on copper coins and tokens describes two farthing tickets of the early nineteenth century as follows : No. 1280 Obv. " Victual Company 47 Giles Street Leith ". Rev. " Meal Barley & Flour Warehouse " and No. 1283a. Obv. " Fruichie Friendly Society ". Rev. " Meal Fund ". These tickets show that the word " Victual " might appropriately be used by a Friendly Society and probably therefore the word Vict : stands for Victual.

From Piggott's 'Directory for Scotland' 1837 and the new Statistics of Scotland 1845 it appears that in 1780 Mr. Dunmore established calico works on his property called Ballindalloch in the Parish of Balfron about 19 miles north-west of Glasgow. The works were some little distance from the village of Balfron. In 1789 Mr. Dunmore was joined by Messrs Buchanan in building the Ballindalloch Cotton works at Balfron. Mr. Archibald Buchanan had been taught the practical part of Cotton Spinning at Cromford in Derbyshire under Arkwright (the Inventor of Cotton Spinning by Machinery) and had just erected the Deanston Cotton Mills in Perthshire. In 1793 the Ballindalloch works were transferred to Messrs James Finlay & Co., Merchants of Glasgow who also had cotton works at Deanston and in 1801 acquired the works at Catrine in Ayrshire.

A five shilling piece and a halfpenny of Ballindalloch are described in Mr. Davis's work, Nos. 71 and 72, but are placed evidently in error to Elgin, which is much urther North.

Fintry is the next Parish to Balfron. There the Culcreuth Cotton Work were carried on and as at Balfron countermarked tokens bearing the name of the village as well as tokens bearing the name of the local works were issued. See Davis No. 114 & 119. Countermarked tokens were also issued at Deanston Catrine & Cromford.

21st February 1912.

F. WILLSON YEATES.

TREASURE TROVE.

Among the few kinds of litigation which may be more interesting to outsiders even than to the parties to it themselves is any legal claim with respect to treasure trove. True, a dispute as to rights over commons may exhume matter of value to the student of ancient tenures and economic history. Litigation as to fishery or foreshore rights often disinters much lore as to old law and customs, with a fragrance and an aroma all their own, dear to the real antiquarian. But none of these forms of litigation surpasses in general interest disputes between the CROWN asserting its well-known rights and a lord of the manor claiming some exemption in virtue of a special custom or franchise; in other words, such a dispute as that which we reported the other day between the CROWN and the DUKE of NORTHUMBERLAND with respect to a find of forty-eight Roman gold coins and a gold ring on the site of a Roman station within the manor of Corbridge. So far as the parties were concerned, the result is all that could be desired : by consent judgment is taken for the CROWN, but there is an understanding that it will not enforce its rights as to certain articles which have been in the possession of the DUKE and his predecessors for a century and a half. Owing to this arrangement we may miss much interesting discussion as to the finds from time to time at Corbridge or generally in the neighbourhood of the Roman wall. The law as to treasure trove did not grow out of a desire to preserve to the community precious articles which the plough or the spade turned up. They were made of gold or silver, the royal metals; and it was quite likely that, even if of great artistic value or archæological interest, they would be promptly melted down and turned into ready money. It is a moot question whether the law of treasure trove, as we know it, has, on the whole, operated in favour of the preservation of articles accidentally discovered. Of late it is probable that no very large find of ancient coins fails to come to the notice of the CROWN. Workmen may pilfer and sell a few; the owner of the land wherein the discovery is made may be permitted to keep some. If the deposit is large, news of it reaches the authorities, and it is claimed. But in earlier times, doubtless, vast hoards were appropriated by private persons, who, if they dreaded claims by the CROWN, melted down the treasure.

Reading of the discovery of hoards of coin in the neighbourhood of a Roman camp, one is tempted to ask, What ages in the past have left most treasure for their successors to dig up ? One is led to put a further question : When we become ancients, shall we prove to have been as generous in this matter as some of our predecessors ? Any numismatist to whom this question is put would call attention to the richness of the chance bequests of certain ages, the poverty of others, and the absolute blank as to some. Any historian of economic changes, especially as to coinage, would tell us of centuries in which the use of gold or silver was rare, of others in which silver increased so much as to lead to a great alteration in the relative value of the two metals. He would also mention changes in the habit of hoarding; that which was habitual and, indeed, necessary at certain times at other times almost entirely ceases. But the numismatist and historian alike would probably say that this age would leave behind it less treasure trove than almost any other. The local branch bank has superseded the earthen pot crammed with gold pieces and buried in gardens or under houses in times of turmoil and invasion. Worn coins are called in and melted down. Paper money and cheques have diminished the necessity for the use of coin except as the small change of commerce. If the Romans had possessed a highly developed banking system, the cabinets of collectors would be poorer and the finds of treasure would be much rarer than they are. The points of perfection of our monetary system mean that we shall leave little for after generations to come upon. Perhaps, too, though here one touches upon more doubtful and highly speculative matter, what coins and other articles of treasure trove this generation may leave behind may be of less interest than those which have come down to us. One of the few philosophical writers on numismatics, EZECHIEL SPANHEIM, has pointed out the wealth of meaning, the crystallized wisdom, preserved for us in ancient coins, upon which each inscription or figure had significance; the

instruction to be gathered from those " symbola, vel documenta " potius, ad omnem vitæ usum feliciter comparata ". With reference to the coins coming down from the times of the Cæsars, for example, he observes that, along with their lineaments, are expressed their maxims and arts of governing, the foundations of an enduring polity; justice, equity, constancy, liberality, munificence; expressions of flattery in regard to the particular ruler, but true descriptions of the ideals of government. So, too, on the coins or medals commemorative of the women of that time are not merely significant symbols but expressions denoting feminine ideals — *Pudicitia, Pietas, Fecunditas, Concordia.*

The treasure trove of the past has carried down to us not a little of its wisdom. Will our coins, even the best specimens of decorative art and technical perfection, tell as much? They will be faithful memoranda of the changes in Sovereigns or Dynasties. But they may not have the full significance of coins upon which a former age indelibly wrote its ideals, the passwords or watchwords of the time. These doubts have a wider significance than their relation to coins and medals and what is technically known as treasure. This has been not inaptly termed the age of steel and iron : its most characteristic works are embodied therein; the engineer, using these as his servants, is the wonder-maker of our time. Will he leave as lasting memorials of his amazing science and skill and daring as did the primitive members of his profession ? Will he bequeath treasure trove, in the large sense of the phrase, which will endure and excite the curiosity of far-off generations as for us do the works of the engineers of the Stone and Bronze Ages? It is possible that he will have written his name, if not in water, in metals which will quickly rust and decay, metals as ephemeral as the paper upon which our books are printed or the ink in common use; in materials which may form a scrap-heap, but not treasure trove.

REVIEWS.

Wifela's Combe : a History of the Parish of Wiveliscombe. By F. Hancock (Taunton, Barnicott & Pearce).

Prebendary Hancock is well known in the West of England as the writer of two good books dealing with the histories of the adjacent towns of Minehead and Dunster. He has now produced a volume on the history of the small Somersetshire town and parish of Wiveliscombe. The name is odd, and more than one attempt has been made to supply its derivation. Collinson, the county historian, mentions two explanations which were current in his day, but both of them are obviously impossible. The one derived the name from the prevalence there in early times of the grub called the weevil, whilst the other supposed that it had its origin in the presence of weasels in the district. Mr. Hancock's theory, however, is most probably correct, namely, that it means the Combe which was the possession of one Wifela, or Wyvel. The local pronunciation has long ago been simplified as Wilscombe.

The story of the parish goes back to early days, for prehistoric folk established a great earthwork at Castle, a fortress which was held in succession by Romans, Saxons, and Danes. Edward the Confessor bestowed the manor on the bishopric of Wells, and here for centuries bishops occasionally resided. The prebendaries of Wells also held a large estate about the town, exercising manorial rights and using an official seal; but the ecclesiastical affairs of the parish were left almost entirely to the care of the vicars. The story of the fabric of the church is sad; it is now a tasteless building erected in 1829, with a debased semi-Italian interior.

Mr. Hancock has dealt carefully, and for the most part in an interesting fashion, with the manor, the prebend, the vicarage, the charities, and the industries; he also draws successfully on the registers, which begin in 1558, and the churchwardens' accounts, which date from 1681. The book concludes with a few traditions and ghost stories. Its 300 pages bear witness to Mr. Hancock's industry as a gleaner from public and local records, but there are several other sources unexplored from which further information might have been gained. In one place the information given is insufficient and to some extent incorrect. We are told that Wiveliscombe possessed a mint " at which coins were struck in the reign of Stephen, probably by some great baron. " The extant coins of this mint are those of Duke Henry, afterwards Henry II. This is a matter of historic moment. Duke Henry landed with his forces in the South-West of England in 1153, when the earls of that district rose in his cause; the evidence of the coinage closely corroborates that of the chronicles and charters. Henry's own money was minted at Wareham, Sherborne, Malmesbury, and possibly Taunton, as well as at Wiveliscombe; whilst other mints of the West, including Dunster, struck the coinage of the several earls who supported him in his action against Stephen.

BIBLIOGRAFIA NUMISMATICA ROMANA.

IL CORPUS DEI MEDAGLIONI ROMANI.

FRANCESCO GNECCHI. — **I Medaglioni romani da Augusto a Giustiniano descritti ed illustrati.** Milano, Hoepli, 1912. Opera di oltre pag. 400 in 4° e di 162 Tavole illustrative in tre volumi.

Questo insigne lavoro dell' illustre Vice-Presidente della Società Numismatica Italiana, ben noto anche a Londra, della cui Società Numismatica ebbe la medaglia nel 1906, è opera destinata a divenire testo in materia, poiché per la prima volta riunisce in un *Corpus* il più completo finora possibile, la vasta e importantissima serie di tutti i medaglioni romani finora conosciuti sparsi per tutto il mondo civile. Questo *Corpus*, essendo il risultato delle ricerche pazienti di oltre dieci anni di lavoro, forma il Catalogo più completo delle collezioni pubbliche e private alle quali attinse il Gnecchi, per la serie dei medaglioni romani. La descrizione sobria, esatta è completata dalle illustrazioni riunite in cento sessantadue tavole, eseguite con ottimo risultato dalla ditta Brumer e C. di Como, cosicchè per questo lato non teme il confronto con opere consimili straniere. I medaglioni vi risaltano in modo talora sorprendente dal fondo e sono nitidissimi nei più minuti particolari. Ma il merito principale dell' opera del Gnecchi consiste secondo me, non solo nel Catalogo in sè, ma anche nella serie delle conclusioni scientifiche alle quali è giunto, e che egli svolge nella sua introduzione, la quale è la monografia più completa e scientifica che si abbia sui medaglioni imperiali romani.

Riunendo in essa i risultati ai quali era giunto con singoli lavori già noti agli studiosi, perché 'inseriti nella *Rivista italiana di numismatica*, ci offre è seguenti capisaldi scientifici :

1° L'esitenza e la determinazione del medaglione senatorio oltre quello imperiale, togliandoci le incertezze sulle quali rimase il Cohen ;

2° I rapporti del medaglione con la monetazione imperiale romana e con la relativa sua circolazione, rapporti che non escludono quella del medaglione ;

3° La rinuncia alla teoria del Kenner sulle proporzioni multiple dell'asse in quantità differenti e progressive entro i singoli medaglioni che, non avrebbero potuto renderne pratico l'uso ai cittadini romani, senza portar seco la bilancia ;

4° La recisa affermazione del carattere donativo del medaglione romano come un atto della « *liberalitas* » dell' Imperatore, in sostituzione di tutte le altre ipotesi sul carattere di tali medaglioni come *signa, falere, prove di zecca, modelli pei ritratti dell' imperatore e simili.*

5° La conclusione naturale e scientifica che il medaglione romano, nel suo fine e uso commemorativo, sia una vera e propria medaglia, sorta presso i Romani prima che nel Rinascimento italiano, come espose il Gnecchi stesso negli Atti del Congresso Numismatico internationale di Bruxelles (1910).

Francesco Gnecchi soltanto poteva quindi dare la definizione esatta e completa del medaglione romano come segue :

I pezzi scelti in ogni metallo, emessi all'infuori o al disopra della semplice ed ordinaria monetazione.

Se a queste considerazioni storiche, numismatiche, metrologiche intorno al medaglione aggiungiamo quanto il Gnecchi riuscì ad esporre circa l'arte e i tipi, le rappresentazioni dei rovesci, il grado di rarità, la presenza delle falsificazioni ecc., a ragione possiamo

concludere che l'opera del Gnecchi chiude degnamente l'ultimo cinquantennio di attività numismatica italiana e giustamente è dedicata *Romae Aeternae*.

Milano, marzo 1912.

SERAFINO RICCI.

AN EXTREMELY RARE SIXPENCE DATED 1878.

Some sixpences coined during the reign of Queen Victoria in the year 1878 bear the erroneous abbreviation DRITANNIAR instead of BRITANNIAR in the obverse legend. The reverse of the one in my possession, which has been circulated, bears the die number 6 above the date, 1878. Most of these pieces were withdrawn from circulation before the error in the obverse legend was discovered by numismatists, hence their extreme rarity. It is doubtful whether the general public ever heard of the existence of these sixpences.

HENRY GARSIDE.

OBITUARY

THE LATE MR. JOHN WARD.

Mr. John Ward, whose death was briefly notified in these columns on the 21st. inst., was a native of Belfast, where he lived till 1906, settling subsequently at Farningham, Kent, where several members of his family had preceded him. Forced by the early death of his father to abandon the idea of a university career he went into business at the age of fifteen, and his strong, artistic bent, coupled with keen commercial instinct, enabled him to build up a publishing and printing business (Marcus Ward and Company) which was widely known. He retired at an age which enabled him to indulge his tastes to the full, and between Egyptology, numismatics, antiquarian interests generally, and painting in water-colours, his life was busily occupied till a few days before his death. Mr. Ward, who was seventy-nine years of age, was the author of "Pyramids and Progress," "The Sacred Beetle," "Greek Coins and their Parent Cities," "Our Sudan," and several earlier publications relating to drawing and painting. He travelled extensively in Europe and Egypt, and formed a collection of ancient Greek coins which passed into the possession of Mr. Pierpont Morgan, and is now in the Metropolitan Museum at New York. Mr. Ward, who was a Fellow of the Society of Antiquaries, was a Magistrate for Belfast. He was a member of the Savile and the Burlington Fine Arts Clubs as well as of the Turf Club, Cairo.

MR. ARTHUR DOBLE.

We regret to have to announce the death of Mr. Arthur Doble of Toronto whom we have known for over twenty-five years as a buyer of coins and medals, not as we believe on his own account, but for the purpose of supplying them to others. It is twenty-five years since he left the City of London to undertake Insurance work in Canada, but his interest in Numismatics was steadily maintained almost to the last, and he was particularly keen upon obtaining special issues of modern coins and medals, commemorative or otherwise.

H. F.

LE INIZIALI A. I. SULLE MONETE DI SISTO V.

In alcune monete di Sisto V coniate nella zecca di Fano si trovano le lettere A.I. situate sotto il busto del pontefice in modo da non potersi interpretare *Anno* I del pontificato, come parrebbe stando alla descrizione del Cinagli (N. 101, 193, 201-205) Ciò fu rilevato dal Pigorini [1] e poi da me nella illustrazione della Zecca di Fano [2]. Allora, non trovando una spiegazione possibile delle due iniziali, mi limitai a dire che esse dovevano certamente appartenere al concessionario della zecca o tutt'al più all'incisore dei coni.

Ora una memoria contenuta nel Codice n° 439 della Biblioteca Oliveriana di Pesaro, che ha per titolo *Zecca di Pesaro*, nel quale Annibale Olivieri raccolse o trascrisse documenti e notizie intorno alla zecca e alle monete, mi pone in grado di procedere alla identificazione del personaggio cui si riferiscono dette iniziali, e credo utile darne notizia agli studiosi perchè, all'occasione, possano rettificare o confermare la mia congettura.

Essa è tratta certamente da una lettera degli Agenti del Duca di Urbino in Roma, i quali tenevano informato il Principe dell'andamento delle cose monetarie di quella capitale per norma e regola dei lavori della zecca ducale, di che abbiamo altre prove nelo stesso volume; trovasi a carte 108 ed è così concepita:

« 2 Agosto 1589 ».

« In l'ultimo appalto della Zecca di Roma è conventione di battere « centomila scudi l'anno d'argento et ventimila libre di baiochelle « nel modo come fece M. Geronimo Cecchi a tempo di Pio V, e « nelle baiochelle il sig. Zechiere è obligato, che siano di bontà « d'argento onze due et mezo per libra, e non deve battere quatrini « neri. »

« Tutte l'altre Zecche del Stato Ecclesiastico sono state concesse « al Signor Luigi .... gentil'homo dell'Ecc.ma Signora Camilla, « il quale ha facoltà di battere a ragguaglio come di sopra per la « quantità che batterà, et non deve battere quatrini neri. »

Col nome *Luigi*, latinamente *Aloysius*, era trovata la spiegazione della prima delle due iniziali, quando, rileggendo alcune lettere di Casa Peretti dirette al Comune di Ancona pubblicate dal compianto mio amico Ciavarini [3], mi parve di poter spiegare anche l'altra. Infatti Donna Camilla Peretti, sorella di Sisto V, *l'ecc.ma signora Camilla* della notizia precedente, scriveva il 14 Marzo 1590 agli Anziani di Ancona: « M. *Luigi Innocentij* è mio servitore; mi è « molto caro, et desidero di giovarli in ogni sua occorrenza. Mi è « Parso dar conto alle SS. VV. di questa mia volontà, acciocchè « potendolo aiutare nelli suoi affari sappiano di farne particolar « piacere a me, che a loro mi offero, etc. » Le iniziali del nome di Luigi Innocenzi (*Aloysius Innocentij*) servitore di Donna Camilla, corrispondono perfettamente a quelle A. I. dell'ignoto concessionario della zecca di Fano e delle altre zecche dello Stato Ecclesiastico.

Nella commendatizia di Donna Camilla non si parla, è vero, di concessione di zecca ma soltanto di affari in generale, però trovo nella stessa pubblicazione che, a un solo mese di distanza, il 14 Aprile 1590, il Cardinale Montalto, Alessandro Peretti pronipote di Sisto V, scriveva ai medesimi Anziani di Ancona: « Per la « lettera vostra di XXVIII di Marzo, Nostro Signore ha inteso il « desiderio, ch'havete di poter battere moneta, e perchè Sua Santità « desidera compiacervi, ha fatto dare la vostra lettera in mano del « Sig. Cardinale Giustiniano col quale si haverà da trattare questo « negotio, etc. [4].» La coincidenza mi pare non sia fortuita e possa servire a meglio stabilire l'identità del signor Luigi gentiluomo della Eccellentissima signora Camilla concessionario delle zecche dello Stato Ecclesiastico, con Messer Luigi Innocenzi buon servitore e molto caro a Donna Camilla raccomandato agli Anziani di Ancona.

Galeotto Tommasini il 6 Ottobre 1589 pagava al Comune di Fano il saldo del canone da lui dovuto come conduttore della zecca fino

al giorno 16 Settembre precedente in cui aveva cessato di lavorare. Però, non ostante la cessazione di lavoro da parte del Tommasini, la zecca rimase attiva ugualmente raggiungendo anzi uno dei periodi di maggiore attività, mentre nei libri del Comune non si trova più menzione di essa, nemmeno per la esazione del solito canone annuale, ultimo avanzo della antica signoria del Comune, avocata totalmente allo Stato [1]. Sarebbe quindi di un certo interesse conoscere il tenore della concessione ottenuta dall'Innocenzi, la quale doveva estendersi a tutte le zecche dello Stato Pontificio, sebbene il Cinagli non registri monete di altre zecche, all'infuori di quella di Fano, con le iniziali A.I. L'Innocenzi non usufruì del suo privilegio per più di un anno, giacchè sulle monete della Sede Vacante e su quelle di Gregorio XIV uscite dalla zecca di Fano appariscono le iniziali B.G. di un nuovo e a me parimenti ignoto concessionario.

Chiuderò queste poche parole accennando a due conseguenze che si possono trarre dalla memoria trasmessaci dall'Olivieri. La prima, che a tempo di Pio V furono battute baiocchelle; il che conferma quanto io ebbi a dire in opposizione allo Zanetti e al Pigorini. L'altra che i *quattrini neri*, vale a dire i quattrini di Sisto V, furono emessi tutti prima di quest'ultima concessione o appalto di zecca del 1589, in cui si fece espresso divieto ai concessionari di emetterne ancora; così avvenne che le baiocchelle presero addirittura il posto dei quattrini nella emissione e nella circolazione, e da ciò potè forse derivare l'opinione che si cominciasse a coniarle soltanto in quest'epoca.

G. Castellani.

ANCIENT WORKERS IN COPPER.

Professor William Gowland, the new President of the Institute of Metals in succession to Sir Gerard Muntz, took for the subject of his inaugural address, at the Institution of Mechanical Engineers, the early history of copper and its alloys. In his absence through illness the paper prepared by the President was read by the Secretary.

He said so momentous a discovery as that of metals contained in ores must have had its origin in the domestic fires of the Neolithic Age. The camp fire was, in fact, the first metallurgical furnace, and from it, by successive modifications, the huge furnaces of the present day had been gradually evolved. Furnaces of primitive form survived in Derbyshire up to the 17th century. In Japan the furnace for smelting copper, tin, and lead ores, which was a mere hole in the ground, was in universal use there up to 1858, and was still extensively employed. It was as simple as that of the Bronze Age. There was abundant evidence to show that Egypt was the first in the field in artistic bronze casting. The fall of Greece and the rise of the supremacy of Rome was the dawn of an important period in the history of copper and its alloys. In Spain and in Britain copper smelting was vigorously carried on by the Romans. The Romans were the first makers of brass. Although they were unacquainted with the essential constituent, zinc, yet they discovered that, by melting copper altogether with a certain ore (calamine), a yellow alloy of a more golden colour than bronze could be obtained. The process was so effective that, until a comparatively recent period, all brass was made in Europe by the ancient process, and even until a few years before 1861 it was thus made in Birmingham. The survival of this ancient process afforded a striking example of the conservatism characteristic of British metallurgy. With the disappearance of the calamine brass, one of the last links in the chain connecting the modern metallurgy of copper and its alloys with antiquity was broken. An important link, however, still remained in the process *à cire perdue* of casting bronze, a process in which it could hardly be said that we were any further advanced than the Greek founders of some centuries before our era. Further, it should not be overlooked that the principles on which copper refining is based were carried out in practice in the times of Pliny.

Times.

M. ROTY ET LE MINISTRE DES BEAUX-ARTS.

M. Roty, le graveur, membre de l'Institut, aujourd'hui décédé, avait, lors de l'Exposition universelle de Bruxelles, présenté un médaillon et vingt dessins.

Comme il est d'usage, le commissaire général de l'Exposition lui avait demandé, dans le cas où il désirerait vendre les objets exposés, d'en indiquer le prix, ajoutant qu'en tout cas ce renseignement lui serait utile pour assurer lesdits objets.

Au nom de son mari, qui était alors très souffrant, Mme Roty fit connaître que le prix du médaillon était de 2,500 francs. Elle ajoutait en post-scriptum : « Vous pouvez indiquer, pour les dessins, le prix de 300 francs pour chaque dessin. »

Les dessins furent vendus à un milliardaire américain de la cinquième avenue, à New-York, M. Huntington, qui remit un acompte, les dessins ne devant être livrés qu'après l'Exposition.

A l'avis qui lui fut donné de la vente, Mme Roty protesta et déclara que, si elle avait indiqué le chiffre de 2,500 francs pour le médaillon, le prix qu'elle avait indiqué pour les dessins n'était relatif qu'à une estimation en vue de l'assurance.

De là le procès qu'elle a intenté à l'État, pour lui faire défense de se dessaisir des dessins de son mari.

L'État, assigné en la personne de M. le ministre des Beaux-Arts, répondait que M. Huntington refusait de résilier la vente, ayant fait présent des dessins à la Société de numismatique de New-York, et demandait, en conséquence, au tribunal, l'autorisation de livrer les dessins, qui sont en ce moment sous séquestre au Grand Palais.

Après plaidoiries de Me Lalle et de Me Porée, la première chambre du tribunal, sous la présidence de M. Salvador, vient de donner raison à la veuve de l'illustre graveur.

Le ministre des beaux-arts devra donc faire remettre à Mme veuve Roty, des mains du commissaire séquestre, les vingt dessins litigieux, et ce, sous peine d'une astreinte de 20 francs par jour de retard.

NUMISMATIC SOCIETIES, MUSEUMS &c

BRITISH NUMISMATIC.

Feb. 21. — Mr. Carlyon-Britton, President, in the chair. — The Rev. W. A. Laughlin and Messrs. H. J. Farrow, J. H. Searey, and L. A. Woodward were elected Members.

Mr. H. A. Parsons read a paper on 'The Dunwich Mint,' in which, after reviewing the history of the city in Saxon times, when, after attaining the height of its prosperity in the closing years of Ethelred II., its decline gradually set in owing to the denudation by the sea, he attributed four coins to the mint, namely, one of each of the last two types of Ethelred II., and one of each of the first two types of Canute. The author explained that the coins thus synchronized with its history, for only at that particular period would Dunwich be likely to have exercised its privilege of a mint.

Mr. B. Roth exhibited the contents of a remarkable archæological hoard found at Peterborough in 1886. It comprised Roman coins and other relics, a bronze torque, and three ancient British coins. One of these was a gold stater similar to Evans, Plate B, No. 8, and the other two were silver money of the Iceni. Amongst other exhibitions were a copper siege-piece issued at Cork in 1647, by Mr. L. L. Fletcher; and the original die for the obverse of William Mossop's medal to Dr. Henry Quin, by Mr. F. W. Yeates. Mr. Henry Symonds presented a series of numismatic works to the Society's library.

YORKSHIRE NUMISMATIC SOCIETY.

The Annual Meeting was held in Leeds, the president, Mr. W. Sykes, in the chair. The report for the year showed the membership to be 26, as compared with 25 last year, three members have been elected during the year, but two have lapsed through non-payment of subscription. Including the present meeting four have been held, with an average attendance of 8.5, as compared with an average attendance of 10 in 1910, and one Committee meeting, with an attendance of 7. Meetings have been held once at Barnsley and Sheffield, and twice at Leeds.

Mr. T. Pickersgill read a paper relative to a find of some 3,000 Roman copper coins at Bramley, early in 1908, consisting of those of seventeen Emperors and one Empress, all between periods, A.D. 244, and A.D. 282; the coins are nearly all in uncirculated condition, no place of mintage is indicated, but as, with one exception, all were rulers of Britain and Gaul, many probably were struck in this country. A tray of very fine specimens of the several varieties was shown. The exhibit was of much local interest.

ADELAIDE ART GALLERY.

The Adelaide Art Gallery and Library have in their possession a very fine collection of coins, in fact, the finest of any public institution in Australia. For many a long day it has puzzled the board of governors how best to make these available to the public. After many debates on this subject it was decided to get the advice of an expert numismatist, and last March Ex-Cr. A. Chitty was asked to advise on the matter. For this purpose he visited Adelaide and inspected the collection, and reported on same. He found the collection to contain 17,000 specimens, ranging from 400 B.C. to present times, and the coins varied in size from the size of the top of a lead pencil to ten inches in diameter. As a result of his report the board decided to appoint an expert numismatist to identify, classify catalogue, and arrange the collection, so that the coins can be safely and securely placed on view for public inspection. For this purpose a special room has been built of stone, with concrete ceiling and floors and ample light. The choice of the board for the position of numismatist again fell on Ex-Cr. Chitty, who has accepted the position and will shortly commence his duties.

(*Australian Press.*)

We take this opportunity of congratulating our friend Mr. Chitty on his recent appointment and offer him our best wishes for the fulfilment of his arduous task.

CATALOGUE

OF

COINS and MEDALS for SALE

Special attention is directed to the fact that every coin or medal catalogued in the following lists is guaranteed to be absolutely genuine (except when expressly stated in the description to be otherwise) and if not approved of can be returned, when the full amount paid will be refunded.

Collectors will also kindly note that every care is taken when compiling the catalogues not to overrate the condition of the pieces but to faithfully represent them according to their merits.

All orders should be sent to Spink & Son Ltd., 17 and 18, Piccadilly, London, W.

(For further particulars see first page of this Circular.)

VARIA

FIND OF ANCIENT COINS.

The Roxburghshire Procurator-Fiscal, Mr. Sydney Hilson, has, on behalf of the Scottish Exchequer, obtained possession of the ancient silver coins recently unearthed by a ploughman in a field on the farm of Mellendean, on the Duke of Roxburghe's Sprouston estate. There are over 500 of them. The figures on some of them are well preserved.

During the work of reconstruction of Goodrich House, Hatfield, the remains of a sixteenth century timber building have been uncovered, and a number of silver and copper coins, dating from the time of Charles II. to George II., have also been found. The property was originally portion of the Manor of Hatfield.

***

FIND OF SAXON COINS.

Excavations by the Broadstairs Archæological Society, in the grounds of Valetta House, Broadstairs, already referred to in *The Standard*, have disclosed a circular ditch, about fifty feet in diameter, grouped in which, and on shelves cut out of the chalk at the side, were eight skeletons, buried in a manner which points to their being Anglo-Saxon. Below these, in the chalk, five more skeletons were discovered, which are believed to date back to the early bronze age. Some silver Saxon coins were found with the first eight skeletons, whilst buried with one, who was evidently a warrior, were an iron knife, and the boss of a shield, with bronze rivets. The skulls of the bronze age skeletons have been sent to the Royal College of Surgeons for measurement.

***

The Paris Cabinet des Médailles et Monnaies has received a generous gift from M. Zay, a collection of 500 pieces, for the most part very rare, and consisting of French Colonial coins from the seventeenth century. It includes, for instance, the coins which Louis XIV. had struck in 1670 for currency in the " isles et terre ferme de l'Amérique et autres lieux de la concession de la Compagnie des Indes occidentales ", whilst others were for the Extreme East, and even for Tahiti.

A LISIEUX.

Dans la nuit du 31 octobre au 1er novembre, on a dévalisé trois vitrines du musée-bibliothèque de Lisieux: diverses médailles, monnaies, bagues et cachets anciens, un sceau en bronze de l'évêque de Matignon, deux épées anciennes ont disparu. Le voleur a en outre décroché une Vierge à l'Enfant d'Antonio de Calvi, mais il ne put emporter cette peinture d'assez grandes dimensions. Par contre, il a dérobé des médailles et des volumes qui se trouvaient sur le bureau du bibliothécaire.

ADVERTISEMENTS

WANTED.

Bushell's Mine ticket, 1660 with portrait of Sir Francis Bacon, with Rev. DEVS. EST. QVI. CLAVSA. RECLVDIT, a miner standing amid rocks holding a pickaxe and a piece of ore. [redacted]
Medallic Illustrations, vol. I, pp. 467, 8. Write or send to Spink & Son Ld, 17 & 18 Piccadilly, London. W.

ALSO

CATALOGUE OF GREEK COINS SOLD

BY MM. ROLLIN & FEUARDENT

Paris, 20 & 21 June 1906.

With Plates.

NOW READY

PART I

MONNAIES BYZANTINES

BY

COUNT JOHN TOLSTOY

Large 8vo, 112 pp. 7 plates. **Price 6/6** nett.

Extract from Prospectus:

" Subscribers will receive the parts as soon as published, on the following terms: the first, second and third parts for 6/6 (1 dollar 60 cents) net, each part; the subsequent parts for 5/6 each (1 dollar 30 cents), and the last for 2/2 (60 cents).

The price of each part to non-subscribers will be 8/6 (2 dollars 10).

Once the complete work is published the price will be raised.

The subscription-list will be closed two months after the publication of the second part (Spring or Summer 1912).

N. B. Although the work is written in Russian, the author thinks that persons quite ignorant of the Russian language will be able to use it, as it contains reproductions of all the described coin-types and of over half the varieties. The text of the plates is in Latin of Greek, the values of the coins given in francs, and the weight in grammes. All the legends are reproduced in the text in fac-simile, and transcribed in Latin and Greek.

As all the parts will have one common pagination, and the plates enumerated in sequence, subscribers and purchasers will be able to bind the parts as they please.

The work will comprise the description of all the Byzantine coins known to the author, as well as those of the Empires of Thessalonica, Nicaea, Trebizond, and the imitations of Byzantine types issued by the Goths and Lombards of Italy".

The work will consist of 9 to 12 parts, two or three appearing yearly.

Subscriptions received by SPINK & SON Ltd.
17 & 18 Piccadilly, London, W.

MONTHLY

NUMISMATIC CIRCULAR

THE *Monthly Numismatic Circular* will be forwarded post free on receipt of half-a-crown (= 3 francs = 2 ½ marks = 60 U. S. A. cents, in P. O. O. or stamps) for one year's subscription.

Should any applicant not receive it regularly by post, please notify the omission to us, when it shall be at once rectified. All communications respecting the Numismatic Circular (either referring to its literary portion or to its catalogue of coins, &c. for sale) should be made to our West-End house, 17 and 18 Piccadilly, London, W., where all letters and orders will receive immediate attention.

Cheques crossed National Provincial Bank of England, Piccadilly Branch.

Any coins or medals can be had on approval if the applicant is known to us, or, if not, on receipt of references. Postage on coins, as a rule, is paid out.

Orders for coins from the annexed list will be executed in rotation, but preference will be given to clients who are willing to purchase outright, providing the coins answer to the description.

Coins not approved of can be returned.

LA *Circulaire mensuelle de Numismatique* sera adressée franco à toutes les personnes qui voudront bien en faire la demande en nous faisant parvenir 3 francs 20 centimes par mandat postal pour un abonnement annuel.

Nous prions nos correspondants d'adresser toutes lettres et communications relatives à la partie littéraire du journal ou au catalogue des monnaies et médailles, à notre établissement, 17 et 18, Piccadilly, Londres, W.; nous y répondrons immédiatement.

Les ordres seront exécutés à tour de rôle en donnant la préférence aux commandes effectives.

Toutes les pièces seront envoyées *à condition*, si le client le désire, mais le port de retour est à sa charge.

Les personnes qui ne nous seraient pas connues sont priées de nous fournir des références.

DAS *Numismatische Circular* wird portofrei, nach Empfang von 2 ½ Mark (3 Kronen ö. W.) als Jahresbetrag, geschickt.

Sollte jedoch ein Abonnent dasselbe nicht regelmässig erhalten, so bitten wir, uns gefälligst Anzeige davon zu machen, um weitere Unregelmässigkeiten zu verhüten.

Alle Mittheilungen, welche dieses "Numismatische Circular" betreffen (gleichviel ob dieselben sich auf den literarischen Teil oder auf das Verzeichnis der Münzen, &c. zum Verkauf beziehen), sollten an unser West End Etablissement, 17 und 18 Piccadilly, London, W., gerichtet werden, wo Briefe und Aufträge sofortige Erledigung finden.

Jede Münze oder Medaille wird zur Ansicht gesandt. Bestellungen werden nach Reihenfolge des Einganges effectuirt und Nichtconvenirendes zurückgenommen.

Rückporto zu Lasten der Herren Besteller.

Uns unbekannte Herren Sammler werden um Aufgabe genügender Referenzen ersucht.

GREEK COINS.

THE ANCIENT COINS OF SICILY.

(*Continued from col. 13502.*)

PANORMUS.

The modern town of Palermo stands on the site of the ancient Phoenician city known to the Greeks as Panormus, and, if we read the inscriptions on the coins aright, to the Phoenicians as Ziz. The name πάνορμος implied that the port was always fit for landing in safety, and also the complete port, just as πανδαισία signified a complete feast, or πανσπώλιον, a complete place of sale or barter, a Bazaar.

The name Ziz צ״ץ may be derived from צ״ץ, to shine, or flourish or blossom; the noun צ״ץ was used for a blossom, as in Psalm 103.15 where we have both verb and noun in the phrase "as a flower of the field so he flourisheth".

Such a name was most suitable to the bright sunny harbour on the shores of which the flowers are still beautiful and abundant.

We meet with the same double currency of coins with Greek and Phoenician legends at Motya and Panormus, both cities being Phoenician in origin, and having much commerce with the Greek cities of Sicily.

The types of these two cities are also alike in being copies of those of Greek cities.

The Phoenicians shewed no initiative power in regard to art, and were content to copy from their rivals, who had invented or at least adopted a metallic currency long before the Phoenicians determined to imitate them.

No historical notices seem to exist concerning the foundation of this old Punic trading post, but at the time when the inhabitants of Panormus came into contact with the Greeks they were under the dominion of Carthage.

The earliest notice of the city appears to be the account given by Diodorus Siculus of the invasion of Sicily by Hamilcar in 480 B.C., when a fleet sailed from Carthage to Panormus, where, after a three days rest, the Carthaginian army started on their fatal march to Himera (lib. XI, 24). During the period which followed, until 406 B.C., we read nothing of this city in the old histories, and the coins are the only contemporary evidence of its welfare.

THE TYPES.

The head of Apollo on these coins was no doubt copied from Greek types; it is found on coins of Agrigentum, Alaesa, Catana, and the Reverse type of the coins of Catana is similar to that of the coins of Panormus with the head of Apollo.

The head of Apollo also occurs with a quadriga on the Reverse of coins of Leontini.

The coinage of these cities must have been familiar to the citizens of Panormus, and was no doubt copied by them.

As the Nymph with the swastika symbol has on the Reverse a hound, the types were most probably copied from those of Segesta, and the Nymph therefore may be meant for Segesta.

It is noticeable that the Swastika symbol should be found on a coin of a Phoenician city, as it is said to be never found in Semitic art. It is therefore, like the inscription, a proof of the Greek influence in the mint at that time. Confer notes on this symbol on p. 38 of "Common Greek Coins".

On the Litra we find the head of a river-god; similar heads are found on coins of Leontini, Selinos and Himera.

As the coins of Leontini were apparently copied, in regard to the head of Apollo, probably this river-god also may have been copied from coins of that city. The figure of Poseidon seated seems to be more original in design. A head of Poseidon appears on coins of Catana, Messana, Solus, Syracuse and Tyndaris, and perhaps of Lipara. But all there head of Poseidon are later than this litra of Panormus. This god was a Greek rather than a Phoenician deity, and is evidence of Greek influence even on a coin with a Phoenician inscription.

The Reverse also of this small coin with the figure of Poseidon seated is original.

A naked youth seated sideways on a man-headed bull galloping.

The man-headed bull was a familiar type on the coins of Gela, and must have been familiar to the men of Panormus.

On a didrachm of Selinus issued during this period of transition we see a somewhat similar type of Heracles struggling with a bull, but the bull is not man-headed.

On a didrachm of Himera issued during the same period is a figure of a naked youth seated sideways on a horse. Rustics often ride farm horses sideways.

The design of this coin of Panormus looks as if it had been suggested by these didrachms, but what it really signified seems difficult to decide. The man-headed bull would have signified a river-god to the Greeks, and the rider may have signified either a marine dæmon like Glaucus or a national or tribal hero or founder of the colony.

COINS WITH GREEK INSCRIPTIONS.

TETRADRACHM.

Normal weight: 268 grains. Specimen in B. Mus. 265.1 grs.

I. Obv. И МЯОИАП.

Head of Apollo to right, laureate, his hair rolled.

Rev. Quadriga to right driven by charioteer in long chiton, holding goad in right hand, and the reins in both; horses walking; above, Nike flying to right crowning the horses. Specimens in Imhoof and De Luynes Cab^{s}.

DIDRACHM.

Normal weight: 134 grains. Specimen in B. Mus. 131.1 grs.

II. Obv. ИОЖ ITIMƧO И П.

Head of Nymph to right wearing earring, necklace, and sphendone ornamented in front; behind 卐 swastika.

Rev. A hound to right looking back; above, a murex: border plain.

III. Obv. Head of Nymph to right; her hair tied at the back: behind, a cray fish upwards.

Rev. Γ ANO Ρ MOΣ.

A hound, to right: with nose downwards, no symbol, border of dots. Tafel IV, Adolf Holm.

IV. Obv. Head of Nymph to right, wearing earring, necklace and diadem; her hair rolled.

Rev. Same die as No III.

LITRA.

V. Normal weight: 13.43 grains. B. Mus. Specimen 13.3 grs.

Obv. A young male head; to right, wearing tainia; hair short; border of dots.

Original from CORNELL UNIVERSITY

Rev. Forepart of man-headed bull swimming to right : beneath, a mussel shell.

B. Mus. Cat. describes the head as "river god ?", and Adolf Holm also as "Flussgottes" but without mark of interrogation.

COINS WITH PHOENICIAN INSCRIPTIONS.

LITRA ? PERHAPS OBOL.

I. Weight of specimen in B. Mus. 11.3 grains.

Obv. Poseidon, naked to the waist, seated to right on a rock, holding a trident in his left, and extending his right hand towards a dolphin, to right, downwards : border of dots.

Rev. 𐤆 𐤌 (זמ) (= Ziz). A naked youth seated sideways on a man-headed bull galloping to right, holding a caduceus in his right hand ; his left extended.

II. Weight of specimen in B. Mus. 9.5 grains.

A female head to right, wearing necklace, her hair bound with broad diadem ornamented with maeander pattern, her back hair turned up under diadem, and protruding in a bunch above ; around the head four dolphins : border of dots.

Rev. Similar type to obverse of No 1.

One specimen in B. Mus. has this Reverse type to left.

ABACAENUM.

At the front of the hill now called Pizzo di Tripi considerable ruins, consisting of prostrate columns and fragments of walls, were discovered by Fazello, and identified as those of the old city of the Siculi called Abacaenum (Fazellus, de Reb. Sic., IX, 7). The site is about four miles from the north coast, between Tyndaris and Mylæ, about twenty-seven miles west from Messana.

The forests of oak, which still exist in that region, were probably flourishing in the fifth century B.C., for we see on the small silver coins of Abacaenum a boar and an acorn, and herds of swine are still pastured there. It seems probable that there may be a reference to the forests of oak in the name of the city, if we may connect the name Ἄβακαινον with the word Ἄβαξ, genitive Ἄβακος, meaning a board or plank of wood. ; a word familiar to us from the architectural technical word "Abacus". The Emperor Frederick II. hunted in this forest, and some consider it to have been that in which the herds of Helios were pastured, of which Homer wrote. Od., XII, 128.

Dr Pape derived the name of this city from Ἀβα and Καίνη.

The word Ἄβαξ seems to be a late word and no instance has been quoted of its use in the sense of a plank or slab of timber.

Perhaps the Latin Abacus is as old or older than the Greek, and as we find the name given to a Siculan township it may belong to the old language of the Pelasgians.

The territory of Abacaenum included that of Tyndaris until the elder Dionysius founded that city, circa 396 B.C. Although spoken of by Ptolemy (III, 4. § 12) it is not mentioned by Cicero in his orations concerning Verres, and it was therefore of small importance in later times. The rise of Tyndaris probably was the cause of its decline.

The coins are witness to the civilizing influence of the Greeks upon the Siculi.

The head on the coins may perhaps be that of Zeus to whom oak-trees and heights were sacred.

The placing of part of the inscription on the Obverse and the remainder on the Reverse is said by Mr. G. Macdonald (p. 131 "Coin types") to be "probably due to lack of space". We find a similar division of the inscription on coins of **AKPA ΓAΣ**, Acragas-where the two types together "were required for the full expression of the emblem of the town."

COINS OF THE TRANSITIONAL PERIOD.

LITRA.

I. Obv. **ABAKA I.**

A bearded male head to right, his hair in a bunch behind ; plain border.

ИОИИ in exergue.

A boar to right, his foreleg bent : border of dots. Weight of specimen in B. Mus. 11.3 grains.

II. Obv. Bearded male head to right, bound with wreath, his hair in a bunch behind : border of dots.

Rev. **ИIAK / ABA**. A boar standing to right, in front an acorn : plain border.

III. Obv. **A / B**. Similar type.

Rev. **I A / I И**. Similar type, but no acorn.

IV. Obv. **ABAK.** Similar type.

Rev. **AINI.** A boar standing to right : above, a barley corn.

BIOGRAPHICAL NOTICES OF MEDALLISTS

Coin, Gem, and Seal Engravers, Ancient and Modern, with References to their Works.

B.C. 500 — A.D. 1900.

(*Including the names of several hitherto unpublished artists.*)

One-hundred-and-sixty-third article.

(*Continued from col. 13511.*)

TANNPICHLER, HANS (*Germ.*). Mint-warden at Landshut, 1458.

TAPPEINER, KARL (*Austr.*). Sculptor of Vienna, by whom is a Portrait-medal of Michael Ferdinand Muellner, 1907.

TARCHIANI, ANTONIO (*Ital.*). According to Bolzenthal, a Florentine Medallist of the first half of the seventeenth century. His son, Francesco Pesutelli, is also said to have practised the art.

TARDIEU, NICOLAS (*French*). Engraver to King Louis XV. ; his wife Jeanne Louise Françoise, *née* Du Vivier, † 6. April 1762, is known as a Medallist (Rondot, *op. cit.*, p. 355).

TARENNE, JEHAN (*French*). Money-changer and Die-engraver, decapitated on 21. August 1418. D. Mater (*Etudes sur la numismatique du Berry*, Gaz. num. franç. 1905, p. 243) quotes from some contemporary records which show that Tarenne engraved dies for Jetons which he had on sale.

TARLANT or **TARLAN, LOUIS** (*French*). Goldsmith and Engraver of jetons, born in 1691 ; married Anne Crocx on 12. January 1717. His jetons date from *circ.* 1716-1717.

TARNOWSKY, SPYTECK (*Pol.*). Treasurer to the Crown of Poland, 1546-1548. His initials **S. T.** occur on the currency.

TARRAX, YPOL (*Belg.*). Mint-master at Antwerp, 10. December 1474 to 1. January 1476 in conjunction with Marcel van Millon, and later alone from 20. September 1477 to 14. May 1478.

TARTIER, JACQUES LE (*French*). Mint-master at Troyes, appointed in January 1540 ; privy mark, boar's head ; letter **S** and pellet under the 14th letter of the legends. He had already been in office from March to December 1538.

TARTIER, LUPIN LE (*French*). Mint-master at Troyes, from December 1538 to the end of 1539; privy mark, a mullet.

TASCHENDORFFER, LORENZ (*Austr.*). Mint-master in Austria 1495, 1497. He was a City judge at Vienna 1480-85, 1490, 1494 and 1496. (Cf. Ebengreuth, Wiens Münzwesen, *Handel und Verkehr im späteren Mittelalter*, 1902. — Josef Nentwich, *Regesten zur Geschichte der Münzstätte Wien*, Mitth. des Clubs, &c., 1901. p. 31).

TASCHEREAU, LUCAS (*French*). A partner of Nicholas Briot, 1625 (Mazerolle, *Les Médailleurs français*).

TASCHNER, IGNATIUS (*Germ.*). Contemporary Sculptor and Medallist, who exhibited several medals and plaquettes at the Berlin Fine Art Exhibition 1907: P. Websky; — Von Leonrod; — Niemeyer; and seven small medals.

TASCHNER, LUDWIG (*Germ.*). Mint-master at Landshut 1453-1455, 1459.

TASSET, ERNEST PAULIN (*French*). Contemporary Medallist, born at Paris on 15. November 1839; a pupil of the Ecole des Beaux-Arts, and of Oudiné. He first began exhibiting at the Salon in 1869. Received Honourable mention in 1876; Medal of the third class in

1883; Bronze medal at the Paris Universal Exposition 1900. He is a Chevalier of the Legion of honour since 1895, and a Member of Société des Artistes français. At the International Numismatic Congress held at Brussels in 1910 he presided over the section of the Modern medal with much distinction and competency.

For some years, M. Tasset assisted Albert Barre, Chief engraver at the Paris Mint. Beside preparing dies for French coins, he obtained commissions from various governments, Bolivia, Brazil 1902, Columbia, Greece, the Republic of Haiti, Morocco, Monaco, Servia, Uruguay, Venezuela, the Dominican Republic 1891, Holland, &c.

M. Tasset is one of the best practical Medal-engravers of our times; he has made a speciality of the technique of medallic art, and to him is due the great perfection and accuracy of the modern reducing machine, thanks to which it is now possible to transform a model of any dimension into a puncheon of inferior size.

Among his best known productions are: Portrait-medal of Marshal Mac-Mahon, President of the French Republic; — Olivier de Serres; jeton (1876); — Pope Leo XIII. (1882); — Monier de la Sizeranne (1883); — Medal of the Académie internationale des sciences industrielles, of Madrid (1885); — St. Hedwige; — Medal ef the Société des carabiniers de l'Ile de France (in collaboration with Vernon, 1887, &c.).

M. Mazerolle describes the following:

STRUCK MEDALS. Salle des thèses de l'Université d'Orléans, 1882; 52 mill.; — Centenary of the firm of Heidsieck, at Rheims, 1885, 69 mill.

CAST MEDALS. La Chimie se découvrant à Lavoisier, 1881; 63 mill.; — 1883. Société d'encouragement de l'escrime; 79 mill.; — La mutualité commerciale, 41 mill.; — 1884. Commission des huiles; 65 mill.; — 1885. L'Enseignement par l'aspect; 65 mill.;

Life-saving Medal.

— Société française de sauvetage; 67 and 41 mill. (*illustrated*); — 1889. The French Republic; 50 mill.; model of the head of the French Republic for the fiscal stamps (*illustrated*); — Syndicat

The French Republic.

général de la Bourse de commerce de Paris; 65 mill.; — 1890. Edmond Hébert, doyen honoraire de la Faculté des sciences de Paris; 100 mill. and 68 mill. (*illustrated*).

Edmond Hébert.

Chavignerie et Auvray give a list of his earlier exhibits at the Salon: 1869, La bienfaisance secourant les malheureux; — 1870. Medal of the Compagnie d'assurances maritimes, La Prévoyance; — Le Commerce et l'Industrie s'appuyant sur les attributs de la

comptabilité; – Liberty; pattern coin for Uruguay; — 1874. La Navigation de plaisance; — Medal of the Yacht Club de la Méditerranée; — 1875. Portrait-medal of Marshal Mac-Mahon; — Jeton of the ' Compagnie La Maritime '; — Jeton of the ' Compagnie La Navigation; — 1876. Olivier de Serres; jeton; — Jeton of the ' Conseil d'Administration du journal ' Le Temps'; — 1877. Exhibition Prize Medal, in commission for the Canadian government, 1876; — 1879. Medal for the ' Société française de timbrologie; — Jeton for the ' Chambre syndicale du commerce d'exportation '; — 1880. Medal of the Geographical Society of Marseilles; — Portrait-medal of M. Allar; — French Life saving medal (Society leaning on Force and Courage); — 20 Dinar piece of Servia (with bust of King Milan); — Five Dinar piece of Servia; — 1881. Effigy of the Republic; — Jeton of the ' Chambre syndicale des produits chimiques '; -- Portrait-medal of Pierre Aymar Bressier; — 1882. Commemorative medal of the erection of a statue to Adolfo Alsina, at Buenos-Ayres; — H. H. Pope Leo XIII.; — 1883. Henri Menier; — A. Utrechta; — Monier de la Sizeranne; — La mutualité commerciale; — Mercure; — L'Enseignement par l'aspect; — Salle des thèses de l'Université d'Orléans; — La République (after a bust by J. France); — Copy of a coin of Thurium; — La Chimie se découvrant à Lavoisier; — 1884. M. J. Jaluzot; — Société d'encouragement de l'escrime; — 1885. Gaston Menier; — Jeton de la Commission des huiles; — Académie des sciences industrielles de Madrid; — 1886. J. F***, portrait-medal; — 1887. St. Hedwige (memorial medal of the Marquise d'H***); — 1888. Centenaire de la maison Heidsieck à Reims; — 1890. La République; — 1891. Patterns for the coinage of the Dominican Republic; — 1898. Comemorative medal of the Monument erected by Alsatians to Gambetta at Ville d'Avray (after Bartholdi); — 1900. Edmond Hébert; — Jonkheer Otto Reuchlin, &c.

At the New York International Medallic Exhibition, March 1910, the following medals by Tasset were exhibited : Jeton du Syndicat général de la Bourse de commerce de Paris; — Jonkheer Otto Reuchlin; — Edmond Hébert; — Gaston Menier; — Médaille de la Société d'Encouragement de l'Escrime; — Jeton de la Commission des huiles; — Jeton du Syndicat général de la Bourse de commerce de Paris; — Jeton de la Chambre syndicale des Produits chimiques; — Médaille de la Société française de Sauvetage.

At the Luxembourg Museum, Paris, several medals by Tasset are on exhibition : Edmond Hébert; — Société d'encouragement de l'escrime; — Salle des thèses de l'université d'Orléans; — Jeton de la Commission des huiles; — La Chimie se découvrant à Lavoisier.

TASSET, F. (*French*). This Engraver's name occurs on various medals of 1870, &c. : Neverled, commandant des mobiles français, † 1870; — Prévault, French colonel, † 1870; — Paul Richard, Pasisian actor, 1870; — Henri V., Pretender to the French crown, LA PAROLE EST A DIEU.

TASSET, PHILIPPE JOSEPH EMILE (*Belg.*). Sculptor and Engraver at Liège, born in May 1838, died 16. Novamber 1879. By him is a Portrait-medal of the Burgomaster Ferdinand Piercot, 1879. He contributed several papers on medal engraving and numismatics to scientific review's.

TASSIE, JAMES (*Brit.*). Modeller, 1735-1799. The following biographical account of this artist is extracted from the late W. Wroth's monograph in the *Dictionary of National Biography*, N.E., XIX, 374.

" James Tassie, born at Pollokshaws, near Glasgow, on 15th July 1735, was the fourth child of William Tassie, by his wife Margaret, daughter of James McGhie. The Tassies had long resided in Pollokshaws, and were believed to have come from Italy as refugees, and to have settled in Scotland as tanners and skinners.

" In his early days James Tassie worked as a stonemason, and his father's tombstone in Eastwood churchyard was considered to be his work. While working at his trade he found time to study modelling in the Foulis Academy at Glasgow, and in 1763 he removed to Dublin, where he became an assistant in the laboratory of Henry Quin, the physician, who occupied his leisure in making imitations of antique gems. Working together, Tassie and Quin invented the ' white enamel composition ', a vitreous paste in which Tassie afterwards cast his wax medallion-portraits, and which he used for his reproductions of gems.

Portrait of James Tassie.

" Tassie and his nephew William, kept the secret of this composition, but a recent analysis has shown that it was ' a very easily fusible glass, essentially a lead potash glass '. The ingredients were fused at a moderate heat, and when of a pasty consistency received the impression of the mould or matrix. This paste served both for the permanent mould in relief and for the impressions of intaglio gems that were taken from it. Tassie varied the colour of his reproductions with great skill, made them opaque or transparent, and imitated the varied layers of a cameo.

" In 1766 Tassie settled in London, and in 1766-7 received a bounty of ten guineas from the Society of Arts for ' specimens of profiles in paste '. About 1769 he supplied casts to Wedgwood and Bentley for reproduction in Wedgwood paste, and most of the cameos and intaglios named in Wedgwood's catalogue of 1773 were casts from moulds supplied by him. He prepared the first plaster casts that were taken of the Portland Vase.

" In 1775 Tassie published ' A Catalogue of Impressions in Sulphor of Antique and Modern Gems ', from which pastes were made and sold by him. His charge for intaglio pastes suitable for seals and rings was 1s. 6d. to 2s. 6d. and for cameos from 10s. 6d. to 42s. These were much sold by the London jewellers and by himself.

" Before 1783 Tassie had been commanded by Catherine, Empress of Russia, to furnish her with a complete collection of his coloured pastes of gems and cameos, and from about 1785 he employed as a cataloguer the Anglo-German, Rudolph Eric Raspe, famous as the creator of ' Baron Munchausen ', who issued in 1791 his well known catalogue of Tassie's collection (' A Descriptive Catalogue of Ancient and Modern Engraved Gems', London, 4to), illustrated by fifty-seven plates. The work, with its supplement, describes fifteen thousand eight hundred items reproduced from the antique, including three hundred gems which the Earl of Carlisle allowed Tassie to reproduce from his cabinet.

" Tassie's claim to remembrance as an original artist rests on his Portrait-medallions modelled from life in wax and cast in his hard white enamel paste. These are works of much distinction and charm, and furnish portraits of Adam Smith and many eminent Scotsmen. Tassie exhibited medallions at the ' Society of British Artists' from 1767, and at the ' Royal Academy ' from 1769. A collection of over one hundred and fifty medallions, founded upon the bequest made by Tassie's nephew, William, to the ' Board of manufactures ', Edinburgh, is now in the ' Scottish National Portrait Gallery.'

" A Catalogue of the Portrait-medallions by the Tassies is included in Gray's ' James and William Tassie '.

" James Tassie died on the 1 June 1799, and was buried in the graveyard of the meeting-house known as Colliers Rents in Southwark, afterwards the Mission Hall of the London Congregational Union. He was a man of modest demeanour and simple

character. From 1767 to 1772 Tassie had lived at Great Newport Street; from 1772 to 1777 in Compton Street, Soho; and from 1778 to 1791 at No. 20 Leicester Fields (Leicester Square), a house on the site of the Hotel Cavour.

"About 1793 he appears to have been assisted in modelling by his younger brother, John.

"A half-length portrait, in oils, by David Allan, his fellow-student, at the Foulis Academy, is in the National Gallery of Scotland (Tassie bequest), and there is another portrait, in oils, by John Paxton, in the Scottish National Portrait Gallery. His nephew William made two portrait-medallions of him".

Copies in bronze of medallic portraits in opaque paste, executed by James Tassie, at the end of the eighteenth century or beginning of the nineteenth, exist of James I. of Scotland, James IV., James V., and Mary (*illustrated*). That of James IV. has the private mark of Tassie, a **T** incuse, on the bust. These medallic portraits were executed by Tassie after the publication of the Catalogue of his works by Raspe, in 1791. They were probably intended to form a series of Scottish Sovereigns, which does not appear, however, to have been completed (*Medallic Illustrations*, I, p. 13).

Queen Mary Stuart.

The Tassies Portrait-medallions in enamel paste include the following which have all been modelled or cut by the Tassies many of them directly from life: —

Lord Abercromby, † 1795; — John Adam, † 1792; — Mrs. Adam; — Robert Adam, architect, † 1792 (3 var.); — Anne Elizabeth, Countess Aldborough, 1787, † 1802; — Edward Augustus, 2nd Earl of Aldborough, 1787, † 1801; — Alexander I. of Russia (after Pichler), † 1825; — Mrs. Alexander, 1791; — David Allan, painter, 1781, † 1796; — Mrs. Allan, 1781; — Alexander Allardyce, 1798; — Alstroemer Junior; — Princess Amelia, daughter of George III., † 1810; — Jeffrey, 1st Baron Amherst, field-marshal, † 1797; — James Anderson, botanist, and physician-general, Madras, † 1809; — James Anderson, of London, 1798, † 1808; — Prof. John Anderson, Glasgow, 1789, † 1796; — William Anderson, surgeon, Glasgow, 1796; — Queen Anne (after O'Brisset's medallion); — George, Baron Anson, † 1762; — John, 4th Duke of Argyll, K. T., † 1770; — Archibald Arthur, M. D.; — Lady Catherine Ashe; — Charlotte, Duchess of Athole; — John, 3rd Duke of Athole, † 1774; — Alexander Aubert, astronomer, † 1805; — Lady Auckland; — Sir Joseph Banks, Bart., naturalist, † 1820; — Lady Banks; — George Barret, R. A., landscape-painter, † 1784; — Alexander Baxter, 1798; — Peter Bayly, poet, † 1823; — Rev. James Beattrie, poet, 1787, † 1803; — Benjamin Bell, surgeon, 1792, † 1806; — Rev. Martin Benson, bishop of Gloucester (modelled by W. Whitley), † 1752; — Jeremy Bentham, † 1832; — Torbern Olof Bergman, chemist, † 1784; — Dr Bird; — Prof. Joseph Black, chemist, 1788, † 1799 (2 var.); — Rev. Hugh Blair, 1791, † 1800 (2 var.); — Robert Blair, Lord President of the College of Justice, 1792, † 1811; — Henry St. John, 1st Viscount Bolingbroke, 1740, † 1751; — Ignatz, Baron de Born, mineralogist, 1790, † 1791; — John Bowes; — John Bowman; — Sir Robert Boyd, K. B., Governor of Gibraltar, † 1794; Richard Ramsden Bramley (by William Tassie), 1804; — Miss Mary Bright; — Elizabeth, Countess of Bristol; — Robert Brown, 1791; — Jane Bruce, 1798; — David, 11th Earl of Buchan, antiquary and author, 1783, † 1829; — James Buchanan, 1799 (2 var.); — Mrs Bully, 1776; — Sir James Bland Lamb-Burgo, Bart., † 1824; — Edmund Burke, statesman, 1797 (**W. TASSIE F.**) (2 var.); — Richard Burke; — Archibald Burnett, 1799; — Robert Burns, † 1796 (mod. by W. Tassie, 1801); — James Byres, architect 1779, † 1817; — Colonel Archibald Campbell, 1797; — Colonel Sir Archibald Campbell K. B., Governor of Jamaica and Madras, 1779, † 1791 (4 var.); — Colonel John Campbell, 1801; — Lady Campbell, † 1813; — Rev. Robert Campbell, 1795; — Queen Caroline; — Cassen; — Catherine II., Empress of Russia, † 1796; — Maria Feodorowna, Empress of Russia; — Catherine II. after a model by Maria Feodorowna, 1789; — George Chalmers, antiquary, 1796, † 1825; — Elizabeth, Duchess of Chandos, 1787; — Lord Charlemont; — Prince Charles Edward Stuart; — Queen Charlotte, consort of George III., † 1818 (2 var.); — Princess Charlotte; — Charles Chauncey, physician, † 1777; — Rev. James Chelsum, virtuoso and author, 1788, † 1801 (2 var.); — Philip Dormer Stanhope, 4th Earl of Chesterfield, K. G. (after I. Gosset), † 1773; — Edward Daniel Clarke, LLD, author, † 1822; — Thomas Clarkson, slavery abolitionist, † 1846; — William Constable, a collector of gems (2 var.); — Mrs. Constable; — Rt. Hon. Henry Seymour Conway, Field-Marshal, † 1795; — Captain James Cook, circumnavigator, † 1779; — Richard Cooper, landscape painter, † after 1809; — Thomas Cooper, 1794; — Sir Trevor Corry, † 1781; — Rev. John Cross, Glasgow, 1800; — Mrs. Jean Cross, 1801; — Prof. Andrew Coventry, 1794, † 1832; — Robert Craig, Paisley, 1800 (**W. TASSIE F.**); — Thomas Crawfurd, of Carlsburn, 1785, † 1791; — William Cruikshank, M. A.; — William Cumberland Cruikshank, anatomist, 1795, † 1800; — Alexander Crum, 1791, † 1808; — Alexander Crumsmall; — William Cullen, chemist, 1786, † 1790 (2 var.); — William Augustus, Duke of Cumberland, K. G., † 1765; — Basil William, Lord Daer, politician, 1794; — David Dale, industrialist and philanthropist, 1791, † 1806; — George Dempster, of Dunnichen, politician, † 1818; — Sir John English Dolben, 4th Baronet of Finedon, † 1837; — Sir William Dolben, 3rd Baronet of Finedon, 1779, † 1814; — James Donaldson, Glasgow, 1796, † 1797; — Lord Ducie, † 1808; — Charles François Dumouriez, † 1823; — Adam, 1st Viscount Duncan, admiral, 1797, 1798, † 1804 (4 var.); — Robert Dunmore, of Kelvinside, 1791; — Janet Napier Dunmore, 1791; — The Dunmore children, 1791; — Rev. Louis Dubens, diplomatist and author, † 1812; — Rev. Alexander Easton, 1794; — Thomas Elder, Lord Provost of Edinburgh, 1795, † 1799; — Erasmus; — Rev. John Erskine 1801, † 1803 (W. Tassie); — The Hon. Henry Erskine, Lord Advocate, 1791, † 1817; — Mrs. Ewing (Isobel Reid), 1795, † 1814; — Fénelon, François de Salignac de la Mothe, archbishop of Cambray. † 1715; — Prof. Adam Ferguson, historian, 1791, † 1816; — Ralph Fisher; — James Forbes, 1791, † 1819; — Sir William Forbes, Bart., 1791, † 1806; — Rev. James Fordyce, † 1796 (2 var.); — Sir William Fordyce, physician, † 1792; — Robert Foulis, 1776, † 1776 (2 var.); — Charles James Fox, † 1806; — Benjamin Franklyn, † 1790; — Col. the Hon. Archibald Campbell Fraser, 1795, † 1815; — Captain Sir William Fraser, 1st Baronet of Ledeclune, 1807, † 1818; — Frederick the Great, † 1786 (2 var.); — Robert Freer, 1800, † 1827 (W. Tassie); — Robert Freind, † 1751; — Mrs. Freind (Jane de l'Angle); — William Hall, 2nd Viscount Gage, † 1791; — General The Hon. Thomas Gage, † 1787; — Mrs. Gage; — David Garrick, 1780 (2 var.); — George I.; — George II.; — The Children of George II.; — George III. (4 var.); — George IV. (W. Tassie); — John Gibbon; — William Gillespie, 1791, † 1807; — Lord Glenlee; — Alexander Gordon, Glasgow, 1796; — Elizabeth Gordon, 1795; — Duke of Gordon (mod. by Hagbolt), † 1827; — Lord George Gordon, 1781, † 1793 (3 var.); — Archibald Grahame, 1795, † 1806; — Jane Grahame, 1796, † 1850; — Miss Jane Gray, 1792; — Prof. James Gregory, physician, 1791, † 1821; — John Griffiths, 1798; — John Guthrie, 1796, † 1834; — Rev. Archibald Hall, 1776 (signed: **T**), † 1778; — Rev. James Hall D. D., 1790, 1794 (3 var.); — Mrs. Hall, 1795, † 1829; — — Agnes and Isabella Hall, 1795; — John Hall, 1796; — Douglas, 8th Duke of Hamilton, † 1799; — Gilbert Hamilton, provost of Glasgow, 1796, † 1808; — Colonel Henry Hamilton; — W. Hamilton, 1786; — Rt. Hon. Sir William Hamilton K. B., diplomatist and archaeologist, 1784, † 1803 (2 var.); — John Handerson; —

TASSIE, WILLIAM (*Brit.*). Modeller, 1777-1860. Born in London in 1777, was the son of David Tassie, the modeller.

"On the death of his uncle James in 1799 he succeeded to his property", says Wroth, "and continued to carry on his business at No. 20 Leicester Square. He began to add to James Tassie's collection of reproductions of gems and medals, and furnished additional casts to the imperial collection of Russia. His seals and gems in composition paste, inscribed with original mottoes and devices were especially popular, and he published a 'Descriptive Catalogue' of them in 1816 (2nd ed. 1820). Another Catalogue of his impressions from gems, etc., was published in 1830.

"His collection of intaglio and cameo impressions, in enamel, sulphor, or paste, was enormously added to during the forty years that he was in business and at last consisted of more than twenty thousand specimens.

"Among the gems were many originals (by Marchant, Burch, and other artists employed by Tassie) of contemporary notabilities, including Napoleon, Nelson, and Lady Hamilton. His collection had a world-wide fame. In 1882 (22 March) Shelley wrote to Thomas Love Peacock to procure for him 'two pounds worth of Tassie's gems'.

Portrait of William Tassie.

"Tassie also modelled Portrait-medallions in wax and cast them in the white enamel paste used by James Tassie, but his work has not the ease and precision of his uncle's.

"A medallion of James Tassie, and one of Professor Robert Freer, are cited by Gray as favourable examples of his work (see also the medallions in the catalogue in Gray's Tassie, pp. 81-170). He executed a set of twelve medallions of the Passions, signed "**W. T.**". In 1840 Tassie retired from his prosperous business, which was thenceforth carried on by his partner John Wilson, an artist who entered Tassie's employment about 1827, and exhibited at the Royal Academy in 1824-56. Tassie settled at 8. Upper Phillimore Place, Kensington, where he died, unmarried, on 26. October 1860. He was buried in Brompton Cemetery.

"Tassie was a kindly, cultivated man, and his studio in Leicester Square was a sort of lounge for artists and literary men, including Moore and Byron. A wax medallion-portrait of Tassie, by T. Hagbolt (circa 1833) passed into the possession of his great-nephew, Prebendary Vernon, and is roproduced in Gray's 'Tassie' (p. 60).

"On 28. January 1805 Tassie won, by a ticket which he had purchased out of kindness from a poor artist, the chief prize in the Boydell lottery, consisting of the Shakespeare Gallery, pictures and estate. He made a present to the artist and sold the whole property by auction in May 1805. The works of art realized more than £6.180 (Wheatley, London Past and Present; British Institution).

"By his will Tassie left a large collection of the moulds and impressions of gems executed by his uncle and himself to the 'Board of manufactures', Edinburgh, together with various pictures. The items of this bequest are now exhibited in the Scottish National Portrait Gallery and in the National Gallery of Scotland. Another portion of his collection passed into the possession of his nephew, William Hardy Vernon, who in early life had been in partnership with him; Vernon who himself cut a beautiful intaglio of the heads of Milton and of Byron for each of which Murray gave the artist £10, died Vicar of Wootton, Bedforshire, in November 1880, aged 85. Part of his collection was sold in Wootton in February 1881. The remainder was sold at Christie's in April 1882. Many of the large Tassie medallions were included in the Shadford Walker Sale in 1882."

Among the Portrait-medallions mentioned under James Tassie, quite a number were modelled by William Tassie.

TASSINARI, CÉSAR (*French*). Contemporary Gem-engraver, born at Marseilles, from Italian parents; pupil of the well-known Cameo-cutter, Luigi Isler.

In the Paris Salon Catalogues, the following exhibits by this artist are recorded : 1891. Portrait-cameos in sardonyx of M^lle M. D***; — Edison; — 1892. M. D***; — M. Eugène de White; — 1893. M. Eugène de White; — 1898. Edward F. Armstrong, etc.

TASSINI, (PAOLO DI CLEMENTE). A Florentine Medallist, who signed **C. P.** (*q. v.*) (Cf. Blanchet, *Numismatique du moyen âge et moderne*, II, 374, and Armand, *op. cit.*, III).

TASTA, MATHIEU RENARD DU (*French*). Mint-master at Angers, mentioned on 7. June 1717.

TASTA, RENARD DU (*French*). Director of the Paris Mint, under Louis XV.; privy mark, a fox.

TAT, GABRIEL (*French*). Mint-master at Turin, 1541-1544; privy mark, **GT**. He coined for Francis I.; Mint-mark V under the shield.

TATTEGRAIN, GEORGES GABRIEL (*French*). Contemporary Sculptor, born at Péronne (Somme); pupil of M. Sollier. He is the author of some Portrait-medallions, one of which was exhibited at the Salon in 1877.

TATTI, JACOPO. Surname of Sansovino (*q. v.* vol. V, p. 332).

TAUBENREUTHER, CHRISTOPH (*Austr.*). Mint-master at Joachimsthal, 1600-1604. Privy-mark a double lily. D^r Fiala describes two counters of him, with his name and arms (*Donebauer Samml.*, n^os 3937-8).

TAUBMAN, F. M. (*Brit.*). Designer of a Medal of the Neasden Golf Club, 1905 (*Brit. Num. Journ.*, I, 415).

(*To be continued*).

INDO-PORTUGUESE NUMISMATICS.

THE GOLD ISSUES OF GOA.

In the year 1498 Portuguese ships first appeared off the West Coast of India and within a quarter of a century from that date the Portuguese had obtained so complete a mastery of the Indian seas that no foreign vessel could trade with the ports of the West Coast, without their licence, on pain of being treated as a pirate. The Monopoly of that trade which had so enriched the Muhammadan powers which controlled the Persian-Gulf and Red-Sea routes was broken and, for the next 100 years, the monopoly of the supply of the commodities of Asia to Europe, or at least to the nations of Western Europe, was absolutely in the hands of the Portuguese. Besides securing the control of the seas the Portuguese erected strong forts at various coast towns and, in 1510, the great Affonso de Albuquerque, the real founder of the Portuguese dominion in Asia, decided to seize the island of Goa and to make it the seat of the Portuguese Government in Asia. In February 1510 he, accordingly, beseiged and took Goa but only to lose it three months later. In November of the same year, however, he again attacked and retook the island and Goa has ever since remained the chief possession of the Portuguese in India and the seat of Government. The second capture of Goa, by d'Albuquerque, occurred on November 25^th 1510 — the anniversary of the martyrdom of St. Catharine and the wheel (roda), the instrument of her martyrdom, was made a part of the Arms of Goa.

When Affonso de Albuquerque first took Goa the principal inhabitants of the place represented to him that trade and business of all kinds was hampered by the great scarcity of currency and appealed to him to cause money to be issued. After much hesitation he yielded to their persistence, caused a Mint to be opened and arranged for coins to be struck, in the name of the King of Portugal, of gold, silver and copper, corresponding in size, value and weight, with the pieces which had been current previously in Goa but of a new and European type. He also commanded that all coins of the dispossessed Muhammadan ruler should be brought to the Mint to be exchanged for the new pieces and that such Muhammadan coins should no longer be current in Goa. A very interesting account of the opening of the Mint and its attendant ceremonies is given in the late Dr. G. da Cunha's "Contributions to the Study of Indo-Portuguese Numismatics", Folios 8, 9 and 10, Bombay, 1883. The Mint was, of course, closed when the Portuguese lost the City but it was reopened on their recovering possession. Thenceforward it remained open and, almost continuously, at work until 1869, when it was finally closed.

Information about the type and denominational values of the coins issued has to be gathered, not from contemporary official documents, which, apparently, do not exist, but from works, published some fifty years after the event, such as the "Commentarios do Grande Afonso Dalboquerque" by Braz de Albuquerque (son of the great hero), first printed in Lisbon 1557; the "Lendas da India" by Gaspar Correa, etc., etc. but, unfortunately, the accounts contained in such works do not agree as to the type or denominational values. Several contradictory descriptions of the type are given by Dr. da Cunha (Folios 11, 12, 21, 22 and 38); and, on Folio 11, he gives the value of the Cruzado or Manoel as 420 reis and, on Folio 12, as 34 vintens or 680 reis. But on this occasion: —

"Non ragioniam di lor ma guarda e passa".

As regards the type of the issue Braz de Albuquerque distinctly says that a Cross of Christ was on one side and a sphere (the device of D. Manoel I. King of Portugal) on the other. — Pieces of that type, in gold, silver and copper, are, fortunately, in existence to bear out his statement. But Braz de Albuquerque speaks of a copper dinheiro — 3 to the leal — having been issued and omits to mention the gold meio Manoel. No dinheiro, — 3 to the leal — of the type, has yet come to light but a Meio (half) leal or pequenino — 2 to the leal — (a value far more likely to have been issued) exists and is, probably, the coin referred to as a dinheiro. A meio (half) Manoel is described and illustrated later.

The following is a description of the Gold coins issued, by d'Albuquerque, from the Goa Mint in the reign of D. Manoel I. (1495-1521).

1. The Cruzado (later called a Manoel).

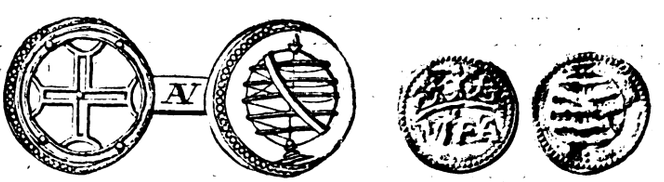
Obv : Cross of the Order of Christ within two line circles enclosing four beads at equal distances with a fifth bead in the centre of the Cross, the whole surrounded by a bead circle.

Rev : The Armillary sphere surrounded by two line circles enclosing a bead circle. Weight 3. 45 grammes. 21 mill.

2. The Meio or half Manoel.

Obv : The word "Mea" with royal Crown over surrounded by a bead circle.

Rev : The Armillary sphere surrounded by a bead circle. 17 mill. 1.70 gramme.



The larger piece, which was intended to replace the native Hun or Pagoda of about the same weight, is described and illustrated in the "Diccionario de Numismatica Portugueza", Folio 180, by I do Amaral B. de Toró, printed in Oporto, 1886. Mr. de Toró mentions that the specimen exists in his collection and suggests that the five beads, around and in the Cross, on the obverse, represent the quinas — the central shield, enclosing five shields, of the Arms of Portugal. The smaller piece may have been issued when it was decided to change the name of the larger piece from Cruzado to Manoel, with the royal Crown replacing the Cross on the obverse to indicate that it was money of the King. D'Albuquerque had not submitted the designs for his coins to the king and had not even obtained the royal assent to the coinage as the currency needs of the Goa Community had been pressed upon him as being too urgent to allow of the necessary delay.

No other Gold coins appear to have been struck at the Goa

Mint in this reign and, in 1519, the Governor promulgated an order that no more gold, or silver, coins should be issued (Da Cunha. Fo : 28). The Mint continued to issue copper coins but it did not resume the minting of gold pieces until 1549 and the coins issued then were of an entirely changed type. In the interval the Apostle St. Thomas had been adopted as the Patron Saint of India and his relics had been duly found at Malaypur, a mile or two from Madras. Whether the Apostle ever reached India is a question quite open to doubt and those interested will find the question ably discussed by the Revd. G. Milne Rae in an article contributed by him to the Madras Journal of Literature and Science, Madras, 1889.

However that may be the Portuguese, having adopted St. Thomas as their patron saint for India, decided to have his effigy on their Indian gold pieces and to call the pieces St. Thomés after him. From then, until the closing of the Mint, in 1869, all gold pieces issued by the Goa Mint are called St. Thomés. They are of three main types with, of course, varieties in each type. The earliest type has the figure of the saint seated, the second type has the saint standing and the third and last type has the Cross of St. Thomas substituted for his effigy.

In the reign of D. João III (1521-1557) there were two distinct issues of gold St. Thomés by the Goa Mint. The pieces were called Pardaos S. Thomé. They were equivalent to the Hindu gold Pagodas. Pardao d'ouro and pagode were, with the Portuguese, interchangeable terms (Da Cunha Fo : 47).

The first issue was during the Viceroyalty of D. João de Castro (1545-1448) see Folio 137, Vol. 3. of the late Dr. Teixeira de Aragão's splendid work "Moedas cunhadas em nome dos Reis, Regentes e Governadores de Portugal, "Lisbon, 1880.

The following is a description of a specimen : —

Obv : Crowned Arms of Portugal, between I (João) on left and ȝ (3) on right, surrounded by a bead circle.

Rev. :-Seated figure of St. Thomas with nimbus and flail, facing to right, between Ƨ (S) — T (St. Thomas), surrounded by a bead circle. 19 mill. 3.22 grammes.

The second issue of the Pardao S. Thomé was made in the year 1548/9, when D. Garcia de Sá was viceroy (Aragão, Fo. 140). This issue is precisely of the same type as the preceding, even to the reversed S on the reverse, and was evidently struck from the same die. The pieces are of the same diameter but are 12 ½ o/o lighter and weigh only 2.80 grammes. This reduction in weight and intrinsic value was made, no doubt, with the object of preventing the pieces from being melted down and to keep them in circulation. A specimen, of this second issue, is described (No. 3259) and illustrated (Pl. 8) in the Catalogo da Collecção Numismatica de J.-G. de Souza Braga, printed by Orosco and Co., Rio de Janeiro, 1906.

Another gold piece, but much larger and weighing 9 grammes, resembling, in type and size, the São Vicentes of the period, struck for Portugal, has been classed as an Indian S. Thomé. It, however, in no way assimilates with the native gold pieces circulating on the West Coast of India, in size or weight, and Affonso de Albuquerque kept this object in view when striking his coins at Goa (Da Cunha Fo : 10). The piece was struck in Lisbon, probably, more as a commemorative piece than as a coin meant for circulation in India. But as it relates to India and to St. Thomas a description of it is given here : —

Obv : Crowned Arms of Portugal surrounded by the legend JOA : III : POR : ET : AL : R.

Rev : Standing figure of St. Thomas facing left, between the letters S T, and surrounded by the legend : INDIA : TIBI : CESSIT. 29 mill. 9 grammes.

The illustration is taken from the before mentioned collection of J. G. de Souza Braga, Pl. 9. The piece is also illustrated by Aragão Pl. 1, no. 1 and by Dr. da Cunha, Pl. 2, no. 6. The legend, round the figure of St. Thomas, refers to India having been assigned to him as the sphere of his Apostolic labours and, at the same time, delicately suggests the acquisition of India by D. João III.

The next gold piece, of the Goa Mint, is another Pardao S. Thomé differing greatly from the similar pieces of the reign of

D. João III but weighing 2.80 grammes like the specimen of the second issue of that reign. The seated figure of the Saint faces to the left, instead of to the right, and the piece is, probably, an issue of the reign of D. Sebastião (1557-1578).

The following is a description of the Coin : —

Obv. Crowned Arms of Portugal between the remains of two letters, one above the other, on the left, and a roda (wheel) on the right surrounded by a line circle.

Rev. Seated figure of Saint with nimbus and flail, facing left, between S — T (Saint Thomas), with a five-rayed star beneath each letter, surrounded by a line circle. 18 mill, 2.80 grammes.

The piece is in the writer's collection and is here illustrated. Unfortunately, the two letters, on the left of the Portuguese arms, are undecipherable, and so until a specimen is found with those letters perfect, it will be impossible to say, with certainty, to which reign the coin should be assigned. Gold pieces were ordered, in 1568, to be struck at the Cochin Mint and no specimen of that issue has yet been discovered but the roda (wheel), to the right of the arms, on the above piece, seems to indicate that it is an issue of the Goa, and not of the Cochin, Mint. Aragão (Fo. 155) refers to gold S. Thomés having been struck at the Goa Mint in the reign of D. Sebastião, but gives the weight of the pieces as 3.20 grammes, namely that of the first issue of the reign of D. João III. But the weight of such pieces, issued in the reign of D. Sebastião, is far more likely to have accorded with that (2.80 grammes) of the later issue of D. João's reign and for the same reasons.

This is the first instance of the device of a roda (wheel) appearing on Portuguese-Indian Coins. Later, in the reign of D. João V (1706-1750), this device appeared on many tutenag pieces which, in consequence, were called Rodas.

Of the gold S. Thomés, issued during the next one hundred years, no specimen is known. Documents, however, fortunately, exist which prove that such pieces were issued throughout that period and, sooner or later, specimens will come to light and be identified. Aragão's fine work, already frequently referred to, contains copies of about 140 official documents relating to Goa mint-matters and to the coins for the Indo-Portuguese possessions.

In the reign of D. Filippe I (1580-1598) the Viceroy tried to fix the value of the gold S. Thomé, of the period, at 8 ½ tangas — the value, previously, having been 6 to 7 tangas (Document 34, March 19th. 1595).

In the reign of D. Filippe II (1598-1621) gold S. Thomés are referred to in Document No. 50, Dec. 25th. 1608. Aragão also mentions them on Folio 192.

In the reign of D. Filippe III (1620-1640), Document No. 80, of Nov. 5th. 1631, No. 82 of March 15th. 1634 and No. 83 of August 1634 all refer, among other matters, to gold S. Thomés issued by the Count de Linhares. Fortunately these documents give some clue to the type and value of the pieces issued. They shew that the Viceroy, the Count de Linhares, had substituted, on the reverse of the coins, the Cross of S. Bento de Aviz for the figure of

Original from CORNELL UNIVERSITY

the Saint and that, in consequence, the king had ordered the issue to be called in. In the letter, from the king, dated March 15th. 1634 (Doc. 82), it is expressly stated that the effigy of the Saint had always been on the gold pieces and that the gold pieces had always been called after the Saint in consequence. The gold pieces mentioned, are a S. Thomé, of the value of 3 Xerafins and 12 reis, with the arms of Portugal, on one side, and a Cross of Aviz, on the other, with the value 912 — (the Xerafim being equal to 300 reis) shewn also on one of the sides; and two other pieces of the value of 300 reis and 150 reis, respectively, and of the standard of the old S. Thomés.

This is the only occasion on which the Cross of Aviz was displayed on any coins of the Indo-Portuguese series. Two of the silver pieces of the issue, the Patacão, weighing 17.35 grammes, and the Meio (half) Patacão, weighing 8.60 grammes (not 9.30 grammes as mentioned, in error, by the late Mr. de Campos in O Archeologo Portugués, Vol. 7, Nos. 8 and 9 of 1902), have been saved from oblivion and are in the writer's collection. They are here illustrated as the illustrations may lead to the identification of the gold S. Thomé of the same issue.

In the reign of D. João IV (1640-1656) the Council at Goa ordered that all gold from China or Mozambique should be taken to the Mint to be coined into S. Thomés of the standard of old S. Thome's and of the value of 4 Xerafins and 30 reis apiece (Aragão, Fo : 230 and Da Cunha, Fo. 61).

In the reign of D. Affonso VI (1656-1667) the Goa Mint continued to coin gold S. Thomés and a reference thereto is contained in " Les six voyages, &c. " de J. B. Tavernier, published in Paris in 1676. In Part II, of that work, Tavernier mentions a gold piece, which he says was struck at Goa, called a S. Thomé, worth 4 rupees or six French francs and which weighed one grain more than a demi-pistole. Tavernier also gives an illustration of the piece which is here reproduced :

It is also reproduced by Aragão, Pl. 2, No. 10, and by Da Cunha, Pl. 4, No. 15. — The latter (Fo. 62) doubts whether such a coin was ever in circulation as no mention of such a type is to be found in the archives of the Goa Secretariat and because other pieces drawn by Tavernier have been proved to be inaccurate. But many pieces not mentioned in the archives of the Goa Secretariat exist and it is difficult to think that Tavernier could have drawn such a piece without having seen one more or less like it. Besides it is not so very unlike the S. Thomés of 1677 and 1680, illustrated further on, which had not been issued at the date of the publication of Tavernier's work.

The S. Thomé, illustrated by the late Dr. J. Meili, in his work " Variedades e alguns exemplares ineditos da Moeda portugueza ", No. 24, printed in Zurich 1890; and also referred to by the late Mr. J. de Campos, on Folio 229 of his " Numismatica Indo-Portuguesa ", Lisbon 1901, as being a S. Thomé of this reign, is really a S. Thomé of 5 Xerafins of the reign of D. João V, as will be shewn later.

So, although issued, no S. Thomé has yet been discovered of the reigns of D. Filippe I, D. Filippe II, D. Filippe III, D. João IV and D. Affonso VI.

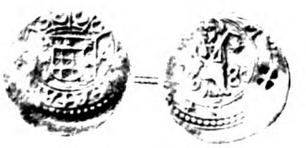
During the Regency of D. Pedro (1667-1683) the Council ordered (Document 101 of May 1678) that the value of the gold S. Thomé, which had been slightly lowered in previous reigns, should he raised and be fixed at 5 Xerafins; and also ordered the striking of gold pieces, to be called Xerafins de Ouro or Gold Xerafins, of the same type and value as the silver Xerafins which had, as obverse, the Cross of Christ with the figures of the date in the angles of the Cross. No specimen of the Xerafim de Ouro of the period has yet been discovered but the following gold S. Thomés of 5 Xerafins are known, viz : —

1. Obv. Crowned Arms of Portugal between (G.) — A, surrounded by legend (illegible) within line circles.

Rev. Standing figure of St. Thomas with nimbus and flail, to left, between 16-77, a small cross under the flail, surrouuded by legend (illegible) within line circles. 19 mill. 3,4 grammes.

2. Obv. Crowned arms of Portugal between G A surrounded by legend (illegible) within line and bead circle.

Rev. Standing figure of St. Thomas with nimbus and flail, facing left, between figures of date (16)-80, a star beneath the flail, surrounded by remains — S. T (-) M (—) of legend within line and bead circles. 18 mill. 3,4 grammes.



When more perfect specimens of these pieces are discovered, it will, probably, be found that, although issued during the Regency of D. Pedro the legend will refer to D. Affonso VI, who did not die till 1683, as the word " Rex " appears to be part of the legend on the obverse of the 1677 piece. These pieces are the earliest specimens, so far known, of the type of S. Thomé with the standing figure of the Saint. They formerly belonged to the late Dr. Julius Meili and were sold with his collection, in Amsterdam, in May 1910, Nos. 1414 & 1415 of the sale catalogue. The 1677 piece is mentioned by Mr. de Campos (Folio 229) as of the date 1673.

In May 1685 (Aragão Fo. 263) the Council at Goa resolved to issue Gold S. Thomés of 20 and 10, as well as of 5 Xerafins, of the same type as preceding pieces, but no specimen of that issue or of any issue of D. Pedro II (1683-1706), as king, has yet been discovered, and, although ordered, the larger pieces, the 10 and 20 Xerafins, were, probably, never struck.

In the reign of D. João V (1706-1750) the Goa Mint continued to issue S. Thomés with the standing figure of the Saint — first with the date and later undated.

On September 9th. 1713 (Aragão, Document 112) the Viceroy ordered the striking of a fresh issue of S. Thomés of 5 Xerafins to weigh only 2.8 grammes, instead of the 3.4 grammes of the former issues, and to be called S. Thomés novos (New S. Thomés) to distinguish them from the S. Thomés of 5 Xerafins issued before 1713, which were to be called S. Thomés velhos (Old S. Thomés) and which, in future, were to be current at the enhanced value of 6 Xerafins 15 reis. Pieces of 10 and 2 ½, as well as of 5, Xerafins were issued and of the same type as that of the earlier pieces. Specimens of this issue are known of the dates 1713, 1714, 1715 and 1717.

1. S. Thomé of 10 Xerafins.

Obv. Crowned arms of Portugal between G A surrounded by legend (IOA)NNES.V. within 2 line circles.

Rev. Standing figure of Saint with nimbus and flail to left between 17-14 surrounded by legend within line circles. 20 mill. 5.6 grammes.

2. S. Thomé of 5 Xerafins.

Obv. Crowned Arms of Portugal between G A surrounded by legend IOAN — within line and bead circles.

Rev. Standing figure of the Saint with nimbus and flail, facing left, between 17-14, a small star each side of figure above the date, surrounded by legend S-ME within line and bead circles. 18 mill. 2.80 grammes.

3. S. Thomé of 2½ Xerafins.

Obv. Crowned arms of Portugal between — A surrounded by legend.

Rev. Standing figure of Saint between 17-15 surrounded by legend within line and bead circles. 14 mill. 1.40 grammes.

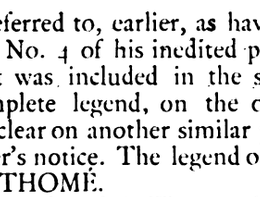
The above S. Thomés of 10, 5 and 2 1/2 Xerafins belong to Dr. J. A. d'Azevedo Borralho of Lisbon, who kindly allows them to be illustrated in this article.

This issue probably ceased about 1717 and was succeeded by an issue of S. Thomés of 5 Xerafins of a slightly different design and without date but with the weight (2.8 grammes) unchanged.

The following specimen :

Obv. Crowned Arms of Portugal between G A, with some letters S.V.R.P. and bead circle.

Rev. Standing figure of St. Thomas with nimbus and flail, facing to left, with star beneath the flail, with letters. ME. and bead circle. 16 mill. 2.80 grammes.



This is the coin referred to, earlier, as having been mistaken by the late Dr. J. Meili, No. 4 of his inedited pieces, for a S. Thomé of D. Affonso VI. It was included in the sale of his collection, No. 1410. The complete legend, on the obverse, is IOANNES V.R.P as was made clear on another similar piece which, recently, came under the writer's notice. The legend on the reverse was probably S.TME for S.THOMÉ.

This is the last issue of gold S. Thomés displaying the figure of the Saint. Later issues have the Cross of St. Thomas instead of his effigy.

Simultaneously with the above pieces small gold coins, of the value of One Xerafin, were issued, of a type corresponding with that mentioned in the resolution of the Goa Council of the previous reign, dated May 1678 (Aragão Document 101), which ordered gold Xerafins to be issued with a Cross of Christ on the reverse. But these gold Xerafins weigh only .57 grammes, a fifth of the weight (2.8 gr.) of the new S. Thomés of 5 Xerafins whereas the earlier gold Xerafins would have weighed. 68 gr., a fifth part of the weight (3.4 gr.) of the old S. Thomés of 5 Xerafins.

The following is a description of a Xerafin de Ouro (gold Xerafin) of 1718.

Obv. Crowned arms of Portugal between G A surrounded by bead circle.

Rev. Cross of Order of Christ with figures of date 1718 in angles of Cross surrounded by bead circle. 13 mill. 57 grammes.

Specimens are known of the years 1715, 1716, 1718 and 1721 and Mr. J.M. do Carmo Nazareth, in the catalogue of his collection, Nos. 321 and 322, printed in Nova Goa 1896, describes two, as of 1728, but adds that the figures of the date are very indistinct. The date of those pieces will, probably, be found to be 1718. Mr. de Campos (Fo. 180) says that these Xerafins de Ouro were struck in accordance with the law of September 9th 1713, which fixed the weight of the S. Thomé of 5 Xerafins at 2.8 grammes, giving .57 gr. to each Xerafin, but he quotes one of 1705 and another of 1711 as belonging to Dr. J. Meili. Both these pieces are now in the writer's collection and the dates are 1715 and 1721.

A radical change, in the type of the S. Thomé, was made, in 1728, in accordance with the resolution of the Goa Council of September 2nd of that year. The figure of the Saint, on the coins, was considered to have so degenerated that the council decided to do away with it and to substitute for it the Cross of St. Thomas; and to issue pieces of 10, 5 and 2 1/2 Xerafins of the new type but of unaltered weight. Aragão (Fo. 291) says, by mistake, that, on September 2nd 1728, the Council ordered the coining of S. Thomés of *12* Xerafins and with the *Cross of Christ* on the reverse. But Mr. J.M. do Carmo Nazareth sent a copy of the actual resolution to Mr. de Campos (see the latter's illuminating article in O Archeologo Português, Vol. X, Nos. 3 and 5 of 1905) and it orders, as above stated, S. Thomés to be struck with the *Cross of S. Thomas* on the reverse and of the value of *10*, *5* and *2* ½ Xerafins.

In virtue of this Order of the Council, dated September 2nd 1728, S. Thomés were issued of the new design and all later S. Thomés display, on the reverse, the Cross of St. Thomas.

The following is a specimen of a S. Thomé of 10 Xerafins, of the new issue, dated 1737.

Obv. Crowned Arms of Portugal within a bead circle.

Rev. Cross of S. Thomas with the long lower arm of the Cross separating the figures of date 17 37 with the letters CR(v)S D(e) S.T(ho)ME around and surrounded by a bead circle. 18 mill. 5.67 grammes.

Specimens of the S. Thomé of 10 Xerafins, of this type, are known of the dates 1729, 1732 and 1737 but no specimen of the lower values (5 and 2½ Xerafins) has yet been found. Mr. de Campos thought that the lower values may not have been issued, as not being necessary, owing to the Portuguese Dobra of 4 escudos being plentiful in Goa at the time.

This was the last issue of gold coins during the reign of D. João V and no new law was passed for striking gold pieces until 1761. No pieces seem to have been issued between 1737 and 1761. But the law of February 11th 1743 (Aragão Document 120) ordered that the above S. Thomé of 10 Xerafins should be current at the enhanced value of 11 Xerafins.

Aragão (Pl. 15, No. 7) illustrates what appears to be a pattern S. Thomé of 10 Xerafins with the lower arm of the Cross dividing the date 17 37 and the legend IH-CR-V.S.P.S.-IH(esus) C(h)R(istus) V(enit) S(alvare) P(opulum) S(uum) on the reverse weighing 5.56 grammes.

In the reign of D. José I (1750-1777) the first gold pieces were struck in accordance with the law of November 11th 1762 (Aragão Document 125) of the same type as the S. Thomé of 10 Xerafins of 1737, as above illustrated, but of the value of 128, 4 and 2 Xerafins — the 12 Xerafins, however, weighing only 4.88 grammes

as against the 5.67 grammes of the 10 Xerafin piece of 1737. The issue was made in the years 1762, 1763, 1764 and 1765 but only specimens of the S. Thomé of 12 Xerafins are known. The reference to a 4 Xerafin piece by Dr. da Cunha (Fo. 96), as belonging to the Honble. James Gibbs, being much too vague for that to be accepted as a reliable specimen of the above type.

The following is an illustration of a S. Thomé of 12 Xerafins of

1764. 19 mill. 4.88 grammes.

In 1766 a fresh issue of S. Thomés of 12, 8, 4 and 2 Xerafins was made with a new value, a S. Thomé of 1 Xerafim, added and, for the first time in the history of the gold issues, with the value, in Xerafins, displayed on the Coins. The three larger pieces are of the same general pattern, viz :

Obv. Crowned Arms of Portugal within bead circle.

Rev. Cross of S. Thomas with top arm of Cross separating the value 12 X and the lower arm separating the figures 17-66 of date within bead circle.

The 2 Xerafin, in some years, had a Crown, instead of the Portuguese Arms, for obverse. The obverse of the 1 Xerafim is a Crown and the piece is undated and has the value I-X separated by the lower arm of the Cross. The five pieces weigh, respectively, 4.9, 3.25, 1.62, .80 and .40 grammes. The following are illustrations of S. Thomés of 12, 8 and 2 Xerafins of this series.

The issue was continued till 1775 inclusive.

In his " Diccionario de Numismatica Portuguesa " Mr. J. do Amaral B. de Toró, Fo. 140, gives an illustration of a S. Thomé of *12* Xerafins, of the above type, dated *1731*. In O Archeologo Português, Vol. 10, Parts 3/5, 1905, the late Mr. de Campos conclusively proves that such a piece is an impossibility and for the following sufficient reasons :

1. That no S. Thomé, of the value of 12 Xerafins, was issued prior to 1762.

2. That the value, in Xerafins, was not displayed on any S. Thomé earlier than 1766.

Mr. de Campos roundly states the illustration to be a creation of Mr. B. de Toró's imagination ; and the conical form of the figure 1, of the date and value in the illustration, to which Mr. de Campos also refers, also proves that the piece could not possibly have been a specimen of 1781 mistaken by Mr. de Toró for a piece of 1731. Unfortunately, Dr T. de Aragão was deceived by Mr. de Toró's illustration and reproduced it in his great work, Pl. 2, No. 1, as the only gold piece issued in the Viceroyalty of D.J. de S. de Gama (1725-1732) and as confirming his own mistake in reference to the resolution of the Goa Council, of September 2nd 1728, already alluded to. Dr. G. da Cunha quotes the piece in his Contributions, Fo. 78 ; and even Mr. de Campos, before he had discovered the fraud, mentions it, without any suspicion, in his Numismatica Indo-Portuguesa, Fo. 230. And so one mistake leads to others.

In 1775 the design was again changed but without any alteration in the weight of the pieces and, in the issue, the S. Thomé of 1 Xerafim was omitted. In the new design the value is given in words, instead of figures, thus : doze (12), otto (8), quatro (4) and dous (2), round the top of the Cross. The pieces were issued, in each year, up to and including 1780. The following is an illustration of a S. Thomé of 12 Xerafins of this issue. 17 mill. 4.87 grammes.

In 1781, when D. Maria I was on the throne of Portugal, the Goa Mint reverted to the design of the S. Thomés of 1766-1775 and issued a S. Thomé of 12 Xerafins with the value again given in figures, instead of words, and with the flat-top shield of the previous reign. It is not known whether pieces of lower value than 12 xerafins were issued. The following is an illustration of the S. Thomé of 12 Xerafins. 17 mill. 4.86 grammes.

In the following year (1782) the Goa Mint, in making a fresh issue of S. Thomés, altered the shield of the Portuguese arms to a Louis XV rococo shield and that type of shield, with slight variations, was retained on the pieces for the next 25 years. Small differences in the shape of the crown, in the form of the letter of value or in the position of the figures of the date are found in some years but the general type was maintained throughout.

Between 1782 and 1807 S. Thomés of 12, 8, 4 and 2 Xerafins were issued, the 12 Xerafin piece in each year and the other values less frequently. The following are illustrations of S. Thomés of 12 and 4 Xerafins. Weighing respectively 4.88 and 1.7 grammes.

In 1807, while D. João was Regent, the Louis XV rococo shield was discarded and gold S. Thomés were struck with the arms of Portugal in an oval shield. The following is an illustration of a S. Thomé of 12 Xerafins of 1814 of this type. 18 mill. 4.7 grammes.

S. Thomés of other values were also issued and of various dates.

In 1819, when D. João had become king, as D. João VI, a fresh issue of gold S. Thomés was made with the United Arms of Portugal and Brazil, on the obverse, instead of the Portuguese Arms in the oval shield but S. Thomés, with the oval shield, were also struck in 1819. The issue was continued till and including 1825.

Specimens are known of the S. Thomés of 12, 4 and 1 Xerafins so, probably, the pieces of 8 and 2 Xerafins were also issued. The following is an illustration of a S. Thomé of 12 Xerafins, of this type, dated 1819. 17 mill. 4.77 grammes.

Original from CORNELL UNIVERSITY

No gold pieces are known of the reigns of D. Pedro IV (1826-1828) or of D. Miguel I (1828-1834).

In the reign of D. Maria II (1834-1853) gold S. Thomés of 12 Xerafins were issued in the years 1840 and 1841. For obverse they had the Portuguese Arms, in a square shield, between two laurel branches. The following is an illustration of a S. Thomé of 12 Xerafins of 1840. 16 mill. 4.9 grammes.

No other value of this issue is known and the S. Thomé of 1841 is the last gold coin issued by the Goa Mint.

The frequent use of the word " probably " and the number of pieces indicated as still unknown shew that much remains to be discovered concerning the gold coins of Goa.

On Folios 357/370, of his " Numismatica Indo-Portugueza ", Mr. de Campos gives a long list of gold S. Thomés known to him at the time of writing that work.

The Goa Mint continued to issue copper coins till 1848 and silver pieces till 1869. In the latter year the Mint, after a career of 360 years, was finally closed. Thenceforward the currency, silver and copper only, for Goa and the other Portuguese possessions in India, has been struck for the Portuguese Government by the Mints at Bombay or Calcutta.

In the course of this article a few small mistakes have been pointed out in the works of the authorities cited. This has been done, solely, in the interest of the advancement of knowledge of the subject. The works referred to are those of pioneers writing from insufficient data. In such cases mistakes are inevitable. It is necessary, however, to call attention to them, as mistakes, uncorrected, are apt to be repeated and to lead to others. The admirable works cited need no praise. All honour to those whose labours have made easy the path for those who follow.

HENRY T. GROGAN.

NUMISMATIC REFERENCES IN SHAKESPEARE.

(*Continued from col. 132.12*).

THE TWO GENTLEMEN OF VERONA.

According to Prof. Dowden, this is the 4th Play, entirely the work of Shakespeare, and his 3rd Comedy, having been written, according to this authority, between 1592 and 1593. Its place in the Comedies would, therefore, be after 'Love's Labour's Lost' and 'The Comedy of Errors' and before 'A Midsummer Night's Dream'. 'Romeo and Juliet', also, preceded it the previous year. It was not published before the Folio of 1623, but, according to Fleay, it was staged about 1591. In Meré's list of plays previous to 1598, it is the first enumerated.

ACT I.

SCENE I. — " Nay, Sir, less than a POUND shall serve me for carrying your letter ".

POUND. — See C. E., Act IV, Sc. I.

ACT II.

SCENE V. — " Come on, you Madcap, I'll to the alehouse with you presently; where, for one shot of five PENCE, thou shalt have five thousand welcomes ".

PENCE. — Here we learn from this reference what was the cost of a drink of ale in Elizabeth's time.

The Penny is the oldest of English coins still circulating, the most national and the one which has undergone the most changes in value and in appearance. It originated in the Heptarchy and was of silver until the reign of Charles II, of whose Hammered Money, it occurs in the 1st and 3rd Coinages. From that reign to the present, it has been continued in that metal as part of the Maundy Series, but, in the reign of George III (1797), it reappeared in the regular currency made of copper. In 1860, the copper was exchanged for bronze. From the reigns of William I (1066), to Henry III (1216-72), there was no other English coin. In the latter reign a Gold Penny, as well as the usual silver one, was struck in 1257, and this was the first English gold coin since the Conquest. Robert Shiells in The Story of the Token (New York, J. Ireland, 1891), p. 47, says: " Abbey Tokens and jettons of every kind passed for fractional parts of a penny, no matter whether they had been struck for sacred or secular purposes ". This refers to the beginning of the 15th century. Lewellynn Jewitt, in his Handbook of Traders' Tokens, says: " In Anglo-Saxon and medieval times the want of small coins, that is, a currency representing a small value, was much felt, and this gave rise to the occasional issue of spurious, or rather base, coins to supply the deficiency, as it was found the smaller pieces, for instance, the pennies when broken up for use as halfpence and farthings-were unfit for general use among the rough-handed population ". Further on, he says, " In 1601 and 1602 the requirements of the army in Ireland caused, for a time, the issue of copper Pence, Halfpence and Farthings, and this seems to have revived the idea of copper pledges for England, originated in Elizabeth's reign, for which, indeed, pattern pieces were struck. Copper tokens were, at that time, issued by the cities of Oxford, Worcester and Bristol ". The issue of tokens was finally stopped by the Government in 1672 and they did not reappear until 1787, when the Anglesey Copper Mines Co. were permitted to recoin them and, then it was that the Penny made its appearance in that form of coinage. English Tokens came to an end in 1817.

A. H. COOPER-PRICHARD

SOME COINS OF THE BRITISH EMPIRE.

THE TRANSVAAL.

A Royal Proclamation approved and signed by His Majesty King Edward the Seventh in Council at Buckingham Palace, London, on Friday, the sixteenth day of February, 1906, directed that any gold, silver, or bronze coins coined in the Mint established in Pretoria by the Government of the late South African Republic in accordance with the provisions of Law number fourteen of 1891, since repealed, and which, in the case of gold coins, have not become diminished in weight by wear or otherwise, so as to be of less weight than that prescribed under Article eight of the said law, shall, until otherwise directed by Royal Proclamation, continue to be current, and a legal tender in the Transvaal and the dependencies of that colony, up to the same amount as coins coined in the Royal Mint, London. The Royal Proclamation came into force in the Colony on Tuesday, May 1st, 1906, and was printed in " The Transvaal Government Gazette " newspaper for Friday, May 11th, 1906, therefore the pieces of money referred to must now be included among the coins of the British Empire. The Royal Proclamation only refers to coins minted in Pretoria but it was doubtless meant to include those coined in the Berlin Mint in the years 1891 and 1892 as the coins manufactured in Germany are still circulating in the colony.

I am not aware that Law number fourteen, 1891, has been previously printed in English and I am greatly indebted to the kindness of the Right Honourable the Earl of Elgin and Kincardine, K. G., formerly Secretary of State for the Colonies for having helped me to obtain the following translation from the original Dutch version published in the " Staatscourant ":

LAW NUMBER FOURTEEN, 1891.

MINT LAW FOR THE SOUTH AFRICAN REPUBLIC.

(Approved and enacted by Resolution of the First Volksraad, Article One, 325, dated Seventh of August, 1891.)

PREAMBLE.

Whereas it is desirable to provide for the manufacture of gold silver and bronze coins for the South African Republic.

Be it enacted as follows:

ARTICLE ONE.

MINT AT PRETORIA.

A mint shall be established at Pretoria.

ARTICLE TWO.

BY WHOM TO BE WORKED.

The mint shall be worked by the National Bank of the South African Republic (Limited), in accordance with Article thirty of the Concession, dated Pretoria, the fifth day of August, 1890, and granted by Special Resolution of the Volksraad, dated ninth of August, 1890.

ARTICLE THREE.

UNIT OF COINAGE.

The unit of coinage in the South African Republic shall be the pound sterling, divided into twenty shillings of twelve pence each.

ARTICLE FOUR.

COINS TO BE MANUFACTURED.

The coins to be manufactured and issued by the Mint shall be the following only :

GOLD COINS.

A coin of one pound sterling, the standard weight of which shall be 7.98805 grams.

A coin of half of one pound sterling, the standard weight of which shall be 3.99402 grams.

SILVER COINS.

A coin of five shillings, the standard weight of which shall be 28.2759 grams.

A coin of two shillings and sixpence, the standard weight of which shall be 14.13795 grams.

A coin of two shillings, the standard weight of which shall be 11.31036 grams.

A coin of one shilling, the standard weight of which shall be 5.65518 grams.

A coin of sixpence, the standard weight of which shall be 2.82759 grams.

A coin of threepence, the standard weight of which shall be 1.41379 grams.

BRONZE COINS.

A coin of one penny, the standard weight of which shall be 9.44984 grams.

A coin of one halfpenny, the standard weight of which shall be 5.66990 grams.

ARTICLE FIVE.

FINENESS OF COINS.

Each coin of one pound shall contain 7.3224 grams of pure gold, and each coin of half of one pound shall contain 3.6622 grams of pure gold, so that the fineness of the gold coins shall be more than eleven twelfths fine gold, and less than one twelfth alloy. The fineness of the silver coins shall be thirty-seven fortieths fine silver and three fortieths alloy. The bronze coins shall be mixed metal, copper, tin, and zinc.

ARTICLE SIX.

VARIATIONS ALLOWED.

The following variations shall be allowed, namely : In the weight of a pound piece, an excess or a deficiency not exceeding 0.01296 gram or 0.2 grain; in the weight of a ten shilling piece, an excess or a deficiency not exceeding 0.00648 gram or 0.1 grain ; and in the fineness of all gold coins, an excess or a deficiency not exceeding two one thousandth parts; in the weight of a five shilling piece, an excess or a deficiency not exceeding 0.11781 gram; a half-crown piece, an excess or a deficiency not exceeding 0.05890 gram; a two shilling piece, an excess or a deficiency not exceeding 0.04712 gram; a shillingpiece, an excess or a deficiency not exceeding 0.02356 gram; a sixpenny piece, an excess or a deficiency not exceeding 0.02000 gram; a threepenny piece weighed by the pound, an excess or a deficiency not exceeding three one thousandth parts ; and in the fineness of all silver coins, an excess or a deficiency not exceeding three one thousandth parts.

ARTICLE SEVEN.

UP TO WHAT AMOUNT THESE COINS SHALL BE LEGAL TENDER.

The coins struck and issued by the said mint shall be current in the South African Republic and shall be legal tender for all purposes, as follows, namely : — The said gold coins up to any amount; the said silver coins up to an amount of forty shillings for each payment; and the said bronze coins up to an amount of one shilling for each payment. The current silver and bronze coins shall be accepted in the Government offices of the South African Republic up to any amount.

ARTICLE EIGHT.

Gold coins issued by the Mint shall remain current unless depreciated fraudulently or by cutting or boring so long as the deficiency in weight does not exceed five one thousandth parts.

WHEN GOLD COINS DEPRECIATED IN CIRCULATION SHALL BE CALLED IN.

Gold coins issued by the mint which have become depreciated in circulation to a greater degree than five one thousandth parts shall be called in to be recoined at the expense of the Republic. Any coin so depreciated shall be taken in payment at all offices of the Republic as if of full value, but shall not be reissued from such offices.

COINS DEPRECIATED BY FRAUD.

Coins issued by the mint which have been depreciated by fraud or by cutting or boring, and which are presented at any office of the National Bank of the South African Republic, Limited, shall be locked up and kept by the bank, and payment of the real value of such coins shall be made to the person offering the same after the real value thereof has been ascertained.

ADMINISTRATION OF MINT DECIDES AS TO DEPRECIATION.

The decision of the administration of the mint as to whether coins issued by the mint have been depreciated by fraud, or by cutting or boring, and to what extent shall be final.

ARTICLE NINE.

COINING GOLD FOR PRIVATE PERSONS.

Private persons shall have the right to bring to the mint, gold, which the administration of the mint shall coin into pounds and half pounds at a mintage charge of not more than three per cent., subject to the following provisions.

REGULATIONS THEREFOR.

(A). If the mint is fully occupied in coining, the administration of the mint may, subject to the approval of the Government, postpone coining for private persons.

(B). Any gold which is not of the fineness of eleven twelfths pure gold and one twelfth alloy, and any gold which is unsuitable for minting, may be refused coinage by the administration of the mint.

(C). If the administration of the mint is of opinion that the issue of gold coin in the Republic is excessive, the Government may declare that minting both for the State and for private persons shall be stayed for a certain time to be fixed by the Government.

Original from CORNELL UNIVERSITY

ARTICLE TEN.

GOVERNMENT SHALL ISSUE FURTHER REGULATIONS.

The Government shall, with the advice and consent of the Executive Council and subject to the approval of the Volksraad, issue further regulations as to the coinage of gold tendered for this purpose by private persons.

ARTICLE ELEVEN.

RIGHT TO COIN MONEY BELONGS SOLELY TO THE MINT.

No gold, silver, copper, or bronze coin or coin of other metal, shall be made or brought into circulation as a coin, or as a medium of exchange, except by the State Mint. It is further prohibited to make or bring into circulation any coin, medal on ornament in gold, silver, copper, bronze, or other metal, which looks similar to a coin manufactured by the Mint.

PENALTY FOR CONTRAVENTION.

Every contravention of the provisions of this article shall be punished with a fine of not more than one thousand pounds sterling or imprisonment, with on without hard labour, for a period not exceeding five years, or with both fine and imprisonment, as before mentioned.

ARTICLE TWELVE.

EXCHANGE OF GOLD AND SILVER COINS.

The Government shall appoint offices where gold coin shall be given in exchange for silver coin issued from the mint, but silver to the value of five pounds shall be the least amount which may be tendered for exchange.

ARTICLE THIRTEEN.

GOVERNMENT DETERMINES SHAPE ET CETERA OF COINS.

The shape, design and inscription of the coins shall be determined by the Government.

ARTICLE FOURTEEN.

GOVERNMENT APPOINTS OFFICIALS TO SUPERVISE THE WORKS OF THE MINT.

The Government shall appoint the officials required for supervising the works of the mint, define their duties, and fix their salaries, subject to the approval of the First Volksraad. The said officials shall have access to the mint and coining, and to such books of the National Bank of the South African Republic, Limited, as relate to the mint, and exercise an effective control over the mint.

ARTICLE FIFTEEN.

TREATIES WITH FOREIGN STATES AND COLONIES WITH REGARD TO ACCEPTANCE OF COINAGE.

The Government may enter into negotiations and conclude, subject to the approval of the First Volksraad, agreements with the Government of any foreign State or Colony for securing the acceptance as legal tender within such foreign State or Colony of the coins minted in accordance with this Law, and for securing the acceptance as legal tender within this Republic of coins made in such foreign State or Colony, and with a view thereto may agree to allow Commissioners of such State or Colony to be appointed to supervise the operations of the said mint jointly with the officials mentioned in Article fourteen.

ARTICLE SIXTEEN.

TRIAL MAY BE ORDERED BY GOVERNMENT.

For the purpose of ascertaining whether coins issued from the mint have been manufactured in accordance with the provisions of this Law, a trial may be ordered whenever the Government shall think fit.

ARTICLE SEVENTEEN.

TAKING EFFECT.

This Law shall come into operation immediately after publication in the " Staatscourant ".

S. J. P. KRUGER,

STATE PRESIDENT.

DR. W. J. LEYDS,

STATE SECRETARY.

GOVERNMENT OFFICE, PRETORIA,

AUGUST 20th, 1891.

In a future article I hope to give some additional information on this subject.

HENRY GARSIDE.

SPECIE AND INSURANCE FRAUDS.

The recent loss by shipwreck of the specie-laden vessels Delhi and Oceana has reminded underwriters of certain cases of fraud which occasionally occurred in earlier days. The matter would hardly come within the scope of this paper were it not for the curious fact that the frauds in question (or at least one of them) were partly laid bare owing to the suspiciously large number of Spanish dollars which were said to have been on board one of the sunken vessels. It would be patent to most people, besides numismatists, that to obtain these dollars by the hundred thousand for shipment or any other purpose would be an impossibility, and in the other case mentioned an equal impossibility in the shape of nearly ten thousand doubloons has to be faced. The story (from the *Times*) of these two frauds of the years 1854 and 1859 may therefore interest our readers and we subjoin it below. —

In the days before the era of steam and of ocean telegraphy opportunities for fraud were greater than they are now, and certain misguided persons did not hesitate to use them. Two well-known cases are cited by this authority, in which it was alleged that vessels containing specie had been lost by accident.

In November, 1854, insurances were effected in London by a highly respectable firm for £ 46,385, the equivalent of 152,500 Carolus Mexican dollars, in 61 boxes, for £ 4,222 on 14,473 oz. Sycee silver, and for £ 2,400 on flour and bran, by the W. T. Sayward, from San Francisco to Shanghai. The vessel was subsequently reported to have been lost at the Loo-Choo islands, and a total loss was claimed. Some of the facts stated being of a curious nature, inquiries were promptly instituted, and it was found, in the first place, that the Carolus dollar was a rarity, and that to procure the quantity said to have been shipped would have been an impossibility. This confirmed suspicions, and after much labour and patient inquiry it was found that one Martin Renlok, a cross between a Greek and a Frenchman, had been the leader in a conspiracy to defraud the underwriters. The boxes had been filled with shot and cut nails and the vessel had been scuttled. The whole facts were elicited in a very masterly way, and the underwriters were saved from the consequences of an audacious fraud.

In 1859 another carefully-planned fraud was detected and defeated. Insurances had been effected in London on 9,500 doubloons, in six cases, valued at £28,800, and on flour, &c., valued at £7,600, by the Mathias Cousino, from Valparaiso to Rio de Janeiro and Pernambuco. In due course the vessel was reported to be lost, but there were such suspicious circumstances about the whole transaction that the payment of the loss was deferred pending inquiry into the circumstances. It was eventually discovered that the specie had never been put on board and that the vessel had been assisted to a peaceful end in fine weather.

A PROPOSED SYSTEM FOR NUMBERING MUSEUM SPECIMENS.

In publishing the Introduction to Mr. Cooper Pritchard's System, a brief outline of which appeared in the April and May issues of the *Numismatic Circular* of last year, we invite criticism from our readers as to how far it could be applied for practical purposes to Museums and Private Collections.

Eds N. C.

The question of numbering specimens in museums has been too long neglected, and, in almost all cases, the number used is a purely arbitrary symbol, meaning nothing in itself and only serving as a guide to a catalogue or register. Our venerable mother, the British Museum, whose ever-enlightened policy is always in the van of scientific and museum improvements, has taken one step beyond this unenterprising attitude by the adoption of a system by which the number gives the *date* of the acquisition of the specimen, day, month, and year, together with an individual number for the particular specimen, which last is dependent on the chronological number. But the question now arises as to the relative importance of ascertaining the date of the acquisition of a given specimen. Of course, it is interesting to have this information, but, certainly not of such everyday importance as to make the reference to a catalogue a matter of serious inconvenience. As I have said, the step taken is for the better and the method adopted is an improvement on the old habit (still in use in the great majority of museums), of a number which means nothing in itself.

In that the British Museum number does mean *something*, it is a step in the right direction, but, considered from another point of view, that of the relative importance of the information conveyed, it is a step *forward* but in the *wrong* direction. If it were possible to give *all* the information required by a system of numbering, and, thus, render reference to a register altogether needless, we should have obtained an ideal, which is, unfortunately, altogether impossible, the obvious reason being that, the extent of numbering which it would require would cover a space infinitely greater than the size of most objects in a museum and always so great as to disfigure the specimens upon which it was used, or to render their label at once ridiculous and unintelligible without greater labour than the simple reference to a register would necessitate. It is obvious, then, that the number must be limited in its import and every collector will at once see that the number to be of reasonable dimensions must be confined to a single species of information. We have, then, to consider what shall be the nature of the information conveyed by the number of the specimen. The usual style of numbering is already open to some of the disadvantages which we have referred to in treating of the impossibly ideal system and without possessing any of its advantages. The British Museum method implies a rare minimum of four figures and a frequent maximum of nine, which, on rare occasions, may even be greater. Another great disadvantage of the latter is that the numbers are so indistinctive that they are not easily read on a straight line. " 10102715 " means that the specimen in question is the 15th object received by the museum on the 27th day of the 10th month of the 10th year of the present century, whatever that may be, for the century is not specified. But all this information does not strike the eye at first sight, so the British Museum arranges the numbers in the form of a cross, with a blank space in the middle. I leave it to the imagination of the reader to picture to himself the amount of space on a small object thus covered by the number, such, for instance, as I have seen on the skull of a small mammal ; and, also, the intelligence of this style of numbering as applied to any specimen, no matter of what size.

Having shown an additional disadvantage in the British Museum system, let us now return to the fundamental question, namely the desirability of the numbering conveying at sight the one species of information most desirable to those interested in the specimen. The whole matter, therefore, turns on the question as to what *is* the species of information most required when looking at a specimen apart from its register, which is not always convenient to have at hand or, if at hand, not always convenient to refer to in each particular instance. Undoubtedly, this is the *provenance* of the object, i. e. the *place* from which it was procured.

As every museumologist will allow this position, the question is to find a system of numbering which shall tell the observer at a glance where the specimen in question came from and this, in fact, is our present object.

At this place, permit me to observe that, throughout the foregoing, it must constantly be borne in mind that this system of numbering has reference to ALL the specimens, of every sort and nature and belonging to all countries and periods, and it will be useless to pick out some small speciality and object to the items of the classification which do not happen to touch that particular subject, as, I may add, has already been done, so long (which I claim to be the case), as that and every other speciality may be covered by some other part of the system.

Another thing to be noted is that it is not my object to impose every detail of this system on those adopting the general principles of it : the THEORY is all that I aim at as supplying a much-felt need.

Moreover, as this system is geographical and as it is intended for historical and archæological specimens as well as for biological and palaeontological, the geography of the Middle Ages has had to be combined with that of modern times, though a practical application of the system will at once show that it may be used with perfect logic on modern specimens by simply ignoring its mediaeval side and, again, by the mediaeval archaeologist with the same facility by ignoring its modern aspect. As to Ancient Geography, it corresponds so closely with that of the present day that in a few cases only will it be necessary to add fresh symbols to meet the divergencies, an addition which the absolute elasticity of the system readily allows for without affecting the numbering of the remainder.

The question of the arrangement of countries must necessarily be a matter of individual taste and all that is contended for in the foregoing is that the arrangement suggested is, at least, a natural one.

Wherever this system is adopted, the loss of data becomes impossible, for the number on the specimen tells the locality where the specimen came from, and, while that essential object is forever secured, all other information can be gathered from that. The excavator or collector in the field and the museum receiving specimens from abroad will have no difficulty in appreciating the value of this system in that regard. We now proceed to the details.

The first part of the numbering must necessarily refer to the country from which the specimen came or to which it belongs, according to the preference in use in the particular science dealt with. Of course, where all the specimens in a particular collection belong to the same country, the number of the country may be confined to the heading of the entire collection, and, in that instance, it would be needless to affix it to every specimen. In that case, the numbering of the specimen will begin with the province in that particular country where the specimen originally belongs or has been found.

Beginning with EUROPE, we have first the Classical Period, which in matters of classification is equal to the position of a country, and, as both Greek and Roman Coins, for instance, are frequently treated in the same book or catalogue, this separate classification it must be conceded is a convenient one. The number 1 is therefore given to this division.

(*To be continued.*)

CORRESPONDENCE

The Editors,
"Numismatic Circular".
Sir :

On account of certain difficulties experienced with the lithographers while my recent contribution on "SIAMESE PORCELAIN and OTHER TOKENS" was in the press, I was ultimately obliged to curtail the contents of this book and was only able to include but a small portion of my collection, and not the entire lot, as was my original intention and purpose. The Plates and Catalogue sec-

Original from CORNELL UNIVERSITY

tions were consequently reduced at the last moment, but I omitted to mention this change in the Preface, which, together with the Historical Introduction, had been written and printed in advance.

In consequence, those readers unacquainted with the above circumstances would naturally consider that the 300 odd varieties described and illustrated in my work, exhausted the lot in my cabinet, since it was primarily intended to be a Catalogue of all the specimens in my collection.

Considering that Haas states that, as far as he could ascertain, about 800 different kinds were known to exist, and that Sylvester mentions that over 1000 were known to him, the statement advanced in the preface that my collection was perhaps one of the biggest in existence, would no doubt appear as somewhat presumptious if the claim had been based only on the comparatively small number of specimens described and illustrated in my monograph.

I hope to publish the remaining part of this work so as to be able to include all the specimens in my own cabinet, which numbers over 1,500 different varieties. Even then, I much doubt if the work could be considered complete, as it would probably not embrace all the specimens known of this most extensive series, which has up till now received but scant attention from collectors. In the meanwhile, I consider that the foregoing explanation may not be here out of place after the kind review of my monograph on this subject in the January number of the "Numismatic Circular".

Yours obediently,
H. A. Ramsden, F.R.N.S.

Yokohama, 20th February 1912.

SOME COINS OF LUCCA.

By Captain Philip Whiteway.

This city and territory of Tuscany was greatly favoured by the Lombard kings of Italy, who opened a mint here in 650. It became a republic in 1119. From the 11th century the city was continually at war with Pisa. Between 1314 and 1429, Lucca groaned under a series of tyrants or was subservient to foreign dominion, with brief intervals of liberty. Here are the names of some of them. Uguccione della Faggiula (1314), Castruccio Castracane (1328-42), period of Pisan supremacy (1342-69). From 1429-79, Lucca was governed as a republic. Only members of a few aristocratic families could hold offices of state, the people having no voice in public affairs.

In 1805 Napoleon I. created Lucca a duchy in favour of his sister Elisa, wife of Felice Baciocchi (an ex-teacher of music) who was dispossessed in 1814, when the state was ceded to Charles Louis of Bourbon-Parma (ex-King of Etruria). In 1847, Lucca was transferred to Tuscany, in exchange for Parma and Piacenza.

TYPES.

The chief type figuring on the Lucca coins is the full-face, crowned and bearded effigy of Our Saviour, with the legend SANTVS VVLTVS. The people of Lucca gave the name of *barbone* (bearded) to this type. As has been shown in the NUMISMATIC CIRCULAR for March 1912, Hazlitt in his "Coins of Europe" (p. 452 etc.) is in error when he states that the Sanctus Vultus is a "crowned and bearded effigy of a royal personage." As a matter of fact it is derived from a cedarwood Crucifix of Oriental (Byzantine?) origin, dating from the 8th or 9th century, and supposed to have been carved by Nicodemus with the help of a celestial visitant. The actual cross is only exhibited three times in the year, and it may be said to be the most precious possession of the city of Lucca and its Palladium. John Sterling in his celebrated "Letters", writes "The Cathedral of Lucca contains some Relics, which have undoubtedly worked miracles in the minds of people hereabouts. The grandfather of all Relics (as the Arabs would say) in the place is the Volto Santo, which is a face of the Saviour appertaining to a wooden crucifix. This image was brought to Lucca... more than a thousand years ago, and it has ever since been kept, in purple and fine linen and gold and diamonds, quietly working miracles." I had privilege of examining this Crucifix closely a few years ago.

The Sanctus Vultus type was in use on the coins of the Republic from the 13th to the 18th century.

From the 14th to the 18th century St. Martin and the Beggar, and in the 18th century St. Paulinus, were popular types.

The rarest coins struck at Lucca were those minted by the Lombard kings of Italy.

ANONYMOUS LOMBARD KINGS, 650-749. Gold.

1. Tremissis. Obv. Fictive legend composed of VI repeated from six to eleven times, around a Latin cross.
Rev. FLAVIA.LVCA around a star. R8.

ASTOLPHUS KING OF THE LOMBARDS, 749-56. Gold.

2. Tremissis. Obv. D.N.AISTVLF.REX around Latin cross.
Rev. FL.AVIA.LVCA around star of six rays.
Four minute varieties of this coin are known with differing star on reverse.

DESIDERIUS, 757-77. Gold.

3. Tremissis. Obv. D.N.DESIDER.REX around Latin cross.
Rev. FLAVIA.LVCA around a star in circle or dots.
4. Obv. D.N.DESIDER.R.
Rev. As 3.
5. D.N.DES.DER.REX etc. as 3.
Rev. FL.AVIA.LVCA etc. as 3.

CHARLEMAGNE, 773-800. Gold, silver.

6. Tremissis. Obv. D.N.CARVLVS.REX. Bust of emperor.
Rev. FLAVIA.LVCA around star.
7. Tremissis. Obv. Legend as 6 around Latin cross.
Rev. As 6.

SILVER.

7. Danaro. Obv. CARO.LVS in two lines.
Rev. L-V-C-A in angles of a cross. R8.
8. Danaro. Obv. D.N.CAROLVS.REX. Latin cross.
Rev. FLAVIA.LVCA.
9. Danaro. Obv. As 7.
Rev. LVCA in one line.
10. Danaro. Obv. CARLVS.REX.FR. around cross.
Rev. CARLVS around monogram composed of the word CARLVS.

LOUIS I (Emperor), 814-40. Silver.

11. Danaro. Obv. HLVDO-VICVS.IMP. around cross.
Rev. LVCA in one line.

HUGO & LOTHAIRE (Kings of Italy), 930-46. Silver.

12. Danaro. Obv. VGO.LONTARIVS.R. around monogram composed of their names.
Rev. XPISTIANA.R (Cristiana religio), in field in two horizontal lines L C / V A.

HUGO I. (Marquis of Tuscany), 950-61. Silver.

13. Danaro. Obv. MARCHIO around HVGO.
Rev. CIVITATE around L.V.C.A.

OTTO I & II, 961-70. Silver.

14. Danaro. Obv. IMPERATOR around. O / T T. / O
Rev. OTTO.PIVS.REX around L.V.C.A.
15. Danaro. Obv. As 14.
Rev. CIVITATE.L.V.C.A.

HUGO II. & JUDITH (of Tuscany), 970-1001. Silver.

16. Danaro. Obv. DVX.TVSCI around monogram composed of the two names.
Rev. DVX.IVDITA around L.V.C.A.

OTTO III, 1001-4. Silver.

17. Danaro. Obv. OTTO.PIVS.RE around L.V.C.A.
Rev. IMPERATOR around T-T.
18. Danaro. Obv. IMPERATOR around monogram.
Rev. OTTO.HTERCIVS around LVCA. Base silver. Very rare.

HENRY II (1004-24). Silver.

19. Danaro. Obv. INPERATOR around H.
Rev. ENRICVS around L.V.C.A. in angles of a cross.
20, Danaro. As 19, except IMPERATOR.

CONRAD II, 1039-1125. Silver.

21. Danaro. Obv. INPERATOR around monogram.
Rev. CHVINRADVS around LVCA.
22. Danaro. Obv. As 21.
Rev. CVRADVS around LVCA.

HENRY III, IV & V, 1039-1125. Silver and Copper.

23. Danaro. Obv. ENRICVS around $\frac{L}{C\ A.}$
$\frac{}{V}$
Rev. IN (or IM)PERATOR around T-T.
24. Danaro. Base silver. Obv. INPERATOR.
Rev. HIRICVS around a cross in the angles of which is L.V.C.A.

COPPER.

25. Obolo. Obv. As 23,
Rev. As 23.
26. Obolo. Obv. EIRICVS around LVCA.
Rev. INPERATOR monogram.

(*To be continued.*)

LES BILLETS DE BANQUE SUISSES.

Les premiers billets émis par la Banque nationale ont été mal accueillis du public. Chacun s'est plu à leur trouver des défauts et de nombreux journaux, tant en Suisse qu'à l'étranger, les ont fait ressortir.

Il ne s'agit donc pas de la critique de quelques esprits chagrins qui rejettent systématiquement tout ce qui est un peu nouveau, mais bien de l'opinion à peu près unanime du public.

Dès lors, il peut sembler utile de rechercher les causes de cette désapprobation et de voir si l'on pourrait mieux faire à l'avenir.

Illustrer veut dire proprement éclairer, expliquer. On comprend que si l'illustration n'est pas adéquate au sujet, elle va à fin contraire du but poursuivi ; au lieu d'amener de la lumière, elle crée de l'obscurité, et parfois du ridicule. Quelle doit être l'illustration du billet de banque, et d'abord quelle est la nature exacte de ce précieux instrument d'échange ?

Le billet de banque n'est pas une monnaie. Il lui manque le caractère de marchandise. Il représente la richesse sans être la richesse elle-même ; il n'est qu'une promesse de richesse, c'est une fiction.

Dès lors, s'il faut que l'illustration du billet cadre avec la nature de celui-ci, elle sera symbolique. La gerbe ou la couronne de Cérès, la couronne d'abondance de la Richesse, le caducée de Mercure, tels sont les motifs maintes fois employés. L'allégorie peut aussi convenir ; les anciens billets français représentaient « la Sagesse fixant la Fortune », et cette gracieuse composition paraissait heureusement choisie.

La commission nommée à cet effet et présidée par M. le conseiller fédéral Robert Comtesse, a jugé à propos d'illustrer les nouveaux billets suisses par des scènes de la vie agricole et industrielle. Le billet de cent francs offre au premier plan un faucheur ; celui de cinquante francs présente un bûcheron s'attaquant à un jeune sapin ; celui de mille francs nous transporte dans l'usine Sulzer et Cie, à Winterthour, où nous assistons à une fonte ; enfin le billet de cinq cents francs nous introduira, dit-on, dans un atelier de brodeuses d'Appenzell.

L'idée qu'on a voulu rendre par ces multiples images, c'est que la richesse découle du travail, idée salutaire et bienfaisante entre toutes ; mais on peut se demander si, exprimée avec autant de réalisme, elle se trouve bien en place sur un billet de banque. Car ce n'est pas le symbole du travail lui-même ; ce n'est pas l'emblème de la richesse qui nous est offert, mais ce sont des prés, des bois, du métal, c'est-à-dire des richesses en personne.

Encore si ce faucheur et ce bûcheron pouvaient être revendiqués par des gens du métier, mais ils sont incorrectement dessinés et semblent plutôt des apprentis maladroits, dont l'effort apparent est hors de proportion avec le but à atteindre : instinctivement on cherche autour d'eux s'ils ne vont pas blesser quelqu'un. Cette gaucherie augmente encore le réalisme de l'image et elle a provoqué chez les uns des critiques non méritées, chez les autres le regret de voir notre art suisse si faiblement représenté.

Les règles de l'héraldique ne sont pas mieux respectées ; ainsi qu'on l'a fait observer le billet de cinqante francs présente une croix blanche qui se détache sur un fond bleu, tandis que sur le billet de cent francs, cette même croix est rouge.

Ce sont là des étourderies qu'il est aisé de corriger, mais que l'on doit corriger, car il est inadmissible que la Banque nationale suisse ignore les armes de son pays.

La Commission suisse des Beaux-Arts a, paraît-il, regretté qu'on ne l'ait pas consultée, et je ne puis que partager ses regrets, car s'il est vrai que pour composer une médaille il faille toute une académie, il doit en être de même lorsqu'il s'agit de la composition d'un billet, pour laquelle une réunion de banquiers peut paraître insuffisante. Il est au reste certain qu'il y a dans le cas particulier les exigences techniques qui limitent fort le champ de l'artiste et que la maison Waterlow a nécessairement fait valoir ; elles doivent entrer en ligne de compte dans les critiques que l'on fait des nouveaux billets.

En supposant qu'elle ne trouve pas une allégorie convenable illustrant la Richesse, ou le moyen de l'obtenir, me sera-t-il permis de suggérer à la commission fédérale, lorsqu'elle renverra son premier travail, de choisir un motif qui non seulement symboliserait la Suisse, mais qui, de plus, incarnerait la source principale de la richesse de ce pays, je veux parler de l'alpe. L'alpe supporte le glacier qui fournit à nos plaines l'eau bienfaisante sans laquelle elles resteraient stériles. Cette eau, par sa chute, crée l'énergie qui actionne nos usines, éclaire nos villes et fait mouvoir nos tramways. L'alpe attire de nombreux voyageurs qu'il faut recevoir été et hiver dans les hôtels qu'on ne compte plus. Et lorsque les torrents glaciaires se sont réunis, ils forment ces deux beaux fleuves, le Rhône et le Rhin, que nous donnons, le premier à la France, le second à l'Allemagne. Croit-on que ce soient là de modestes cadeaux ? A-t-on jamais calculé à quelle somme ils montent chaque année ? A côté de cette source de richesse matérielle, sans cesse renouvelée et du rôle de forteresse naturelle, gardienne du pays, l'alpe détient encore le souvenir de notre antique liberté. Les hommes du Grütli étaient des habitants de l'alpe et c'est pour son indépendance qu'ils se sont unis.

La Russie a mis sur ses billets le portrait de la grande Catherine et l'Allemagne celui de Guillaume Ier. Ce sont là des illustrations qui symbolisent l'accroissement des deux empires. La Suisse ne peut ni ne veut s'accroître. Sa gloire ne réside pas dans des territoires annexés ; elle est plus haut placée et plus noble. Ce qu'elle veut conserver et ce qu'elle doit chérir, ce qu'elle a su conquérir en plein moyen âge et plus tard encore, c'est la liberté, si bien symbolisée par l'alpe.

En illustrant les billets suisses par des vues de l'alpe, le Département fédéral des finances restera dans la note juste et je crois qu'il sera loué de tous.

EUG. DEMOLE,
Président de la Société suisse de numismatique.

DECIMAL COINAGE.

— Referring to a recent article on the metric system, will you allow me to call your readers' attention to the sister subject — decimal coinage?

It cannot be too forcibly insisted on that decimal coinage and the metric (or other decimal) system of weights and measures are, from the legislative point of view, two entirely distinct subjects. The practical difficulties attendant on the introduction of the latter into this country are enormous, and I have gathered from many sources a mass of public opinion against it.

From time to time for many years Bills for the adoption of the metric system have been laid before Parliament (the last in 1907), but none have succeeded in becoming law. Moreover, neither Russia, nor Denmark, nor any English-speaking people has adopted it. Thus, apart from the huge practical difficulties in the way, and its great practical imperfection, concurrent action for its adoption by the United Kingdom, our Colonies, and the United States is essential. (The imperfection here alluded to lies in the fact that whilst one-half, one-third, one-fourth, and one-sixth of 12 are whole numbers, only one-half and one-fifth of ten are so.)

On the other hand, decimal coinage stands on a completely different footing. In the non-adoption of decimal money reckoning we stand alone, and have done for many years, among civilized countries. By adopting it we should put ourselves into line with the rest of the world. Its introduction does not require joint action with any other nation, and a decimal system can be introduced without inflicting confusion, loss of any kind, or appreciable trouble upon the public, which permits the continuance in circulation of all the coins at present in use, and which is identical with the one current throughout the civilized world.

Decimal coinage has been adopted by all the countries of Europe (save the United Kingdom) and by their dependencies and offshoots, by the United States, Canada, Newfoundland, Ceylon, Egypt and Japan. It is the currency of Guernsey and Alderney (Channel Islands), and is more or less used in other British dependencies. Even in parts of China and Persia, money-reckoning is chiefly on decimal lines. Thus all civilized nations (outside the British Empire) use decimal reckoning, and it has also been adopted by some two-thirds of the English-speaking peoples. The United Kingdom and a part of her Colonies stand, therefore, in complete, though by no means glorious, isolation from the rest of the world.

Whilst the past 40 years or so have brought forth *ad nauseam* Parliamentary Bills, Select Committees of both Houses, Royal Commissions, debates, discussions of learned societies, associations both for and against, and many books, pamphlets, articles, &c., on the metric system of weights and measures, practically no official and but very little other light has been thrown on decimal coinage for very many years, in fact, since the report of the Royal Commission in 1859. Surely the time is ripe for the appointment on that subject of a Royal Commission, or still better of a Special Commissioner. The appointment of commissioners to inquire into a report on specific subjects is a most useful practice and a growing one, too, both with ourselves and other nations. The report of a competent Special Commissioner on decimal coinage could not fail to be of great value. Such an appointment is, moreover, absolutely non-committal in policy and (for a Government) infinitesimal in cost. His report might be followed by the appointment of a Royal Commission, to whom his previous labours would be invaluable. The outcome of such a Commission, if afterwards appointed, must be one of two things — either the setting forth of substantial reason why this country should continue to remain in complete isolation, or her falling into line with the rest of the world by the adoption of decimal coinage.

REVIEWS.

Chinese Open Work Amulet-coins. By H. A. Ramsden, F.R.N.S., President of the Yokohama Numismatic Society. 8vo 60 pp. iv plates, and many illustrations in the text. Jun. Kobayagawa Co., Yohohama, 1911.
Supplied by Spink & Son Ltd, 5/6 *nett*.

The remarkable political transformation of China is drawing all eyes towards that mystic country, with its teeming millions, which has suddenly awoke from the slumber of centuries. Mr. Ramsden has therefore chosen a most opportune time to issue his valuable monographs on the numismatic relics of a bygone age of Chinese history, and the present little work dealing with the 'Openwork Amulet-coins' is adding a considerable amount of information on this particular subject, which has received but scant attention from previous writers.

The best treatise on these, Kainz "*Chinesische Tempelmünzen*" is very incomplete, and Lockhart "*Currency of the Far East*" describes and illustrates only a few representative specimens.

Mr. Ramsden divides these 'Charms' into three main groups: A — The originally made purely for amuletic purposes; B — Those which, from the beginning, were to be used as drawer handles; C — Those primarily intended to serve as portable shrines.

These amulets are fairly common, and were all made by the ordinary casting process. Their original purpose was connected with superstitious beliefs, and they have been used for exorcising demons, repelling witchcraft, and protecting from the 'evil eye'. All imaginable subjects from the domain of nature are represented on them, but the figures of Dragons in connection with varied animals predominate. The Deer, Bird, Fish, and Floral designs are also very common.

As to the symbolic meaning of the designs, Mr. Ramsden does not attempt to give any explanation, but refers to such works as Denny's *Folklore of China*, Doolittles, *Social life of the Chinese*, 'Giles' *Dictionary*, De Root, *The Religion of the Chinese*, etc.

The illustrations are excellent, the text very clear, and the information reliable and most interesting not only to students of sino-numismatics, but even more so to folklorists and archaeologists in general.

Rome in her Monuments. Described historically and chronologically with 580 illustrations. By Commendatore Pietro Stettiner. Translated from the original Italian by J. Tolerton and E. Creeth, 8vo. 596 pages. Loescher & Co. Rome, 1912.
Price: 10/- nett.
Supplied by Spink and Son Ld.

This volume is intended as a popular manual, and deserves unqualified praise. Throughout, it bears evidence to the wide and thorough antiquarian knowledge of the author, who by means of lucid and well-written historical notes accompanied by excellent illustrations, pictures in a most vivid manner the bygone ages of Eternal Rome, from its foundation to our own days. Of all the numerous guide-books of Rome that have been published of late years, this is undoubtedly the most attractive and perhaps one of the most useful. But the work is more than a guide-book. Its object is to present Rome and her history in a 'panoramic view', and to bring the immortal city within the reach of many who are not privileged to study her past on the spot.

By arranging the monuments according to periods, and illustrating the most important or typical specimens chronologically, twenty-seven centuries of Roman history are presented in order to the eye by visible and authentic documents.

The book is not merely a collection of photographs, though the illustrations, all original, are an important feature, taken as they are, not from ordinary points of view, but from those best calculated to show special aspects, aesthetic or historical, of their subjects.

A feature of the work, which makes it of great value to the numismatologist, are the numerous reproductions of coins and

medals, from cast bronze bars (aes signatum) of the earliest Roman currency including an almost unbroken series of Portrait pieces of the rulers of Rome, to a Five lire piece of Pio IX., 1870. Even mediaeval pieces are represented, as a silver coin of Pope Adrian I. (the first pope who coined money), another, of Charlemagne in conjunction with Leo III, Augustale of Frederic II, Gigliato of Charles of Anjou, gold Florin of the Roman Senate 1305, billon coin of Cola di Rienzi, 1347. The Papal medals show the Palazzo Venezia, fortifications of Ostia, Ponte Sisto, St. Peter's, Castel S. Angelo, the Quirinal Palace, etc. One is surprised to find so much information within so small a compass, and considering the wealth of illustrations the book is a marvel of cheapness. The printing, paper, type, reproductions are all that can be desired.

We warmly recommend Comm. Pietro Stettiner's book as a useful as well as ornamental addition to any library.

NUMISMATIC SOCIETIES, MUSEUMS &c.

ROYAL NUMISMATIC SOCIETY.

February 15th: Sir Henry H. Howorth. K.C.I.E., President, in the Chair.

Messrs. Newton H. Harding and G. Hamilton Smith were elected Fellows of the Society while Messrs. Hubert A. Druce and R. E. Forster were admitted.

Exhibitions: by Mr. J. Grafton Milne, an undated Alexandrian tetradrachm of Vespasian apparently a mule with an obverse from the die for the bronze coinage and a reverse for billon; by Mr. F. A. Walters, F.S.A. a heavy Noble of Henry IV of the Calais Mint (119.4 grains) having a flag at the stern of the ship and a coronet m.m. on the rudder, of which only two other specimens are known; by Mr. Percy H. Webb, a third brass of Gallienus: *obv.* GALLIENUS AUG, with radiate bust r. *rev.* IO CANTAB, Jupiter standing r. holding thunderbolt in r. and spear in l. The reverse legend is an abbreviation for IOVI CANTABRORUM; by Mr. Bernard Roth, F.S.A. a rare gros d'argent of Henry V, and two moutons d'or of Henry V and two of Charles the Dauphin; also a series of ancient British and Roman coins and fibulae and a late Bronze Age torque found at Peterborough; by Mr. Henry Garside, a rupee of British India of George V.

Mr. Lionel M. Hewlett read the fourth portion of his treatise on Anglo-Gallic coins, which dealt with those struck by Henry V in Normandy. The earliest of these was probably the rare demi-gros or guenar, which Mr. Hewlett considers may have been struck at Caen, where Henry stayed for some months to organise the government of Normandy before proceeding to lay siege to Rouen. Immediately after the fall of Rouen, Henry struck moutons in gold and gros in silver there. On the 25th September 1419, he ordered that all coins struck for the future should bear an H. in the centre of the cross in the reverse. He opened a second Mint at St. Lô on the 14th April 1420. The mint of issue was designated in the manner usual in France at that time, by placing a pellet under a certain letter of the legends. At first, Henry used the same mint-mark for Rouen as that used by Charles VI, but after the opening of the mint at St. Lô he placed a pellet below the first letters of the legends to designate the Rouen Mint and below the second letters of the legends to designate the St. Lô mint. The mouton with four fleurs-de-lis in the angles on the reverse which has been ascribed to Henry V on the strength of Poullain's manuscript should be ascribed to Charles the Dauphin, who struck them at the mints of the Dauphiny.

SOCIETY OF BIBLICAL ARCHÆOLOGY.

March 13. — Mr. F. Legge in the chair. — Mr. E. J. Pilcher read a paper on 'Weight-Standards of Palestine' in relation to a number of small weights recently discovered in the Holy Land. These weights are not inscribed with the familiar word "shekel," and they are not on the shekel standard, but they are divided into three classes: the *neseph*, having a mean weight of about 156 grains; the *payam*, of about 115 grains; and the *beka*, of about 97 grains. The *neseph* is obviously the fiftieth part of the Babylonian mina of 7.800 grains, and this would tend to demonstrate that the ancient Hebrews divided their mina into fiftieths, instead of the sixty parts which formed the Babylonian division. The *payam* is two-thirds of the Persian silver stater of 173 grains, and the *beka* is two-thirds of the Egyptian *kedet* of 146 grains. The discovery of these three standards is not at all surprising in a land subjected alternately to the influence of Babylonians, Persians, and Egyptians; but the reason for such a proportion as two-thirds of the Persian stater and two-thirds of the Egyptian *kedet* is far from obvious. It should be remembered, however, that in the time of Nehemiah a poll tax of one-third of a shekel was imposed upon the Jews instead of the previous levy of half a shekel, and it is not improbable that the same principle was carried into the other standards. The Hebrew or Phœnician shekel was really a double stater, and weighed about 220 grains. It should, therefore, be compared with double staters in the other systems, and this is what was done by Josephus in comparing it with the Attic standard. Consequently, a Babylonian Jew in paying his poll tax would give a third of a double stater on the Persian standard, while an Egyptian Jew would give a third of a double *kedet*, each one thus contributing in the currency to which he was accustomed, instead of weighing by the shekel standard, which was, for political reasons, probably in abeyance at the time.

SOCIÉTÉ FRANÇAISE DE NUMISMATIQUE.

Séance du 3 février.

La Société entend une communication de M. Bordeaux sur l'atelier temporaire de Moulins au XVIe siècle.

M. Blanchet présente un bel exemplaire du jeton de Jean de Tévalle, gouverneur de Metz, de 1568 à 1581, et un reçu signé de lui pour ses gages de lieutenant-général, de janvier à avril 1575.

Il communique ensuite au nom de M. Claudius Côte, correspondant à Lyon, les jetons d'Antoine Tavernier et de Joseph Steinman, échevins de Lyon en 1785 et 1789, et celui de l'abbé Legris, curé de Saint-Pierre et Saint-Saturnin.

Au nom de M. Luneau il présente aussi deux explemplaires d'une petite monnaie de Frédéric-Henry, imitée de celles d'Henri III.

M. Bouclier présente des monnaies russes en platine, à fleur de coin.

Le colonel Allotte de la Fuye communique une tablette babylonienne portant un tarif de denrées avec indication de leur valeur en sicles d'argent.

BRITISH ACADEMY.

At the meeting of the British Academy held on Wednesday March 20th in the rooms of the Royal Society Mr. G. F. Hill, of the British Museum, read a paper on "Some Cults of Palestine in the Græco-Roman Age." The Master of Peterhouse, President, and subsequently Sir Arthur Evans, presided, and among others present were Sir Charles Lyall, Professor Percy Gardner, Sir G. Warner, Mr. L. W. King, Mr. H. R. Hall, Professor Ker, Mr. Robert Mond, Miss Gertrude Bell, Mr. Crace, Mr. O. M. Dalton, Dr. Gaster, Professor Hechler, and Dr. Büchler.

The object of the paper was to examine some of the evidence as to the existence in Hellenistic and Roman times of local cults, other than Jewish or Christian, in Palestine, and more especially in Samaritis and Judæa.

In the scarcity of other extant remains the evidence, apart from references in literature, is almost entirely to be drawn from the coins, which were issued in the cities down to the middle of the third century after Christ. These coins reveal a sometimes

Original from CORNELL UNIVERSITY

inextricable confusion of Syrian, Phœnician, Philistine, Egyptian, Greek, and Roman elements. The early silver coins of the fourth century B. C., which were probably issued from Gaza, are peculiar in the miscellaneous collection of religious types which they present, including a figure of the Jewish god Jahu or Jehovah, resembling a Greek Zeus, and seated upon a winged wheel. These various types were, however, dictated by commercial reasons, and do not prove the existence of a cult of Jahu at Gaza. The later coins of the Palestinian cities, on the other hand, do indicate local cults. The worship of the Roman Emperor is illustrated by the type, common to numerous cities, of the City-goddess (probably in origin Astarte), partly assimilated to the goddess Roma, and holding in her hand the bust of the Emperor. Greek religious legend, as localized in this district, is illustrated at Nysa-Scythopolis (Beth-Shan) and Raphia, where we find types representing the story of Dionysus (including his re-birth from the thigh of Zeus). Neapolis of Samaria possessed a great variety of cults. The coins show an elaborate picture of the still sacred mountain Gerizim, with its carriage-road, stairway lined with shrines, and temple and altars at the top; the god worshipped there was probably the ordinary Greek Zeus with his consort Hera. But in the city there was also a cult of the bull-god Zeus of Heliopolis, for whose consort the stag-goddess, Diana of the Ephesians, in a form partly assimilated to the Oriental dove-goddess, called by the Greeks Aphrodite, seems to have served.

Ascalon and Gaza.

The most remarkable cults seem to have persisted in the Philistine cities of Ascalon and Gaza, which obstinately retained their anti-Jewish and anti-Christian character. At Ascalon, though we cannot identify-Dagon, we find the marine Astarte functioning as City-goddess, accompanied by a dove, and also a distinct lunar goddess, holding a dove and standing on a triton. This is probably Derketo or Atargatis. An Ascalonian war-god bears the name Phanebalos, which is to be interpreted " manifestation of Baal. " Other types of the same city show strong Egyptian influence, but the Egyptian deities, such as Osiris and Isis, are Syrianized by making them stand on lions.

Finally, the coinage of Gaza entirely confirms and amplifies the evidence which has of late been accumulating concerning the primitive connexion of the Philistine cities with Crete. The name of the great Gazaean god Marnas, who offered such stubborn resistance to Christianity, is probably not Syrian but Cretan. He is the Cretan Zeus, a young god, with a goddess resembling the huntress Artemis for his consort, just as in Crete there seems to be a connexion between the young Zeus Velchanos and the goddess Britomartis, who is Artemis. Gaza was a Minoan foundation, and Minos — himself a form of the Cretan Zeus — was worshipped at Gaza, which, indeed, was actually called Minoa. The temple of Marnas, within the double portico of which Porphyry built his great cruciform church, the Eudoxiana, was one of the most famous buildings in Palestine, and excavations on this site or at Ascalon would probably have most important results.

A discussion followed, in which Mr. Hall, Mr. King, Miss Gertrude Bell, Dr. Gaster, Dr. Büchler, Professor Hechler, and Dr. Hirschfeld, took part. A vote of thanks to Mr. Hill, on the motion of Sir Arthur Evans, concluded the meeting.

CATALOGUE

OF

COINS and MEDALS for SALE

Special attention is directed to the fact that every coin or medal catalogued in the following lists is guaranteed to be absolutely genuine (except when expressly stated in the description to be otherwise) and if not approved of can be returned, when the full amount paid will be refunded.

Collectors will also kindly note that every care is taken when compiling the catalogues not to overrate the condition of the pieces but to faithfully represent them according to their merits.

All orders should be sent to Spink & Son Ltd., 17 and 18, Piccadilly, London, W.

(For further particulars see first page of this Circular.)

VARIA

DISCOVERY OF OLD COINS IN CO. KILDARE.

While draining some of his land at Abbeyleix, Castledermot, Mr. Wm. Kinsella, grocer and farmer, made a remarkable discovery. About one and a half feet from the surface he unearthed a small urn which contained 226 silver coins of various dates. They included French coins, 45 Spanish coins current during the reign of Philip and Mary; James shillings, on which the harp and crown are plainly discernible; others show the thistle. Other coins show the features of Elizabeth, Charles I., and Edward VI. The find was handed over to Sergeant Castles, of the Constabulary, being treasure trove, and transferred to the police headquarters at Athy. All will be sent to the Dublin authorities, and then placed in the Royal Irish Academy. They will be finally offered for sale, and if purchased the full market value handed over to Mr. Kinsella. The coins were examined by Lord Walter Fitz Gerald, and he pronounced them to be a very interesting collection.

*
* *

A daring theft has been committed at the Museum of Rheims, which has just been robbed of a gold *bonbonnière* decorated with enamel, and a medallion of Louis XVI., formerly the property of that monarch. The fact that a number of precious stones and other jewelled articles in the same case were left untouched points to the thief being an unscrupulous collector rather than the more usual sort of criminal.

MONTHLY

NUMISMATIC CIRCULAR

THE *Monthly Numismatic Circular* will be forwarded post free on receipt of half-a-crown (= 3 francs = 2 ½ marks = 60 U. S. A. cents, in P. O. O. or stamps) for one year's subscription.

Should any applicant not receive it regularly by post, please notify the omission to us, when it shall be at once rectified. All communications respecting the Numismatic Circular (either referring to its literary portion or to its catalogue of coins, &c. for sale) should be made to our West-End house, 17 and 18 Piccadilly, London, W., where all letters and orders will receive immediate attention.

Cheques crossed National Provincial Bank of England, Piccadilly Branch.

Any coins or medals can be had on approval if the applicant is known to us, or, if not, on receipt of references. Postage on coins, as a rule, is paid out.

Orders for coins from the annexed list will be executed in rotation, but preference will be given to clients who are willing to purchase outright, providing the coins answer to the description.

Coins not approved of can be returned.

LA *Circulaire mensuelle de Numismatique* sera adressée franco à toutes les personnes qui voudront bien en faire la demande en nous faisant parvenir 3 francs 20 centimes par mandat postal pour un abonnement annuel.

Nous prions nos correspondants d'adresser toutes lettres et communications relatives à la partie littéraire du journal ou au catalogue des monnaies et médailles, à notre établissement, 17 et 18, Piccadilly, Londres, W.; nous y répondrons immédiatement.

Les ordres seront exécutés à tour de rôle en donnant la préférence aux commandes effectives.

Toutes les pièces seront envoyées *à condition*, si le client le désire, mais le port de retour est à sa charge.

Les personnes qui ne nous seraient pas connues sont priées de nous fournir des références.

DAS *Numismatische Circular* wird portofrei, nach Empfang von 2 ½ Mark (3 Kronen ö. W.) als Jahresbetrag, geschickt.

Sollte jedoch ein Abonnent dasselbe nicht regelmässig erhalten, so bitten wir, uns gefälligst Anzeige davon zu machen, um weitere Unregelmässigkeiten zu verhüten.

Alle Mittheilungen, welche dieses "Numismatische Circular" betreffen (gleichviel ob dieselben sich auf den literarischen Teil oder auf das Verzeichnis der Münzen, &c. zum Verkauf beziehen), sollten an unser West End Etablissement, 17 und 18 Piccadilly, London, W., gerichtet werden, wo Briefe und Aufträge sofortige Erledigung finden.

Jede Münze oder Medaille wird zur Ansicht gesandt. Bestellungen werden nach Reihenfolge des Einganges effectuirt und Nichtconvenirendes zurückgenommen.

Rückporto zu Lasten der Herren Besteller.

Uns unbekannte Herren Sammler werden um Aufgabe genügender Referenzen ersucht.

GREEK COINS.

THE ANCIENT COINS OF SICILY.

(*Continued from col. 13572.*)

ENNA.

The only coins of Enna belonging to the transitional Period are obols insignificant in size, but interesting on account of the reference borne by the types to the cult of Proserpine.

The name of the city is said by Dr Pape to signify "Altenburg", Oldtown (*Wörterbuch der Griechischen Eigennamen*, p. 359).

He refers to ἔνη, ἔννη in the *Etymologicon Magnum*, an early *Christian Greek Lexicon*. On page 582 of Gaisford's Edit. we read Εννη ἔστι δὲ ὄνομα πόλεως, — "Now Enna is the name of a city", the words given only as being an example of the doubling of a letter. In *Stephanus Thesaurus*, p. 1118 ἔννος is given as "vetus", "old". The word was used especially of the moon, as in *Plato, Cratylus*, p. 409 B, but the more usual spelling is with one ν, as ἔνος, with a rough breathing, and this agrees with the Sanskrit "Sanas" and Latin "Senex".

The legends on the obols shew the rough breathing was in use when the **HENNAION** coins were issued and the name was spelt Henna by the Romans. Stephanus of Byzantium and Diodorus Siculus spell the name Ἕννα as it is spelt in the *Ety. Magnum*. The old Greek name has been corrupted into Castro Giovanni but as the natives have long called it "Castro Janni" we see that the castro di Enna easily became "Castro de Janni", and that the Christian folk made that into Giovanni, the Italian form of John.

The site of Enna is as nearly as possible in the centre of the island; hence Cicero called it "Mediterranea Maxime" (Verres, III, 83).

As Eryx was famed for its temple of Aphrodite so was Enna also for its cult of Proserpina.

The sacred grove of her temple was called by Cicero from its central position in the island "Umbilicus Siciliæ" (Verres, IV, 48).

The same metaphor is used in the Hymn to Ceres by Callimachus, line 15.

The site is on a level table-land on the summit of a very high hill about three miles in circumference. The sides of the hill are precipitous cliffs, inaccessible and except in a few places easy of defence. The city was abundantly supplied with water, which flows from the rocks on all sides, and hence the site may be considered as one of the most remarkable of the natural fortresses of the world.

Livy thus speaks of Enna: "Enna, which stood on an eminence lofty and difficult of ascent on all sides, was impregnable on account of its situation" (XXIV, 37).

Cicero thus describes the site: "But Enna is in a high and lofty situation on the top of which is a large level plain, and springs of water which are never dry. And the whole of the plain is cut off and separated, so as to be difficult of approach" (Verres, Act. II. IV. 48).

Strabo merely mentions Enna as lying "in the midst between Syracuse and Eryx and commanding the surrounding plains" (Lib. VI, 273).

Plutarch in his life of Marcellus says that "if Enna, Megara and Syracuse were treated harshly, the blame was rather to be charged to the sufferers themselves than to those who punished them". This slight notice implies that the Romans took the city.

As Henna is an ancient fortress in the centre of the island, it is unlikely to have been a Greek colony, and as it is not mentioned by Thucydides, we should naturally conclude the city to have been a fortress of the Sicels.

The coins however show that the inhabitants, during the period to which the litræ belong, viz, 480 to 450 B.C., were at any rate governed as far the mint was concerned by Greeks, for the cult of Demeter and Persephone was thoroughly Greek. Homer, indeed, mentions the journey of Odyseus "to the dwelling of Hades and of dread Persephone" (*Odys.* X, 494). But Homer does not mention the rape of Persephone; for we learn first of that myth from Hesiod (*Theog.* 914). It is thought that Corinthian colonists introduced the myth to Henna. The Cretans claimed their own island as the site of the myth, and the Eleusinians claimed the Nysaean plain in Boeotia; others, later, said the site was in Attica.

The date when the Greeks obtained this influence on Henna is not mentioned by any ancient historian. Stephanus of Byzantium about 525 A.D., without citing his authority, tells us Ἕννα was a Colony of Syracuse, founded 80 years after the settlement of the parent city (654 B.C.).

This is improbable on account of the distance of Henna from Syracuse, more than sixty-five miles.

No remains of the ancient city or of its temples now exist; according to Fazello, the temple of Ceres stood on the brink of the precipice and has been thrown down with the fall of large masses of rock.

It is most probable that the materials of the old city were used by the Saracens in erecting their castle and the other buildings, some of which remain. The Saracens ruled in Enna from 859 to 1080 A.D.

A temple of Persephone is seen on the Monte Salvo, near the convent of the Padri Reformati.

THE CULT OF ENNA.

Cicero after speaking of the cult of Demeter and Proserpine as universal in Sicily said "For they believe that these goddesses were born in these districts, and that corn was first discovered in this land, and that Libera was carried off, the same goddess whom they call Proserpina, from a grove in the territory of Enna, a place which because it is situated in the centre of the island is called the navel of Sicily.

"And when Ceres wished to seek her, and trace her out, she is said to have lit her torches at those flames which burst out of Etna, and carrying these torches before her, to have wandered over the whole earth..... Around Enna are many lakes and groves, and beautiful flowers at every season of the year, so that the place itself appears to testify to that abduction of the virgin which we have heard of from our boyhood.

"Near it is a cave turned towards the north, of unfathomable depth, where they say that father Pluto suddenly rose out of the earth in his chariot, and carried the virgin off from that spot". (C. Verres IV, 48).

Cicero describes how Verres stole the ancient image from the temple at Enna, in the next chapter (XLIX) "This I say, that this very Ceres, the most ancient, the most holy, the very chief of ancient things (omnium sacrorum) which are honoured by every people, and in every nation, was carried off by Caius Verres from her temple and her home. Ye who have been to Enna have seen a statue of Ceres made of marble, and in the other temple a statue of Libera.

"They are very colossal, and very beautiful, but not very ancient. There was one of brass of moderate size but extraordinary workmanship (singulari opere) with the torches in its hands, very ancient, by far the most ancient of all those statues which are in that temple that he carried off.

"In truth that city does not appear to be a city but a shrine of Ceres, the people of Enna think that Ceres dwells among them, so that they appear to me, not to be citizens of that city, but to be all priests, to be all ministers and officers of Ceres" (omnes accolæ atque antistites).

A full description of the Cult of Ceres is given in the fourth book of Ovid's Fasti. Referring to Sicily he says "It is a habitation delightful to Ceres, there she possesses many a city, among which is the fruitful Henna, with its well tilled soil".

After describing the carrying off of Proserpine he goes on "Ceres was amazed at the lamentation, she had just come to Henna.... she restrains not her wailing, and is swiftly borne on her course, and she begins it from thy plains, O Henna". The legend is repeated by Silius Italicus in his fourteenth book of the Punic wars.

Tum rapta præceps Hennæa virgine flexit.

As soon as he had snatched away the maid of Henna he caused his steeds to return to his dark regions.

The same myth is repeated by Diodorus Siculus (V.III.) in which the site is fully described.

LITRÆ OR OBOLS

OF THE TRANSITIONAL PERIOD.

Weight of specimen in the British Museum 11.2 grains.

Obv. Quadriga, to right, driven by Demeter holding torch and reins; horses walking: border of dots.

Rev. HEN NAI O N.

A female figure, facing, her head turned to left, clad in a long chiton, and with chlamys falling over both her arms, sacrificing with a lighted torch in her right hand, before an altar.

HIPANA.

It seems doubtful whether the exact site of Hipana has been discovered, but from the mention of the city by Polybius we may gather that it was to the east of Palermo, and not very far distant. Adolf Holm places the site at Castellacio, on the east of Termini, about thirty miles to the east of Palermo, and this would agree with the manner in which the city is mentioned by Polybius (Lib. I, 24, p. 34, Ed. Mr. Hampden).

" The consuls of the following year, A. Atilius and C. Sulpicius, having led the army to Panormus, where the Carthaginians lay in winter quarters, drew up their forces in order of battle before the city, but when the enemy kept close within the walls, they directed their route back to Hipana, and took it in the first assault... Mytistratum was also taken ... they then marched to Camarina ". Perhaps the city mentioned by Diodorus Siculus as Sittana, in his description of the same campaign, may be more correctly written. Hipana (Diod. Sic. XXIII, 9, p. 315, Ed. F. Hoefer).

The only other writer who mentions the city is Stephanus of Byzantium, and he is quoting Polybius.

In some of the best MSS. of Pliny we find " Hipanenses " in place of " Ichanenses " which is the reading in old editions, but the better reading is found in Sillig's edition.

However, as the name Ichanenses does occur in Stephanus we cannot be sure of the mention of Hipana by Pliny (Lib. III, 8, s. 14, § 91).

The coins are the only evidence of anything more than the name of the city, and what we may infer from the passage in Polybius. They shew that early in the fourth century the city belonged to the Carthaginians, as the types are similar to those on the coins of Motya. The dolphin and shell shew that the city was a port, and the similarity of the coins to those of Motya point to the close connection in commerce of the two ports.

In the British Museum is a silver obol, weighing 11.2 grains, bearing on the obverse. ANA·TAI (IΠANATAN). An eagle with
Π I
closed wings standing to left on an Ionic capital, holding in its beak an uncertain object : plain border.

Rev. A dolphin to left : beneath, a scollopshell.

LONGANE.

In the British Museum there is a silver obol of the Transitional Period inscribed ΛΟΓΓΑΝΑΙΟΝ and this little piece of silver seems to be all that is left of the city in which it was minted.

Some Numismatists used to attribute this coin to the place mentioned by Diodorus Siculus as in the territory of Catana (Excerpt Hoeschel, p. 508). " There was at Longane in Catana a fortress called Italium. This fortress was beseiged by Barca the Carthaginian "...

But as there is on the Reverse of the coin the head of a river-god it is more probable that the city from which the coin was issued was situated on the stream called Λόγγανος or Λοίτανος mentioned by Polybius (1.9, p. 23, Ed. Hampton) in his account of the year 270 B.C. " And when the Mamertines, elated by their past success, had spread themselves over all the country without any fear or caution he (Hiero) led against them the forces of the city (Syracuse), which were now completely armed and disciplined, and came to an engagement with them upon the banks of the river Longanus, in the plain of Mylae ".

Now as Catana is fifty miles to the south of Mylæ, this river cannot be associated with the town mentioned by Diodorus Siculus.

The only reason for the naming of the river-god on the obol Amenanos, in the British Museum Catalogue, is the old belief that the coin was issued near Catana, in the city mentioned by Diodorus. But as Adolf Holm suggests (p. 603, tom. IV Geschichte Sic.) it is much more probable that the river-god on the coin is the god of the river Longanus near Mylæ, spoken of by Polybius.

It is thought that the Fiume Sta Lucia is most likely to have been the Longanos, which is about three miles south-west of Milazzo, although Cluverius regarded the Fiume di Castro Reale as the Longanus, though that is more distant from the city Mylæ (Cluv. Sicil., p. 303).

We notice that the river is called both λογγανος and λοιτανος; this looks like a misreading in one case, because if we write the names in the old characters we can see how easily ΛΟΓΓΑΝΟΣ might be read as ΛΟΙΤΑΝΟΣ. These words are not found in the Greek Lexicon of Liddell and Scott, but λογγευω and λοιτευω are found in Stephanus' Thesaurus (p. 384) and said to signify βαπτειν or θαπτειν, and λογγη is said to mean a grave (q. 346) and to be equivalent to λοιτη, a form made like κοιτη, ἐροιτη.

Dr Pape in his work on Greek names evidently drew his note from Stephanus' Thesaurus, and would regard the name of the river as meaning the deadly stream.

But as λαγγάζω is sometimes written λογγάζω and means the same as the Latin " langues ", our " languid ", we may perhaps see in λαγγαζω the roots, from which the ideas of death may have been derived. The stream may have been a slow one and if so the name would signify its sluggish movement.

OBOL.

The weight of the specimen in the British Museum is 11.3 grains. Obv., ΛOIANAΓΓOΛ (ΛOΓΓANAION). Head of young Heracles to right, in lion's skin : border of dots.

Rev., Young head, to left, of a river-god, with short horn above the forehead.

The style is that of the early transitional period; a young head of Heracles appears on a bronze coin of Agrigentum (No 117, B.M.C.) and on another bronze coin of Agrigentum is a head of a young river-god. The same head of Heracles also appears on a bronze coin of Agyrium (No 6 B.M.C.).

At Camarina a similar head of Heracles appears on silver tetradrachms (No 13 B.M.C.).

At Entella a similar head appears on a Hemilitra (No 3 B.M.C.). At Gela also on the Reverse of silver coins (No 60 B.M.C.). At Himera also on obols (No 49 B.M.C.). At Thermæ Himeræ on late bronze on reverse.

Also on Bronze of Messana (No 78 B.M.C.).
On Bronze of the Mamertini (No 13 B.M.C.).
Also on Bronze of Panormus (No 6 B.M.C.).
Also on a triobolon of Selinus (No 48 B.M.C.).
Also on Bronze of Solus (No 1 B.M.C.).

During the period of fine art the head of young Heracles appeared on gold coins of Syracuse (No 133 B.M.C.).

The type of the head of young Heracles was therefore popular almost throughout the Greek cities of Sicily, and we can only infer that the city Longane was a Greek city.

The placing of the head of a river-god upon the coin as a type was also common; the type is found at Adranum No 3 B.M.C.
Agrigentum No 122 B.M.C.
Agyrium No 7 B.M.C.
Leontini No 61 B.M.C.
Panormus No 5 B.M.C.
Piacus No 1 B.M.C.
Selinus No 50 B.M.C.
and on Siculo Punic coins No 24 B.M.C.

(*To be continued.*)

BIOGRAPHICAL NOTICES OF MEDALLISTS

Coin, Gem, and Seal Engravers, Ancient and Modern, with References to their Works.

B.C. 500 — A.D. 1900.

(Including the names of several hitherto unpublished artists.)

One-hundred-and-sixty-fourth article.

(Continued from col. 13583.)

TAUPIER, JEHAN (*French*). Mint-master at Nantes, 1541-1549; privy-mark, a heart. Mint-mark, ermine under the shield. He coined Douzains à la croisette, on which the words are divided by ermines (*Bull. de num.*, II, pp. 22, 23).

TAURICUS (*Rom.* or *Greek*). One of the famous Caelatores of antiquity whose names are recorded by Pliny. He was a native of Cyzicus.

TAUSSE, RAOUL (*French*), 1511-13. Ironmonger of Béthune; engraved dies for Méreaux, *circ.* 1511-13.

TAUTENHAYN Senior, **JOSEF** (*Austr.*). Contemporary Sculptor and Medallist, born at Vienna on 5. May 1837, died on 1. April 1911, aged 74. His father, Hermann Tautenhayn was a native of Saxony, who settled at Vienna in 1830; his mother, Veronika Waschak, came from the neighbourhood of Iglau. Josef was one of nine children; of the four sons, one, Hermann, became a Statuary, and died in 1903, and another, Rudolf, a Die-sinker, who succeeded to the father's business.

Josef Tautenhayn received his early instruction at the St. Anne's normal school at Vienna; in 1853 he became a pupil of the medallist, Karl Radnitzky, at the elementary school of modelling; in the following year, he entered the preparatory school of sculpture of the K. K. Academy, which at the time was under the direction of Prof. Franz Bauer. Later he studied the art of medal-engraving at the 'Graveurakademie' of the Vienna Mint, and visited Italy, France and England. In 1869 he was appointed K. K. Kammer-Medailleur; in 1878 he was awarded the Karl Ludwig medal for the model of a

shield representing the Struggle of the Centaurs and Lapithae, which he executed in commission for H. M. the Emperor. In the same year he became Professor of Medal-engraving at the K. K. Academy of Fine Arts; 1874, he won the Reichel Prize; 1882, the large gold State medal. He is a Ritter of the Order of Francis Joseph.

In later years the artist has not produced much, but of one of his best known medals, the Jubilee Medal of Francis Joseph I. 1898, for Military and State officials, over 3 million specimens were struck.

The following list of Tautenhayn's medallic works is extracted from Dr Domanig's monograph: 1866. War Medal for the Tyrol (var.); — Military Medal for the Prague Bürgerkorps (var); diam. 31 mill.; — 1867. Hungarian Coronation Medals; one with bust of Francis Joseph I., and the other with that of the Empress Elizabeth (the second *illustrated* from the model in wax); 50, 26,

Elizabeth, Empress of Austria.

and 20 mill.; — 1867. Johann Hassenbauer, Ritter von Schiller; Rℒ. by Leisek; 48 mill.; — Fürst Karl zu Schwarzenberg; 63 mill.; — 1869. First Industrial Exhibition at Vienna; 43 mill.; — Visit of Francis Joseph I. to Palestine; 72 mill.; — Opening of the Suez Canal in the presence of H. M. Francis Joseph I.; 72 mill.; — Shooting Medal of Reichenberg; — 1872. Empress Maria Theresia Monument at Klagenfurt; 61 mill.; — Franz Schubert; 64 mill.; — 1873. 25th Anniversary of Francis Joseph I.'s reign; 55 mill.; — Archduchess Gisela of Austria and Duke Leopold of Bavaria; on

Archduchess Gisela of Austria.

their marriage; 42 mill. (bust of the Archduchess *illustrated* from Tautenhayn's wax model); — Universal Exhibition; Prize Medal for Arts; 70 mill.; — Universal Exhibition; Prize Medal for Progress; 70 mill.; — State Prize Medal for Agriculture; 61 and 50 mill.; — Prize Medal of the Society of Pharmacists; 68 mill.; — Friedrich Schmidt; 45 mill.; — 1874. Wilhelm von Tegetthoff; 62 mill.; — Countess Amalia Sommsich; 45 mill.; — Ignaz Frank, Vienna; — 1875. Emperor Maximilian Memorial at Trieste; 70 mill.; — Annexation of Bukowina to Austria; 43 mill.; — Official Prize Medals for Horse-breeding, Mining, Mechanics, Tobacco-growing, etc.; 40-48 mill.; — Medals for the Collars of the Rectors of Czernowitz University; 47 mill.; — Prize Medal of the Industrial Society of Kuttenberg; 43 mill.; — 1876. Heinrich Laube; 50 mill.; — 1877. Archduke Albert of Austria; 63 mill.; — Raxalpentaler on the Opening of the Karl Ludwig-Schutzhaus; 33 mill.; — Wilhelm von Tegetthoff; 62 mill.; — Alexander Conze; 53 mill.; — 1878. Alessandro Daninos; 60 mill.; — 1879. Silver Wedding of T. M. the Emperor and Empress; obv. by Scharff; 50 mill., and 170 mill.; — Second Centenary of the Relief from the danger of pestilence of the Mint Officials of Vienna; 36 mill.; — Prize Medal of the K. K. Ministry of Commerce; 57 mill.; — 1880. Alexander Ritter von Pawlowski; 38 mill.; — Prize Medal of the Lower Austria Industrial Exhibition; 61 mill.; — 1881. Crown Prince Archduke Rudolph; wax model (*illustrated*);

— Crown Princess Archduchess Stephanie; wax model (*illustrated*); — Marriage medal of Crown Prince Rudolph with

Crown Prince and Princess Rudolph and Stephanie.

Princess Stephanie of Belgium; 55 mill.; — 1882. State Prize Medal for Decorative Arts; 46 mill.; — 1883. Prize Medal of the Society of Graphic Arts; 50 mill.; — Prize Medal of the Theresianum; 48 and 39 mill.; — Jubilee Medal of the City of Vienna; 72 mill. (*illustrated*); — King John Sobiesky; 70 mill.; — Friedrich Freiherr von Schmidt; 45 mill.; — Franz von Miklosich; 53 mill.; — Theophil Hansen; 60 mill.; — Opening of the Arlberg Tunnel; 70 mill.; — 1884. Dr Paul von Gautsch von Frankenthurn; 51 mill.; — Count Franz Folliot de Crenneville; obv. by Scharff; 125 mill.; — 1885. Club of Plastic Modellers of the Society of

Jubilee Medal of the City of Vienna, 1883.

Artists; 135 mill.; — Fürst Fürstenberg, Cardinal Archbishop of Olmütz; 47 mill., and 108 mill.; — Prince Nicholas of Montenegro; wax model; — 1888. 40th Anniversary of reign of Francis Joseph I.; 62 mill.; — 1898. Laura Tautenhayn; wax model; — 1891. Joseph Axmann, line-engraver; plaquette, 180 mill.; — Dr Ernst Julius Hachnel, 62 mill.; — 1892. Ludwig von Lieben; cast, 150 mill.; — Richard von Lieben; cast, 150 mill.; — Second Centenary of the Viennese Academy of Fine Arts; 64 mill., and 165 mill.; — Fourth Centenary of the Discovery of America; wax model; — 1894, Hermann von Helmholtz, Berlin; 85 mill. (2 var.); — Another, with R⁄. Vindobona; 61 × 41 mill.; — 1896. Patriotic Association of Artists in Bohemia; 80 mill.; — Society of Viennese Pharmaceutists; 29 mill.; — 1898. Jubilee of Francis Joseph I.; 60 mill.; — Jubilee Medal for the Army; 34 mill.; 5 million specimens were struck; — Portrait-plaquette of H. M. Francis Joseph I.; cast, 206 × 172 mill.; — 1899. Fahnen-Medaille (1849-1899); cast, 91 mill.; — 1900. Prize Medal of the Paris Universal Exhibition; wax model; — 1901. Commemorative medal of the K. K. niederösterreichische Statthalterei; plaquette, 76 × 60-67 mill; also 225 × 182-200 mill.; — 1903. Viktor Luntz; 55 × 38 mill.; cast, 125 × 180 mill.; — 1904. Spring; wax model; — Donauweibchen und Eiserner Mann; — Jubilee of the Austrian Empire; — 1905. Don Juan of Austria and Tegetthoff; 160 × 110 mill.

The Vienna Mint preserves the following Coin-dies by Tautenhayn: 1866. *AV.* 4 Ducat piece; Ducat; Goldkrone; and Halb Goldkrone; *AR.* Double Thaler (R⁄. by Franz Gaul); Double Gulden, Vereinsthaler (R⁄. by Gaul); Gulden; Quarter Gulden; Zehn Kreutzer; Fünf Kreutzer; — 1868, *AR* Gulden for Hungary (R⁄. by Gaul); 20 and 10 Kreutzer pieces for Hungary (R⁄. by J. Pfeiffer); 20 and 40 Kreutzer for Austria (R⁄. by Gaul); — 1870. *AV.* 8 Gulden = 20 Francs (R⁄. by Gaul); and 4 Gulden = 10 Francs both for Austria and Hungary; Gulden (R⁄. by Gaul); and 20 Kreutzer (R⁄. by Pfeiffer) for Hungary; — 1878. *AV.* 20 and 10 Francs, and *AR.* Gulden for Hungary; — 1879. Silver Wedding Double Gulden (after Leisek; R⁄. by Tautenhayn and A. Scharff). Beside these, a large number of dies and puncheons, many for official Prize medals, of all kinds are enumerated in *Katalog der Münz- und- Medaillen-Stempel-Sammlung des K. K. Hauptmünzamtes in Wien*, Wien, 1904.

"Die Kunstrichtung Tautenhayn's", observes A. von Loehr, "ist durch die strengste Vollkommenheit der Formen ausgezeichnet. Nichts Skizzenhaftes — Alles durchgedacht, Alles durchgearbeitet. Dabei ist nichts Langweiliges oder allzu Akademisches in seinen Arbeiten — er stellt nur schöne Gedanken formvollendet und schön dar."

Münz- und Medaillen-Stempel-Sammlung in Wien.*

TAUTENHAYN Junior, **JOHANN JOSEPH** (*Austr.*). Son of the preceding; born at Vienna on 10. September 1868; studied at the K. K. Academy of Fine Arts, and under Prof. E. Hellmer; he learned chasing in the workshop of C. Waschmann and B. Kellermann at Vienna.

His principal medallic works are: 1893. Ferdinand Jäger; cast medal, 180 mill.; — 1894. Portraits of Children; plaquette, silver cast; — Helene Odilon, actress; plaquette in silver, cast 210 × 150 mill.; — 1895. Portraits of Children; bronze cast plaquette, 140 mill.; — 1896. Two Portraits of Young Girls; bronze cast plaquette, 140 mill.; — Anton Bruckner; medal; and plaquette, 65 × 45 mill.; — 1898. Lady's Pendant, Architects' Ball of the City of Vienna, 1898; plaquette, 40 × 100 mill.; — Jubilee Exhibition at Vienna; 40 mill. — 1899. Choral Association of Austrian Railway Officials; 45 mill., and 20 mill.; — Lady's Pendant, octagonal brooch; 20 mill.; — 1900. Fourth Centenary of the Incorporation of Görz with Austria; 66 mill.; — Hans and Gretl Simon; plaquette, 130 × 200 mill.; — Plaquette of the Society of Engineers and Architects; Homage to Paul Kortz;

Male Portrait.

150 × 220 mill.; — Dedication medal of Frau Johann Strauss to Directress Alex. v. Schönerer; cast plaquette, 160 × 260 mill.; — Serpentine Dancer (illustrated in *Moderne Medaille*, 1900, p. 33); — Four Children's Portraits; cast plaquette, 160 × 210 mill.; Count and Countess Lanckoronski; cast plaquette, 220 × 250 mill.; — Portraits of their Children; 160 × 250 mill.; — Lady's Pendant, buckle; 60 mill.; — Marriage Medal Nostitz-Jordan, Dresden,

*

TAVERNA GIULIANO (*Ital.*). Gem-engraver of Milan, who flourished in the sixteenth century. He excelled as a worker in crystal, and is mentioned by Lomazzo and Mariette. King remarks that, as late as the year 1750, the Milanese maintained their reputation for working in crystal.

BIBLIOGRAPHY. — Babelon, *Pierres gravées.* — King, *op. cit.*

TAYLOR, WILLIAM JOSEPH (*Brit.*). Medallist, Die-sinker and Engraver, born in Birmingham in 1802; apprenticed to Thomas Halliday in 1818 (a copy of this Indenture is in the possession of Dr Stanley Bousfield, and says that from November 1st 1820 during the remainder of apprenticeship, Taylor is to receive eight shillings a week). Taylor was the first die-sinker to be trained under Halliday, who later on turned out in succession Charles Frederick Carter, John Sheriff, Joseph Moore, William Wyon and many others of lesser note.

Taylor came to London in 1829 and set up business as a Die-sinker, Medallist and Engraver, first at 5 Porter Street, Soho, then he removed to 3 Litchfield Street, and in 1843 to 33 Little Queen Street. Finally, in 1868, he went to 70 Red Lion Street, where he died in March 1885.

In November 1852, Taylor sent out a coining press and complete plant to Melbourne. The undertaking was financed by a small syndicate, and Mr. W. R. Scaiffe was in charge. In the Melbourne Exhibition of 1854 Mr. Scaiffe was "awarded a Bronze medal for medals struck in the Building" (The original engraved Certificate awarding this medal is in Dr Bousfield's collection).

Dies for Port Philip Gold pieces of 1853 and Victorian Shilling and Sixpence of the same time were probably made by Taylor and sent out (as Dr Boursfield owns two puncheons for these pieces from among Taylor's dies).

Taylor's plan to mint gold into pieces stamped and of convenient weight fell through because by the time his mint was ready the banks were buying gold at its full value. The press was bought by Mr. Thomas Stokes in 1857.

From the Collection of W. J. Taylor, Dr Bousfield has an unpublished Token which was meant to be circulated as an advertisement for this plan. The obverse is that of the common Melbourne Halfpenny Token with a kangaroo standing, and the reverse reads "Pieces of ¼, ½ 1 & 2 oz. Pure Australian gold issued at the Kangaroo Office Port Phillip-Native gold exchanged on the best terms". This is particularly interesting, as hardly any contemporary struck pieces are known (*Vide* B.N.S. Journal, Vol. I, pages 394-5).

After W. J. Taylor's death the business was carried on by his sons Theophilus and Herbert. In 1892 Theophilus left the business, and in 1908 the presses, tools and machinery were sold off.

Among the best known of medals by Taylor are: Medal of St. Saviour's School, Southwark, founded 1562, rebuilt 1839; — Shakespeare Medal for Commemoration of 1842 (designed by H. H. Young); — Handel Centenary Commemoration at the Crystal Palace in 1859; — Taylor Combe Memorial Medal, 1826 (after Pistrucci); — Charles Green, aeronaut, 1836; — Medal of the Worshipful Company of Joiners, London; — Completion of the Thames Tunnel, 1842 (sev. var.); — Medal of the Royal Humane Society (in the style of Pingo's earlier medal); — Coronation medal of Dom Pedro II. of Brazil, 1841; — Medal of the British Archaeological Association, 1850; — Restrike of the St. Bartholomew Massacre medal; — Patterns for coinage of French Pretender Henri V., 1831-33 (including 5, 2 and 1 Francs, and 50 Centimes); — Prize medal of the Society of Agriculture and Horticulture (with bust of Queen Victoria; modelled by G. Glenny); — Peace of Paris 1814, with busts of Alexander I. of Russia, Frederick William III. of Prussia, the Duke of Wellington, and Marshal Blücher (signed: **W.T.F.**); — Free Trade medal (by Taylor and Allen); — The Duke of Sussex (after Weigand); — General Gordon; — Golf Club medal; — Prize medal for Literature; — Dr Chalmers, commemorating the First Assembly of the Free Presbyterian Church of Scotland, 1843; — Prize medal of the city of Perth for first student in the senior mathematical and physical class; — Sir James Duke, Montrose Academy Prize medal; — James William Gilbart, F.R.S.; Foundation of the London and Westminster Bank commemorated, 1834; — Halfpenny Tokens of Matthew Young, undated; Benjamin Nightingale 1843, 1845; — Penny and Halfpenny Tokens of William Till, 1834 and 1839; — Pattern Gourde of Henri I. of Haïti, 1820, &c.

Taylor also sent out the copper coinages for the Republic of Liberia in 1847 and 1862, and was responsible for a number of the Australian Tokens. The firm took a prominent part in the 'restriking' of coins and medals late in the last century, possibly at the instigation of others. The dies being now chiefly in private possession, they will not serve again. Possibly the best known of these restrikes are "J. P. Droz" Patterns of George III. (which were first struck outside the Soho Mint sometime between 1862 and 1880. The die of the nude Britannia had not been hardened when it came into Taylor's possession); — Fullerton's patterns in gold, silver, copper and white metal for 2/6, 1/6, 1/. and 6d. (Subsequent to the restriking of these by Matthew Young the dies were taken by Taylor who supplied the tokens to order as required); — Devonshire County Twopenny token 1801 (dies were softened and repaired, and 24 impressions taken); — Various Napoleonic Medals; — Seringapatam medals, &c.

BIBLIOGRAPHY. — *Information kindly supplied by Dr Stanley Bousfield to whom I beg to offer my best thanks.* — *Sale Catalogues*, &c.

TAZZAGLIA (*Ital.*). Medallist of the second half of the eighteenth century, by whom is a medal of the Roman Senator Ab. Rezzonico with Rx. Minerva as mentioned by Bolzenthal, p. 270.

T. B. or **T. B. B.** (Turin) and **BARTOLOMEO BRUNASSO** (Mint-master), 1519-1535.

T. B. *Vide* **TOMMASO BRAGADINO.** Mint-administrator at Venice, 1618.

T. B. or **TB.** *Vide* **TONNIES BREMER.** Mint-master to the city of Hanover, 1619-1628.

T. B. or **TB.** *Vide* **THOMAS BERNARD.** Medallist at Paris, 1675-† 1713.

T. B. *Vide* **THÉODORE BONNETON.** Mint-engraver at Geneva, 1788-1797.

T. B. *Vide* **T. BIRNBÖCK.** Medallist at Munich, *circ.* 1855.

T. B. C. *Vide* **TURIN** and **BERNARDO CASTAGNA.** Mint-master, 1567-1569.

BIBLIOGRAPHY. — Schlickeysen-Pallman, *op. cit.*

T. B. (*Brit.*). Engraver's initials on some medals relating to the capture by Admiral Vernon of Fort Chagre in 1740, &c. One of these medals is described in *Medallic Illustrations*, II, 546, n° 149. The obv. shows a half-length figure of Vernon to right, Rx. Six ships entering Porto-Bello harbour.

T. BN occurs on the reverse of silver fifty centesimi dated 1863, minted for Italy.

T. C. (Turin) and **CACCIA** (Mint-master) 1484-1489.

T. C. *Vide* **THOMAS CRANMER,** Archbishop of Canterbury, 1532-1556, on coins of Henry VIII.

T. C. *Vide* **TOMMASO CONTARINI.** Mint-inspector at Cattaro, 1606-1608.

TCHEREMISSINOFF, Mlle VERA ELIZABETH (*Russ.*). Contemporary Sculptor and Medallist, born at St. Petersburg; pupil of Strasser, Gauquié, and Roland.

At the Paris Salon, 1909, she exhibited a Portrait-medallion of Prof. Dr Robert Gaupp.

TCHUKMASSOW (*Russ.*). Contemporary Medallist; author of a medal of the Centennial of the Moscow Foundling Hospital, 1868. It is signed in Russian on the reverse.

T. D. *Vide* **THOMAS RUTHAL**, Bishop of Durham, on coins of Henry VIII., 1508-1523.

T̄E. *Vide* **TOBIAS EITZE**. Mint-master at Quedlinburg, 1615-1617.

T. E. *Vide* **ELIA TISCO**. Mint-master at Parma, 1644-1652. Also **E. T.**

T. E. These initials occur on a Portrait-medal of Count Ludwig Zinzendorf, † 1760.

TEBMER, SIGMUND (*Austr.*). Moneyer at Vienna, 1468.

TECLENBURG. *Vide* **TEKLENBURG.**

TEDESCO, IL. *Vide* **KRAFT, GOTTFRIED** (Vol. III, p. 215). Gem-engraver of Danzig, second half of the eighteenth century. He was one of the cleverest pupils of Natter, and known at Rome as *Il Tedesco*. By him is a fine Portrait-cameo of Augustus. His style bears analogy to that of Pichler.

TEICHMANN, CHRISTIAN (*Germ.*). A native of Dusseldorf; Mint-master at Berg, circ. 1807; was then appointed in the same capacity at Ehrenbreitstein, 1808, and Wiesbaden 1808-1843. He served the Dukes Frederick Augustus (1808-1816), Wilhelm (1816-1839) and Adolf, on the coinage of whom his initials **C T** occur. The engravers Lindenschmidtt (1808-1809) and Zollmann (1819-1843) worked under him.

Conventionsthaler of Frederick Augustus of Nassau, 1811.

Teichmann died at Wiesbaden on 4. February 1852.

BIBLIOGRAPHY. — Julius Isenbeck, *Das Nassauische Münzwesen*, 1879.

TEISSIER (*French*). This signature occurs on a Masonic medal of the Lodge 'L'heureuse Alliance' of Provins, 5782 (*Marvin*, 221).

TEISSIER, ANTOINE (*French*). Contemporary Sculptor and Medallist, born at Metz; pupil of Charpentier. By him are Portrait-medallions in bronze and terra-cotta.

TEISSIER, HENRI (*French*). Contemporary Sculptor and Medallist, born at Mézières; pupil of Charpentier. He is the author of a number of Portrait-medallions, two of which were exhibited at the Salon in 1883.

TEIXEIRA, LOPES (*Port.*). Contemporary Sculptor, born at Villa Nova de Gaya (Portugal). At the Paris Salon 1886 he exhibited a Portrait-medallion of Rodrigo Soares.

TEKLENBURG JOHANN (*Germ.*). Mint-master at Crailsheim 1622-1623. *Vide* Gebert, *Die Brandenburg-Fränkischen Kippermünzstätten*, 1620-22.

TELEMACHUS. The inscription **ΤΗΛΕΜΑΧΟΥ** occurs on a Roman intaglio in red jasper of late period, showing a Warrior standing. The late owner, M. Kibaltchich of St. Petersburg, took it to be an engraver's signature, but it no doubt refers to the personage represented on the gem.

TELGE, P. (*Germ.*). Mint-engraver at Bukarest. There is a Memorial medal of William I., German Emperor, 1888, by him, which is signed : **P. TELGE BERLIN**; obv. by E. Weigand. I have not been able to ascertain when Telge was appointed at the Roumanian Mint. Besides coin-dies, he cut the official Jubilee Medal of King Carol I., on the completion of his 40 years' reign 1866-1906.

TELLIER, L. N. (*French*). Engraver at Lyons, by whom are several jetons 1826, 1830, 1832 (Notaires de l'arrondissement de Lyon), &c. *Vide* E. L. G. Charvet, *Médailles et jetons de la ville de Lyon*, Gaz. fr. de num., 1907-1908.

TELSBERGER, Meister **STEPHAN VON** (*Swiss*), 1459-1476. Goldsmith, Mint-master, and Die-cutter of Basle, in was, 1434, burgher of Lucerne; Mint-engraver at Lucerne, *circ.* 1459-1476.

BIBLIOGRAPHY. — Dr Theodor von Liebenau, *Die Münzmeister von Luzern*, Bull. Soc. suisse de numismatique, 1885.

TELTSCH, E. (*Austr.*). Author of a medal of Dr Josef Graber of Vienna, the R. of which is signed **E. STANIEK FEC.**; also of another of Dr. M. Benedikt, Vienna (In Boston Collection).

TEMET, P. Signature on an ancient gem in black jasper (Florence), representing Hercules Musagetes playing on the lyre, with a Cupid carrying a long torch (Raspe, *Tassie Gems*, n° 5945).

TEMPLETON, REID (*Amer.*). Issuers of private currency, 2 ½, 5 and 10 Dollars 1830 for Georgia, 10 and 25 Dollars 1849 for California.

TENAILLE, MÉDAILLEUR A LA. *Vide* **TANAGLIA** *supra.*

TENAILLE, MAURICE (*French*). Contemporary Sculptor and Medallist, born in Paris; pupil of Barrau. At the Salon 1893 he exhibited a Portrait-medallion in bronze.

TENG, HANS (*Austr.*). Mint-master at Waldstein (Styria) 1645-, 1649; privy-mark **V.T.** He coined for Johann Anton, Duke of Krummau, Prince of Eggenberg, and issued Thalers of 1645 and 1649 as well as subsidiary currency.

TENGEL, HANS. (*Germ.*). Mint-master at Rostock, 1546-48; privy-mark, a trefoil.

TENGY. *Vide* **HANNS TENGG** or **HANS TENG** *supra.*

TENNANT, COL. J. F. (*Brit.*). Officiating Mint-master at Calcutta, 22nd July to 19th November 1871, again 26th December 1871 to 2nd February 1872, and 10th to 15th February 1872; 18th January to 20th July 1876; 23rd October 1876 to 3rd July 1881; 1st September 1881 to 10th January 1884. In *Revue belge de numismatique*, 1883, p. 423, Dr. von Winckler gave an interesting account of an interview with Col. Tennant and description of the Mint at Calcutta.

TENNIEL, Sir **JOHN** (*Brit.*). A celebrated cartoonist, who from 1864 to January 1901 has week by week drawn the chief political cartoon in *Punch*, the merits of which are too well-known to need comment; illustrations to "Aesop's fables", "Ingoldsby Legends", "Alice in Wonderland", and other works, reveal the grace and delicacy of his workmanship; born in London, 1820, and practically a self-taught artist; joined the staff of *Punch* in 1851; was knighted in 1893; died in 1903.

Tenniel designed L. C. Wyon's medal of the International Medical Congress, in London, 1881, a specimen of which was in H. M. King Edward VII.'s collection at Buckingham Palace.

TENORT, HENRI (*French*). Mint-engraver at Saint-Lô, *circ.* 1416.

TEPERELLI, FRANCESCO MARIO (*Ital.*). Medallist of the first quarter of the sixteenth century. By him is a Portrait-medal of Lodovico da Ponte de Bellune, known as Pontico Virunio, of Treviso (1467-1520), historian and scholar. The medal is signed : **OPVS.FRANCISCI.MARII.TEPERELLI.PVERVLI.** Diam. 45 mill. (Armand, I, 123; III, 51; Friedländer, 105).

TERNOIS, JACQUES (*French*). Contemporary Sculptor, and Medallist, born at Semur (Côte-d'Or); pupil of Thomas, and J. Dampt. He exhibited various Portrait-medallions at the Salon 1893, 1896 and later.

TERRAX, YPOL (*Flem.*) and his companions, acted as Mint-masters at Bruges, 23rd January 1467 to 14th April 1472; again in conjunction with Marcel van Millon, Easter 1472 to Easter 1474.

TERROUX, ÉTIENNE (*Swiss*). Mint-master at Geneva, in conjunction with his son. Two contracts were passed between them and the City Council on 28. June 1765 and 16. January 1769. His name occurs also in connection with the negotiations which took place at Neuchâtel 1775-79 with a view of reopening a Mint there.

BIBLIOGRAPHY. — Demole, *Histoire monétaire de Genève*. — W. Wavre, *La « Grande Lacune » dans le monnayage de Neuchâtel de 1714 à 1789*, Musée Neuchâtelois, 1885, Num. Circ., 1894.

TERRY (*Brit.*). A London Die-sinker of the last quarter of the eighteenth century, whose best known production is a medal of George Augustus Elliot, Lord Heathfield, commemorating the latter's celebrated defence of Gibraltar, 1782. The medal is signed: **TERRY. FEC. LONDON**. *Vide* Cochran Patrick, *Scottish Medals*, p. 107.

TESCHLER, JOHANN (*Germ.*). Medallist at Nuremberg, died in 1546 (Doppelmayr (201)193. *Vide* Vol. I, *N.E.*, pp. 493, 569). Dr. Domanig (in *Jahrbuch* des A.H.K., XIV, p. 26 sqq.) has given a list of this artist's productions.

In his Catalogue of the Lanna Collection (Sammlung des † Freiherrn Adalbert von Lanna, Prag; III. Teil, Berlin 1911) Dr. Regling ascribes to Deschler the following medals: 1540. Nikolaus Guerard; 36 mill.; — 1548. Ludwig von Hutten; 35 mill.; — 1549. Marquardt von Stein; 40 mill; — 1553. Hieronymus Paumgartner; 74 mill,; — 1554. Johann Neudörffer; 2 var.; — 24 mill.; — 1554. Lukas Sytzinger Senior; 45 mill.; — 1554/7. Lukas Sytzinger Senior and Junior; 35 mill.; — 1556. Georg Ölinger; 57 mill.; — 1556. Franz Ygelshofer; 42 mill.; — 1557. Franz Schleicher; 41 mill; — 1560. Kilian Saner; 41 mill.; — 1562. Sigmund Richter; 37 mill.; — 1564. Franz Ygelshofer; 32 mill.; — 1567. Heinrich Walter; 40 mill.; — Leopold Heyperger and his wife, Elizabeth; 31 mill.

A fine specimen of Deschler's silver Portrait-medal of Charles V. and Mary of Hungary (72 mill.) brought 885 Marks at the Wunderly Sale, Frankfort-on-M., 1900, lot 37.

TESCHLER, NIKLAS (*Austr.*). Mint-master at Vienna, 1456-1463.

TESEO, JOSEFO (*Ital.*). Mint-master at Modena, under Francesco I. (1629-1637). His initials **I.T.** occur on the Doppia, Doppio Ducatone, Ducatone, Testone, Lira, and other coins of that reign.

TESSIER, LÉONART (*French*). Mint-master at Montpellier, *circ.* 1500.

TESSIN, PIERRE (*French*). Contemporary Sculptor, born in Paris; pupil of Dumont, and Hanoteau. At the Salon, 1886, he exhibited a Portrait-medallion of his son.

TESSIN, INV. Signature on a Portrait-medal of Charles XI. of Sweden, 1691, by Arvid Karlsteen (*Hildebrand*, p. 445, n° 118).

TESTI, PAOLO (*Ital.*). Contemporary Sculptor and Medallist, residing in Florence. He was trained in the Academia delle belle Arti of his native city, and devoted himself first to painting, but after obtaining the first prize for work from the nude he abandoned this branch of art for sculpture, in which at the end of the year, he again carried off the first prize.

He modelled also various Portrait-medallions, and his sympathetic intuition of feeling, combined of course with his conscientious technique, makes him excellent as a portrait sculptor. "I love portrait modelling more than anything else" said the young artist one day. "At one time, when I had not much work on hand, I used to lay my friends under requisition and take them one after another, an hour each, sometimes for days at a stretch. I find it intensely interesting to try to give in clay an impression of the characteristics of my sitters; most attractive, too, to study the physical idiosyncrasies which individualise them." Working on these lines, Paolo Testi produces portraits busts and medallions which are remarkable for their vivacity, their truth of impression, their freedom of movement. Among many others we may cite as good examples the bust of Paolo Ferrari, Nicolo Barabino, the printer, and a very fine medallion of Dr. Alessandro Foresi, the late antiquarian.

A medal headed BENEDICTVS THETIVS FLORIA is illustrated in XII, p. 128.

Conscientious, imaginative, endowed with quick intuition, Paolo Testi is a distinctly interesting artist, and one who is likely to make himself known among the sculptors of the present day (*Studio.*, XII, 128-129).

TESTARD, Mme PAULINE (*French*). Contemporary Sculptor and Medallist, born in Paris; pupil of Barrau. In the Salon Catalogues, the following exhibits of medals are recorded. 1892. Emmanuel Contamine de Latour; — Mlle W***; — Mlle Jeanne de C***; — M. de C***; — Mlle Marcelle R***; — Mme Luce de G***; — 1893. M. Maurice de G***; — Mlle Léonie D***; — Mlle Louise B***; — Femme Louis XVI.; — Femme moyen âge; — 1894. La marchande de pommes; — 1895. Médaille pour la Société vélocipédique; — Emmanuel Contamine de Latour; — La Flore; — 1896. Don Vidal Ballaguer; — Idylle; — Baron de R***; — 1897. Diane chasseresse, &c.

TET... (*Greek*). This inscription occurs on Tetradrachms of the Chalcidian League (*circ.* B.C. 392-358), specimens of which are at Berlin and Paris; obv. Laureate head of Apollo; Rv. **ΧΑΛΚΙΔΕΩΝ**. Lyre, above which **TET** in minute characters. This inscription may represent an Engraver's signature (*Historia Numorum*, 1911, p. 209). A specimen in the Philipsen cabinet, of fine style, was signed **T...**

BIBLIOGRAPHY. — Forrer, *Signatures de graveurs*, 1906.

TETTELBACH, ERNST GUSTAV MORITZ (*Germ.*). Painter, born 14. March 1794, died 12. December 1870; son of Gottfried Benjamin T. He painted flowers, but has left also some engravings on stone.

TETTELBACH, GOTTFRIED BENJAMIN (*Germ.*). Coin- and Gem-engraver, born at Dresden in 1750, died on 18th July 1813. He was at first an ordinary lapidary; later he studied the art of gem-engraving under Lippert, and became in 1793 Engraver to the Saxon Court and Cabinet. His productions are said to be wonderful imitations of the antique. Conspicuous among them are the Seal of Michel Angelo; — Offering to Flora; — Offering to Vesta; — Oedipus; — Leda and the swan, etc. Prof. Tettelbach was a member of the Berlin and St. Petersburg Academies.

TETTELBACH, KARL FELIX (*Germ.*). Brother of Ernst Gustav Moritz; is known as a Gem-engraver.

TETTELBACH, PAUL CLEMENS (*Germ.*). Gem-engraver, born at Dresden in 1776; son and pupil of Gottfried Benjamin T. He was appointed Engraver to Czar Alexander I. and found recognition in Russia. As an imitator of the antique he was very clever. His Medusa head, Ganymede, The three Graces, etc. are particularly fine.

A collection of 28 specimens of his works illustrating classical subjects very beautifully engraved on chalcedony, onyx, cornelian, rock-crystal, lapis-lazuli, bloodstone, agate, and three fine Cameos was offered for sale in London some years ago.

The subjects were Æsculapius (*cornelian*), Erato plucking a feather from the wing of a Harpy (*crystal*), Atalanta pausing to pick up the golden apple (*cornelian*), Pallas attacking Tryphon (*cornelian*), Endymion (*bloodstone*), Jupiter with scales (*chalcedony*), Theseus (*cornelian*), a Muse seated (*cornelian*), Mercury and Pallas (*crystal*), Cupid and Lion (*cornelian*), Harpocrates (*lapis lazuli*), Ulysses carried over sea on a tortoise (*chalcedony*), Head of Sappho (*crystal*), Female Figure with torch and pitcher (*banded agate*), Knight on Horseback (*cornelian*), Greek Marriage scene (*cornelian*), Phrixus (*cornelian*), Cupid and Lion (*cornelian*), Knight in Armour (*cornelian*), Wild Man, with club and shield (*bloodstone*), Greek Head—male (*crystal*), Roman Head—male (*crystal*), Warrior on Horseback (*cornelian*), Warrior on foot in armour (*cornelian*), Cupid and Lion (*cornelian*), Startled Swan (*chalcedony*), Dragon (*yellow cornelian*), Aurora (*agate*). The subjects of the Camei were (1) Bust of Laocoön (*onyx of two strata, dark brown on a white ground*), (2) Bust of Jupiter Ammon (*onyx of two strata, light brown on a lighter ground*), (3) Two Heads of Infants (*yellow chalcedony on white agate*).

TETTENHAYMER, PAUL (*Germ.*). Mint-master at Passau, 1450.

TEUCH, GEORG (*Austr.*). Mint-engraver at Joachimsthal, *circ.* 1657-1670. The Vienna Mint Museum preserves a number of dies by this artist for uniface Bohemian Hellers of Ferdinand III, 1652, 1654, Thalers and Half Thalers 1656, Leopold I. Thalers, Halt Thalers, Groschen 1659, Kreutzer 1660, Quarter Thalers and Fünfzehners 1663, etc.

BIBLIOGRAPHY. — *Katalog der Münzen- und- Medaillen-Stempel-Sammlung des K. K. Hauptmünzamtes in Wien*, 1906.

TEUCER, (TEYKPOY) (*Greek*). Gem-engraver of the Augustan age, whose signature **TEYKPOY** occurs on a very beautiful intaglio in amethyst, representing Hercules and Iole : the hero nude, seated on a rock covered with the lion's skin, draws Iole towards him.

Hercules and Iole.

This fine gem is preserved in the Florence Museum (25 × 18 mill.) It has often been described. Copies of this by Brown, Burch, and Carpus, are known. It is also admirably copied in the Poniatowsky series, where it is signed **ΕΛΠΗΝΟΡΗC**.

Furtwängler's remarks on Teucer's gem are worth reproducing here: "Diese Arbeit verdient hohes Lob; das Ganze (Composition und Linienführung) wie das Einzelne (man beachte z. B. den Löwenkopf) sind sehr schön; aber eine gewisse matte, kalte Eleganz, man möchte sagen ein akademischer Zug macht sich doch recht fühlbar. Das befremdet uns nicht : wir sind eben im Zeitalter eines Horaz."

The authenticity of this stone is unquestionable, as behind the female figure a space has evidently been reserved at the outset for the signature.

None of the other pretended works of Teucer can pass for antique. They are : —

1. A crouching Satyr, twining a garland. Left by Stosch to Guay, and by the latter to Lord Carlisle.

2. Achilles seated, holding a helmet, a lance in his right, the shield resting against a tree. Bracci affirms that both are of modern origin on his own knowledge.

3. Mask : amethyst (De Thoms). Style and cabinet sufficiently attest its modern origin.

4. Antinous : quoted by Raspe without further note.

5. Head of Minerva : sard (Lippert). A reduced copy of the head of Athena Parthenos by Aspasios, with the name rudely scratched in.

6. Bust of Diana : cameo (Blacas ; now British Museum). The name incised in long deep letters, the last upon the quiver.

7. Hercules carrying a woman on his shoulders wearing a garland. An indifferent intaglio quoted by Dubois.

Several Poniatowsky gems bear the inscription **TEYKPOY**.

of Brunswick, Denmark, Emberg, Göttingen, Holstein, Magdeburg, Marx, Mansfeld, Mecklenburg, etc. which are very interesting.

TEXTOR, ERNST (*Germ.*). Mint-master at Dortmund, then at Mayence 1644-51. His privy-mark on Mayence currency is **E. T, ET, E XT**. G. H. Lockner, *Mainzer Münzbeamte des 17. und 18. Jahrhunderts*, Berl. Münzbl., 1904, p. 427.

T. F. *Vide* **THOMAS FISCHER**. Mint-master at Harzgerode, 1695.

T. F. *Vide* **G. TODA**. Mint-engraver at Vienna, 1735-1765.

T. F. These initials in monogram occur on a Fifteen Kreutzer piece of Joseph Benedict, bishop of Chur, 1743, and other currency of that same prelate.

T. F. *Vide* **F. T.** Signature on a medal struck by Freemasons of Paris to commemorate the reign of the Commune, 1871 (*Marvin*, XXXI).

T. F. These initials occur on the Rℒ. of a medal by Wermuth of Augustus III. of Poland, 1758.

T. G. *Vide* **TRIFON GRADENIGO**. Mint-master at Cattaro, 1532-33.

T. G. *Vide* **THOMAS GALE**. Mint-master at York, 1547-53.

T. H. *Vide* **THEODOR HAUPT**. Mint-engraver at St. Petersburg, 1700-1710.

T. H. *Vide* **THOMAS HALLIDAY**. Medallist in London, early part of the nineteenth century.

T. H. F. These initials occur on a George IV. trial coin, issued by Uhlhorn, and reproduced in 'Spink's Numismatic Circular', I, col. 405, from the late Mr. J. G. Murdoch's collection.

THACETAS. Fictitious signature on a gem described by Raspe, representing Hercules and Omphale.

(*To be continued.*)

SOME COINS OF THE BRITISH EMPIRE.

The following abbreviations are used in describing the coins: —
O — Obverse.
R — Reverse.
E — Edge.

CYPRUS.
QUEEN VICTORIA.
BRONZE PIASTRE.

TYPE I.

PIASTRE, 1879.

O. — Legend: — VICTORIA QUEEN. Head and truncated neck of the Queen in profile, and looking to the left. Below the truncation of the neck, the date, 1879. Her Majesty is wearing a diadem adorned with gems and a scroll of oak leaves and acorns. The diadem is partly hidden by the wavy hair which is parted on the forehead, carried over the ear and collected into a knot behind the head. The whole within an ornamented rim.

R. — Upper legend: — CYPRUS. Lower legend: — ONE PIASTRE. A bead on each side between the legends. The numeral I, encompassed by a beaded circle. The whole within an ornamented rim.

E. — Plain.

Similar coins are dated 1881, 1882, 1884, 1885, 1886, 1887, 1889, 1890, 1891, 1895, 1896, and 1900.

Some piastres coined in the year 1881 and all those coined in 1882, bear the letter H (for Heaton) above the date.

Those dated 1882 and 1884 are not given by Atkins in his book on British Colonial coins. He gives the date 1880 but none were coined in that year.

On the piastres dated 1879 and 1881, the obverse legend is in smaller letters and the numerals of the date are not so large as on those coined in subsequent years, and the numeral of value on the reverse is more slender than that on piastres bearing later dates.

STRAITS SETTLEMENTS.
QUEEN VICTORIA.
SILVER FIFTY CENTS.

TYPE I.

FIFTY CENTS, 1886.

O. — Legend: — VICTORIA QUEEN. Head and truncated neck of the Queen in profile, and looking to the left. Her Majesty is wearing a, diadem richly jewelled and heightened with alternate crosses pattee and united roses, thistles, and shamrocks. The diadem is partly hidden by the wavy hair which is parted on the forehead, carried over the ear and collected into a knot behind the head. The hair is bound by a fillet, which is tied into a bow at the back of the head, the hanging ends being crimped. The whole within an ornamented rim.

R. — Upper legend: — STRAITS SETTLEMENTS. Lower legend: — FIFTY CENTS 1886. A bead on each side between the legends. The decorated numerals 50, encompassed by a beaded circle. The whole within an ornamented rim.

E. — Milled with straight lines.

Similar coins are dated 1887, 1888, 1889, 1890, 1891, 1893, 1894, 1895, 1896, 1897, 1898, 1899, 1900 and 1901.

The fifty cents coined in the year 1890 and some of those minted in 1897 and 1900, bear the letter H (for Heaton) on the obverse below the truncation of the neck.

None of these coins are mentioned by Atkins in his book on British Colonial Coins.

Henry GARSIDE.

BRITISH INDIA RUPEES.

Mr. Henry Garside writes to inform us that the design of the elephant on the bust of the King-Emperor George the Fifth on the obverse of the rupees dated 1912 has been altered and that the representation of "the grand giant which plays so proud a part in oriental pageantry" is much more realistic than that on those coined in 1911.

COPPER AND ITS ALLOYS IN EARLY TIMES[1].

With the discovery of metals, and notably the application of copper and its alloys in Neolithic times, we have one of the great turning points, if not the greatest, in the history of human development, the first-birth of the germs of that civilisation and culture to which we have attained at the present day. The discoveries of the properties of steam and electricity and their applications to our industries and other practical purposes of life we are apt to regard as wonderful and epoch-making, yet when we compare them with the results which have followed the discovery of metals, they are but trifling and insignificant.

The order in which the metals were discovered was not the same for every region, as their ores are very capriciously distributed in the world, and it is extremely probable, if not absolutely certain, that the metals which occur native, *i. e.* those which occur as metals in nature, must have been first known to the men inhabiting the localities in which they occurred. The metals so occurring most frequently are gold and copper. The former is much more widely distributed than the latter, and must have been the first metal to be known in many regions.

It is, however, one of the most worthless metals for practical purposes, so that until the rise of Greek and Roman civilisation but little use was made of it. Copper, too, we only find in use to a very limited extend, as it was not well suited for the construction of weapons or useful implements. On the other hand, its alloy with tin afforded a metal which in many physical properties could only be surpassed by iron or steel. According to the views of

1. Abridged from the Presidential Address to the Institute of Metals by Prof. William Gowland, F.R.S., a brief outline of which appeared in the April *Numismatic Circular*, col. 13525.

several ancient writers, Lucretius and Poseidonius, so momentous a discovery as that of metals contained in ores must needs have been brought about by no uncommon cause.

According to them a conflagration consumed forests which covered the outcrop of metalliferous veins, reducing the metals and bringing them to the notice of man, but there are no grounds for such inference. The discovery of metals other than "native" had no such poetic origin, but was brought in a more commonplace and more humble way. It had its origin in the domestic fires of the Neolithic age.

The extraction of the common metals from their ores does not require the elaborate furnaces and complicated processes of our own days, as pieces of ore, either copper carbonate or oxide, cassiterite, cerusite, or mixtures of these, and even iron oxides which by chance formed part of the ring of stones enclosing the domestic fire, and became accidentally embedded in its embers, would become reduced to metal. The camp fire was, in fact, the first metallurgical furnace, and from it, by successive modifications, the huge furnaces of the present day have geen gradually evolved.

First, a shallow cavity would be formed in the hearth of the fire for the reception of the molten metal, and this would be made larger as time went on and larger quantities of metal were required by deepening it or by surrounding it with a higher wall of stones. Furnaces of precisely this primitive form survived in Derbyshire up to the seventeenth century. In Japan the furnace for smelting copper, tin, and lead ores, a mere hole in the ground, which was in universal use there up to 1858, and is still extensively employed, is as simple and rude as that of the men of the Bronze age.

The alloys of copper and tin during the early Metal age, and even somewhat later, were obtained not by melting together copper and metallic tin, but by the reduction of oxidised copper ores containing tin-stone, or of copper ores to which tin-stone was added. As it has been stated by several Continental archæologists that when a copper ore containing tin ore is smelted the tin does not enter into combination with the copper, but passes into the slag, I have made several experiments under the conditions which were available to prehistoric man, which completely disprove their statements.

A furnace of the simplest form, merely a hole in the ground, was constructed in my laboratory at the Royal School of Mines. The fuel used was charcoal. A mixture of copper ore (green carbonate) and tin-stone was smelted in it, and a copper-tin alloy, a bronze containing 22·0 per cent. of tin, was obtained. The experiment was repeated several times, and in every case copper-tin alloys were obtained. This experiment proves indisputably that when a copper ore containing tin ore was smelted by primitive man, a bronze consisting of copper and tin was the result.

The shape and structure of the lumps of copper which have been found in the founders' hoards[2] of the Bronze age afford valuable evidence as to the size of the rude smelting furnaces, the method of smelting, and the manner in which the metal was removed from the hearth. These lumps are always fragments of rudely disc-shaped cakes of about 8 in. to 10 in. in diameter, and 1½ in. in thickness, having the largely columnar fracture of copper when broken near its solidifying point. They show that the furnace was simply a small shallow hole or hearth scooped in the ground, about 10 or 12 in. in diameter, and that the operation of smelting must have been conducted as follows:—A small charcoal fire was first made in the hearth, and when this was burning freely a layer of ore was spread over it, and upon this a layer of charcoal, then alternate layers of ore and charcoal were added in sufficient quantity to yield a cake of copper. The fire was doubtless urged by the wind alone in the earliest times, but later by some kind of bellows.

When all the charge had melted, the unburnt charcoal and the slag were raked off. The metal was not laded out, but was allowed to solidify first, and at the moment of solidification was rapidly pulled out and the cake broken up at once on a large stone. In Korea, at the copper mine of Kapsan, this primitive method of removing the copper from the furnace still survived when I travelled through the country in 1884.

The method of smelting copper ores in the primitive furnace which has survived in Japan from prehistoric times closely resembles that of the Bronze age. The copper of the bronze age resembles modern blister copper in composition, but, unlike it, it often contains only traces of sulphur. When sulphur is present in the crude metal only in traces it undoubtedly indicates that the metal had been obtained by smelting oxydised ores. The percentage of copper in several characteristic specimens ranges from about 97·0 to 99·0.

I will now ask for your attention to the earliest alloys of copper and tin, those of the Bronze age. In the production of these alloys in the earliest part of the age, copper ores containing cassiterite can alone have been used; it is obvious, therefore, that the percentage of tin they contain must have varied with the percentage of cassiterite in the ore and the regularity with which the smelting operations were performed. Even in the later period of the Bronze age, when the alloys were made by smelting the copper ore with cassiterite, alloys of definite composition can only have been accidentally obtained. Further, it is very questionable whether the metal tin was ever employed in making the alloys until the Iron age was well advanced, as this metal has never been found in the founders' hoards. Consequently the implements and weapons are of very varied composition, at first generally containing but little tin, less than 3 per cent., but later having that metal frequently in satisfactory proportions for the uses they were intended for.

A curious feature of the alloys of which the early weapons were made in Hungary is the presence of antimony as an important constituent instead of tin. This doubtless arose from the alloys having been prepared by smelting the antimonial copper ores which occur in that country. Axes made of these alloys would be fairly serviceable on account of the hardness produced by antimony in copper. We hence find them in use, with antimony largely replacing tin, until late in the Bronze age.

The difficulties the earliest men had to contend with were extremely great, for it is self-evident that alloys of definite composition could not be ensured by the early practice of smelting mixtures of ores. It would seem, therefore, that when we find weapons or implements of suitable composition for their intended use, some physical tests must have been applied to the furnace product before it had been used for their manufacture.

We will now pass to a brief consideration of the methods followed by prehistoric man for the manufacture of his weapons and implements. Practically all copper celts were cast in open moulds, as if cast in closed moulds they would be more or less vesicular and worthless, except when the copper contained arsenic, tin, antimony, zinc, or nickel in not less proportions than 1 per cent., or an excess of cuprous oxide The remains of his appliances which have been found show clearly that the metal from the smelting operation was remelted in crucibles and poured from them into moulds of clay or stone, perhaps of sand, but of this there is no definite evidence. The metal was not laded from the smelting furnace, as the small crucibles with rude handles which have occasionally been found, and have been erroneously supposed to be ladles, show no signs of having been exposed to a high temperature both on the inside and outside, as would have been the case had they been so used; the interior and upper edges alone bear marks of such exposure. The reason for this will be seen later.

Implements and weapons of bronze, unlike those of copper, were always cast in closed moulds. The method of melting the metal in each case was as follows:—The furnace or hearth was merely a shallow depression in the ground. The crucibles were made of clay, which was sometimes mixed with finely cut straw or grass. They were embedded in the ashes at the bottom of the hearth in such a manner that their bases and sides were thoroughly protected from the intense heat of the fire, their upper edges and interior only being exposed. This method had been adopted owing to the fusible character of the clay of which they were made. The fuel used was wood and the charcoal which was produced during

2 Founders' hoards, many of which have been unearthed in this country and in Europe, contain generally worn out or broken implements, waste castings, and rough lumps of copper apparently brought together for recasting. In some the objects are new and ready for use or are in an unfinished state. They appear to have been the stock-in-trade of itinerant founders. A flat axe made of the alloy is in the British Museum.

the process. After a crucible had been thus placed and charged with copper, copper and tin-stone, or copper and tin, the fire was made up over it. A sufficiently high temperature for melting the metal could be obtained by the wind alone. When the contents of the crucible had melted, the crucible was removed from the furnace and the metal poured into a mould.

In consequence of this mode of heating, the lower parts of the crucible will, it is evident, bear but little traces of the action of a high temperature, whilst the upper edges and interior will exhibit a fused or semi-fused structure, and this is precisely what we find in all early crucibles.

The small capacity of by far the greater number of these crucibles which have been found is worthy of note. Few can have held more metal than would suffice for the casting of a single axe. This is, however, not surprising if we remember that they are the appliances of that remote time when metallic weapons were only beginning to replace those of stone.

The moulds used by primitive man are also of considerable interest. The earliest are of the class known as open moulds, and consist merely of cavities of the necessary form and size hollowed in the surface of a stone.

In casting swords and daggers of bronze the moulds must have been of clay and been heated to dull redness at the time when the metal was poured in— a method of casting which is still practised in Japan— as by no other means could such perfect castings of their thin blades have been obtained. The castings generally were hammered at the cutting edges, and it is to this hammering, and to it only, that the hardness of the cutting edges of both copper and bronze weapons is due, and not to any method of tempering. Much has been written about the so-called art of tempering bronze supposed to have been practised by the men of the Bronze age in the manufacture of their weapons; the hardness is also said to be greater than can be given to bronze at the present day. I should like to correct this error, as it can only have arisen owing to its authors never having made any comparative practical tests of the hardness of bronze. Had they done so, they would have found that the ordinary bronze of to-day can be made as hard as any, in fact, harder than most, of prehistoric times, by simple hammering alone.

We will now pass to the consideration of the copper alloys of Mycenæan, Babylonian, Greek, and Roman times. Until the introduction of iron, copper and bronze played an important part in the lives and struggles of the early races occupying the Greek peninsula and its islands, whilst in later times the alloy bronze afforded an imperishable material to the great sculptors of the golden age of Greece, by which many of their incomparable works have been preserved to us.

In Greek literature we have no records of metallurgical processes relating to copper or its alloys, such as are to be found in the writings of Roman authors, notably Pliny.

Strabo, the only Greek author who condescends to take any notice of metallurgy or metal working, confines his statements to gold, silver, and lead. But at Laurion the remains of ancient furnaces for smelting lead ores, which have been unearthed from time to time, indicate that low hearths resembling those of the Bronze age were extensively employed; and if we may reason from Japanese metallurgical procedure, similar furnaces would be used for copper. The island of Cyprus, once rich in copper ores, was doubtless the source whence the inhabitants of the Greek peninsula in early times obtained their copper.

Among the earliest specimens of the metal which have been found in Greece are some copper nails which were obtained by Dr. Schliemann at Orchomenos, a city in Bœotia, which was in a state of decay in the time of Homer. They belong to that remote period in Mediterranean civilisation to which the name Mycenæan has been applied.

They are interesting as showing that the men of that remote period were able to produce copper of tolerable purity, but this would not be difficult, as the ores which they worked would be oxidised ores, oxides, and carbonates from the outcrops of veins, viz. the parts which were exposed at the surface of the ground.

Bronze was also then in use for nails and cramps in building construction, but especially for weapons, and was of good quality.

There is abundant evidence to show that Egypt was the first in the field in artistic bronze casting. When it first began it is difficult to say, but objects of at least as early as 3000 B.C. are in existence.

Even in the early examples great technical skill is displayed. The most ancient Greek bronzes are solid castings, whereas in Egypt they are light and hollow, having been cast with a core of argillaceous sand, which still remains in many specimens.

The statuary bronze frequently contains considerable amounts of lead, sometimes with but little tin, and the question naturally suggests itself, whether this arose from scarcity of the latter metal. Only a few analyses have been made, and unfortunately few of the objects can have even approximate dates assigned to them.

Bronze was in extensive use in Nineveh about 1000 B.C. for vessels and ustensils of many kinds, and curiously was sometimes employed for those which we should now make of more precious metals.

The Greek copper alloys of a later period, many examples of which are found in the coins of about the fourth century B.C., are true bronzes consisting of copper and tin, with lead or zinc only as impurities and not intentionally added.

A curious feature in them is the presence of nickel varying from traces up to 0.5 per cent. The percentage of tin is somewhat irregular, but in most examples ranges from about 8 to 11 per cent. The same is true of the Macedonian coinage alloys from the third to the second century B.C., but the percentage of tin in them is somewhat greater, generally being from about 10 to 12 per cent. These alloys were undoubtedly made by melting together the metals copper and tin, and not, as in the Bronze age, by smelting stanniferous copper ores, or by melting copper with tin ore.

The Macedonian alloys more particularly are the best of the ancient bronzes.

A little later in Greek coins we find lead as an intentional constituent in various proportions, ranging generally from about 6 to 10 per cent., or even more, with a proportionate reduction in the percentage of tin. The Macedonian coins, however, with few exceptions, preserve their character as true bronzes.

The alloys used for statues are frequently true bronze with 9 to 11 per cent. of tin, but in other examples about 5 per cent. of lead has been added, probably with the intention of increasing the fusibility of the alloy and its fluidity when molten.

The statements of Pliny as to the composition and mode of manufacture of the bronzes as imitated in Rome throw but little or no light on the subject; in fact, they are for the most part useless and misleading. As regards the Corinthian bronze, the beauty of which is so extolled by classical writers, he states that the alloy was discovered by the Romans at the sack of Corinth, when vessels of gold, silver, and bronze had been accidentally melted together during the burning of the city and produced a golden bronze.

The siege of Corinth, however, occurred in 146 B.C., but the excellence of Corinthian bronze had been recognised long before.

Whatever may have been the exact composition of this bronze, of which several statues are said to have been cast, I may say that no addition of gold or silver to any copper-tin alloy will cause it to resemble gold closely. Imagination must, I think, be responsible for the accounts given of this bronze by ancient authors, especially when we read also that its beauty was derived from being cooled in the water of the fountain of Peirene.

With the fall of Greece and the rise of the supremacy of Rome we enter an important period in the history of copper and its alloys. In Spain and in Britain we find copper-smelting being vigorously carried on by the Romans, and in Rome and the chief seats of the empire a further extension of the use of bronze, not only for statues and other objects of art, but for vessels of all kinds, furniture, and other articles of domestic life. Of special importance is the invention of a new alloy, brass, which comes into use for the first time in Europe.

Among the varied remains which are representative of the Roman occupation of Britain, few are of greater interest to the metallurgist than the cakes of copper found in North Wales and Anglesea. These cakes afford us, in their form and character, unmistakable evidence of their history. They had been obtained by smelting sulphide ores, or ores containing sulphides, in low hearths, in which they had almost certainly been allowed to solidify before

Original from CORNELL UNIVERSITY

removal. According to Pliny, who seems in this matter to have had access to fairly trustworthy sources of information, the copper obtained by smelting was brittle and useless, and in order to obtain malleable metal from it, it was mixed with lead and melted several times, and the oftener the operation was repeated the better was the quality of the copper. This brief account of copper-refining by a non-technical writer gives us an excellent *résumé* of the process as practised in Roman times. The operation was evidently conducted with free access of air, and the lead used would, by its oxidation, aid greatly in the removal of impurities from the copper.

The earliest Roman alloys which have come down to us are copper, lead, tin, alloys of the fifth century B.C. Their chief peculiarity is their very large content of lead, namely, from about 19 to 25 per cent., the tin being about 7 per cent. They were worthless for practical purposes, but formed the alloy of which the large coin of the republic—which weighed from 8 to 11 ozs.—the "As," was cast. These copper-lead-tin alloys continued in use as coinage alloys until 20 B.C., but from that date until two centuries later lead is seldom found in coins except as an accidental impurity.

The large percentages of lead were undoubtedly added in these cases on account of the cheapness of the metal as compared with copper and tin.

The copper-tin-lead bronzes appear also to have been used by the Romans for engineering and industrial purposes. An interesting example of this use is afforded by the broken shaft of a water-wheel which was found in the lower Roman workings of the north lode of the Rio Tinto mine. The water-wheel was probably built in the first century of our era, as coins of the time of Vespasian (70 to 81 A.D.) were found near it.

The bronze used for statues by the Romans also always contains lead in considerable proportions, as much as 6 to 12 per cent. being often present. In this they were doubtless influenced by Greek practise, the lead being added to the bronze to increase its fusibility and more especially its fluidity when molten, so that it might receive the sharpest possible impressions of the mould.

I may point out here that the addition of lead to bronze was and is largely practised by the Japanese, not only for the reasons stated above, but also to enable the objects cast of the alloy to receive a rich brown patina when suitably treated; and in this connection it is worthy of note that Pliny states that by the addition of lead to Cyprian copper, the purple tint is produced that we see in the drapery of statues.

The alloy used by the Romans for mirrors does not differ greatly from that in use in Europe for metallic mirrors in comparatively recent times, the percentage of tin ranging from 23 to 28 per cent., but lead is present in all from about 5 to 7 per cent.

COPPER-ZINC ALLOYS—THE BRASSES.

Zinc as a distinct metal was unknown in early times; in fact, as late as the sixteenth century it was not known in Europe; but there are strong reasons for the belief that the Chinese were acquainted with it as metal at least several centuries earlier. It is occasionally but rarely present in the implements and weapons of the Bronze age, and then only in small quantities as an accidental impurity, which has been derived from smelting copper ores containing it.

In somewhat later times it occurs in rings, armlets, and other personal ornaments found in the ancient burial mounds of Germany and Denmark, but these mounds are of post-Roman date, and the objects mentioned have really been made from Roman coins.

In Greek alloys zinc is never found as an intentional addition, but only as an impurity, about 1 to 2 per cent or less; in fact, according to Gobel, all antique objects which contain zinc are not Greek; but this, in my opinion, is only true for those containing considerable proportions of the metal, and not for those with the small amounts just mentioned.

In Roman times it first appears in the coins of the republic as an impurity; as an intentional addition, however, it only begins in the time of Augustus (20 B.C. to 14 A.D.), when brass was made for the first time in the world's history.

One of the earliest examples is a coin of 20 B.C., which contains 17·31 per cent. of zinc.

The Romans were the first makers of brass. Although they were unacquainted with the essential constituent zinc, yet they had discovered that by melting copper together with a certain ore (calamine), a yellow alloy of a more golden colour than bronze could be obtained.

It was first employed for coins which appear to have had a higher value than those of bronze, even up to the time of Diocletian (286 to 305 A.D.), when six parts of brass are said to have been worth eight parts of copper. There is, too, a curious statement by Procopius in his *De Œdificiis* relating to its value in the fifth century A.D., in which he says that brass was then not very greatly inferior to silver.

The method employed by the Romans in making this alloy from copper and calamine was a very simple one.

It was conducted as follows: — The calamine was ground and mixed in suitable proportions with charcoal and copper in granules or small fragments. This mixture was placed in a crucible, and was very carefully heated for some time to a temperature sufficient to reduce the zinc in the ore to the metallic state, but not to melt the copper. The zinc being volatile, its vapour permeated the fragments of copper, converting them into brass. The temperature was then raised, when the brass melted, and was poured out of the crucible into moulds.

This process was so effective that, until a comparatively recent period, all brass was made in Europe by the ancient process, and even until a few years before 1861 it was thus made at Pemberton's Works in Birmingham. It was called "calamine brass", and was generally believed to be superior in mechanical properties to brass made by using metallic zinc.

The survival of this ancient process affords a striking example of the conservatism characteristic of British metallurgy, as brass had been made in England by Emerson, using metallic zinc, in 1781. This, so far as I have been able to ascertain, was the first to be made in Europe by melting copper and zinc together.

In Roman alloys the percentage of zinc was very variable, ranging from about 11 to 28 per cent. For ornamental purposes and scale armour they had an excellent alloy, of which the following are examples. Several rosettes and studs which had formed the mounts of a casket were unearthed in the excavations at the Roman city of Silchester in 1900.

Both the rosette and stud are of practically the same alloy. Now, of all the copper-zinc alloys, those which contain from 15 to 20 per cent. of zinc possess the greatest ductility.

This Roman brass is therefore one of the most ductile of the whole series of brasses. It is, besides, identical in composition with Tournay's alloy (copper, 82·5 per cent.; zinc, 17·5 per cent.), which, on account of this property and its rich colour, is used for the manufacture of all French jewellery made from thin sheets in imitation of gold. Hence the brass of which the rosettes are made is notably of the compositiou which is best fitted for making such ornaments, and is that which would be employed at the present day.

I have also examined the scales forming part of a suit of Roman scale armour dug up in the excavations of a Roman camp near Melrose, and found them to be of practically the same composition as the above.

The chief use of brass by the Romans, apart from the various coinages, appears to have been for fibulæ and other personal ornaments and for decorative metal-work, and for these, as we have already seen, they had invented a metal perfectly suitable, both as to its workable qualities and its beauty.

That they were the first inventors of brass is, I think, without doubt, as the alloy is not found in Greece or the Greek colonies or elsewhere until the time of the Roman Empire.

In the eleventh century great care was betowed on the purification of the copper intended to be used in the manufacture of calamine brass for objects of art, more especially for the removal of lead, as it had been found that brass contaminated with that metal could not be satisfactorily gilt.

As regards the brass which was made in this country by the ancient method, *i.e.* "calamine brass", and that made with spelter, the former, according to Dr. Percy, was preferred for the manufacture of buttons and articles to be gilt, as it was said to take the gold better in "water-gilding". It was also preferred for other purposes. It is difficult to see why there should be any difference

Obverse.

Reverse.

between the two brasses unless the spelter of those days was more impure than at present, possibly containing more lead and iron. Prejudice against the metal made by a new process may, however, have been one of the causes of the opposition which was raised to its use.

With the disappearance of the calamine brass, one of the last links in the chain connecting the modern metallurgy of copper and its alloys with antiquity is broken. An important link, however, still remains in the *cire perdu* process of casting bronze, a process in which it can scarcely be said that we are any further advanced than the Greek founders of some centuries before our era.

Further, it must not be overlooked that the principles on which copper-refining is based were carried out in practice in the time of Pliny.

The influence of copper, and particularly of bronze, from the age of Bronze to that of Imperial Rome, is an element which has played a greater part in the civilisation of Europe than that of any other metal. This is often lost sight of in this age of iron and steel. It hence seemed to me that it might be of interest and possibly of profit to present to the members of our Institute an account of the achievements which our fellow-workers in bygone ages were able to accomplish without the elaborate appliances and scientific knowledge of our own times.

LEAVES FROM MY NOTE BOOK

ON WAR MEDALS AND DECORATIONS.

(*Continued from col. 13517.*)

ASHANTI 1900.

NATIVE CHIEF'S MEDAL & CHAIN.

The susceptibility of the African native character to that which is showy was fully appreciated by those responsible for the issue of the medal to the Chiefs who were loyal to the British Government during the Ashanti Rebellion of 1900. The medal is four inches in diameter and was struck in silver from the design of the War medal issued for the Campaign under Sir James Willcocks who commanded the Ashanti Field Force in 1900 which totally defeated the Ashantis at Obassa and accomplished the relief of Kumassi. It is surmounted by an ornamental suspender formed of scrolls and the Imperial Crown.

Obverse. Bust of Edward VII, in the uniform of a Field Marshal, EDWARDVS VII REX ET IMPERATOR [1].

Reverse. The British Lion standing and looking towards the rising sun. In the foreground native arms, palm-branch and tablet inscribed, ASHANTI.

Six of these medals were issued with silver chains composed of links of alternate lions and groups of roses, shamrocks and thistles, attached by two Chains formed of oval links. Owing to the death having taken place of one of the Chiefs, before the medals were issued, the one illustrated was given by the Commissioner to Capt. C. H. Armitage, who kindly permitted Messrs Spink to photograph it and gave them the essential particulars of this interesting and rare medal. C. W.

1. This was the first medallic design issued with the effigy of King Edward VII.

REVIEWS.

Repertorio generale delle Monete Coniate in Italia e da Italiani all' Estero. Con nuova sistemazione cronologica e con indicazione dei prezzi a ciascuna moneta, by Cav. Julio Sambon. Periodo primo dal 476 al 1266.

Large 4to, 108 pp. + XIII Plates and numerous wood blocks in the text [1].

Price of the ordinary edition : £ 1.4.0.
— *edition de luxe* : £ 2.0.0.
Supplied by Spink & Son, Ld, agents for the United Kingdom.

Cav. Giulio Sambon is a veteran of Italian numismatists. His expert knowledge of coins, the result of a long career of study and practice, is a sufficiant guarantee to secure a kind welcome to any publication from his competent and authoritative pen.

The present work, as the title implies, is intended to be a general repertory of the coins struck in Italy and by Italians in foreign lands. It is subdivided into ten parts, adopting the more scientific arrangement under regions and dynasts, instead of grouping under mints, as is usually done.

The novel system of describing the coins in tabular form is both concise and very clear. It enables one at a glance to find out the date, issuing prince, denomination, mint, weight, descriptions of obverse and reverse, metal, name of author who published the coin, or that of the collection to which it belongs, approximate value, and observations with general remarks.

The first volume just issued comprises the following five parts :

I. Ostrogothic Rulers of the V. and VI. centuries. — Byzantine Emperors of the V. to IX. centuries. — Duchies of Southern Italy under the domination of the Greeks.

II. Longobardic Rulers of Northern and Central Italy from the VI. to the VIII. centuries. — Longobardic Dukes and Princes of Southern Italy from the VII. to the XI centuries.

III. Carlovingian Kings and Emperors of the VIII. and IX. centuries and their successors as Emperors or Kings of Italy from the IX. to the X. centuries ; Marquises of Tuscany X. century. — The first Pontiffs from Gregory III. to Pasquale II.

IV. Saracenic Rule in Sicily from the IX. to the XI. centuries. Norman Rule anterior to the monarchy, from 1058 to 1130. — Norman Monarchy of the two-Sicilies from 1130 to 1194.

V. Emperors of Germany and Kings of Italy : House of Saxony and Franconia from the X. to the XII. centuries; House of Suabia or Hohenstauffen from the XII. to the XIII. centuries.

The second volume will deal with the following five other subdivisions : —

VI. The States and Great Republics of the XII. century.

VII. Foreign Possessions posterior to the XII. century.

VIII. Coins issued in Foreign Possessions.

IX. Coins issued from the XIV. to the XIX. centuries by Italian princes and feudatory families. — Revolutionary Period and the Italian War of Independence (Risorgiments), XVIII. to XIX. centuries.

X. Kingdom of United Italy, XIX. to XX. centuries.

The portion just published, describing 1195 coins, among which a number of inedited pieces, throws a good deal of fresh light on the numismatics of the mediaeval period of barbarous and foreign incursions into Italy. Cav. Sambon has drawn from the National Museum of Naples, British Museum, Bibliothèque Nationale Paris, Berlin Cabinet, Brera Museum, and all the principal collections of Europe for his sources of information. All the representative types are illustrated by wood blocks, which give a clearer idea of the design than process blocks, the originals, most of which or barbarous style, being usually in mediocre state of preservation and not lending themselves to favourable reproduction by photography.

I may safely assert that the work is called to render great services, quite independently from the remarkable and more complete treatises which are now in course of publication, such as H. M. King Victor Emanuel's "Corpus Numorum Italicorum" and the Catalogue of the Vatican Cabinet.

To numismatists, the innovation of indications of approximate value will be most welcome. Collectors of Italian coins were in need of such a guide, and Cav. Sambon has felt that this item of information would be a real help to them.

As it is this publication makes a fine book.

L. F.

1. Since going to Press we learn that this work has been crowned by the French *Académie des Inscriptions. Eds. N.C.*

NUMISMATIC SOCIETIES, MUSEUMS &c.

ROYAL NUMISMATIC.

March 21. — Mr. H. A. Grueber in the chair. — Mr. Grueber read a paper on the 'Buildings of the Forum as illustrated by Coins'. Having distinguished between the different kinds of *fora* which existed in Rome, the writer gave a brief account of the early history of the Great Forum and of its gradual development, fixing the date of erection of many of the edifices, vestiges of which remain to the present day. For his illustrations, with one exception, he selected coins of the period of the Republic. These supplied amongst others figures of the Sacellum of Venus Cloacina, the Basilica Æmilia, the fountain of Juturna, the Temple of Vesta, the Rostra, the Puteal Scriboneanum, and the Temple of Julius Cæsar. A coin of Nero was employed to supply an illustration of the Temple of Janus, which is supposed to be the first one erected in the Forum, and does not appear on earlier pieces. Mr. P. H. Webb and Mr. F. A. Walters exhibited Republican and Imperial coins illustrative of the paper.

*
* *

April 18th. — Mr. Percy H. Webb in the chair.

Mr. J. Grafton Milne exhibited a copper coin of Julia Maesa struck at Aspendus, with rev. Sarapis, Isis and Demeter, and a copper coin of Claudius Gothicus struck at Sagalassos with rev. Boule and Demos. Mr. Bernard Roth showed a fine series of Anglo-Gallic coins of Henry VI, in gold, silver and billon.

Mr. Lionel M. Hewlett read the concluding portion of his treatise on Anglo-Gallic coins, which comprised the coins struck by Henry VI. These differed from the previous coins of the series in being regal, instead of feudal coins. Henry II had struck coins as Duke of Aquitaine and Earl of Poitou ; Edward III, although he claimed the throne of France, struck coins as Duke of Aquitaine only, and similarly Henry V struck coins as Duke of Normandy ; but Henry VI was *de facto* King of France and struck coins as such from the French Regal Mints. The coins struck at the Dijon mint were issued by the Duke of Burgundy from dies prepared locally. The coins of Henry VI consist of a Salute and Angelot in gold, a grand blanc and petit blanc in silver, a tiezin, denier tournois, denier parisis, and maille tournois in billon.

BRITISH NUMISMATIC.

March 20. — Mr. Carlyon-Britton, President, in the chair. — Mr. J. Reilly, jun., was elected a Member. — Mr. W. J. Andrew, in an address, continued his 'Numismatic History of the Reign of Stephen'. He called attention to the fact that the existing coins of Stephen's regal type, Hawkins 269, were confined to mints which were all to the east of a line drawn from York to Lewes, and he believed that their circulation was practically limited to that portion of England, for it was there that the strength of Stephen's party lay. The mints to the west must have then been issuing money either under the influence of Matilda's party or of that of the independent bishops and barons. The period would comprise the years 1142 to 1146, and of it he attributed Hawkins type 275 to Henry, Bishop of Winchester, the King's brother; Hawkins 272 to the Bishop of Exeter ; and 273 and 274 also to the West of England. Treating the series bearing the name of Henry, and illustrated as Hawkins 259, he adduced evidence to prove that, with the possible exception of the Corbridge coin, which might well have been issued

by Prince Henry of Scotland as Earl of Northumberland, the type could not have been current before 1142; and as in that year Henry Fitz-Empress, afterwards Henry II., arrived in England as a boy of ten years old, he believed it was commemorative of his advent, when, in consequence of the tendency of the Norman barons towards Salic principles, the cause of his mother, the Empress Matilda, was upon the wane. The geographical division of power and monetary circulation would explain the continuance, in those counties which were not under Stephen's authority, of the many varied types which seem to have had but a local issue, such, for example, as the pennies of Taunton struck by the Bishop of Winchester, which bore the name of a moneyer whom Mr. Andrew identified as "Sanson the moneyer" of the Winchester Roll of 1148.

Major R. P. Jackson contributed a paper on the coins of Madura and Tanjore, in which he differentiated the issues of the various potentates ruling between the sixteenth and eighteenth centuries, and explained the origin of many of the symbols which appear upon them. In this relation he was able to append a list of "srivira" coins of Madura new to Indian numismatics.

Mr. J. Coats, jun., presented to the Library of the Society, and to each member of its Council, a copy of Burns's 'Scottish Coinage'; and Mr. W. Allen contributed to the Society's collection a medal in silver struck to commemorate his friend the late Dr. Joseph Joachim.

Mr. B. Roth exhibited a series of the coins of Stephen's reign referred to in Mr. Andrew's address; Mr. F. A. Walters showed a heavy noble of Henry IV. of the Calais mint, weighing 119·4 grains; and Mr. William Charlton, Mr. W. S. Ogden, and the author illustrated Major Jackson's paper with many examples of the Indian coinage.

***

BRITISH NUMISMATIC.

April 24. — Mr. Carlyon-Britton, President, in the chair. — Dr. A. A. Payne and Mr. Gordon Fraser were elected Members.

Dr. P. Nelson contributed a treatise on 'The Pre-Revolutionary Coinage of America', in which he explained in detail the series of coins beginning with the ryal of Elizabeth, bearing a legend which refers to the colonization of Virginia by Raleigh in 1584, and closing with the halfpence and farthings of 1773 and 1774, the latest issues prior to the Declaration of Independence.

Mr. J. B. S. MacIlwaine furnished an interesting account of the discovery of a hoard of 226 silver coins at Abbeylands, Abbeylieux, co. Kildare. The treasure, which was contained in a brown jug of "Bellarmine" ware, had evidently been hidden during the troubles of Charles I.'s reign, and comprised the silver currency common to Ireland since the reign of Edward VI., with the additions of one quarter-thistle of James VI. of Scotland, French money of Louis XIII. and Henry IV., and forty-five portions of Spanish dollars much worn and clipped. Amongst the coins of Charles I. were an Ormonde sixpence and a half-crown of the "blacksmith" type.

Mr. Edward Wooler showed six specimens from a quantity of plain base-metal pieces recently discovered in widening a road at Darlington. These, Mr. Fentiman explained, were a forger's stock-in-trade and intended to pass as the worn shillings current towards the end of the reign of George III.

In illustration of Dr. Nelson's paper, Mr. Bernard Roth and Mr. S. M. Spink exhibited series of the rarer examples of the early American coinage.

Mr. Shirley Fox showed a groat, half-groat, penny, and farthing — the last hitherto unknown — of the Calais mint of Henry VI., bearing a leaf upon the King's bust and after the word CALISIE in the legend.

***

Mr. Shirley fox writes "In the report of the British Numismatic Society's meeting I am credited with having exhibited a 'groat, half-groat, penny, and farthing of Henry VI'. The last-named piece should have been a halfpenny, and it is, as stated, the first of the particular issue which has been noted. The farthing is quite unknown".

CATALOGUE

OF

COINS and MEDALS for SALE

Special attention is directed to the fact that every coin or medal catalogued in the following lists is guaranteed to be absolutely genuine (except when expressly stated in the description to be otherwise) and if not approved of can be returned, when the full amount paid will be refunded.

Collectors will also kindly note that every care is taken when compiling the catalogues not to overrate the condition of the pieces but to faithfully represent them according to their merits.

All orders should be sent to Spink & Son Ltd., 17 and 18, Piccadilly, London, W.

(For further particulars see first page of this Circular.)

VICTORIA CROSS.

101967 Group of 2. China, 2 bars, Taku Forts 1860, Pekin 1860, Victoria Cross. Lieut. (Afterwards Colonel) Edward Lenon 67th Foot. with photograph. E. R. 125 » »
∴ On August 21, 1860, the Taku Forts were attacked and captured-about 500 of our men being killed and wounded. When the moment of assault came Lieutenant Lenon, with some others, sprang into the ditch, which was filled with water, and swam across, entering through the embrasures. He was the third to gain a footing on the walls.

VARIA

DANGER OF VERDIGRIS ON COINS.

At East Ham an inquest was held on the body of Abraham Robinson, aged 27, of Wortley-road, East Ham. Robinson was employed by the Gas Light and Coke Company to collect coppers from the penny-in-the-slot gas meters. He had been in ill-health for some time and was under the care of Dr. Feeley, who found that he was suffering from metallic poisoning. Robinson stated to the doctor that very often the coins were green with verdigris, which remained on his fingers. The doctor in his evidence said that Robinson had a long moustache, which he curled with his fingers, and by doing this he had absorbed the verdigris. The jury returned a verdict that death was due to metallic poisoning and suggested that a method should be devised to prevent the handling of so many coins by the collectors.

MONTHLY

NUMISMATIC CIRCULAR

THE *Monthly Numismatic Circular* will be forwarded post free on receipt of half-a-crown (= 3 francs = 2 ½ marks = 60 U. S. A. cents, in P. O. O. or stamps) for one year's subscription.

Should any applicant not receive it regularly by post, please notify the omission to us, when it shall be at once rectified. All communications respecting the Numismatic Circular (either referring to its literary portion or to its catalogue of coins, &c. for sale) should be made to our West-End house, 17 and 18 Piccadilly, London, W., where all letters and orders will receive immediate attention.

Cheques crossed National Provincial Bank of England, Piccadilly Branch.

Any coins or medals can be had on approval if the applicant is known to us, or, if not, on receipt of references. Postage on coins, as a rule, is paid out.

Orders for coins from the annexed list will be executed in rotation, but preference will be given to clients who are willing to purchase outright, providing the coins answer to the description.

Coins not approved of can be returned.

LA *Circulaire mensuelle de Numismatique* sera adressée franco à toutes les personnes qui voudront bien en faire la demande en nous faisant parvenir 3 francs 20 centimes par mandat postal pour un abonnement annuel.

Nous prions nos correspondants d'adresser toutes lettres et communications relatives à la partie littéraire du journal ou au catalogue des monnaies et médailles, à notre établissement, 17 et 18, Piccadilly, Londres, W.; nous y répondrons immédiatement.

Les ordres seront exécutés à tour de rôle en donnant la préférence aux commandes effectives.

Toutes les pièces seront envoyées *à condition*, si le client le désire, mais le port de retour est à sa charge.

Les personnes qui ne nous seraient pas connues sont priées de nous fournir des références.

DAS *Numismatische Circular* wird portofrei, nach Empfang von 2 ½ Mark (3 Kronen ö. W.) als Jahresbetrag, geschickt.

Sollte jedoch ein Abonnent dasselbe nicht regelmässig erhalten, so bitten wir, uns gefälligst Anzeige davon zu machen, um weitere Unregelmässigkeiten zu verhüten.

Alle Mittheilungen, welche dieses "Numismatische Circular" betreffen (gleichviel ob dieselben sich auf den literarischen Teil oder auf das Verzeichnis der Münzen, &c. zum Verkauf beziehen), sollten an unser West End Etablissement, 17 und 18 Piccadilly, London, W., gerichtet werden, wo Briefe und Aufträge sofortige Erledigung finden.

Jede Münze oder Medaille wird zur Ansicht gesandt. Bestellungen werden nach Reihenfolge des Einganges effectuirt und Nichtconvenirendes zurückgenommen.

Rückporto zu Lasten der Herren Besteller.

Uns unbekannte Herren Sammler werden um Aufgabe genügender Referenzen ersucht.

GREEK COINS.

THE ANCIENT COINS OF SICILY.

(*Continued from col. 13644.*)

THE PERIOD OF FINE ART.

The Period of Fine Art is generally considered to begin with the year in which Eumenes issued coins bearing his signature in Syracuse, the year 440 B.C. and to extend to about 340 B.C.

The fact that the artists who produced the dies in the offices of the mint were allowed to sign their names on their work is evidence of the high esteem in which they were held, and of the value of fine art in the eyes of the city rulers. So much has been written in praise of the work of this period that it will be unnecessary to add to the universal eulogy.

Winckelman speaking of the art on these coins said "it passes all imagining", and he asks "might not Raffaelle, who complains that he could not find in nature any beauty worthy to stand for Galatea, have taken her likeness from the best Syracusan coins, since in his days — with the exception of the Laocoon — the finest statues were not discovered? Again he says "Beyond these coins human comprehension cannot go."

In the *Archæologia* (XIX, p. 375) Payne Knight remarks "to the sublime perfection of these coins no work of man of a similar description has hitherto even approached."

Although only the wealthy can afford to collect specimens of this Period excellent casts may be easily procured, and many beautiful photographs obtained at a low price.

About twenty-four cities of Sicily issued money during this period, and many beautiful coins were issued unsigned by the artists.

For the sake of ready reference the plan of giving a chapter to each city in alphabetical order will be adhered to, and the notices of the work of each individual artist reserved for the chapter on the coins of Syracuse, in which city most of the important artists worked.

The artists whose work was most widely distributed were Kimon and Evainetos, who wrought in the mints of Camarina, Catana, Naxos, Segesta and Syracuse.

ABACAENUM.

Period of Fine Art.

In the British Museum two types of Litræ or Obols are preserved belonging to this Period.

I. Weight: 12.8 grains.

Obv. Bearded head to right, hair short: border of dots.

Rev. **ABA**. Boar standing to right; in front, an acorn.

II. Weight: 9.3 grains and 9.9 grains.

Obv. Head of Water-Nymph, three quarter face to left; border of dots.

Rev. **ABA**. A sow walking to left, at her feet a pig to left.

III. Weight: 12.7 grains.

Obv. Same as no II.

Rev. Similar to no II but the sow and pig to right.

The fact that in a small Sicel town coins of this kind could have been issued is a witness to the general culture of the people throughout the island, and proof of the prosperity of the city which could maintain a mint.

BRONZE COINAGE.

I. Size ·8.

Obv. Female head to right, wearing earring and sphendone; behind, a barley corn: border of dots.

Rev. **ABAK NON**.

Forepart of a man-headed bull swimming to right: border of dots.

II. Size ·7.

Obv. Female head to right, wearing earring, necklace, and sphendone: border of dots.

Rev. **ABAKA I NI NΩN**.

Forepart of a bull, butting: border of dots.

III. Size ·5.

Obv. Similar type to left: same border.

Rev. **ABAKAINI N**. Similar to no II.

AGRIGENTUM.

Fine Art Period.

After the death of Theron's son in 471 B.C. the citizens of Agrigentum established a democratic form of government which lasted until the Carthaginian invasion in 406 B.C. The years between these dates may be regarded as the most prosperous the city ever enjoyed. Instances of the wealth and hospitality of the citizens are mentioned by Diodorus (XIII, 83,84) and he gives 20,000 as the number of the citizens and the whole population including strangers, and probably slaves, 200,000.

Diogenes Laertius gives the larger number 800,000, but that is probably an exaggeration (VIII, 7). Ducetius, chief of the Sicels, after taking by storm the town of Aetna, invaded the territory of the Agrigentines and besieged Motyum, which was occupied by the Agrigentines. Ducetius won a victory over the Greeks, but soon afterwards Motyum was retaken by the Agrigentines, who were joined by the Syracusans. Ducetius went to Syracuse as a suppliant, and was sent to Corinth, from which city he returned to Sicily to try to found a new city at Caleacte; thereupon the Agrigentines quarrelled with the Syracusans for having saved the life of their common enemy without their consent.

Many other cities were drawn into the quarrel, some siding with Syracuse, others with Agrigentum. The two armies met on the banks of the river Himera, and the Syracusan won the victory, more than a thousand Agrigentines being slain. Soon afterwards peace was restored.

Probably the famous Empedocles was the greatest of the citizens of Agrigentum, and some of the coins now in our collections may have been handled by him. In looking over the history of the city during this period of fine art it is difficult to find any victory which may have been commemorated by the type of the two eagles; the retaking of Motyum seems hardly important enough to have been thus symbolized, but it is the only success recorded.

In this period a new type makes its appearance: on the Obverse two eagles on a hare, one lifting its head, the other bending down to its prey. On the Reverse we find the popular type of the quadriga.

In style and design these types are among the most beautiful of all the Sicilian artists' works. Alas only three or four of the decadrachms have been preserved. Numismatists have generally considered this design to be an illustration of a passage in the Agamemnon of Æschylus in which two eagles devouring a hare are regarded as an omen sent to the Greek kings (vv. 109 foll. Warr's translation).

"How they who share the Achaean throne, the twain consorted princes of Hellas chivalry, wielding their spears of vengeance, were sped unto the Teucrian land by birds of mettle, the one black, the other argent behind. In station manifest they alighted hard by the palace, the kingly fowl before the kings of the fleet devouring a hare's body, big with her brood, on the spear hand where they foreslowed her running."

It is difficult to say what victory was celebrated by this type, but we may feel sure it was meant as a commemoration of some great victory of the Agrigentine army.

In a country where eagles were common such a design would

Original from CORNELL UNIVERSITY

appeal naturally to the citizens as an evident symbol, whether they were familiar with the poem of Aeschylus or not.

In Bk XXXIII, cap. 12 of Pliny's *Natural History* is a reference to an engraver Acragas which is explained by M. Th. Reinach as probably a coin of Agrigentum let into a bowl as an ornament. Many shallow drinking cups of clay, found in Italy, bear a central medallion made from the impression of a Greek coin.

The four known specimens of the decadrachms are 1) At Munich. 2) At Paris. 3) Pennisi. 4) St. Petersburg.

DECADRACHMS.

Obv. Two eagles to left standing upon a hare lying on its back on some rocks.

The nearest eagle with folded wing is lifting its head, as if uttering its cry, the other is bending over its prey with wings still extended.

In the field to right is a grasshopper or locust.

Rev. A quadriga driven to left by a male charioteer nearly nude, above the horses in the field is the legend **AKPAΓAΣ**; above that, an eagle flying to left; below the horses' feet a crab, the symbol of the city.

Size: 1.4 inch. Weight: 43,21 grammes. 656.7303 grains.

The Munich specimen weighs 670 grains.

In an article in the *Num. Chron.*, 1909, p. 357, we find that Mr H.-A. Grueber and Mr E.-J. Seltman defend the genuineness of the specimen at Munich but those at Paris are condemned as forgeries by M. A. Sambon.

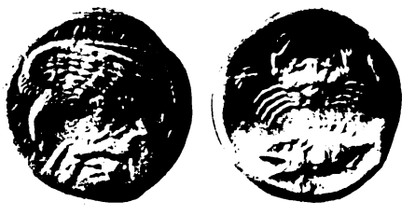
TETRADRACHMS.

Normal weight: 268 grains.

There are two main varieties of the tetradrachms, the earlier bear a single eagle tearing a hare, and on the reverse a crab with a sea-fish of the perch family, Polyprion cernium, according to E. v. Martens, or a Serranus, according to Mr. Lydekker. The later bear similar types to those of the decadrachms. A link between these types may be seen in a tetradrachm bearing the two eagles and on the Reverse a crab and a figure of Scylla.

I. Obv. **AKPAΓ ANTINON.**

An eagle with wings spread, standing to left, on a supine hare, and devouring it; supporting the hare a rock, on which is a barley corn (?) and scallop-shell: border of dots.



Rev. A crab underneath which a sea-fish, to left, with open mouth, and spines along its back; to left of crab a scallop shell, to right a conch shell (?)

II. Obv. **A[KPAΓAN]TINON.** Two eagles, similar to those on the decadrachms, on supine hare, but the eagles are to right.

Rev. Quadriga to right driven by youth holding reins in both hands and the goad in his right; horses in high action, the rein of the farthest broken and hanging down; above Nike flying to left, crowning the charioteer, below **MY[P]**; in exergue Scylla to right with her hand raised.

A similar specimen has a fly in the field of the Obverse. Same die of Reverse.

III. Obv. Similar type: in field **ΣIAA.**

Rev. **AKPAΓ / NITINA** on a tablet hanging on a nail to left end of inscription **NO.**

A quadriga to left driven by Nike, holding goad in right, and reins in left hand: horses in high action, the rein of the farthest broken and hanging down: in exergue a club to left: border of dots.

IV. Obv. Similar, but with lion's head with mouth open to left, in the field.

Rev. Similar to No III.

V. Obv. Similar to No III.

Rev. Quadriga to right driven by draped female figure (?) holding reins in both hands: above Nike flying to left crowning driver; in exergue a crab upside down: border of dots.

VI. Obv. **ΣTPATΩN** above a type similar to that on the decadrachms, behind, the horned head of a young river-god to right.

Rev. **AKPAΓANTI / NON** in exergue.

A quadriga to left, driven by Nike holding the reins in both hands, and the goad in her left; above a vine-branch with leaves and fruit: border of dots.

VII. Obv. **AΓA.** Two eagles, to right, standing on a supine hare, the near eagle with wings closed and head raised, the further with head bent over the hare: border of dots.

Rev. **AKPA NT INON.**

A large crab in upper part of field, underneath a figure of Scylla to left, her right hand raised, her left arm round the neck of one of the dogs.

VIII. Catalogue Dr. J. Hirsch, no XVIII, 2224, Tafel XXIX.

Obv. The normal two eagles on hare to left. In field a cicada.

Rev. Similar to no 58 B.M.C.

Quadriga to left driven by Nike holding reins in both hands, and goad in left, above a vine branch with leaves and fruit: border of dots.

N.B. This coin in the B.M. has for symbol on obverse the horned head of a young river-god to right.

DRACHMS.

Normal weight: 67.28 grains.

IX. Obv. The normal type of the two eagles to left on supine hare: border of dots between two plain borders.

Rev. **AKP** above and **ΛAN** below crab the shell of which presents the features of a human face, underneath a cray-fish to right, on the left of crab a barley corn, on the right a cicada with head upwards.

TRIOBOLON.

Normal weight: 31.99.

X. Obv. Eagle standing to right with spread wings bending head over a supine hare: behind eagle a barley corn in the field.

Rev. **A · N** a crab, underneath a pistrix to left, holding a fish in its mouth.

XI. Obv. Eagle standing to right with spread wings, bending head over a colt lying supine, behind the eagle a barley corn: border of dots.

Rev. **A P A.** Similar type to last but the pistrix to right.

XII. Obv. Eagle standing to right bending over a supine hare: border of dots.

Rev. **K A / R A.** A crab, and tunny fish to left.

XIII. Obv. **AK RA.** Similar type to last.

Rev. Similar type, no inscription.

XIV. Obv. No inscription. Similar type.

Rev. **AЯ ЖA.** Crab and tunny fish.

XV. Obv. Similar to last.

Rev. **AKRA.** Crab and tunny fish.

OBOLS.

Normal weight: 11.11 grains.

XVI. Obv. **AKRA.** Eagle standing to left with closed wings on rocks, attacking with its beak a serpent which it holds in its talons: plain border.

Rev. Crab; beneath **A**: plain border.

XVII. Obv. **AKPΛΓANTINON.**

*

The normal type of the two eagles to right on a supine hare: plain border.

Rev. Crab, and broad sea fish to right with open mouth and row of spines along its back: plain border.

BRONZE COINS.

Dr B.V. Head says "The actual weights of these bronze coins, large and small, together yield an average of 613 grains for the litra. This perhaps shews that the litra had already been reduced from 3375 grains, its original weight, to $\frac{1}{5}^{th}$ of that weight or 675 grains, a reduction which is thought by Mommsen to have taken place in the time of Dionysius, but which the weights of the bronze coins of Camarina and Himera, if they are of any value as evidence, prove to have occurred much earlier". (*Hist. Num.*, p. 122).

BRONZE COINS.

Before 406 B.C.

Weight: 341. Size 1.1. Hemilitron.

I. Obv. **AK PAΓAN INON.**

An eagle with wings spread, to right, holding it its claws a tunny fish, and throwing back its head as if screaming: border of dots.

Rev. A crab holding in its left claw an eel: beneath, a conch and cuttle fish: around • • • • • •

Weight: 277. Size 1.05.

II. Obv. **AK**? Eagle with spread wings to right holding in its claws a hare(?) which it is attacking with its beak.

Rev. Similar to last.

Weight: 359. Size 1.1.

III. Obv. Eagle with spread wings to right, holding in its claws a supine hare to left, throwing back its head as if screaming. In field to right a cicada: plain border.

Rev. A crab, beneath a Triton, to right, holding conch with both hands, and blowing into it; around the marks of value.

Weight: 344. Size 1.05.

IV. Obv. Similar to no I.

Rev. Similar to no III.

Weight: 301. Size 1.15.

V. Obv. No inscription. Eagle with wings spread holding and attacking supine hare: plain border.

Rev. Crab, beneath which a pistrix, to right, on either side ⁘

Weight: 342. Size 1.25.

VI. Obv. Similar type to no V.

Rev. Crab; beneath scallop and another shell, and cray-fish to left. Around crab the marks of value.

VII. **A** Eagle with wings spread to right holding in its **ΓAЯK** claws an inverted fish, and raising its head: plain border.

Rev. Crab: beneath cray-fish to left, above conch; around marks of value.

TRIAS.

Weight: 161. Size ·85.

VIII. Obv. **AK PA.** An eagle with spread wings to right, holding supine hare in its claws and attacking it with its beak: border of dots.

Rev. Crab: beneath a cray-fish: between the two • • •; on some specimens the legend on obverse is retrograde.

IX. Weight: 165. Size ·8.

Obv. Similar to no VIII, plain border.

Rev. A crab: beneath a cray-fish to left, above a fig-leaf; in field to right a shell, around ⁘

HEXAS.

Weight: 132. Size ·75.

X. Obv. **A P.** Eagle with wings spread to right, holding in its claws an inverted bird, which it attacks with its beak: plain border.

Rev. Crab: beneath, two tunny fishes to left; on either side • •

Weight: 117. Size ·75.

XI. Obv. Similar eagle holding supine pig.

Rev. Similar to no X but fishes to right.

XII. Obv. Similar type but eagle holds a tunny fish: border of dots.

Rev. Similar to no XI.

XIII. Obv. Similar to no XII.

Rev. Crab: beneath, two tunny fishes to right and to left, passing, on either side • •

XIV. Obv. Similar to XII.

Rev. A crab: beneath a perch to left: between the two • •

UNCIA.

Weight: 53. Size 17.

XV. Obv. **AK PA.** Eagle with wings closed, standing to right on a tunny-fish, looking back: plain border.

Rev. A crab: beneath, a perch to right: above •

A variety with eagle to left and mark of value beneath.

RESTRUCK BRONZE COINS.

These coins are witness to the distress of the citizens after the destruction of their city by the Carthaginians until the time of Timoleon. No fresh coins were issued but the old coins were restruck or countermarked. About 338 Timoleon recolonized the city with a body of Velians and from that time some degree of prosperity was again attained by the citizens.

BRONZE COINS.

Without marks of value.

Size ·5.

XVI. Obv. An eagle's head, without neck, to right: plain border.

Rev. **A.** A crab: border of dots.

Restruck bronze coins from 406-338 B.C.

XVII. Size 1.2 to 1.15 restruck on No V. Æ.

Obv. Head of young Heracles, to right, wearing lion's skin, in incuse circle.

Rev. Plain.

Size ·85. Restruck on a Trias.

XVIII. Obv. Similar to no XVII.

Rev. **MIKIONOS** in incised letters.

Size 1·05. Restruck so as to deface entirely old type.

XIX. Obv. Head of a young river-god, to right, diademed; behind, barley corn(?) plain border: all in an incuse circle; behind in a smaller incuse circle, a scallop shell.

Rev. Plain.

Size 1.2 restruck on coin resembling no III Æ.

XX. Obv. A female head to right, diademed; plain border; in incuse circle.

Rev. Head of young Heracles wearing lion's skin: incuse circle.

(*To be continued.*)

BIOGRAPHICAL NOTICES OF MEDALLISTS

Coin, Gem, and Seal Engravers, Ancient and Modern, with References to their Works.

B.C. 500 — A.D. 1900.

(*Including the names of several hitherto unpublished artists.*)

One-hundred-and-sixty-fifth article.

(*Continued from col. 13657.*)

THALETIUS (THALETIO or **THALATIO, C. JUNIUS).** (*Roman*). A freedman of Maecenas; is mentioned on an extant inscription as Flatuarius Sigillarius, i. e. a maker of small bronze figures. He was probably an Engraver of gems, seals, and possibly coins. *Vide* Smith. *A Dictionary of Greek and Roman Biography*, etc. III, p. 1019.

THALLER, LUDWIG (*Germ.*). Medallist of Munich, who worked *circ.* 1837-1851. By him is a Portrait-medallion of John Peter Beierlein, the numismatist. I have seen a specimen of this in Dr Jacob Hirsch's collection at Munich.

Original from CORNELL UNIVERSITY

THAM, SEBASTIAN (?) (*Swed.*). Mint-master, mentioned by Schlickeysen, who does not give the place or period of his activity.

THAMYROS (*Greek*). Signature of a Gem-engraver, who is supposed to have flourished before the time of Alexander the Great, and is known by a sard in the Vienna Museum, representing a winged Sphinx scratching her ear with her hind paw. According to Köhler the work is old, but the legend is suspicious.

Other gems known, thus signed, are: Infant seated (Harpocrates); the name incised; cameo (Beverley). Brunn considers the work but sketchy, and the name totally differing in character from the first to be decidedly modern; — Warrior standing by the side of his horse (Prince Isenburg). Is said by Köhler, upon the authority of Heyne, to be a work of Rega's.

Bibliography. — King, *op. cit.* — Stosch, pl. LXIX. — Bracci, II, pl CXIII. — Caylus, *Recueil*, *pl.* XLV, 2. — Eckhel, *Pierres gravées de Vienne*, pl. XXX. — R. Rochette, *Lettre à M. Schorn*, p. 156. — Smith's, *Dictionary*, &c.

THANGEL, LUCAS (*Germ.*). "Kammermeister" at Saalfeld, *circ.* 1574-5. He issued two so-called "Kammermeisterpfennige", which are described in Neumann, under n° 32737-38.

THAUER, CARL (*Germ.*). Mint-warden at Leipzig, previous to 1645; then at Berlin until his death, which took place on 24th June 1658. He coined for Frederick William of Brandenburg (1645-1658). His initials occur on some interesting currency of that reign (cf. Reimmann Sale Catalogue, n° 3203-5). The Mint accounts erroneously call him **CHRISTIAN**. Bolzenthal ascribes medals to him (*p.* 217), and he may possibly have been the Engraver of the coins bearing his signature.

THAVONAT, LUDWIG Freiherr **VON** (*Austr.*). "Oberstkammergraf" of the Hungarian Mining works, 1693. He appointed J. M. Hoffman as Mint-engraver at Kremnitz 1698, and later he installed Warou. Died in June 1719. (C. Oesterreicher, *Regesten*, &c.)

THEED, WILLIAM (*Brit.*). Sculptor (1804-1891); son of William Theed, painter of classical subjects and designer for Messrs Wedgwood and others. The sculptor studied at the Royal Academy and in Italy under Thorwaldsen and others. He executed many well-known statues, busts, and groups, including 'Africa' for the Albert Memorial.

The obverse design of the Hong Kong Dollar and subdivisions of Queen Victoria, 1866, was from a medallion prepared by Wm. Theed, to whom Her Majesty gave a sitting. The reverse design of the Chinese labyrinth was by Mr. Owen Jones. The dies were engraved by Leonard C. Wyon.

Wm Theed's model of Queen Victoria's bust was also used for the Colonial coinage of Malta, the Straits Settlements, British Honduras, etc.

THEILER (*Swiss*). Die-sinker of Lucerne, whose signature I have noted on several commemorative medals, ranging between 1844 and 1882. The best known are: Corps Francs 1842-45; — Cantonal Fête des Cadets at Zofingen, 1869; — Federal Rifle Meeting at Zoug, 1869; — Federal Fête de gymnastique at Biel, 1869; — Fête des Cadets at Neumünster, 1869; — Einsiedeln Pilgrims' Medals and Badges; — Federal Rifle Meeting at Lausanne, 1876; — Federal Fête de gymnastique at Aarau, 1882, and others.

Bibliography. — *Revue suisse de numismatique*, 1890 sqq. — *Stroehlin Sale Catalogues.*

THELOT, JOHANN ANDREAS (*Germ.*). Goldsmith and Modeller, who flourished at Augsburg; he was born in 1654, and died in 1734. (Stetten, p. 476. — Rosenberg, *Merkzeichen*, 88).

THÉNEAUX, EMMANUEL (*French*). Contemporary Sculptor, born at Paris; pupil of Morice. At the Salon of 1886 he exhibited a clever Portrait-medallion of Mlle Charlotte Théneaux.

THENN, ALBERT (*Germ.*). Mint-master at Passau, 1527, 1534.

THENN, BERTHOLD (*Germ.*). Mint-master at Salzburg, 1552-1568.

THENN, HANS (*Germ.*). Mint-master at Salzburg, 1506-1531.

THENN, MARX (*Germ.*). Mint-master at Salzburg, 1531-1552.

THENN, WOLFGANG (*Germ.*). Mint-master at Salzburg, *circ.* 1610.

Bibliography. — I. V. Kull, *op. cit.*, 725, 726. — Zeller, *loc. cit.* Num. Zeitschrift XX, 401.

THEODERIC the Goldsmith (*Brit.*). The Domesday tenant in capite of Kennington in Surrey, and of lands in Oxfordshire, supposed to have been Cuneator under Edward the Confessor. He was, therefore, the probable designer of the last types of the Confessor, of the coins of Harold II., and of the first five types of William I.

Bibliography. — P. W. P. Carlyon-Britton, *A Numismatic History of the Reigns of William I. and II.* (1066-1100), Brit. Num. Journal, II, p. 127.

THEODOROS (*Greek*). Son of Telecles, flourished about B.C. 560, in the time of Croesus and Polycrates, and obtained such renown as a statuary in bronze, that the invention of that art was ascribed to him, in conjunction with his grandfather Rhoecus. He also practised the arts of engraving metals and of gem-engraving; his works in those departments being gold and silver craters, and the celebrated ring of Polycrates.

With respect to the ring of Polycrates, it has been much disputed whether the stone in it was engraved or not. There is evidence to prove that the art of gem-engraving was known in the islands of the Aegean, and particularly in Samos, even before the time of Polycrates. The father of Pythagoras was an engraver of seal-rings, and there is a tradition that it was introduced at Athens in the time of Solon (Smith, *Dict. of Greek and Roman Biography*, III, 1061-2).

THEODOTOS (*Greek*). Coin-engraver, who flourished at Clazomenae, towards the middle of the fourth century B.C. His signature under the form **ΘΕΟΔΟΤΟΣ ΕΓΟΕΙ** occurs on admirable tetradrachms, issued by the magistrates Pytheos, Herakleides, and Mandronax. The type is as follows: obv. Laureate head of Apollo, three quarter face to left, hair flowing, with chlamys tied around the neck; in the field to left, the artists' signature.

℞. **ΚΛΑΣΙΟ** and magistrate's name. Swan to left, with raised wings.

B. M. Cat., *Ionia*, pl. VI, 9. Jameson, *Revue num.*, 1906, Pl. X.

Theodotos is the only ancient Engraver of coin-dies, besides the Cretan artist Neuanthos, who added the **ΕΓΟΕΙ** to his name, thus removing every possible doubt as to the attribution of the signature.

M. Jameson of Paris, who acquired in 1906, one of the finest specimens extant of this beautiful coin, published in *Revue numismatique*, 1906, an account of the signed tetradrachms of Theodotos, and reproduced (Pl. X) six examples from his own collection, the Berlin Museum (2), British Museum, French Cabinet, and Warren Collection. These vary in style, the Jameson piece being unquestionably the finest.

Lenormant thought the coins in question were engraved at the time of King Mausolus of Caria, who died circ. B.C. 353. He remarked on the analogy of style in the head of Apollo of the Clazomenae tetradrachms and those of the Carian dynast.

"Théodotos, le graveur de Clazomène, qu'il faut mettre sur la même ligne que les deux grands artistes syracusains, Evénète et Cimon, se relie par son style d'une manière manifeste aux enseignements presque romantiques (si semblable expression peut s'employer en parlant de sculpteurs grecs) des artistes qui travaillèrent à la décoration du tombeau de Mausole, et en firent une des merveilles du monde. C'est encore un maître de premier ordre, qui pour la noblesse du style et la science du modelé peut rivaliser avec Evénète lui-même. Mais il n'a pas aussi bien compris les conditions spéciales de la composition des types monétaires. En employant, au lieu d'un profil, pour décorer le droit de ses monnaies, une tête de trois-quarts modelée en méplat, il s'est laissé aller trop complaisamment — comme l'ont fait aussi, du reste, à Syracuse, Cimon et Euclide vers la fin de leur carrière — à une mode passagère de son temps. Et s'il y a trouvé l'occasion de prouver, dans de très grandes difficultés, toutes les ressources de son talent, il a fait preuve de moins de goût et d'intelligence en ne discernant pas les inconvénients qui devaient empêcher l'établissement définitif de la mode à laquelle il a cédé, tandis qu'Evénète n'y a jamais sacrifié." Lenormant, III, p. 271.)

L'œuvre de Théodote à Clazomène, Rev. num., 1906, p. 249. — B. V. Head, *Historia Numorum*, p. 491. — Mariette, *Pierres gravées*.

THÉRASSE, VICTOR (*French*). Sculptor of the first half of the nineteenth century, born in Paris on 26th March 1796, died at Maison de Sainte-Perrine, near Auteuil, on 4th February 1864; pupil of Bridan, Lernot, and the Ecole des Beaux-arts. By him are various Portrait-medallions in terra cotta and bronze.

THERMIGNON, Cav. P. (*Ital.*). Medallist and Engraver of coindies, in the service of King Victor Emmanuel II. I have been unable to obtain any information concerning this artist, and the only medals I know by him are : Portrait-medal of Cavour, 1856; — Victor Emmanuel II., 1849 (Giuramento dello Stato); — Marriage of Maria Pia of Savoy with King Louis I. of Portugal; — Pattern 5 Lire Piece of the Republic of San Marino (illustrated in Spink's *Numismatic Circular*, 1899, p. 3503); — Dante Alighieri, 1865 (*Num. Circ.*, 1900, p. 3903), etc.

THEUN (or **THENN**), **WOLFGANG** (*Austr.*). Mint-master at Salzburg, *circ.* 1610. The initials **W. T.** occur on some of the currency issued by him.

THEUNIS, PIERRE (*Belg.*). Contemporary Sculptor and Medallist, residing at Brussels. At the Competition of the Société hollandaise-belge des Amis de la médaille d'Art, 1911, he won the second Prize of 300 Francs.

THEUNISSEN, CORNEILLE HENRI (*French.*). Contemporary Sculptor and Medallist, born at Anzin; pupil of Cavelier, and Fache. He has repeatedly exhibited Medals and Plaquettes at the Salon. Among them : 1888. M. Le Clerc; — Mlle Aliamet; — 1889. Ma mère; — 1890. Mère Marie Catherine; — 1898. Enfant; — M. & Mme H***; — 1901. M. Moyaux, architect; — Les deux Sœurs; — Jeton de présence of the Valenciennes Chamber of Commerce; — M. Henri Soret, ex-mayor and deputy of Saint-Quentin; — 1904. Mme H.C.***; plaquette Æ.; — M. Ch. Ledoux; plaquette (Railways of Penarroya) (d'un réalisme très étudié, mais sans vraie puissance); — M. Paul Schneider; plaquette; — 1906. M. Vauthier, medal; — M. & Mme Jules Touvet, medal; — 1908. Jubilee of the Mines of Anzin; plaquette; — 1909. François Hugues, deputy of St. Quentin.

In some of his productions, the artist has shown himself very successful.

THEUNISSEN, PAUL LUDOVIC (*French*). Contemporary Sculptor, born at Anzin, pupil of Cavelier, Barrias, and Magnadas. At the Salon in 1902 he exhibited a Portrait-medallion of M. Gaston Lefranc.

THEURING, JOHANN (*Austr.*). Mint-engraver at Vienna, born in 1784, died on 15th April 1853. He first began work at the Mint in 1800, and was employed at various times as assistant at the mints of Kremnitz, Nagyba'nya, and Schmölnitz. In 1841 he was entrusted with the cutting of the new punches for gold and silver ware, and later in the same year (1. April) was appointed fourth Engraver to the Vienna mint, with emoluments of 700 florins and a remuneration of 160 florins. In 1849 he retired on a pension.

Among his best known medals are : Portrait-pieces of Prince Charles of Schwarzenberg (1814). He cut the R. dies for the 1837 Double Gulden of Ferdinand I. (obv. by J. D. Boehm); — R. of 4 Ducat piece, 1839; — Prize Medal for Exhibitions of the Gratz Horticultural Society, 1837; — Prize Medal of the Vienna Agricultural Society, 1844 (signed : **J. THEURING F.**); — Dr J. G. Beer, of Vienna, 1821; — Accession of Louis XVIII. of France, 1814, etc.

Bibliography. — *Katalog der Münz-und Medaillen-Stempel-Sammlung*, &c.

THEUS. This signature occurs on Portrait-medals of J. J. Rousseau, coiffed with an Armenian bonnet.

THÉVENIN (*French*). Die-sinker's signature on a Masonic jeton of the Loge des amis triomphants, Orient de Paris, 1810 (*Bramsen*, 1084). Marsden gives the same signature, **THEVENIN** (p. 36, n° CXLV).

THÉVENON, JEAN LOUIS (*French*). Medallist of the second half of the eighteenth century. He was working in Paris, *circ.* 1791. Probably the same as the last, who engraved a Masonic jeton of Paris, 1810. Hennin illustrates on Pl. 32 of his work and describes under n° 345 a medal bearing the signature **THEVE.**

THEVENON, VIDÉ (*French*). This signature occurs on a large medal in tin, intended to preserve the remembrance of the admirable self-devotion of Denis Affre, Archbishop of Paris, who was wounded on 25. June 1848 (Saulcy, *Souvenirs numismatiques de la Révolution de 1848*, pl. XXIII, n° 3).

THÉVENOT, FRANÇOIS (*French*). Painter, Medallist, and Engraver at the Mint of Romans, *circ.* 1523-1546. Mazerolle ascribes two medals to him : Francis I., medal intended for presentation to the King by the town of Romans, 1533; 48 mill.; — Francis, Dauphin, Duke of Brittany (1517-† 1536), presentation medal of the town of Romans to Francis; 45 mill.; struck (*illustrated*).

Presentation medal to the Dauphin Francis, Duke of Brittany, 1533.

M. Blanchet (*Mélanges*, 1908, p. 98) has shown that Thévenot, in common with Jacquelin de Montluçon, Jehan Perreal, and others, were responsible for the designs of some of the medals of their period.

Bibliography. — Mazerolle, *Médailleurs français*. — Rondot & H. de la Tour, *op. cit.*

THIBAULT, or **THIAULT** (*French*). Seal-engraver at Paris, *circ.* 1680-1688. *Vide* E. Babelon, *La gravure des gemmes en France*, &c., p. 152.

THIÉBAUD, or **THIÉBAULT, ALFRED** (*French*). Contemporary Sculptor, born at Paris; pupil of Cavelier, Dantan and Guillaume. He has exhibited at the Paris Salon since about 1875. By him are a number of Portrait-medallions : 1875. Mme Thiébaud; — 1888. Mlle J. Thiébaud; — 1889. Mme L***; — Mme J. B***, etc.

THIÉBAUD, or **THIÉBAULT, HENRI** (*French*). Sculptor, born at Paris; pupil of J. Lequien. He is also the author of the following Portrait-medallions, which are cast in bronze : 1878. Portrait of M. Bonnegrace; — 1888. Mlle H. Thiébault, etc.

THIEBAUD, JEAN PIERRE. *Vide* **JONAS PIERRE THIÉBAUD.**

THIÉBAUD, or **THIBAUD, JONAS** (*Swiss*). A native of Loudun in Poitou (France), who settled at Geneva, and in 1665 was received a burgher of that city. His son was Jean Pierre T., and his grandson Jonas (I) of Neuchâtel, born at Geneva in 1695. Jonas (I) had two sons, who were clever Engravers like their father : Jonas (II) and Jonas Pierre. The two last were the most important Medallists of the family.

It is not always possible to distinguish between the works of Jonas (I) and (II) and Jonas Pierre, belonging to the period when the sons assisted their father as Engravers at Augsburg and other mints. M. Wavre has offered some suggestions which enabled him to ascribe tentatively, out of the 64 productions of the Thiébauds which were known to him, 32 with 2 obv. and 2 R. to Jonas (I), 19 with 3 obv. and 1 R. to Jonas II. and 8 to Jonas Pierre. His list however can only represent a very small selection of the productions of these prolific Die-engravers, some of whose works rank in merit with the best medallic issues of the eighteenth century.

The Neuchâtel (*Switzerland*) Cabinet of Coins and Medals, under the able keepership of M. Baur-Borel has been able to form a fairly complete collection of the works of the Thiébauds.

Ibid., *Jean-Pierre Thiébaud, médailleur neuchâtelois*, Mus. neuch., 1898, p. 195. — Kull, *op. cit.* — *Revue suisse de numismatique*, 1894, 1909. — *Reimmann Sale Catalogue*. — Menadier, *Schaumünzen des Hauses Hohenzollern*. — Tobler-Meyer, *Wunderly Katalog*. — Forrer, *Stroehlin Sale Catalogue*, 1909-1911. — Bolzenthal, *op. cit.* — Ammon, *op. cit.* — *Catalogue of Swiss Coins in the South Kensington Museum*. — Bahrfeldt, *Münzen der Fürstenthümer Hohenzollern*. — M. Morel, *Schweizerisches Künstler-Lexicon*.

THIÉBAUD (*Swiss*). Contemporary Caster. He cast the Portrait-medallions of Dr. J. B. A. Stroehlin, and F. Amiel, modelled by A. de Niederhäusem, and edited by the late Dr P. Stroehlin.

THIEBAUD, JONAS I (*Swiss*). Medallist and Engraver of coin-dies, born at Geneva in 1695. From his youth he devoted himself to die-sinking; from 1710 to 1714 he was apprenticed to Dassier at Geneva; on his return to Neuchâtel, he was often employed by the Mint of Berne. From 1724 to 1733 he was working for the Count of Montfort, the Prince of Hohenzollern, and the Canton of Lucerne, for which he engraved dies for Double Ducats, Ducats, and Five Batz pieces. Later he was for three years in the service of the Ducal mint of Württemberg, and from there he went to St. Gall and Appenzell. In 1740 he took an appointment as Medal-engraver to the Mint at Augsburg, where he obtained the citizenship and a pension. He engraved a great many coin-dies for Augsburg, the Elector of Bavaria, and other princes of the Empire. The date of his death is given as 1769.

Sordet mentions that Jonas Thiébaud's dies for Ducats and Thalers of Augsburg with busts of the emperors Charles VII., Francis I. and Joseph II. are among the best that were produced in Germany in the eighteenth century. The finest medal by him is considered to be that of the Council of Imperial Vicars of the Court Tribunal; signed : **ṪHIÉBAUD FECIT, 1742** (*Vide* Stroehlin, Sale Catalogue, III, 1911, n° 4763).

Augsburg Thaler of Charles VII., 1744.

Amongst the earliest currency engraved by Jonas I. are Half Gulden of Anton, Count of Montfort, 1732, of which two types exist. A Thaler of Count Ernest, dated 1738, is signed **I.THIÉBAUD.F.** on obv. and **I.T.F.** on ℞. Two years later, the series of coins of Augsburg begins with a fine Double Thaler of 1740, signed **I.T.** (*illustrated*). The same initials occur on a series of gold coins of Lucerne, 1741. On the Augsburg Thalers of 1743 and 1744 the **I.T.** is encircled in an oval frame. In 1745 the letters **I.T.**

Abbey of Ottobeuren.

are again found, unframed; and on the Half Thaler of that same year the signature consists of a **T** only. In 1747 a **Ṫ** (abbreviation for **IT**) makes its first appearance and is continued for some time, occurring for instance on the medals commemorating the Centenary of the Peace of Westphalia. A medal, issued in 1749, of Countess

Double Thaler of Augsburg, 1740.

Christina of Stolberg, née Duchess of Mecklenburg, is signed : **J. THIÉBAUD FECIT**. A variety bears the Engraver's initials only **I.T.F.** On coins of 1760 **T** occurs again with or without dot, and this signature is maintained on the numerous gold and silver medals and coins of 1761 and following years, in the following forms : **·Ṫ·**; — **IT. 1763**; — **I + T 1765**; — **I.T. 1766**.

The late M. Wavre has suggested that the dies signed **T, THIÉBAUD, I. THIÉBAUD** or **I·T·** may be ascribed to Jonas Thiébaud, first of the name; those with **Ṫ** to Jonas (II); and to Jonas Pierre, the pieces signed **J. P. THIÉBAUD, J P. T.** or **ṖT.** It is however improbable that these varieties of signatures are distinguishing marks of the productions of these three Engravers.

To Jonas (I) **T.**, the following coins and medals are usually attributed :

Appenzell. Ducat 1737 $\left(\frac{1737}{T}\right)$; — Nine Batzen piece 1738; the ordinary type, and a variety in the British Museum Collection (Townshend bequest), with the inscription on ℞. SALVUM FAC POPVLVM TVVM 1738 BATZEN VIII IT; — Oertli (or 15 Kreutzer = Quarter Gulden) 1738; — Six Kreutzer piece 1737.

Augsburg. Double Thaler 1740 (struck in the name of Charles VI.; *illustrated*); — *Æ*. Ducats of 1743, 1745, 1763, 1765, 1763, 1767; — *Æ*. Thalers of 1743, 1744, 1745, 1767; — Medal of the Council of Imperial Vicars, 1742 (Charles Albert and Charles Philip, Counts Palatine; ℞. Justice and Concord; *Vide* Stroehlin Sale Catalogue III, n° 4763); — Medal of 1753 of the Augustusbrunnen, 45 mill.

Christophsthal. Mining Thaler and Gulden of Charles Frederick, Duke of Württemberg, as Administrator, 1740.

Constance. Franz Konrad, Freiherr von Rodt, Prince Bishop and Cardinal : Ducat, Thaler, Half Thaler, etc. of 1761, struck at Augsburg, and engraved by Franz Hohleisen and Jonas Thiébaud; — Medal of the Brotherhood of St John Nepomucene; signed **IT.**

Haldenstein. Gubert von Salis-Maienfeld : *Æ*. 6 Ducat piece 1733, and silver proof of same.

Hildesheim. Medal (or Thaler) of the Sede Vacante, 1761; 55 mill.

Hohenzollern. Frederick William, *Æ*. Carolin, 1735; signed **T.**

Lindau. Centenary Medal of the Peace of Westphalia, 1748.

Lucerne. *Æ*. 5, 3, 2 and 1 Ducat pieces, 1741; — Half Batzen, 1742.

Montfort. Anton, Half Gulden, 1732 (two varieties); — Ernest, Thalers, 1738 (2 var.).

Münster. Double Thaler and Thaler of the Sede Vacante, 1761.

Ottobeuren Abbey; commemorative medal, 1766; signed **IT**; 46 mill. (℞. *illustrated*).

Schaumburg-Lippe. Albert Wolfgang : Thaler, 1748; signed **Ṫ**; — William Frederick Ernest, Accession coins (Thalers and subdivisions), 1748.

Saint-Gall. Scholastic Prize medals 1739 (several varieties).

Saxony. Medal on the Peace of Hubertusburg, 1763.

Stolberg. Memorial medal of Christina, widow of Count Ludwig Christian, † 1749 (2 varieties).

Württemberg. *Vide* Christophsthal *supra*.

THIÉBAUD, JONAS (II) (*Swiss*). Son of Jonas (I) T. and brother of Jonas Pierre T. Very little is known about this Engraver, who is said to have been a clever artist, and assisted his father at the Augsburg Mint. It is impossible to ascribe to him any dies with his distinct signature. M. Wavre has suggested that the monogram **Ṫ**, which first occurs on coins of Augsburg in 1747, may indicate his work. Nineteen pieces, with the addition of three obverses and one reverse are thus signed, according to the above-named authority, but in the absence of further proofs it is a question very much open to discussion.

BIBLIOGRAPHY. — *As above.*

THIÉBAUD, JONAS, or **JEAN PIERRE** (*Swiss*). Son of Jonas I., was born in 1727; first assisted his father as Engraver at the Augsburg Mint, then at Würzburg and Kempten. In 1755 he went to Neuchâtel; 1758-1761 was employed at the Mint of Soleure, where he was rewarded for his services with a medal in gold, of which he cut the dies; he continued to work for that mint from Neuchâtel until 1766, when he henceforward devoted himself entirely to politics and to the service of the State, becoming a member of the Grand Conseil of the town of Neuchâtel. On the reopening of a Mint there he was appointed Controller and Inspector. He married Marianne Purry, by whom he had three daughters and a son. He died in 1812.

A medal of 1753 by him is signed : **DICAT I. P. THIEBAUD LE FILS F. 1753**; a Portrait-medal of the Mint-master of Augsburg, Hohleisen, has : **I.P T.IUN.F.**, and a Jubilee medal of the Church of the Cross at Augsburg, **I.P.T.** On an unsigned religious medal of Augsburg the signature is **PT.**

The Neuchâtel piece of 1754 SEMPER FLOREBIT is signed : **J. P. THIEBAUD LE FILS.**

By J. P. Thiébaud are also the following : Scholastic Prize Medal of Neuchâtel (*Mus. Neuch.*, 1896, p. 149, n° 3), and a Pattern with ℞. CULTURA MITESCIT; — Scholastic Prize Medals of Soleure, with bust of St. Ursus, S. URSUS MART. A. D. CCLXXXVIII; signed **I.P.T.**; — 7, 6, 5, 4, and 3 Ducat pieces of Soleure, 1761, with the Saints Ursus and Victor on obv.; — A series of Satirical medals, after Wermuth, of Landammann Epp of Uri, 1737-38 (*Vide* Stroehlin Sale Catalogue, III, 3848-61; Leitzmann, *Num. Zeitschrift*,

Satirical medal, by J.-P. Thiébaud.

1855, p. 142); Double Ducat size (*illustrated*); — Francis Töpsel, prior of the Convent of Polling in Bavaria, 1794 (this medal appears to be the last work known by the artist); — Medal of reward granted by the State of Lucerne to officers and soldiers who took part in the campaign of 1815, from obv. dies by J. P. Thiébaud and ℞. dies by Schwendimann, etc.

BIBLIOGRAPHY. — *As above.*

THIÉBAULD, ALFRED. *Vide* **THIÉBAUD,** *supra.*

THIÉBAULT, HENRI. *Vide* **THIÉBAUD,** *supra.*

THIÉBAUT, A. (French). This signature occurs on a Medallion in terra cotta of an Arab Sheik, 1873.

THIEDE, OSCAR (*Austr.*). Contemporary Sculptor and Medallist of Vienna, by whom I have seen a number of medallic productions at the Brussels International Salon de la Médaille, 1910 : Plaquette of the 25th Anniversary of the 'Verein deutscher Kunststudierenden' at Munich; — Portrait-plaquette of Willi Frass; — Prayer, Æ. Plaquette; — Obv. and ℞. of medallion of the Imperial and Royal Ministry of Religion and Education; — Prof. Vilmer Winklow; — Prize Medal of the Chamber of Commerce and Industry of Eper; — Prince Christian Philip of Löwenstein-Wertheim; — H. I. R. H. Archduke Francis Ferdinand of Austria; — Octagonal Plaquette Souvenir of the Kunstkränzchen of the Academy of Fine Arts of Vienna, 1909; — Portrait of the artist's father; — Fräulein Maler von Wegner; — Fräulein Jella Artner; — Youth; — Youthful Arts; — Souvenir of the Druggists' soirée, 1909, etc.

THIELE, JOHANN HEINRICH (*Germ.*). Mint-master in Brunswick-Lüneburg, *circ.* 1730-1731. He signed **J. H. T.** or **I. H. T.** *Vide* Madai, *Thaler Cabinet*, nos 1177, 78; *Ammon*, p. 80, n° 196. These initials occur on commemorative coins of the Jubilee of the Augsburg Confession, 1730, issued by Duke Augustus William.

THIELT, MICHAEL VAN (*Dutch*). Mint-engraver at Antwerp, 1650-1670. He engraved amongst others a number of jetons, which are described in *Tijdschrift*, IV, 145 sqq.; V, 285 sqq.

THIÉNOT, CHARLES LION (*French*). Sculptor, born at St. Germain-les-Couilly (Seine-et-Marne); pupil of Hector Lemaire, and J. Tonnelier. He has exhibited Portrait-medallions and Medals at the Salon : 1901. Portrait-medal; — 1902. Medallion; — 1904. M. G. D***; — Pastorale; — Jeunesse-Printemps; — Tentation; — Rêverie; — 1905. Mme C. Thiénot; — 1906. Mme C. Thiénot, &c.

THIES (*Germ.*). This signature occurs on a medal commemorating the Third centenary of the Invention of Printing, struck at Wolfenbüttel, 1840 (*Num. Zeits.*, p. 199; Thomsen, *Bronce Medaillier*, p. 203), also on a medal of the XIX. Convention of German Naturalists and Physicians at Wolfenbüttel, 1841.

THIEULAINE, EVRARD (*Flem.*). Mint-master at Ghent, in conjunction with George Le Cabotre and Evrard Le Merchier, from 18th June 1466 to 9th June 1467.

THIEULAINE, GUÉRARDIN (*Flem.*). Mint-master at Bruges, in conjunction with George Le Cabotre, 3rd September 1457 to 20th October 1458.

THILLEN, CHRISTIAN (*Germ.*). Court-jeweller and General Mint-warden of Suabia, 1709-1725 (Lori, III, 259). His daughter married the Medallist Christoph Heinrich Müller.

THILLING, OTTO VON (*Germ.*). Mint-master at Neu-Leiningen under George of Schönenberg, 1591-1595; he was a native of Goslar, and died on 2nd May 1595. *Vide* Paul Joseph, *Die Münzen von Worms*, p. 231 sqq.

THIOLLIER, Mlle EMMA (*French*). Contemporary Sculptor; pupil of her father. At the Salon of 1894 she exhibited Portrait-medallions in bronze of M. & Mme T. L***.

THIONVILLE (*French*). Engraver of the early part of the nineteenth century; mentioned by Bolzenthal, p. 297.

THIRIOT, HENRY (*French*). Contemporary Sculptor, born at Metz; pupil of Millet and Cavelier. By him are also Portrait-medallions, among which I have noted : 1887. M. Ernest M***; — 1888. Mlle Jeanne S***.

THIRMANN, or **THÜRMANN, JOHANN CASPAR** (*Austr.*). Apprentice-Engraver at the Vienna Mint, 1764; on September 1765 he was placed under Anton Widemann, but in 1776 he was pensioned off on account of illness. The Vienna Mint preserves dies by this engraver, signed **T.**; **C. TH** and **C. T.** of a medal commemorating the Birth of the Archduchess Maria Theresia, 1717.

Fiala, in Katalog der K. K. Münz- und Medaillen-Stempel-Sammlung mentions a C. Thirmann as Medallist to the Vienna Mint under Charles VI., who would have been the author of the medal cited here, dated 1717, but in the Index he ascribes this work to J. C. Thirmann, whose connection with the Mint is comprised between 1764 and 1776.

THOLOTTE, Mlle MARTHE (*French*). Contemporary Sculptor, born at Château-Chinon, near Dôle. At the Salon 1897 she exhibited two Plaquettes : Fileuse; — Portrait.

(*To be continued.*)

NUMISMATIC REFERENCES IN SHAKESPEARE.

A MIDSUMMER NIGHT'S DREAM.

Abbreviation : M.N.D.

According to Professor Dowden, this is the fourth comedy written by Shakespeare and the seventh or eight play entirely by his pen. According to Mr Dowden it was written sometime in the years 1593-'4. The description in the play of the unseasonable weather of this winter would point to that. Many references applicable in flattery to the Virgin Queen would point to its having been performed before Elizabeth. Another reference is clearly to the Kenilworth festivities presented before Her Majesty by the Earl of Leicester, July 1575.

It was originally published in two editions in 1600.

Apart from the minor details of its chronology, we may be sure that this play was the first truly great comedy of Shakespeare, a play that marked him as greater than his fellows. At the same time he was writing such tragedies as the Second and Third Parts of King Henry the Sixth, Richard the Third and Richard the Second, and, perhaps, Romeo and Juliet and King John. In other words, it was the product of his pen when his star was first in the ascendant.

When we come to the numismatical references in the play, however, we shall be disappointed, but this is in the very nature of things, for a play that deals with Fairies, Ancient Athens and the all-absorbing love affairs of Lysander and Demetrius, of Hermia and Helena is not to be expected to speak much of the monetary affairs which distinguish every-day life in the modern world. In the Clown Scenes we might expect an exception to this, and there, indeed, the only reference to an actual coin occurs but, even here, that ONE reference is all.

However, in another part of the play, we have a particularly interesting referenee to the constant necessity of weighing coins to ascertain their actual worth in Shakespeare's time. In "Love's Labour's Lost" we have said something of the state of the coin in circulation at that time and the monetary reform in Elizabeth's reign may be regarded as a novel contribution to fixing the chronology of this play, though, perhaps, rather a vague one as the reference would be appropriate AFTER the reform of the coinage as well as BEFORE it and yet, if the reference was made at the particular time that the reform was being carried out, it would have the seasonable character to passing events which we sometimes find in Shakespeare's writings.

ACT III.

SCENE II.

"Weigh oath with oath, and you will nothing weigh :
Your vows, to her and me, put in two scales,
Will even weigh, and both as light as tales"

Since much of the earlier coinage of England was still current in Shakespeare's time and as the same evils in the condition of the current coin were still existing, the following quotation from A. Del Mar's "History of Monetary Systems", may be useful : —

"Edward III was crowned January 25, 1327. To the numerous and sudden alterations of money, which, like an exhibition of fireworks, celebrate the emancipation of the Western princes from the thraldom of Caesar's empire, but introduced the greatest confusion into nummulary denominations and relations, England contributed an additional element of confusion. At all events, it was far less common in other countries. There was a marked difference between the contents of a coin as provided by law or mint indenture and its actual contents, as found by weight and assay, of perfect specimens still extant. For example, the mint indenture of 1345 provided that the pound tower of silver, 0.925 fine, should be coined into 22 1/2 pennies. This would make the gross weight of each penny 24 grains, and the contents of fine silver 22.2 grains, whereas the actual coins in good condition weigh but 20 grains and contain but 18 1/2 grains of fine silver. Similar differences are to be found in other coins of the period".

ACT IV.

SCENE II. — "Oh sweet bully Bottom! Thus hath he lost SIXPENCE a day during his life; he could not have 'scaped sixpence a day : an the duke had not given him sixpence a day for playing Pyramus, I'll be hanged; he would have deserved it: sixpence a day in Pyramus, or nothing."

SIXPENCE. — This coin, made its appearance in the reign of Edward VI, as already stated under "The Comedy of Errors" and so abundant was it in the reign of Elizabeth that, in the present day, really fair specimens are to be purchased for about their face value. Of course, FINE specimens fetch a much higher price.

Evidently Sixpence was a considerable sum of money in the eyes of Bottom's simple companions.

This is the only direct reference to a coin in this play but, perhaps, Bottom got his idea of a lion being a "wild-fowl" from the winged lion of St. Mark upon the Ducats of Venice, a coin which, as we shall see when we come to "The Merchant of Venice" was very familiar to the audiences of Shakespeare (III, II).

Helena's comparison of her rival to a "counterfeit" may, also, perhaps have been influenced by the state of the current coin (III, II).

However, these are but quasi-references and we do not present them in any other spirit.

A. H. COOPER-PRICHARD.

SOME COINS OF THE BRITISH EMPIRE.

The following abbreviations are used in describing the coins : —
O — Obverse.
R — Reverse.
E — Edge.

CEYLON.

QUEEN VICTORIA.

COPPER HALF FARTHING.

TYPE I.

HALF FARTHING, 1839.

O. — Legend : — VICTORIA D : G : BRITANNIAR : REGINA F : D : Head and truncated neck of the Queen in profile, and looking to the left. A diadem and fillet bind the wavy hair, which is parted on the forehead, carried over the top of the ear, and gracefully collected into a knot behind the head. The whole within an ornamented rim.

R. — Inscription, in three lines : — HALF | FARTHING | 1839. Above, the Royal Crown. Below, a rose, with three leaves on each side. The whole within an ornamented rim.

E. — Plain.

Atkins says the rose, thistle, and shamrock, are on the reverse, which is inaccurate.

According to Atkins copper half farthings dated 1827 were minted for circulation in Ceylon, but none were coined in that year.

The copper half farthings bearing dates subsequent to 1839 are Imperial coins and were made current by a Royal Proclamation dated June 13th 1842. Therefore they must not be specially assigned to Ceylon. They are similar in design to those coined in the year 1839 except that they bear on the reverse the rose, thistle, and shamrock, engrafted upon the same stem instead of a rose with three leaves on each side. Those dated 1868 were struck as specimens and not issued for currency.

COPPER QUARTER FARTHINGS.

TYPE I.

QUARTER FARTHING, 1839.

O. — Legend : — VICTORIA D : G : BRITANNIAR : REGINA F : D : Head and truncated neck of the Queen in profile, and looking to the left. A diadem and fillet bind the wavy hair, which is parted on the forehead, carried over the top of the

ear, and gracefully collected into a knot behind the head. The whole within an ornamented rim.

R. — Inscription, in three lines : — QUARTER | FARTHING | 1839. Above, the Royal Crown. Below, a rose, with three leaves on each side. The whole within an ornamented rim.

E. — Plain.

Similar coins are dated 1851, 1852 and 1853.

None of these pieces are mentioned by Atkins.

Henry Garside.

***

CANADA.
KING GEORGE THE FIFTH.
GOLD TEN DOLLARS.
TYPE I.

TEN DOLLARS, 1912.

O. — Legend: GEORGIVS V DEI GRA : REX ET IND : IMP : Truncated bust of the King and Emperor in profile, and looking to the left. On the truncation of the bust : — B.M. His Majesty is wearing the Imperial Crown and the ermine Robe of State, the Collar of the Most Noble Order of the Garter, and the Badge of the Most Honourable Order of the Bath. The whole within an ornamented rim.

R. — Upper legend : — CANADA. Lower legend : TEN DOLLARS. On a wreath formed by two branches of maple (the lower portions of the branches being crossed) a shield bearing the Arms of the Dominion of Canada, heraldically coloured. The date, 1912, above the lower legend. The whole within an ornamented rim.

E. — Milled with straight lines.

Gold five and ten dollars have recently been coined in the Ottawa branch of the Royal Mint. They are in size and intrinsic value similar to coins minted in the United States of North America of like value. The result will be that the gold coins of these two countries will be freely interchangeable and the large quantity of American gold money now in circulation in Canada and held as reserves by the Canadian banks will doubtless in the course of time return to the country of origin.

The Honourable W.T. White, the Canadian Minister of Finance, personally presented the first coin of each denomination struck, to the Victoria Memorial Museum, Ottawa.

Henry Garside.

THE SILPHIUM PLANT ON COINS OF CYRENAÏCA

The *Nuova Antologia* recently published an interesting article on the Silphium plant of Cyrenaïca, from which we cull the following notes.

In ancient times Cyrenaïca was noted for its oils, wines and corn, but the most important of its productions, known by the Greeks under the name of *silphium* and by the Romans as *laser pitium*, consisted in a resinous gum which was much esteemed and very costly. It had curative properties on the nature of which our present knowledge is very small. The attempts that have been made to grow silphium again have been in vain, and all we know about this plant is almost exclusively derived from classic philology. Pliny and Theophrastus believed that the silphium plant was first cultivated in the Garden of the Hesperides, and Belley gave out as his opinion that the seeds were brought from the interior of Africa to the Pentapolis by a violent wind. Herodotus and other writers mention that the silphium grew along the Mediterranean coast; Strabo affirms that it sprang up in the desert, and Arrian says it came from the Libyan oases. Aristophanes notices the plant in his *Ecclesiasuzae*, and also Plautius in *Pseudolus*, and Petronius in the *Satiricon*. Theophrastus states that silphium was used as fodder for fattening cattle, and Dioscorides further alleges that it also constituted human food. Aelian confirms this information and considers

The silphium plant on coins of Cyrenaïca.

the plant as an excellent antidote. Hippocrates recommends it to barren women, and orders it as a powerful digestive. Pliny, in book XIX of his '*Natural History*' dwells at length on its many virtues, and quite seriously says it sends pigs to sleep and causes carps to sneeze. Julius Caesar, at the beginning of the Civil War, sent for thirty pounds of silphium which was brought to Rome, and the resin extracted from it sold at the weight of gold. The inhabitants of Cyrenaïca were in the habit of offering the plant to Apollo as one of the most precious gifts. The silphium plant is shown on

The weighing of the silphium before the King.

the coinage of the province for several centuries, B.C. 600-100, from which we gather some idea of its importance, the plant being so highly prized throughout the ancient world, both for its medicinal virtues and for the perfumes extracted from its flowers.

After the third century of our era, it disappeared, and it has been suggested that the population may have destroyed it to escape the taxes which were levied on the cultivation of the silphium. In 431, a bishop of Ptolemaïs mentions it in his odes and several of his letters, and deplores its complets extinction.

For an account of the 'Coinage of Cyrenaïca', cf. Head, *Historia Numorum*, II. edition, pp. 864-874. — Müller, *Numismatique de l'ancienne Afrique*, I & suppl., etc.

SILVER.

2. Grosso. Obv. OTTO.REX around two Ts. joined.
Rev. S.VVLT.DE.LVCA around small Holy Face (crown with dots) in circle.
3. Grosso. As 2, except dot between OTTO and REX. Crown with three arches, which is customary from now onwards.
4. Large T-Ts, on left OTTO, on right REX. Ex. Star.
Rev. Large Holy Face dividing S.VVLT-D' LVCA.
5. Grosso. Obv. As 4, except Obv. dot above, crescent below.
6. — Obv. REX-OTTO divided by large and ornate T-Ts.
Rev. As 5, except. Ex. a plant.
7. Grosso. As 5, except, rosette above and below T-Ts.
8. — As 6, except, rosette above T-Ts and crescent below.
9. — As 6, except, rosette below T-Ts.

COPPER.

10. Piccolo. Obv. T-T between OTTO-REX. Ex. A dot (bezant), or pellet.
Rev. S.VVLT-DLVCA divided by Holy Face.
The Lucca coinage was reformed at the instigation of the Emperor Frederick I.

XIV c. Gold, silver.

GOLD.

1. Fiorino. Obv. S.VVLT-D.LVCA divided by large Holy Face.
Rev. S.M-AR-TIN, etc. as 1.
2. Obv. As 1.
Rev. S.M-A-R-TIN, etc. as 1. Fiorino.

SILVER.

3. Grossone. Obv. OTTO.REX. Two T-Ts. Two bezants, one above, one below (a variety is known with three).
Rev. S.VVLT.D.LVCA. Large Holy Face bust.

CASTRUCCIO CASTRACANE, 1316-28. Copper.

1. Castruccino. Obv. OTTO.REX. Bust with crown, orb, and sceptre representing the Emperor Otto.
Rev. IN (a variety has M) PERIALIS around L-V-C-A in angles of a cross.

JOHN OF BOHEMIA. Billon.

1. Reale. Obv. S·VVLT.D' LVCA. Holy face.
Rev. REGALIS.MON around royal crown. Two varieties are known, one has asterisks before, between, and after.
Rev. Legend; the second has three bezants between "regalis" and "mon".

PISAN SUPREMACY, 1342-69. Silver, billon.

SILVER.

1. Grossone or Imperiale. Obv. SANTVS.VVLTVS.DE.LVCA around Holy Face.
Rev. OTTO.IM (a rosette) PATOR. Pisan eagle on capital to left.
2. Imperiale. Obv. As 1.
Rev. OTTO.IMPERATOR.ROMANOR around large crowned eagle perched on a small crown.
3. Imperiale. As 2, but three roses below eagle.
4. — Obv. S.VVLT.D.LVCA. Three quarter bust to l.
Rev. OTTO.IMPERATOR.ROMANOR. Eagle on T-T to l.
5. Grosso (Aquilino). Obv. S.VVLT.D.LVCA etc. as 4.
Rev. OTTO.REX etc. as 4. R.
6. Grosso. Obv. REX.ROMANOR around monogram formed of the word OTTO, surmounted by an eagle.
Rev. S.VVLT.DE.LVCA. Holy Face.
7. Grosso. As 5, except ROMANO.REX.
8. ½ Grosso. Obv. MONETA.D'.LVCA around two T-Ts joined, surmounted by an eagle, flanked by two Os; below, REX. R 4.
Rev. S.VVLT.D.LVCA. Holy Face.

BILLON.

9. Aquilino. Obv. OTTO.REX around Pisan eagle.
Rev. LVCA.IMPERIALIS around L.
10. Sestino. Obv. OTTO REX around two T-Ts joined, surmounted by an eagle.

NOTE. With reference to the various personages etc. mentioned above — Castruccio Castracane was a member of the ancient Lucca family of the Intermelli, which had long been exiled by the Guelphs. The family of Castruccio devoted themselves to commerce in England and had accumulated great wealth, and he himself had learned the art of war there. He was no less able politician than soldier, and at the age of thirty-two he obtained the sovereignty of his native country (shortly after the recall of the Guelphs). He died in 1328.

John, king of Bohemia, was the son of the Emperor Henry VII, and, as he was unable to submit to the barbarism of Bohemia, he wandered about Europe aspiring to the romantic glory of being a complete knight. Many Italian states, including Lucca, gave themselves to John (1330). Tired of these commercial and unlordly little republics, in 1333, he sold each town to whatever noble wished to rule over it, and departed for France, leaving Italy in great confusion.

Pisa took possession of Lucca in 1342. In 1368 the Emperor Louis IV., son of John of Bohemia, drove out the Pisans and kept Lucca for himself. In 1369 Charles, in return for a large sum of money, restored the Lucchese their Liberty.

From that period Lucca was governed by a narrow and jealous aristocracy, who excluded from office all who were not descended from families who had an hereditary share in the government of the state. In 1600 there were 168 and in 1799 88 of these families, from whom the grand council and the senate alone were recruited and the officers of state appointed.

Coins bearing the name of Charles IV., and others with the name of Otto, were issued for centuries after the death of those emperors.

AUTONOMOUS, 1369-1799. Gold, silver, billon and copper.

XIV.C.

GOLD.

1. Fiorino. Obv. S.VVLTVS.DE.LVCA. Holy Face.
Rev. L.PETRV'.APOSTOL. St. Peter standing.
2. Obv. and Rev. as 1, except that on one side of the head of the saint is a flower with four petals and on the other a cross. Fiorino.

SILVER.

3. Grosso. Obv. SVVLTVS D' LVCA around small Holy Face.
Rev. OTTO REX around a small cross.
4. Grosso. Obv. SANCTVS VVLTVS DE LVCA. Small Holy Face in four-arched panel.
Rev. KAROLVS IMPERATOR QVART around a four-arched panel, within which is L-V-C-A.
5. Grossetto. Obv. OTTO.IMPERATOR around L-V-C-A.
Rev. SANTVS PETRVS. St. Peter standing.

BILLON.

6. Sestino. Obv. OTTO.IMPERATO around L.
Rev. SANTVS VVLTVS. Holy Face. The Billon Albulo is as 5 with the exception of INPERATOR.

COPPER.

7. Popolino. Obv. INPERATOR QVARTVS around K surmounted by an imperial crown.
Rev. COMVNI E POPVLI around L-V-C-A.

XV.C.

GOLD.

1. Sequin. Paolo Guinigi, 1400-29, the great gonfalonier and tribune. Obv. S.VVLTVS.DE.LVCA.F.P.G. (Paolo Guinigi). Holy Face (bust) to left.

Rev. SANTVS VVLTVS etc. as 9.

11. Grosso. Obv. As 9, except INPERATOR. Sbarra arms.

Rev. As 9.

COPPER.

12. Picciolo. Obv. OTTO INPERATOR around L.

Rev. SANTVS VVLTVS around Holy Face.

XVI.c. Gold, silver, billon.

The small coat of arms which occurs on Lucchesi coins of the 15th. and 16th. centuries, is that of the Mint Master for the time being. The mint was administered by a group of noble families known as the Collegium Monetariorum, from whom the Mint Master was exclusively chosen. The families enjoying the above privilege gradually died out, until one only, the Mansi, remained, and they, with great public spirit, ceded their rights to the Republic in the 17th. century.

GOLD.

1. Scudo. Obv. SANCTVS VVLTVS DE LVCA around three-quarter holy face. Serpignani (and Ser Jacobi) arms.

Rev. CAROLVS IMPERATOR around arms of Lucca — shield with LIBERTAS diagonally across.

2. Scudo. Obv. S.VVLTVS DE LVCA. Holy Face (with imperial crown). Fatinelli (or Gomi arms). Date.

Rev. as 1.

3. Obv. As 2.

Rev. As 2, except INPERATOR and 1570.

4. Zecchino (Sequin). Obv. S.VVLTVS DE LVCA 1572 around Holy Face (Panichi arms).

Rev. S.M-A-RTINVS. St. Martin on horseback.

LORD ANSON.

A Staffordshire man by birth, George Anson joined the Royal Navy first as a volunteer, and in 1716 was serving in the Baltic under Sir John Norris. He was fond of recalling that while on this cruise he had the honour of seeing Peter the Great. Two years later he played his modest part in Sir George Byng's glorious victory over the Spanish fleet off Cape Passaro, and in 1723 he got his first command, as captain of the Scarborough, destined for the South Carolina station. From that year to 1735 his work was mainly concerned with that quarter of the globe, and to this day "Anson County" in South Carolina survives as a memorial of his long visit.

HIS FIRST COMMAND.

In 1737 Captain Anson was appointed to the Centurion, the sixty-gun ship whose wooden walls were destined to enclose him and his small command during the greatest period of his sea career. Anson had some desultory service on the African station, and when war with Spain broke out in 1739 it fell to him, whose many activities and fine sea-going qualities had not escaped the notice of the authorities, to take the command of a little squadron to operate against the richest and remotest of the Spanish colonies. The ships allotted to him were: — The Centurion, 60 guns (flagship); Gloucester, 50 guns; Severn, 50 guns; Pearl, 40 guns; Wager, 28 guns; Trial, 8 guns. So ill-organized was everything at the time, however, that Commodore Anson (as he now was) did not succeed in getting to sea till the autumn of 1740, for "sufficient men could not be found to man the squadron, and even when the crews and the land forces were completed they were mainly composed of invalid sailors taken from the hospitals, old Chelsea pensioners, and undisciplined recruits who had never fired a gun." Not a particularly hopeful or imposing combination of men with which to carry out a programme of such dimensions as to include an attempt to induce Peru to revolt and attack Panama, to waylay the great treasure-galleon which annually left Mexico for Europe, and to endeavour to co-operate with Admiral Vernon in reducing Puerto Bello.

THE FLAGSHIP ISOLATED.

Enormous difficulties were encountered, and many obstacles surmounted, in the course of this voyage. At a comparatively early stage the Pearl and Severn experienced such a terribly rough handling in endeavouring to weather Cape Horn at the worst time of year that they had to part company and find their way home to England, while the Wager was wrecked on an islet adjacent to the Cape. The Gloucester remaining in company, Anson now proceeded along the shores of South America and took and destroyed the town of Paita. But he heard here that Admiral Vernon had failed in attacking Cartagena, and now — it was the spring of 1742 — the Gloucester became unseaworthy and had to turn back, while the little Trial had to be scuttled and sunk. The Centurion alone was left of the ships with which he had sailed, and Anson was now reduced to 400 men. Going ashore on the small island of Tinian, the Commodore and many of his shipmates made a rapid recovery from the scurvy from which they were suffering. As if, however, disasters were never to cease, a storm blew the Centurion off the land while most of her company were on shore. For three weeks they remained thus marooned, not knowing whether the flagship had foundered, but fearing the worst from her non-appearance. At length one day, when they had given up hope and were actually trying to build a boat to carry them to the nearest port (a thousand miles away), to their unspeakable joy the Centurion reappeared.

Capture of the Treasure Ship.

This indomitable man had actually not relinquished the idea of falling in with the galleon from Acapulco. After getting clear of the island on which they had rested the voyagers shaped a course for China, reaching Macao in November (1742). It was necessary thoroughly to repair and overhaul the old ship before she would be ready for active operations again, and owing to difficulties with the Chinese it was a whole six months before she was out of port. Once at sea again—Anson was now reduced to a complement of 227, including lascars and boys — he called his crew together and told them of his intention to make one more attempt to intercept the great galleon. They cheered him to the echo, and the next few weeks were spent in practising small-arm fire and cutlass drill. At length, when two strange sail appeared above the horizon, Anson exclaimed, " Never mind, my lads, we'll fight them both! " However, it turned out to be but one sail, and she was the far-famed galleon of which they were in search. She fought well, and indeed, with her far superior armament and crew twice as numerous, she ought to have repulsed the Centurion with ease. Eventually she struck her colours, and Anson found himself in possession of an enormous treasure and some 500 prisoners. As the latter might have proved a source of embarrassment and even of danger to his own attenuated numbers, on arrival at Macao he made arrangements for their better disposal. The sword surrendered to Anson by the Spanish commander is now a cherished possession of the Earl of Lichfield.

The " Open Door " in China.

At Macao the wily Mandarins were inclined to be troublesome and even offensive, for it was the first occasion on which a British ship-of-war had entered a Chinese port. Anson bluntly informed the local Viceroy that King George declined to pay any duty for the privilege of anchoring off a Chinese roadstead, and in a sense this firmness shown by the great sailor really marked the beginnings of the policy of an " Open Door " in China.

It was found advisable to burn the prize. The infuriated Spaniards quickly sent after Anson Admiral Pizarro and a powerful squadron; Moreover, as if this were not enough, a hostile French fleet was cruising in the English Channel as the victor approached Spithead; but fortune favoured him to the last and he escaped both dangers, actually passing through the French fleet in a fog in the night. It has been told over and over again how, on arrival at Portsmouth, the King himself went down from London to knight Anson and view the treasure, and how the latter was escorted in triumph to the capital. The date of arrival at Spithead was June 15, 1744. " To show the nation that at length there was a decided triumph over the Spaniards, the whole of this wealth was drawn in procession from Portsmouth to London in thirty waggons escorted by the ship's crew, preceded by their officers with drawn swords, and with bands playing and flags flying, among them those taken from the Spaniards, and conspicuously that of the great galleon itself. " The amount of bullion, precious stones, and other valuables was estimated at £500,000. Anson had put a girdle round the globe in three years and nine months.

Later Work.

His next two years were spent at the Admiralty, but in the autumn of 1746 he assumed command of the Channel Fleet. In the following spring he sailed to intercept two powerful French expeditions, one destined for the East Indies and the other for North America. On May 3, 1747, he gained one of the most complete and brilliant victories in our naval annals, capturing every ship of a fleet of six men-of-war and four armed East Indiamen under Admiral De Jonquière off Cape Finisterre. All of the captured ships were added to our navy, Anson writing of l'Invincible that " she is a prodigious fine ship and vastly large. " The victor was raised to the Peerage, his second in command, Warren, writing to the Duke of Bedford, " I well know his modesty will not suffer him to acquaint you that it was owing, under God, to his own good conduct as an officer. " No such blow had been inflicted on a French fleet since La Hogue, and it was confirmed in this same year by another striking victory by Sir Edward Hawke.

Lord Anson, however, remained proudest of his world-voyage in the Centurion, with its harrying of the South American coasts and capture of the great galleon from Mexico.

He survived until 1762, dying at Moor Park, in Hertfordshire, which he had purchased, and where Dr. Johnson and other celebrities used to visit him.

(*The Times.*)

The medal struck to commemorate Lord Anson's defeat and capture of the French fleet in 1747, and his famous voyage around the world 1740-1744.

We have specimens of this medal in gold, silver and bronze, for sale.

Eds. Numismatic Circular.

*
* *

M. Paul Bordeaux, Honorary President of the French Numismatic Society, has brought to our notice two interesting extracts from Voltaire's correspondence, showing that the famous French writer was presented with a specimen of the 'Lord Anson' medal in gold, and giving his appreciation of it.

Extrait d'une lettre de Voltaire à Mr Thiériot.
Datée A Ferney, 14 juin 1769.

. . . . . .

On a frappé en Angleterre une médaille de l'amiral Anson; c'est un chef-d'œuvre digne du temps d'Auguste. Le revers est une Victoire posée sur un cheval marin tenant une couronne de lauriers. Les noms des principaux officiers qui firent avec lui le tour du monde, sont gravés autour de la Victoire, dans de petits cartouches entourés de lauriers. Cela est patriotique, brillant et neuf: la famille me l'a envoyée en or; elle m'a fait cet honneur en qualité de citoyen du globe, dont l'Amiral Anson avait fait le tour. . . . . .

Autre extrait d'une lettre de Voltaire à Mr le comte d'Argental.
7 juillet 1769.

. . . . . On m'a envoyé d'Angleterre une belle médaille d'or de l'Amiral Anson en signe de reconnaissance du bien que j'ai dit de ce grand homme, avec la vérité dont je suis partisan.

(Lettres publiées dans les œuvres complètes de Voltaire avec des remarques et des notes historiques, scientifiques et littéraires, en 75 volumes. 2e édition. Paris, Baudouin frères éditeurs, 1828.

Volume 70. Correspondance générale, tome IX. Lettres n° 313 et 321, p. 475 et 490.)

SOME RARE AND UNPUBLISHED CHINESE COINS.

By H. A. Ramsden, F.R.N.S.

II. Kung Coins.

That rare and little known series of Pu Money inscribed with the character " KUNG " (公) next calls our attention. Whether this ideograph stands for " public " (since the other fancy interpretations may be safely discarded), or for a place of this same name, it is for the moment impossible to determine with any degree of certainty.

Original from CORNELL UNIVERSITY

Playfair's " Cities and Towns of China " mentions a town of this name, located near to the border of Corea. Unfortunately no date is assigned to its foundation or existence and as no other information is vouchsafed which could be of any use to us in determining the question, I am unable to definitely connect this town with the issue of coins bearing the same name. The geographical position of this locality is outside the boundaries of Ancient China proper and it is even problematical if it was influenced in any way by the early Chinese civilization. The probability of its having issued these coins must therefore remain doubtful.

Although several foreign authors make mention of this series of coins, it is evident that none of them had ever seen an original genuine specimen. Their source of information is consequently necessarily limited to what they have been able to gather from native writings on the subject.

Lacouperie, in the " Catalogue of Chinese Coins " illustrates but one of these pieces and makes mention of another. In a wise and non-commital manner he refrains from any further particulars other than that the character here represented stands for " Kung ".

Gardner, in a paper read before the Manchester Geographical Society, deals with and illustrates a specimen of this issue. He relies on " Chinese scholars ", whoever they may be, for the interpretation of the inscription which is read as " Kung " on the Obverse and " Tze " on the Reverse. The transverse stroke which is shown in the illustration of the Reverse (similar, in all respects, to that in our Fig. 16) — which has turned out to be merely a serial or distinguishing mint mark, — no doubt gave rise to the idea of its being intended to represent a character forming part of the main inscription. The assumption that these two archaic symbols put together mean " Heir Apparent " need not be taken seriously. Gardner observes that this coin is probably only a charm and that it is not likely to be older than the Christian era. The meaning of the inscription as above rendered, together with the fact that the oldest Chinese coin-charms are supposed to date from the period indicated, no doubt influenced him in both these conclusions. They are, nevertheless, as wide of the mark as the transliteration of the inscription by the " Chinese scholars " referred to.

In an article on the " Ancient Coins of China " contributed by " Numisma " to one of the Asiatic Society's publications, an example of a coin of this series is both illustrated and commented upon. The legend is read as " Kung " which is translated as meaning " Public Coin " and the date of issue is claimed to be subsequent to B. C. 772.

As Hillier's " Chinese Coinage " is but a commentary of the " Chronicles of Coins ", dealt with later, it will be sufficient if I mention that only an illustration of one of these coins is reproduced, without any further particulars.

The author of the " Ku Chuan Hui " (古泉匯) mentions that he had only seen two specimens of this money, both of which are illustrated. With some reservation, this well known sino-numismatist agrees with the interpretation of the inscription, commonly read as " Kung ". He is more reasonable than other " Chinese scholars " as regards the significance of the transverse stroke on the Reverse of one of the issues of this series. He correctly ascribes it to a serial or mint mark, suggesting that it may either represent the character " above " (上) or the numerals " one " (一) or " ten " (十).

The " Chronicles of Coins " or " Tsien Tchi Sin Pien " (泉誌新編) includes but one specimen of this class of money, illustrating the issue with the transverse stroke on the Reverse. This sign is here read as representing the character " above ".

That little known, but old work, the " Ku Chin Lu " (古金錄) which deals only with the earliest coin-issues of Ancient China, illustrates one of these pieces, evidently a reproduction of a poor specimen, as the result is not very clear. It is bracketed together with three other small Ku Pu coins, all of perfectly different shapes and issues, the rendering of which inscriptions the author was unable to fathom. As is usual with most of the coins included in this treatise, the one in question is assigned to a very early period, even mentioning the semi-mythical epoch of the Age of the Five Rulers (B. C. 2852-2255).

The historical " Chuan Pu Chi en Chi " (泉布統誌) is still more communicative. It mentions the Shang Dynasty (B. C. 1766-1154) as the probable date of issue. The locality where this money passed current is stated to be Liang Shan (梁山) which corresponds to the modern Feng Hsien (鳳翔) in Shensi province.

None of the other important Chinese numismatic works previously quoted as including the " Tchui " coins, appear to make any mention of the " Kung " series.

On examination of the monetary specimens themselves, I have noticed that they differ in most respects from the preceeding issue of " Tchui ". The only trait in common is, perhaps, their similar shape. In the series under treatment there is not the same monotonous regularity in size, weight, patina and manner of writing the ideographic sign which composes the main inscription, as is the case with the money of " Tchui ". In fact, in the "Kung" series, no two coins can be considered as even approximately alike.

I have knowledge of the existence of some ten specimens outside those of my own collection. Four are still to be found in the country of their origin, while Japan and the United States can each claim three. For the purposes of the present article, I have only drawn upon the evidence supplied entirely by the specimens in my cabinet. As my lot comprises all of the more important varieties known, the information derived will no doubt be sufficient for our requirements.

1. The patina, in all the examples, is as varied as can possibly be in the coins of any one series alone. There is, in particular, a peculiar class of corrosion which calls for special notice. It consists of a dull greyish coloured rust marked with opaque white patches which in some cases have eaten right through the coin while in others still remain on the surface as a sort of scab. These coins are usually lighter than the generality. The oxidation on some of the other specimens is so advanced as to leave the original metal unrecognisable. Such coins appear to have undergone a complete transformation and, being extremely brittle, are rarely found whole. That uniform green patina covering the entire surface, so often seen in various other series of the ancient coins of China, is also to be met with here. Rare is the specimen which still shows the colour of the original metal. In such instances, bright red and green incrusted blotches give the coin a most attractive appearance. Notwithstanding the many and varied kinds of patina met with in these coins, in not a single case have I found it the same as that peculiar and characteristic kind of corrosion invariably met with in the coins of " Tchui ".

2. A glance at the accompanying figures will show that both in size and shape the diversities are quite pronounced. Fig. 1 may perhaps be considered as the standard or predominating type. It is probably superfluous for me to point out the main differences since they all figure plainly in the various reproductions which illustrate these coins. I would, nevertheless, like to draw attention to some specimens of more than ordinary interest. The shape of Fig. 12 is very uncommon and is of peculiar interest, this being the only example of this kind known. Figs. 10 and 11 represent the smallest types, both of great rarity.

3. The important variants of the character forming the main inscription on the Obverse are all illustrated in the accompanying figures. Differences also will be found in the two vertical strokes, which, not only are they of varying lengths, but, at their lower extremities, turn outwards at different angles. In some, these strokes end on the same level as that of the shoulders of the coin (see Figs. 6 and 9) while in others they are prolonged well into the field. (See Figs. 3 and 7). The triangles, also, differ in size in the various issues. Sometimes they are large, as in Fig. 5, or comparatively small as in Fig. 8. The geometrical condition of this figure is found drawn in several forms. In Fig. 3 it is equilateral and in Fig. 4 it is acute angled. In some cases these triangles occupy a position almost touching the apex of the aperture formed by the bifurcation of the feet, as will be seen in Figs. 5, 6 and 7. Again, the two vertical lines which extend the length of the coin,— but which are not part of the inscription, — do not always run in the same direction. These two lines are the extension of the sides of the neck of the piece and it is between them that the main inscription is located. In Fig. 12, for instance, these lines are parallel to each other while in the majority of cases they converge, Figs. 9, 10 and 11 being very pronounced.

Figs. 13, 14 and 15 represent three extremely rare and hitherto

Original from CORNELL UNIVERSITY

inedited examples which call for special notice. The additional strokes above and below the triangles in Figs. 13 and 14, might, by themselves, be considered as forming integral parts of the inscription or as errors in the original moulds. Fortunately the coin illustrated in Fig. 15 helps us out of the difficulty. The numeral " 6 " being here inscribed separate to the main inscription, we may safely conclude that the two strokes on the other two specimens are additional signs representing the first of a numbered series. I may also state that this is probably the only instance known where serial marks have been placed on the Obverse of any of the ancient coins of China.

The markings on the Reverses are of no less interest. Hitherto those with the plain three lines running down the back of the coin, — a common trait in many of the ancient Chinese issues, — and the one with the transverse stroke at the lower extremity of the middle line, have been the only two varieties known and so far published. These three vertical lines, — surviving features of the original spade implements from which these coins are derived, — form the design of the conventional Reverse of most issues. The solitary exception will be seen in Fig. 27, where two lines, running parallel to each other and the sides of the coin, — similarly found on the series of " Tchui ", — take the place of the ordinary three.

Fig. 16 shows the much debated transverse stroke. It is a matter of small moment, now that we know its significance, whether this serial mark represents " one ", " ten " or " above ". In this connection, the marking seen in Fig. 22 may be of interest as throwing some light on this problem. These mint marks or serial signs will be found to occupy different positions in the various spaces between the three conventional lines. The strokes representing " one " may be either vertical, as in Fig. 5, 19, 20 and 21, or horizontal, as in Figs. 17 and 18. Fig. 23 is undoubtedly the second of a series, while the numeral " ten " in Fig. 26 is found in an unusual place. The signs seen in Figs. 24 and 25 may be perhaps meant for " 66 " written sideways and downwards in the two cases, or some other fancy serial mark.

4. As would be expected where the sizes vary so greatly, the weights also embrace a comparatively wide range. Thirty-nine different specimens, all of them perfectly entire coins, give the following results :

1 of 6.8 grammes	2 of 5.4 grammes	1 of 4.5 grammes
2 of 6.6 —	2 of 5.3 —	1 of 4.3 —
1 of 6.3 —	1 of 5.2 —	1 of 3.4 —
4 of 5.8 —	3 of 5.1 —	1 of 3.2 —
3 of 5.7 —	3 of 5.0 —	1 of 2.7 —
2 of 5.6 —	4 of 4.7 —	1 of 2.6 —
3 of 5.5 —	1 of 4.6 —	1 of 2.3 —

The mathematical average obtained from the above figures will be 5.1 grammes, while the mean or middle weight lies between 5.1 and 5.3 grammes. The one with the greatest weight results almost three times the weight of the lowest while the difference between them is 4.5 grammes, a no insignificant figure under the circumstances. The biggest coins are not necessarily the heaviest but the smallest are certainly the lightest. The thickness plays an important part in respect to their weight and corrosion is a no less determining factor.

In conclusion, I may state that until a few years ago only two or three specimens of this class of coins were known to collectors. Some finds, — of which the greater portions consisted of broken or defective coins, — have recently come to light, principally from the north of Honan and bordering Chihli provinces. Many found their way to Peking during the last few years and were mostly gathered by me and have been added to my collection. It is thanks to these comparatively numerous acquisitions that I have been able to better study this still rare series of " Kung " money, about which there is yet a great deal to learn.

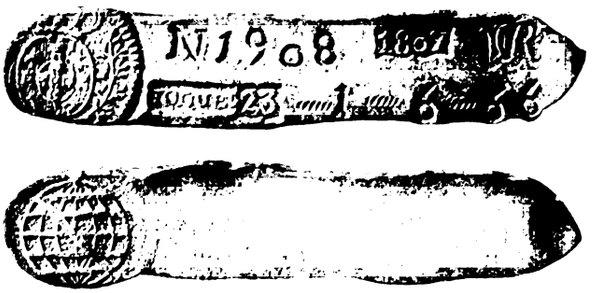
(*To be continued.*)

A BRAZILIAN GOLD BAR OF VILLA RICA.

Paul Ferrand, *L'or à Minas-Geraes*, gives an interesting account of the Gold Refineries in the province of Minas-Geraes, Brazil, which in the first two decades of the nineteenth century issued currency in the shape of gold bars, varying in date, weight, size, etc.

The late Herr Meili, in " Die Münzen der Colonie Brasilien, 1645 bis 1822" illustrated no less than ten of these ingots, of the Refineries of Rio das Mortes, Sabara, Villa Rica, and Serro Frio, and also one of the Refinery in Mato-Grosso.

Nevertheless these Bars have become of great rarity, and on this



account we think it worth recording the present specimen, which has lately come into our possession.

It bears on the obv., stamped, the crowned shield of arms of Portugal surrounded by two laurel-branches, the number of the bar N 1908, date 1807, initials of the Refinery of Villa Rica *VCR*, indication of standard, 23 carats (TOQUE 23), and weight, 1 *oz.* 6 *dwt.* 66 *grs.* The Rx. is plain except for the arms of Brazil on one side.

NUMISMATIC SOCIETIES, MUSEUMS &c.

SOCIETY OF ANTIQUARIES.

May 2. — Dr. C. H. Read, President, in the chair. — Prof. Haverfield, V.-P., read his Annual Report on the last year's work at Corbridge. After giving a short retrospect of the results obtained in the past five years, the striking masonry and buildings, the lion and other remarkable sculptures, the pottery, coins, &c., and after pointing out that the site differed entirely from any other in the North of England, he described the principal results gained in 1911: (1) the inferior houses, yards, furnaces, &c., which filled the western part of Corstopitum, and the objects of interest found among them — a curious carved slab of probably funeral character, the tombstone of the Palmyrene soldier Barates (already known from South Shields), and the large hoard of 159 gold coins; (2) the further examination of the so-called " forum ", probably a store-house, but never completed; and (3) the collection of inscriptions and sculptures, mostly destroyed by fire or weather, which were found in the ballast of the latest stratum of the main road through Corstopitum. In conclusion, he directed attention to some points connected with the gold hoard, and also to the large ingot of iron found in 1909, and recently studied afresh by Sir Hugh Bell and Mr. J. E. Stead. This ingot had been built up of small iron blooms, smelted separately and welded one on to another. Apparently the process had not been completed when the ingot was abandoned, and the purpose of the iron mass is by no means clear.

*
* *

April 18. — Mr. F. W. Bull read some short ' Notes on Further Romano-British Finds near Kettering during the Past Year '. Although the ironstone workings referred to last year had been continued in a northerly direction, the rubbish heaps were fewer, and the finds had been rarer. The pebbled roadway on the site had again been cut through and several wells uncovered, but no definite traces of buildings were found. Further coins had come to light, including two British of the first century — one of Tasciovanus, and the other of Dubnovellanus. Besides some rather unusual enamelled brooches, the only other item to be noted was a quite plain leaden coffin, found in January last. It contained the remains of a skeleton, but no ornaments or other articles.

BRITISH NUMISMATIC

May 22. — Mr. Carlyon-Britton, President, in the chair. — The President referred in feeling terms to the death of the late King of Denmark, a Royal Member of the Society.

Mr. J. B. Caldecott gave an address upon the coins and tokens of the British possessions and Colonies, in which he urged the necessity for a new and standard work treating that branch of numismatics upon comprehensive and modern lines. In support of his argument he instanced from his own collection alone how numerous were the errors and omissions in the old text-books to which students were still forced to refer for their only information.

SOCIÉTÉ FRANÇAISE DE NUMISMATIQUE.

Séance du 2 mars.

La Société procède au renouvellement de son bureau.

Sont élus : président d'honneur, M. Bordeaux; président, M. le commandant Babut; vice-président, M. le colonel Allotte de la Fuye; secrétaire, M. de Villenoisy; trésorier, M. Bouclier; conseillers, MM. le comte de Castellane, Sudre.

M. le comte de Castellane lit une note sur un double-parisis de Philippe VI de la collection du comte de Billy et sur les émissions de ce règne.

M. Bordeaux communique, au nom de M. Cohen, une nouvelle monnaie ottomane en nickel, un plomb d'arpenteur-juré héréditaire de Reims et une médaille en plomb ayant appartenu à des fonctionnaires d'une forêt royale de l'Artois.

M. Dieudonné appelle l'attention sur un douzain de l'atelier de Dijon qui porte comme différent de maître l'ancien emblème des ducs de Bourgogne, le briquet.

Séance du 13 avril.

La Société entend une communication de M. Bordeaux sur un cachet d'administration militaire de l'armée du Rhin et de la Moselle.

M. Bordeaux lit ensuite un mémoire de la Monnaie de Bourges du XVI^e siècle.

Le comte de Castellane complète la communication précédente en donnant un relevé de tous les événements connus de l'histoire de cet atelier.

Le D^r Bailhache présente un douzain fort rare de Montélimar émis par les protestants lorsqu'ils occupèrent cette ville sous Charles IX. Les troupes royales y rentrèrent deux mois plus tard et la frappe cessa.

Le D^r Bailhache signale que dans le *Corpus* des monnaies italiennes publié par le roi d'Italie, il manque deux pièces franco-italiennes qui se trouvent au Cabinet de France.

CATALOGUE

OF

COINS and MEDALS for SALE

Special attention is directed to the fact that every coin or medal catalogued in the following lists is guaranteed to be absolutely genuine (except when expressly stated in the description to be otherwise) and if not approved of can be returned, when the full amount paid will be refunded.

Collectors will also kindly note that every care is taken when compiling the catalogues not to overrate the condition of the pieces but to faithfully represent them according to their merits.

All orders should be sent to Spink & Son Ltd., 17 and 18, Piccadilly, London, W.

(*For further particulars see first page of this Circular.*)

Captain James Cook, the celebrated navigator, first gained fame in Canada, where he did good service at the siege of Quebec 1759, and subsequently made a survey of the coasts of Newfoundland and Labrador. This brought him to the notice of the Royal Society and that body offered him the command of an expedition to the Pacific Ocean to make an observation of the transit of Venus. He set sail from

THE

MODERN COPPER COINS

OF THE

MUHAMMADANS

BY W. H. VALENTINE

SIX COLOURED MAPS

TWO THOUSAND ILLUSTRATIONS

TWO HUNDRED PAGES

The period covered includes the past three centuries

This work, is designed to popularise the study of Muhammadan Copper Coins, and is the outcome of a student's endeavour to identify and arrange them. To this end the author has made faithful drawings of all the specimens of this class of coin that he has been able to find. Commencing with Turkey, the reader is taken numismatically through Egypt, Tripoli, Tunis, Algiers, and Morocco, to Nigeria (for which place the Royal Mint has recently struck a new coinage) and from thence back to East Africa and Arabia. Crossing from there to Europe, the tour continues through the Crimea, Georgia, Persia, Afghanistan, Bukhara, and terminates in Chinese Turkistan.

About a thousand coins struck during the last three centuries are illustrated (including many which have not been figured in any previous work) and the Arabic inscriptions carefully transliterated and explained, as shown on the specimen pages.

To assist in the classification of the coins, a geographical arrangement has been adopted, and six coloured maps have been added to enable the reader to locate the various mints.

The interesting field covered by this work has never before been dealt with, and it will be found that by the issue of this volume — compiled with infinite patience by the author — a real and growing need has been met.

The idea adopted by Mr. Valentine of illustrating each coin is a happy one (and indeed in the case of this Oriental series almost a necessity) because by this means the task of identifying each coin is rendered absolutely easy and pleasant, and it is believed the Work will greatly assist in promoting the study and collecting of Muhammadan Coins generally.

Price : net. 10 6.

Orders for this work should be addressed to the publishers,

MONTHLY

NUMISMATIC CIRCULAR

THE *Monthly Numismatic Circular* will be forwarded post free on receipt of half-a-crown (= 3 francs = 2 ½ marks = 60 U. S. A. cents, in P. O. O. or stamps) for one year's subscription.

Should any applicant not receive it regularly by post, please notify the omission to us, when it shall be at once rectified. All communications respecting the Numismatic Circular (either referring to its literary portion or to its catalogue of coins, &c. for sale) should be made to our West-End house, 17 and 18 Piccadilly, London, W., where all letters and orders will receive immediate attention.

Cheques crossed National Provincial Bank of England, Piccadilly Branch.

Any coins or medals can be had on approval if the applicant is known to us, or, if not, on receipt of references. Postage on coins, as a rule, is paid out.

Orders for coins from the annexed list will be executed in rotation, but preference will be given to clients who are willing to purchase outright, providing the coins answer to the description.

Coins not approved of can be returned.

LA *Circulaire mensuelle de Numismatique* sera adressée franco à toutes les personnes qui voudront bien en faire la demande en nous faisant parvenir 3 francs 20 centimes par mandat postal pour un abonnement annuel.

Nous prions nos correspondants d'adresser toutes lettres et communications relatives à la partie littéraire du journal ou au catalogue des monnaies et médailles, à notre établissement, 17 et 18, Piccadilly, Londres, W.; nous y répondrons immédiatement.

Les ordres seront exécutés à tour de rôle en donnant la préférence aux commandes effectives.

Toutes les pièces seront envoyées *à condition*, si le client le désire, mais le port de retour est à sa charge.

Les personnes qui ne nous seraient pas connues sont priées de nous fournir des références.

DAS *Numismatische Circular* wird portofrei, nach Empfang von 2 ½ Mark (3 Kronen ö. W.) als Jahresbetrag, geschickt.

Sollte jedoch ein Abonnent dasselbe nicht regelmässig erhalten, so bitten wir, uns gefälligst Anzeige davon zu machen, um weitere Unregelmässigkeiten zu verhüten.

Alle Mittheilungen, welche dieses "Numismatische Circular" betreffen (gleichviel ob dieselben sich auf den literarischen Teil oder auf das Verzeichnis der Münzen, &c. zum Verkauf beziehen), sollten an unser West End Etablissement, 17 und 18 Piccadilly, London, W., gerichtet werden, wo Briefe und Aufträge sofortige Erledigung finden.

Jede Münze oder Medaille wird zur Ansicht gesandt. Bestellungen werden nach Reihenfolge des Einganges effectuirt und Nichtconvenirendes zurückgenommen.

Rückporto zu Lasten der Herren Besteller.

Uns unbekannte Herren Sammler werden um Aufgabe genügender Referenzen ersucht.

GREEK COINS.
THE ANCIENT COINS OF SICILY.

(*Continued from col. 13644.*)

AGYRIUM.

The name of this city is interpreted to mean "Mahlberg" by Dr Pape, in his "Wörterbuch der griechischen Namen". That probably signifies that he derived the word from ἀγορά, a market, and so its English equivalent would be Market-town. Ptolemy spelt the name Ἀγυρίων, but the witness of the coins is for the u alone, and he is the only author who adds the o.

This ancient Sicel city is situated on the summit of a steep and lofty hill in the centre of the island, about twenty-six miles from the north shore, and about thirty-six from the eastern shore.

It was about five miles to the south of Galeria, and sixteen miles to the north-east of Henna.

The following account of the history of the city, given by Diodorus, will fully account for the Greek influence in the mint and the Greek style of art on the coinage which is however only known in the Bronze series. One would naturally expect from such a wealthy and populous city that some silver coins should have been preserved. The wealth of the city was due to the fertility of the land around in which much corn was grown. Scarcely any remains of the fine buildings mentioned by Diodorus now exist; the ruined castle on the hill being the work of the Saracens not of the Greeks.

The importance of the place in the eyes of Diodorus may be owing to the fact that he was born there, about the time of Augustus.

Diodorus relates the legend of a visit paid to this city by Heracles (Book IV, c. xxiv). "There happened to Heracles a singular thing in the city of the Agyrineans, the inhabitants honoured him with the feasts and sacrifices offered to the gods of Olympus; up to that time Heracles had not accepted any sacrifice....

"Not far from the city is a stony road in which the cows of Heracles imprinted their tracks as if in wax. This indicated to him that he was already immortal, and he therefore accepted their worship. As a mark of his gratitude to those who had thus honoured him he dug a lake before their city, four stadia in extent, and gave it his name.

"Near the place where his cows imprinted their steps he built a shrine to Geryon, and another to Iolaus, his nephew and companion in arms, and instituted in his honour annual sacrifices which are still continued. All the inhabitants of Agyrium vow their horses from their birth to Iolaus, and feed them until they offer them in sacrifice."

"The temple of Iolaus is so sacred and venerated that children who neglect the usual offerings become dumb and like unto the dead, nevertheless they are healed as soon as they vow to make the sacrifice.

"The gate of the city, before which they sacrifice, was called the Herculean gate. The games and horse races were celebrated every year joyously, and the masters mingled with their slaves, all honouring the god with dancing, feasting and sacrifice."

This account of the veneration given to Iolaus is probably in harmony with the fact that the head of that hero appears on a bronze coin of the fine art period, and the bull with a man's head, swimming, on the Reverse, may have reference to the lake dug by Heracles, however the river-god or lake-god thus symbolized was named Palankaios, his name being given on the legend of the Reverse of the coin.

The word παλαγμός signified a sprinkling.

The first historical notice of Agyrium appears to be the account by Diodorus of the Campanians coming to the city, and leaving their luggage there while they rode on to the aid of Dionysius in Syracuse, in the year 404 B.C. Agyris is mentioned as the ruler of the city. Eleven years later we hear of Agyris as concluding an alliance with Dionysius in 393 B.C., when Mago the Carthaginian advanced on Messana, and was defeated near Abacænum, Agyris helped to cut off the supplies of the Carthaginians and thus led them to sue for peace, the Carthaginians abandoning their Sicilian allies (Book, XIV, c. LXXVIII).

In the next year Mago again invaded Sicily and led his army to the territory of Agyrium, by the river Chrysas, near the road to Morgantina.

"Not being able to draw to his side the Agyrineans and learning that the Syracusan army was advancing he did not move." Dionysius sent a deputation to Agyris who was then next to Dionysius the most powerful tyrant in Sicily, for he was then master of nearly all the forts in the neighbourhood and ruler of Agyrium which contained at that time a very numerous population for it counted not less than 20.000 inhabitants. The very great wealth of the city was stored in the citadel after Agyris had massacred the richest of the citizens.

"Dionysius with some friends entered the city and engaged Agyris to embrace sincerely his alliance promising him a great enlargement of his territory after the war should be ended. Agyris therefore furnished his army with food and necessary munitions, advanced his army, and joining Dionysius, declared war with the Carthaginians." The result was that Mago begged to be allowed to conclude a peace.

During the next fifty-three years we learn nothing of the city until the year 339 B.C. when Timoleon compelled the despot of Agyrium named Apolloniades to abdicate his position (Diod. Book XVI, 82,83).

The inhabitants then were made Syracusan citizens, and 10,000 new colonists were introduced, and the city was adorned with a theatre.

BRONZE COINS.

(420-353 B.C.)

Dr Head places these coins in the time of Agyris but Adolf Holm (Vol. III, p. 654, Geschichte Siciliens) places them later, between 357 and 317, in the time of Timoleon. From the few specimens to be seen at the British Museum the earlier date appears rather more probable.

I. Size ·9.

Obv. An eagle with closed wings to right; behind, a spray of olive: border of dots.

Rev. **AΓ YP IN AI** or **AΓ YP IN AI** a wheel of four spokes, between which, letters of the inscription.

II. Size .7. Obverse **ΑΓΥΡ]INAION** a young male head to right, with short hair, probably Iolaös; plain border.

Rev. **ΓΑΛ ΑΓΚΑΙΟΣ**. The fore-part of a man-headed bull, swimming to right: border of dots. The name probably is the same as φαλαγγαιος as the Latin Palanga = Phalanga. But what has a river-god to do with a pole or staff?

ALUNTIUM.

Dr Pape translates this name by "Seehausen" corresponding to our English Seatown.

Only one Bronze type of this city is assigned to the Period of the finest art in the British Museum Catalogue. The city stood on the north coast of Sicily, between Tyndaris and Calacta, about fifty miles west of Messana. The site has been a matter of dispute, but is is now generally agreed that the modern town of San Marco occupies the site of the old Sicelian city. It is situated on a lofty and steep hill, about three miles from the sea.

However although an inscription beginning with the words Μουνικίπιον τῶν Ἀλουντίνων was found there, Fazello and Cluverius regarded S. Filadelfo as the site of Aluntium, and S. Marco as that of Agathurna. Aluntium is not mentioned by Diodorus, but Ptolemy, and Dion Halicarnassus both refer to it, and it is mentioned

Original from CORNELL UNIVERSITY

by Cicero as one of the places robbed by Verres (Verr III, 43, IV, 23). The only mention of Aluntium in the legendary period is that made by Dion Halicarnassus (lib. I, c. 51). He says Patron remained with some colonists in Sicily with men who had inhabited Aluntium.

BRONZE COINS.

Size .75. Obv. Head of Pallas to left, wearing crested Athenian helmet : border of dots.

Rev. **ΑΛΟΝΤΙΝΟΝ.**

A cuttle fish : plain border.

We find a similar helmeted head of Pallas also on later bronze coins of Agyrium, and of Calacta, and on small silver coins of Camarina, and on bronze of the period of the decline in art of Morgantia. Also on small gold coins of Syracuse.

On bronze coins, of the period of decline in art, bearing the legend **ΤΥΡΡΗ** which were restruck on coins of Syracuse, perhaps by Tyrrhenian mercenaries.

On Siculo-Punic coins the head of Pallas in an Athenian helmet but three-quarter faced is also found.

The influence which brought the type to Aluntium may have been that of Syracuse where the gold coins with a similar type were issued between 430–360 B.C., according to Adolf Holm.

CAMARINA.

in the Fine Art Period.

After the expulsion of Thrasybulus from Syracuse, and the return of the exiles to their respective cities, the people of Gela for the third time established a colony at Camarina, and portioned out its lands among the new settlers.

Diodorus (Book XI, c. 76) says : "The Geloans re-entered Camarina and divided the territory among them — all the cities agreed to recall the exiles, and to restore the cities to their ancient inhabitants... thus were the seditions and troubles appeased throughout Sicily."

These events took place about 461 B.C., and this explains Pindar's reference to the newly founded city in Ode V. 19, τὰν νέοικαν ἕδραν, and his words concerning the rapid growth of the city to wealth and power.

The citizens continued to be jealous of the Syracusans, and were thus led to be the only Dorian city which took the side of the Leontines in their war with Syracuse in 427 B.C.

There seems however to have always been a party in favour of making peace with Syracuse; and thus it was possible to conclude a truce at Gela, which afterwards led to a general peace. We learn from Thucydides (Book III, c. 86) that the Leontines sent for aid to Athens because they were Ionians, and that a fleet was sent to help them. "The Syracusans having with the exception of Camarina all the Dorian cities in alliance with them."

The divided state of Camarina is thus referred to by Thucydides (Book IV, c. 26).

"The Athenians, on receiving tidings that Camarina was going to be betrayed to Syracuse by Archias and his party, sailed thither."

The account of the conclusion of the war is given in chapter 58 of Book IV, where we read of the conference at Gela, and the speech of Hermocrates, the Syracusan, in which he warned them of the danger to Sicily of inviting the interference of Athens.

When the great Athenian expedition arrived in Sicily the men of Camarina waited until it was certain that the invaders would be defeated, and then sent a small force to aid the Syracusans (Thucydides VI, 75, 88 and Diodorus XIII, 4, 12). In 405 B.C. the lands round Camarina were ravaged by the Carthaginian Himalco, but the city itself was not attacked.

But when Dionysius failed to rescue Gela, and the Geloans fled from their homes, the men of Camarina followed their example, retreated to Syracuse, and afterwards found new lodgings in Leontini.

The story is told by Diodorus in Book XIII, c. 108, 111, 113. By the treaty, made by Dionysius with the Carthaginians, the people were allowed to return to Camarina, but were forbidden to restore the fortifications. During the life time of Dionysius Camarina was under his influence.

THE TYPES.

Pallas Athene was according to Pindar "the guardian goddess of the city", and it is therefore natural that the citizens should have depicted her as the driver of the Victorious quadriga on the Reverse of their Tetradrachms. Pallas appeared on the earliest coins of the city, and also on the later bronze coinage. The general design of a quadriga as a coin type was popular in many Sicilian cities, and it may be that this popularity was sufficient reason for its choice, but some have suggested that it may have especial reference to the victory gained by Psaumis of Camarina, celebrated by Pindar in his fourth Olympian Ode.

The fifth Ode is especially interesting to those who are studying this series of coins.

In the exergue of some of these tetradrachms we see two amphoræ which are probably the prizes filled with oil, rather than wine, seeing Pallas is the charioteer.

The types of the didrachms are especially beautiful in design; some of them are signed by the artists Euaenetus and Exakestidas. *Num. Chron.* (1890, p. 307).

Sir A. J. Evans regards these coins signed by Exakestidas as having been issued late in this series but before 405 B.C. His signature occurs in the shortened form **ΕΞΑΚΕ**, and in full on a tetradrachm in very minute letters along the exergual line.

One signature of this artist is placed on a diptych before the face of Heracles on the obverse **ΕΞΑ· / ΚΕ**.

A bearded head of Heracles occurs on the coins of at least twelve of the Sicilian cities, viz. Agyrium, Aluntium, Centuripae, Cephaloedium, Gela, Thermæ, Iaetia, Menaenum, Petra, Selinus, Syracuse, Tauromenium and was copied by some of the Siculo-Punic mints.

The heads of Heracles and the lion's skin differ or vary much in style on the coins of Camarina. On the coins of fourteen cities we find the head of Heracles without a beard wearing the lion's skin, and on a few other cities his whole figure is represented. The myth of Heracles' visit to Sicily is recounted by Diodorus in Book IV .XXIII and XXIV.

The most beautiful design is perhaps that found on the didrachm, where we see the head of the river-god Hipparis on the Obverse, and the nymph riding the swan on the Reverse. This is the work of the greatest of the die-engravers, Euaenetus. Notes on the work of this great artist will be given in the chapter on the coins of Syracuse.

In regard to the figure of Nike which appears on the smaller silver coins of Camarina confer the notes on the history of the growth of the cult of Nike in "Coins of Magna Graecia", pp. 215-218. The fact that the figure bears the caduceus on the coins of Camarina suggests that the earlier idea of Iris may have been in the mind of the artist. However the caduceus is also seen in the hands of Nike on several coins of Terina, and Nike as well as Iris was a messenger of the Gods.

The friendship of the citizens of Camarina with the Athenians may account for the types of the Bronze coins on which Pallas and the Gorgon's head appear.

On these bronze coins we find the earliest instance of the use of the Gorgon's head as a monetary type.

This symbol was connected with Athene as early as the Iliad where we read in Book five (741): "And Athene, daughter of ægis-bearing Zeus, cast down at her father's threshold her woven vesture many-coloured that herself had wrought and her hands had fashioned and put on her the tunic of Zeus, the cloud gatherer, and arrayed her in her armour for dolourous battle. About her shoulders cast she the tasselled aegis terrible, whereon is Panic as a crown all round about and Strife is therein and Valour, and horrible onslaught withal, and therein is the dreadful monster's Gorgon head, dreadful and grim, portent of aegis-bearing Zeus".

It is however noticeable that the Gorgon's head was depicted on the shield of Agamemnon described in Book Eleven (36), "and thereon was embossed the Gorgon, fell of aspect glaring terribly, and about her were Dread and Terror". In Homer the Gorgon is one, the personification of terror even unto death.

But in the days of the mint-masters who placed the Gorgon's head on the coins of Camarina there were legends of three Gorgons,

*

Original from CORNELL UNIVERSITY

derived from Hesiod and Pindar, viz. Stheino, Euryale and Medusa. The head on their coins represents that of Medusa. The Gorgon's head was copied probably from the coins of Camarina by the artists of the Siculo-Punic mint of Motya about the same period (confer no 11 of the Brit. Mus. Catalogue).

As a symbol, the Gorgon's head surrounded with snakes occurs (on the Reverse of an obol of Segesta no 43 Brit. Mus. Catalogue).

The drachms of Syracuse of the period of the decline of art also bear the head of the Gorgon in the centre of the Triskelis (no 353 Brit. Mus. Catalogue).

Much later, in the time of Augustus, the Gorgon's head is combined with the triskelis on coins of Panormus.

TETRADRACHMS OF CAMARINA.

Normal weight : 268 grains.

Obv. **KAMAPINAIOΣ** (*sic*) for **—NAION.** Head of bearded Heracles, to left, wearing lion's skin.

Rev. A quadriga to left, driven by Pallas wearing helmet and long chiton, and holding the reins in both hands, horses galloping in step, above Nike, flying to right, crowning Pallas: border of dots.

On some specimens the Obverse legend is retrograde.

II. Obv. Head of young Heracles to left, whiskered, wearing lion's skin, with paws tied at the throat; in front, upper part of string bow.

Rev. Similar quadriga driven by Nike, but to right. In the exergue **KAM A PINA** and two amphoræ one on each side of the letter **A**: plain border.

III. Obv. **KAMAPINAION.** Similar type but without whiskers.

Rev. No inscription; similar type, and symbols: on line of exergue **ΕΞΑΚΕ⊱ΤΙΔΑ⊱.**

IV. Obv. **KAMAPINAIΩN.** Similar type but with whisker: in front of neck an olive spray with leaf and fruit.

Rev. Quadriga to right, driven by Pallas, wearing crested helmet and long chiton with diplois; she holds goad and reins; the horses are rearing and the chariot appears to be turning; above, Nike flying to left crowns Pallas: in the exergue a barley-corn : plain border.

V. Similar to no 1, but in exergue of Reverse a crane? or swan, flying to left.

Cat. Dr J. Hirsch, no XIII, 1905, no 284, Tafel III.

Cat. Martinetti et Nervegna, 1907, no 666, Plate VII.

DIDRACHMS.

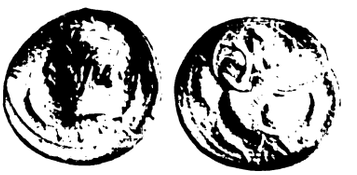
Normal weight : 134 grains.

VI. Obv. Bust of the river-god Hipparis, three-quarter face, looking towards left, having a small horn on either side of his forehead, his hair loose; on the neck the letters **EVAI**: on either side of the head a fish with head downwards: all in a circle of conventional waves.

Rev. **KAM·A···NA.** The nymph Camarina, seated on the back of a swan swimming to left with wings spread open: the nymph is looking to left, her right arm is round the swan's neck and she holds the upper part of her peplos as a sail; beneath the swan conventional waves beneath which is a fish to right; in the field to right is a fish leaping: border of dots.

Confer L. Forrer's "*Notes sur les signatures de graveurs sur les monnaies grecques*", pp. 94-95.

VII. Obv. **ꟻ IϘA ϘIA**. Head of the river-god Hipparis in profile to left, with small horns, hair loose, as if wet, on either side in field a fish with heads upwards : plain border.



Rev. **ANIϘA[MAꓘ]**. The nymph draped seated on swan as on last; but no waves beneath, but around, three fishes upwards: border of dots.

VIII. Obv. **KAMAPINAION.** Head of the river-god Hipparis in profile to left with small horns, hair short and diademed; beneath, **VA**: border of dots.

Rev. **KAMAPINA** between two lines. The nymph as on the former coins; on the swan, beneath are waves amid which is a fish to left.

DRACHM.

Normal weight: 67.28.

IX. Obv. Head of the nymph Camarina, three-quarter face, looking towards the left, her hair loose and radiating, wearing earring and necklace, on either side; rising from behind her neck, a fish: border of dots.

Rev. **KAM API.** A female figure winged flying to left, clad in long chiton with diploïs, holding fillet in her right hand and a caduceus in the left: border of dots. The legend is beneath the figure.

LITRA.

Normal weight: 13.48 grains.

X. Obv. Head of Pallas, to left, wearing crested Athenian helmet.

Rev. Nike flying to left, wearing long chiton with diploïs, and carrying fillet and caduceus.

XI. Obv. **ANIϘAMAꓘ.** Head of the nymph Camarina, to left, wearing sphendone, broad in front and behind, and ornamented with a star, earring and necklace: border of dots.

Rev. A swan flying to left, over conventional waves, the head of swan bent down; under the waves a fish to left.

OBOL.

Normal weight: 11.11 grains.

XII. Obv. **KAMA.** Head of the nymph Camarina, to left, wearing sphendone, broad in front and behind, earring and necklace: border of dots.

Rev. Nike flying to left, wearing long chiton with diploïs, and carrying fillet and caduceus.

BRONZE COINS.

of the Period of Finest Art.

TRIAS.

I. Size ·75. Obv. Gorgon's head, diademed.
Rev. **KAMA.** An owl to right, holding up with left claw a lizard; in exergue • • •; on some specimens in field to right a barley corn: on others in field to right Γ.
II. Size ·6. Obv. Head of Pallas to left, wearing crested Athenian helmet, on the side of which is a wing.
Rev. **AMAK** similar type of owl.

UNCIA.

III. Size ·45. Obv. Gorgon's head.
Rev. Similar type of owl with lizard in claw; in field to right **A**: in exergue •
IV. Size ·5. Head of Pallas to left wearing crested Athenian helmet.
Rev. Similar type to last with mark of value.

(*To be continued.*)

BIOGRAPHICAL NOTICES OF MEDALLISTS

Coin, Gem, and Seal Engravers, Ancient and Modern, with References to their Works.

B.C.500 — A.D.1900.

(*Including the names of several hitherto unpublished artists.*)

One-hundred-and-sixty-sixth article.

(*Continued from col. 13718.*)

THOMAN (*Swiss*). Mint-master at Lucerne, 1421-1424; and at Fribourg, *circ.* 1435-39. In 1435 he coined Deniers and Mailles, and in 1439 Mailles. *Vide* Bulletin de la Société suisse de numismatique et Revue XII, 454.

THOMAN (*Austr.*). Moneyer at Vienna, 1402.

THOMANN, JACOB (*Germ.*). Provisional Mint-master at Hanau, 1613.

THOMAS (*French*). Mint-engraver at Cornavin (Geneva), 1466.

THOMAS, ADRIEN (*Flem.*). In conjunction with Gilles or Gilbert van der Biesen, Privy Mint-masters to Duke Antony of Burgundy, at Vilvorde, 18. April to 24 December 1409; Louvain 12th July 1410 to 21st March 1413; at Ghent circ. 1419. Adrien Thomas was a native of Malines.

THOMAS, A (*Germ.*). Medallist of the early part of the nineteenth century, who flourished at Dresden. He has executed medals on the Return of King Frederick Augustus I. to Saxony, 1815; — 15th Anniversary of his Reign; — Memorial medal, 1827; — Birth of Prince Frederick Augustus Albert, etc.

THOMAS, ALEXIS FRANÇOIS (*French*). Sculptor, born at Paris in 1795, died on 16th November 1875, pupil of Deseine and Dupaty, Besides numerous works of statuary and sculpture he has also produced Portrait-medallions, some of which were exhibited at the Paris Salon, 1837, 1849, 1853, etc.

THOMAS, BARTHÉLEMY (*Flem.*). Mint-master at Bruges, 16th June 1395 to 1400.

THOMAS, BENJAMIN (*French*). Mint-master at Lausanne under Bishop Gérard de Vuippens, 1302-1310. His name appears in documents of the episcopal mint as late as 1330.

BIBLIOGRAPHY. — Morel-Fatio, *Histoire monétaire de Lausanne.*

THOMAS, CECIL W. (*Brit.*). Contemporary Medallist, Seal and Gem-engraver, born in 1885, and residing in London. He early entered his father's workshop, and having a strong inclination for an artistic career, studied under many well-known artists, including Roscoe Mullins, Onslow Whiting and Richard Garbe for sculpture, and E. R. Hughes R. W. S. for drawing, honours being awarded him at the Central School of Arts and Crafts, London.

Gem sculpture has been his special study, with the result that he has successfully engraved many cameo and intaglio portraits. Later he turned his attention to the production of medals, showing a distinct style and an appreciation of the finest examples of the medallist's art.

Sir Henry Irving.

Plaquette of the Surrey Rose Club.

Plaquette of the London Zoological Society.

He is the author of a paper on the 'history of gem-engraving', and from 1909 he has been exhibiting at the Royal Academy, not only gems, but also medals and plaquettes, which show a conscientious technique and quick sense of intuition.

Percy.

Among his productions I would mention: Plaquette of the Surrey Rose Club, 1909 (*illustrated*);— Percy, 1909 (*illustrated*);—Sir Henry Irving, 1905 (*illustrated*); — Plaquette of the Zoological Society of London (*illustrated*); — Seal for the London County Council, etc.

At the Royal Academy, 1911, Thomas exhibited four Portrait-cameos, and again in 1912.

THOMAS, CHARLES (I) (*French*). Mint-engraver at Tours, appointed in 1655, and installed on 18th January 1658; he remained in office until 1656.

THOMAS, CHARLES (II) (*French*). Mint-engraver at Tours, *circ.* 1720.

THOMAS, JEAN (I) (*French*). Mint-engraver at Toulouse, 1420-1431.

THOMAS, JEAN (II) (*French*). Engravers of jetons, at Lyons, *circ.* 1542-1549.

THOMAS, JEAN (*Flem.*). Mint-master at Marbais, in conjunction with Aldry d'Interminelli, from 28th February 1384 to 10th September 1385; at Ghent, 1386.

THOMAS, J. (*French*). Contemporary Medallist, residing in Paris. At the Salon 1909, he exhibited a Portrait-medallion in bronze.

THOMAS, J. ROCHELLE (*Brit.*). Dealer in China, Curios and Antiques, residing in London; edited a number of medals, comprizing Portraits of Lord Tennyson, Gladstone, Sir Henry Irving, and other celebrities. He also issued in 1887 the 'Bonomi' Crown, engraved by Pinches, from models by an Italian sculptor of the name of Bonomi.

The obverse bears a youthful undraped bust of Her Majesty, in profile to left, wearing a head-dress, and the hair in a coil at the back. The legend, in incuse letters, VICTORIA REG., DEI GRA., and the date 1837, which is divided by the bust, surrounded upon the rim by a circle of stars of five points.

The reverse shows a draped full-length standing figure of Britannia as Minerva, in profile to the right, wearing a helmet, holding in her right hand a statuette of Victory, and supporting with her left a trident and shield, upon which is the motto DECUS ET TUTAMEN. The legend in four perpendicular lines, in incuse letters, BRITT MINERVA VICTRIX FID DEF, surrounded upon the rim by a circle of stars of five points.

The bust of the Queen on the obverse, and the figure of Britannia on the reverse, although in about the same relief as an ordinary current crown, presents the great peculiarity that the designs on obverse and reverse have been made sunk below the surface or field of the coin, so that two coins might be placed together and, being perfectly flat, the work upon them would be impossible to rub or wear.

A limited number of proofs were issued, as follows:

150 specimens, in fine silver, brilliant proofs with plain edges, all numbered on the edge.
10 specimens proofs in tin, all numbered.
10 — — bronze, —
10 — — copper, —
10 — — aluminium, —
6 specimens, brilliant proofs in 22 carat gold, each weighing five sovereigns, all numbered.

Queen Victoria and the Prince of Wales (later Edward VII.) accepted copies of this Crown.

Mr. Thomas also issued specimens of the Halfpenny Tokens of the Copper Company of Upper Canada, from dies which came into his possession.

THOMAS-GALLOIS, MADELEINE (*French*). Contemporary Sculptor, born at Saulieu (Côte-d'Or); pupil of Mme Geneviève Granger; now residing at Bourges. At the Salon she exhibited a number of medallic works: 1906. Mme J. Thomas; — Mme Bergeret; — 1907. M. R***; — Mme Marcelle Dominique; — M. Gallois; — 1908. Le député Périer; — M. Gallois; — Mme Dominique; — Mme Thomas, etc.

THOMAS, PHILIPPE (*French*). Goldsmith and Engraver of Lyons. He succeeded to Didier Besançon as Mint-engraver at Lyons, and remained in office from 1552 to 1564. Rondot gives several interesting data in connection with his activity at the Mint.

BIBLIOGRAPHY. — Rondot, *Graveurs lyonnais*, 1897. — Ibid., *Orfèvres de Lyon.*

THOMASSET, FRANÇOIS (*French*). Contemporary Sculptor, born at Louhans (Saône-et-Loire); pupil of Gauthier, and Millet. At the Salon 1886 he exhibited a Portrait-medallion, which is only one amongst many others that the artist has executed.

THOMASON, SIR EDWARD (*Brit.*) 1769-1849. Manufacturer and Inventor, son of a buckle-manufacturer of Birmingham, was born there in 1769. At the age of sixteen he was apprenticed to Mathew Boulton, of Soho. In 1793, his father having retired from business, Edward commenced a manufactory of gilt and plated buttons, which was gradually extended to medals, tokens, works in bronze, and silver and gold plate. In 1796 he submitted to the Admiralty the model of a fire ship propelled by steam and steered automatically, with which he proposed to assail the French shipping in their own harbours. It met with considerable approbation, but was not adopted. On 25 Oct. 1796 and on 22. Dec. 1798 he took out patents (nos 2142 and 2282) for a carriage-step folding up automatically on the door of the vehicle being closed. At various times he patented improvements in gun-locks and cork-screws, and in the manufacture of hearth-brushes, umbrellas, whips, medals, tokens and coins. He also produced many works of great artistic merit, among others a full-sized copy of the Warwick vase in metallic bronze. In 1830 he completed a series of sixty large medals on Bible subjects from pictures by the old masters. He presented these medals to all the sovereigns in Europe and in return received many marks of honour and magnificent gifts. He held on behalf of eight foreign governments the office of Vice-consul for Birmingham, and was honoured with eight foreign orders of knighthood, including the Red Eagle of Prussia. In 1832 he was knighted by William IV. In 1844 he retired from business, and settled at Ludlow, whence he removed to Bath and afterwards to Warwick. He died at Warwick on 29th May 1849, and was buried in the family vault in St. Philip's, Birmingham. By his wife, Phillis Brown, daughter of Samuel Glover, of Abercarne, he had one son, Henry Botfield, who died on 12th July 1843.

Sir Edward published an autobiography entitled 'Memoirs during Half a Century' (London, 1845, 8vo), consisting chiefly of an elaborate account of the various honours he had received. His portrait is prefixed, engraved by C. Freeman (*Dict. Nat. Biog.*, LVI, p. 200).

(*Vide* Thomason's Memoirs. — Colvile, *Warwickshire Worthies*, p. 743. — *Gent. Mag.*, 1849, I, 430.)

In 1793, Edward Thomason, who had been apprenticed to Boulton, commenced business for himself at the corner of Colmore Row and Church Street on the site opposite the present Grand Hotel. After Boulton's death, in 1809, Thomason produced the

Original from CORNELL UNIVERSITY

finest medals in Birmingham. He employed the best die-sinkers he could get hold of, and we shall find some of the best known men working for him. His principal piece is probably the splendid medal in memory of his master and friend, Mathew Boulton. This was a labour of love, and nothing was spared to make it unique. The portrait was from a wax model by Rouw, and the die "was engraved by my best die-engraver at that period (1809) — viz., William Wyon, the uncle to the die-engraver Wyon, of His Majesty's Mint. Great pains were taken to obtain a good likeness, and which was happily accomplished to my satisfaction." It was the deepest-cut die then extant, and upwards of four inches in diameter, supposed to be the largest medal in Europe and of the highest relief. On the reverse round the legend : " Born at Birmingham, September 3rd, 1728. Died August 17th, 1809. Aged 81 "; and in the centre : " The liberal and enlightened patron of Arts and Manufactures. "

At this date Thomason had been engaged in producing coins and medals for about two years. He was careful to employ good workmen, and some of Boulton's old die-sinkers are found working for him at a later date. His medals and tokens form a fine record of the history of the day. He struck two million penny tokens for the Government in 1812 for the payment of Wellington's army in the Peninsula. The obverse of these bore the head of the Duke, and on the reverses were depicted his various achievements in the war — the Passage of the Douro, the lines of Torres Vedras, the capture of Badajos, and the battles of Vimiera, Talavera, Albuera and Salamanca. After the battle of Salamanca Thomason brought out a fine medal of the Duke of Wellington, $2\frac{1}{5}$ inches in diameter, and as the Duke became successively Baron, Earl, Marquis, &c., " so did I bring out a fine new medal of him at each of these periods. " After the battle of Vittoria, June 21st, 1813, Thomason brought out his Marquis medal of Wellington with a new reverse in commemoration, and so on at every step in his career.

In 1807 there was the greatest difficulty with commercial men to obtain change in silver, but particularly in copper, to pay the work-people their wages. During the year Thomason put in machinery for the manufacturing of tokens or coins. In 1808 he received an order from the African Company in London to make the silver coinage for Africa.

Thomason's Token, with his bust.

In 1807 Thomason caused the issue of a large number of electioneering medals for York and Liverpool; further, Medals of Henri Christophe, the black general, who made himself Emperor of Haïti; Medals for the King's party, in South America, to favour the Bourbons, 1809; Memorial medal of Mathew Boulton, from a model by Rouw, engraved by W. Wyon, who at the time was in the employ of Thomason. 1811. Two million copper Tokens for Samuel Fereday; 1812. The English army, then in Spain, were distressed for the want of small change; Thomason was entrusted with the issue of a coinage of Tokens bearing on the obv. the head of Wellington, and on Rv. the names of his principal Peninsular successes. Upwards of two millions of the pieces were struck and passed current with the army (cf. W. J. Davis, *Nineteenth Century Token Coinage*, p. 178 sqq. on these Tokens, where a different version of their origin is given from the verbal testimony of J. K. Picard who caused them to be issued).

In this same year of 1812 an English guinea was worth 27 s., according to the Mint-price of gold; so, naturally, every possessor of a few pieces hoarded them, in consequence of which they became so extremely scarce that there was something approaching a panic— for the Master of the Mint, the Hon. Wellesley Pole, could not obtain permission from the Government to issue a new coinage. At this juncture Berkley Monck, M. P. for Reading, Berkshire, a banker, applied to Thomason for gold and silver tokens. Only £ 1,600 worth of gold pieces were struck, because the then Prime Minister, Percival, requested the manufacturer to cease issuing the pieces until an arrangement had been settled with the banker. These tokens were eagerly bought up at £ 5 each, to be retained as a memento of the *only gold* token ever struck outside the Mint, and of the price of gold at the period. The obverse has a likeness of Alfred the Great, crowned and sceptred, with the name beneath, and this legend, " Pignora certa petis do pignora certa, 1812 "; on the reverse " 40 shillings, Berks Token. Standard gold, 6 dwts. 18 grs. Reading " with the legend. " Payable in bank notes at 6s. he dwt. by J. B. Monck, Esq. "

Portrait-medallion of Mathew Boulton.

The silver tokens were half-crowns, eighteenpence, and shillings, which, despite the present price of silver, are worth considerably more than face value to-day. The gold token, of course, rarely comes into the market, when the price is, naturally enough, prohibitive. In 1810-11 Thomason made tokens for Newcastle-on-Tyne and Gainsborough, a description of which will be of use to the amateur. The shilling of the former place has on the obverse a view of a coal staith (a stage from which coal is loaded into boats laying to) in a circle, and " Bewicke Main Colliery + 1811 +. " On the reverse are the words in small capitals, " One shilling payable at Newcastle-on-Tyne and London +. " There is also a copper penny, which is very scarce. The obverse, again, has the coal staith, and on the reverse " One Penny Payable at Newcastle-on-Tyne ", in a circle. The Gainsborough tokens may be described thus : —

I. — Obverse : Star, garter, and motto " Honi soit ", etc. Legend : John Gamson, Gainsbro'. Reverse : A female figure seated on a bale, holding scales and a horn of plenty. There is a sword on the ground, and the initial " Y " and " D " under the figure. 1 s. token, 1811. Gamson was a woollen draper who was declared bankrupt on May 11, 1822.

II. — Obverse : A ship sailing under canvas. Gainsbro' token, 1811. Reverse : A *near* view of a bridge, with S. Sandars above it, in a circle. Legend : For Twelve Pence—branches of olive under. There is a variant with a *distant* view of the bridge. Sandars was a corn merchant and maltster.

III. — Sixpence. Obverse : Silver token issued by Brumby, Gainsborough, for VI. pence. Reverse : A wheatsheaf, date 1812. Beneath legend : " To accommodate the public with small change. "

The execution of this piece is exceedingly beautiful, and, so far as is known, it is the *only* token on which initials form a

Original from CORNELL UNIVERSITY

diphthong of the surname. Martin Brumby was a maker of sailcloth, declared bankrupt September 22, 1821. Specimens of this sixpence are scarce and valuable. Thomason himself issued tokens, too, which are far from common, and should be secured whenever possible : —

I. Obverse : Bust to left (Sir Ed. Thomason) within a wreath of oak. No legend. Reverse : Token for one penny, 1811, in five lines. The edge is milled, and the piece altogether is of fine workmanship. A good specimen is worth 2 s. 6 d. ; a faultless one 5 s.

II. Farthing token. Obverse : A building, " Thomason's Manufactory, Birmingham." Reverse : Royal Arms and supporters. Above this the motto " Honi soit " etc., and below " Dieu et mon droit ". Specimens of this little piece are rarely met with.

Thomason's principal die-engraver was Halliday, an "outworker" who had premises of his own in Newhall Street, which is near Church Street, where Thomason's works were. As Thomason made tokens for Brecon and Wales, also in the year 1810, it is probable that all specimens dated 1811, and known to be Halliday's work, came from Thomason's place. But Halliday worked for H. Morgan, of London, also — who advertised himself as a licensed maker of tokens — and these pieces were engraved and struck at Newhall Street. It is thought that Morgan was a mere London agent of Thomason and Halliday. In any case, tokens issuing from either of these makers are esteemed. By an Act of 1817 all tokens were declared illegal on and after January 1, 1818 — with the exception of those issued by the overseers of the poor of the parish of Birmingham, and the overseers of the poor of the parish of Sheffield. The former were allowed until March 25, 1820, to recall their tokens, and the latter until March 25, 1823, Thomason, therefore, devoted himself more to the production of high-class medals.

Thomason issued a large number of medals : 1806. Memorial medal of Charles James Fox; — 1812. Wellington (2 ½ in diam.); — 1814. Princess Charlotte of Wales; — Samuel Fereday; — Alexander I. of Russia (by Webb); — The four Allies, the Prince Regent, the Emperors of Russia and Austria, and the King of Prussia, WE SHALL NEVER SEE THEIR LIKE AGAIN; — 1815. Penny Tokens for Admiral Sir Isaac Coffin, Bart, Magdalen Island; — Blücher; — Hetman Platoff; — 1816. Prince Leopold of Saxe-Coburg; — Admiral Sir Sidney Smith; — Grand Duke Nicholas Paulovitch of Russia; — 1817. Matthew Wood; — 1819. Copy of the French medal on the Conquest of England 1804, with FRAPPE A LONDRES EN 1804; — 1820. A series of 48 medals representing the Elgin marbles; — Mudie's National Medals (Thomason allowed his artists to collaborate in this series); — 1821. The Wellington shield; — Giovanni Battista Belzoni, Opening of the Pyramid of Kephren 1818 (by Wells); — Coronation medal of George IV.; — 1822. Golden Wedding of Robert Gilmor, of Baltimore; — Order of the White Eagle of Poland (commissioned by Olive, Princess of Cumberland); — 1823. Royal Humane Society Medal; — 1824. Central American coinage (plated currency); — 1825. Canova; — Walter Scott; — 1826. Commemorative medal of the Foundation of the London University; — Series of National Medals (41 subjects); — 1827. H. R. H. the Duke of York; — H. R. H. the Duke of Saxe-Weimar, completion of the Erie Canal, 1825; — The shield of Scipio; — 1828. Sir Robert Peel; — A series of 16 medals on Science, struck on one side only, making 32 pieces : 1. Mechanics; 2. Optics; 3. Electricity; 4. Hydrostatics; 5. Metallurgy; 6. Chemistry; 7. Astronomy; 8. Mineralogy; 9. Chrystallography; 10. Geology; 11. The Mountains; 12. Phrenology; 13. Steam Engines — Marquis of Worcester & Capt. Savory; — 14. Newcomen & Boughton's; 15. Watt's single, for raising water; 16. Watt's double, for driving machinery; — 1829. Sir Walter Scott; — Emancipation of the Catholics, Ireland pacified; — 1830. A series of medals on Bible subjects, after celebrated paintings (in five volumes) : 1. Adam gave names to the beasts of the field and the fowls of the air (Paul Veronese); 2. Eve presenting the forbidden fruit in the garden of Eden (Domenichino); 3. The Expulsion of Adam and Eve from Paradise (Guido); 4. Cain slaying his brother Abel (Domenichino); 5. Enoch carried up into heaven (Paul Veronese); 6. Noah's ark floating upon the waters (Bandinelli); 7. Noah buildeth an altar and offereth a sacrifice (N. Poussin); 8. The Building of the tower of Babel (Bandinelli); 9. Lot parting from Abraham to dwell in the plains of Jordan (Titian); 10. Lot and his two daughters on their journey from Sodom to Zoar (Rubens); 11. Abraham offering his son Isaac for a sacrifice (Carracci); 12. Rebecca drawing water for Abraham's camels (Poussin); 13. Abraham buried in the cave of Macphelah by his sons (Rembrandt); 14. Isaac blessing Jacob instead of Esau (Titian); 15. Reconciliation between Jacob and his brother Esau (Titian); 16. Joseph's brethren selling him to the Ishmaelite merchants (Guido); 17. The interpretation of King Pharaoh's two dreams by Joseph (Guido); 18. Joseph maketh himself known to his brethren (Murillo); 19. Jacob on his deathbed calling together his sons, and blessing them (Rembrandt); 20. Moses discovered and preserved by the daughter of King Pharaoh (Poussin); 21. The rod of Moses miraculously changed into a serpent (Salvator Rosa); 22. The first-born slain throughout the land of Egypt (Michael Angelo); 23. Pharaoh and his host drowned in the Red Sea (Michael Angelo); 24. Moses smiting the rock for water at Horeb (Murillo); 25. Moses descending from the Mount, and finding the Israelites worshipping the molten calf, (Raphael); 26. The Ark of the Covenant, the Altar af Incense the Brazen Laver (Bandinelli); 27. Moses's brazen Serpent (Rembrandt); 28. Balaam smiting the ass who speaketh before the Angel (Carracci); 29. The Sacrifice of the red Heifer (Vandyck); 30. Joshua dividing the waters of the river Jordan (Rembrandt); 31. Joshua commanding the Sun to stand still (Rembrandt); 32. The Chart of the Travels of the children of Israel from Egypt and across the river Jordan; 33. Jael driving the nail through Sisera's temples (Carracci); 34. Fulfilment of Jephtha's rash vow (Carracci); 35. Samson killing the lion on his journey to Timnath (Le Brun); 36. Samson carrying away the Gates of Gaza (Le Brun); 37. David cutting off the head of Goliath, the Philistine (Michael Angelo); 38, Saul and the witch of Endor (Salvator Rosa); 39. Absalom slain by Joab in the wood Ephraim (Carracci); 40. Solomon's Temple (Bandinelli); 41. Solomon's Judgment (Carlo Dolci); 42. Jeroboam ordering the man of God to be seized (Correggio); 43. Elijah fed by the ravens (Paul Veronese); 44. Elijah carried up into heaven in the presence of Elisha (Raphael); 45. The Shunamite's son restored to life on the prayer of Elisha (Murillo); 46. Jonah cast upon the shore by the whale (Leonardo da Vinci); 47. The Overthrow of the army of Sennacherib, king of Assyria (Michael Angelo); 48. Shadrach, Meshach and Abed-Nego in the fiery furnace (Carlo Maratti); 49. Job in affliction rebuking his wife (Leonardo da Vinci); 50. The Psalmist playing upon the harp (Vandyck); 51. Daniel in the den of lions (Raphael); 52 (or link medal). Caesar murdered in the Senate house at Rome (Correggio); 53. The Nativity or Adoration of the wise men (Rubens); 54. Joseph and Mary's flight into Egypt (Rubens); 55. Christ baptized by John in the river Jordan (Poussin); 56. Christ raising Lazarus from the dead (Murillo); 57. Christ instituting his Last Supper (Leonardo da Vinci); 58, Christ's agony in the garden (Carlo Dolci); 59. Christ crucified (Rubens); 60. Christ's Ascension into heaven (Correggio); — 1834. Medal of the Birmingham Free Grammar School; — 1835. A series of metallic Tracts (100 Halfpenny size medallets, fifty with texts from the Old testament, and fifty with texts from the New Testament).

Amongst other productions by Thomason I may further note : Introduction of Water, London; — Medal on Phrenology (in Boston Collection), etc.

Thomason issued a series of medals of Kings and Queens of England, after Dassier. Many of the medallic productions of Thomason are signed : **THOMASON & JONES.**

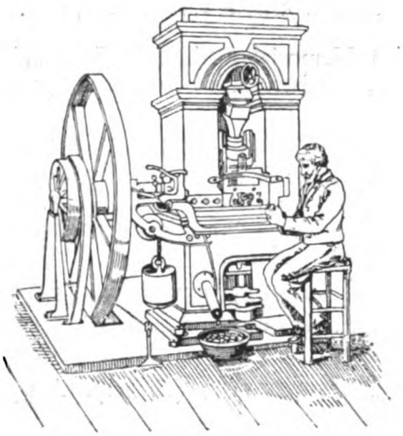
Madonna; — Bust of an Angel; — A Lion passant. All these are finely cut in cornelian.

THOMIRE, PIERRE PHILIPPE (*French*). Bronze founder, 1751-1843; principally modelled figures in the dry classic style of the Empire. He is also the author of some Portrait-medallions.

THOMSEN EDINR., E. W. (*Brit.*). This signature occurs on the Rℒ of a Prize Medal of the Edinburgh Photographic Society, instituted in 1861.

THONNELIER (*French*). Engineer; introduced at the Paris Mint in 1834 the Uhlhorn Steam Coining-Press, with improvements of his own, which was adopted in 1846. At the present time the Paris Mint has 10 large Thonnelier Coining-Presses in use, capable of turning out 55 pieces per minute, 12 medium presses of the same system capable of striking 62 pieces per minute; 6 small presses of the same system coining 77 pieces per minute, and 5 other presses of various systems. All these presses are capable of striking, in ten hours' work, at least 100.000 pieces all sizes (Babelon, *La Monnaie*, Grande Encyclopédie).



Thonnelier's Coining Press.

Trial pieces by N. Tiolier of Louis Philippe 1833, 1839, 1840 and 1845 were issued at the Paris Mint commemorating Thonneliers' introduction of his steam coining press (cf. *infra* **TIOLIER**).

THONI (*French*). Moneyer at Fribourg (Thony der Münzer). He was from 1471 to 1498 a member of the Council of the Two Hundred.

THOR (THAER, DOR). Mint-master at Ulm and Würzburg, 1506.

THORNTHWAITE, J. C. (*Brit.*). Die-sinker at Sydney (New South Wales), who engraved dies for Australian Tokens, the first of which were struck in Sydney in 1852, and were known as the "Tea Stores". J. C. Thornthwaite, and his assistant, Parkin, had arrived from London about three years earlier. Accustomed to the finer work of seal-engraving, Thornthwaite found himself in a peculiar situation when first called upon to prepare dies for tokens; and, having no screw-press, was compelled (pending the arrival of one from England), to complete the work with a hammer or other falling weight. This combination of unfavourable circumstances doubtless accounts for the lack of finish which the pieces exhibit. These tokens dated 1852 and 1853 were made to the order of Samuel Peek, who lost his life in the wreck of the Dunbar, 1857.

Thornthwaite also prepared the Jamberoo Penny (1854), the (Three-Penny) Silver tokens 1854, made to the order of Campbell, of Morpeth; and other silver and copper Penny and Halfpenny Tokens, some of which are signed **J. C. T.** or **J. C. THORNTHWAITE.**

THORNYCROFT, WILLIAM HAMO (1850-) British Sculptor. "A pupil of his father, Thomas Thornycroft, and of the Royal Academy schools, he was still a student when he was called upon to assist his father in carrying out the important fountain in Park Lane, London. He accordingly returned in 1871 to England from Italy, where he was studying, and modelled the figures of Shakespeare, Fame and Clio, which were rendered in marble and bronze. In the following year he exhibited at the Royal Academy "Professor Sharpley" in marble for the memorial in University College; and "Mrs Mordaunt" a relief, — a form of art to which, he was since devoted much attention. The "Fame", already mentioned, was shown in 1873. Believing that the pendulum had overshot its swing from conventional classicality towards pictorial realism, he turned from the fleshy" school towards the Greek, while realizing the artistic necessity for modern feeling. In 1875 his "Warrior bearing a wounded Youth from the field of Battle" gained the gold medal at the Royal Academy schools, and when exhibited in 1876 it divided public attention with the "Tennyson" of Woolner and "Wellington Monument" sculptures of Alfred Stevens now in St. Paul's Cathedral. Then followed the dramatic "Lot's Wife", in marble (1878), and Artemis (1880), which for grace, elegance and purity of taste the sculptor never surpassed. He was thereupon elected an associate of the Royal Academy, and more than justified the selection by his "Teucer" of the following year, a bronze figure of extraordinary distinction which, bought for the Chantrey collection, is now in the National (Tate) Gallery of British Art. It is simple and severe, classic yet instinct with life and noble in form; and in it he touched the high-water mark of his career. Turning to the ideal, in works entirely modern in motive and treatment, Hamo Thornycroft produced "The Mower" (1884) and "A Sower" (1886); the "Stanley Memorial" in the old church at Holyhead partakes of the same character. Among the sculptor's principal statues are "The Bishop of Carlisle" (1895) (Carlisle Cathedral), "General Charles Gordon" (Trafalgar Square, London), "Oliver Cromwell" (Westminster), "Dean Colet" (a bronze group — early Italianate in feeling—outside St. Paul's School, Hammersmith), "King Alfred" (a colossal memorial for Winchester), the "Gladstone Monument" (in the Strand, London), and "Dr Mandell Creighton, Bishop of London" (bronze, erected in St. Paul's Cathedral). Thornycroft's other memorials, such as the "Queen Victoria Memorial" (Karachi), the "War Memorial" (at Durban), and the "Armstrong Memorial" (at Newcastle), are well-known, and his portrait statuary and medallions are numerous. He was elected a full academician in 1888, and an honorary member of the Royal Academy of Munich. He was awarded a medal of honour at the Paris Exhibition, 1900".

Thornycroft was in 1892 one of the competing sculptors who submitted designs or patterns for the coinage of Queen Victoria 1893, the adopted models for which were prepared by T. Brock (cf. Lewis F. Day, *The Coins of the Realm*, Magazine of Art, 1893). He has also occasionally modelled Portrait-medals and Plaquettes, one of Agatha Thornycroft was exhibited by him at the Royal Academy, 1904. A portrait-medal of Dr F. J. Mouat, University of Calcutta, is described by Dr H. R. Storer in *Amer. Journal of Num.*, n° 793.

THORWALDSEN, ALBERTUS or **BERTEL** (*Dane.*). Sculptor, was born at sea on the 19th November 1770. His father, an Icelander, was on his way to Copenhagen, where he settled as a carver of figure-heads for ships; and the son was brought up to the same profession. But from his eleventh year the boy attended art classes, and in 1793 he gained the first gold medal for design at the Academy of Copenhagen, and along with it the privilege of three years' residence abroad for the purpose of study. Accordingly, in 1796, he sailed for Rome, whose collections kindled in him the undying ambition to revive the glories of sculpture as practised by the ancient Greeks. From Canova he had early and generous recognition; and shortly, by the model for a "Jason", he secured reputation. No purchaser, could, however, be found for it till, in 1803, just as in hopeless disgust the artist was about to return to Copenhagen, he received from "Anastasius" Hope a commission for its production in marble. From this time forward prosperity and fame flowed upon him in full tide. In 1819 he returned to Denmark, where his reception was triumphal. He remained at home but a year, and then returning to Rome continued to prosecute his art assiduously up to 1838, when he again departed, to pass his remaining years in his own land. Its climate, however, proved no longer suitable to him, and the year 1841 found him once more at Rome. In 1844, having revisited Copenhagen to complete some of his works there, he died suddenly in the theatre, of disease of the heart, on the 24th of March. All the works remaining in his possession he bequeathed to his country to be preserved in a museum bearing his name, for the maintenance of which he also left the bulk of his fortune, reserving a sufficient provision for his natural daughter, and this collection is now one of the chief glories of Copenhagen. Thorwaldsen's strength lay in classical and mythological subjects; he imitated with wonderful success the antique conceptions, or even may be fairly said to have reproduced classic art. His efforts in Christian subjects, even the famous "Christ and the Twelve Apostles" at Copenhagen, are obviously a less spontaneous outcome of his genius. Of his many works those best known by photography and otherwise are the reliefs "Night" and "Morning". Of his many portrait busts or statues those of Byron, now at Cambridge, and Oehlenschläger are perhaps the most notable. See the Life of Thorwaldsen (whose name is in Danish spelt Thorvaldsen) by Thiele (3 vols. Leip. 1852-58; Eng. abridgment by Barnard, 1865); Hammerich, Thorwaldsen und seine Kunst (Gotha, 1876); Eugène Plon, Thorwaldsen, sa Vie et ses Œuvres (Eng. trans. by Mrs Cashel Hoey, 1874); and Sigurd Müller (Copenhagen, 1890, et sq.). (Chamber's Encyclopædia, Vol. X, p. 187).

Portrait-medal of Thorwaldsen, by Voigt.

Thorwaldsen's name (**THORWALDSEN INV.**) occurs on a number of medals, engraved by various artists, as C. Christensen, F. Krohn, etc., either as the designer or the author of the group of statuary or sculpture reproduced on the rev. of the medals thus signed. Among these I have noted: Memorial medal of Frederick VII. of Denmark, 1839; by F. Krohn; — Silver Wedding medal of Christian VIII. and Caroline Amalie, 1840; by C. Christensen (*illustrated*); — N. Copernicus; — Fr. von Schiller; — Giorgio Zoega, by C. Silvestrini, etc.

Silver Wedding of Christian VIII, 1840.

There are also Memorial medals of Thorwaldsen, by Harald Conradsen, 1844, Christen Christensen, Voigt (*illustrated*), and others.

THOS (*French*). Contemporary Medallist, born at Marseilles; pupil of Yencesse. At the Salon 1912 he has exhibited: Portrait of Count Zamoïski (belonging to Princess M. A. Lubomirska); — Saint-Louis, bronze casting; — Portrait of Mlle Roussel; — Le Soir; — Ecce Homo; — Mater Dolorosa.

THOUET, FRÉDÉRIC (*French*). Editor of medals, referring to the Siege of Paris, 1871: Prices of food during the Siege; — Ambulance Medals; — Ambulance des Citoyens Mourocq et Dr Regnier.

THOUZET, or **TOUZET, PIERRE** (*French*). Assayer at the Paris Mint, 1624.

THROGMORTON, SIR NICHOLAS (*Brit.*). 1515-1571. Diplomatist; joined household of Catherine Parr, his relative, 1543; was ambassador in Paris under Elizabeth, and afterwards to Scotland; fell into disgrace as involved in an intrigue for the marriage of Mary, Queen of Scots, with the Duke of Norfolk; imprisoned on suspicion of sympathy with the rebellion of the northern Catholics, 1569; died in 1571.

Sir Nicholas Throgmorton was Master of the Mint at the Tower in London under Edward VI. He was responsible for the coins bearing for mint-mark a ton, being a rebus on the last syllable of his name. These consist of AV Sovereign, Half-Sovereign, Crown, and

Silver Crown of Edward VI., 1553.

Half-Crown of the 4th Issue (1552), and AR of the 3rd Issue: Crowns 1551, 1552, and 1553 (*illustrated*); Half-Crowns 1551 and 1552, with cantering horse, and 1553 horse walking; Shillings, Sixpences, Threepences, Pennies, Halfpennies, and Farthings.

There is a jeton, engraved by Paquier Feuret, of Sir Nicholas Throgmorton, 1560, bearing his arms on either side (*Med. Ill.*, 101.25).

of King Haakon VII. and Queen Maud 1906, and for the Norwegian coinage : Æ 20 and 10 Kroner; Æ 2 and 1 Kroner, 50, 25 and 20 Öre; Æ 5, 2 and 1 Öre; which was first issued in 1907.

The portraits of the sovereigns were prepared by the Sculptor Bisdal, and the models for the coins by the Sculptor Alsaaker.

Another type of the Coronation medal bears on the Reverse the

Coronation medal of King Haakon VII. and Queen Maud, 1906.

crowned and draped shield of arms. This official medal was presented by King Haakon VII. to all the High Officials who took part in the Coronation ceremony. These medals were all issued in various sizes.

At the Brussels ' International Exhibition of Modern Medals ', 1910, Throndsen exhibited the following medallic productions : Coronation Medals of King Haakon VII.; — King Haakon VII., gilt medal; — Christian Michelsen and Carl Berner; — Portrait-medallions, cast in bronze, of King Haakon VII., Queen Maud, and Crown Prince Olav; — Portrait of a Lady, large medallion cast in bronze; — Oscar II., King of Sweden and Norway; — Cato Maximilian Guldberg, 1902; bronze medal; — 75th Anniversary of

the London firm of R. White and Sons, 1901; — Björnstjerne-Björnson; Æ Plaquette; — King Haakon VII., silver medal; — Christian Michelsen, Æ Medallion; — Oscar II. of Sweden; small Æ medal; — Walkyrie; Æ Plaquette; — Hendrik Ibsen; — Official medal of the Norwegian Fisheries Exhibition at Bergen, 1898; — Ludwig Holberg, etc.

At the International Medallic Exhibition of the American Numismatic Society in New-York, March 1910, Throndsen also exhibited some medals : Oscar II., two sizes; — Eleventh Norvegian Agricultural Show at Throndhjem, 1902; — Cato Maximilian Guldberg; — Christian Michelsen; — The White medal; — Chr. Michelsen and Carl Berner; — Haakon VII.: — For Videnskabeligt Arbeide; — Walkyrie; — Portrait-medal of Haakon VII., Queen Maud, and Prince Olaf; — Selskabet for Christiania Bys Vel; — Haakon VII. Rex Norvegiae; — Det 12te Almindelige Norske Landbrugsmode; — 3die Nordiske Havebrugs Udstilling; — Kristiania 1907; — Til enig Vagt om Norge; — Idraet Giver Sundhed; — Björnstjerne Björnson; — Rop " Leve Norge "; — King Haakon VII., and Queen Maud.

(*To be continued.*)

ON SOME HISTORICAL MEDALS.

By A. M. Broadley.

Author of " Dr. Johnson and Mrs. Thrale ".

A medal has been described as " a circular piece of metal issued to record or commemorate an event or a person, and embellished with devices and inscriptions representative, symbolical or connected

The Naval Medal of 1653 for the Battle of Portland, in the collection of Messrs. Spink.

with its particular purpose ". This rather vague definition can scarcely be regarded as satisfactory, the shape of a medal not necessarily being circular; for many well-known examples are oval, while a few are octagonal. The most familiar form of medal is that struck by the State as a reward for military or naval service, and worn as a distinctive decoration by the recipient. Our present concern, however, is principally not with medals designed and issued to serve as badges, but with those intended only for commemorative purposes. It is to historical medals that Joseph Addison alludes in his " Dialogue " when he speaks of " Critics in rust".. Possibly the fondness of Englishmen for medals is not as great as that of the foreigner, for a modern writer declares that " while we

distribute tracts the French distribute medals ". From the end of the fourteenth century downwards some of the world's greatest artists have turned their attention to the designing of medals. Amongst the great mediaeval medallists may be mentioned the names of men like Vittore Pisano, Matteo de Pasti, Benvenuto Cellini and Albert Dürer. In the sixteenth and seventeenth century their traditions were perpetuated in France by Primavera, Pilon and Dupré. The English commemorative medal begins with the reign of Elizabeth, although we have portrait medallions of Henry VIII, Edward VI and Queen Mary. The fine English medals of the Commonwealth and the reign of Charles II, were the handiwork of those great engravers, Thomas and Abraham Simon Rawlins was also employed by Charles II after the Restoration. From the time of William and Mary onwards nearly all the

designers of British medals were foreigners. The collecting of war medals is a cult of itself, but for some unaccountable reason the public interest in historical medals has languished, although its votaries were once as numerous and enthusiastic as those of philately are to-day, when the expenditure of the £2,500 necessary to purchase specimens of the penny red and twopenny blue Post Office Mauritius, intrinsically worth the fraction of a farthing, would suffice to secure a fine cabinet of gold and silver medals illustrating English history from the reign of James I down to the coronation of George V, including possibly half a dozen unique examples!

There are few more useful aids to history than the monumental work, in two volumes, compiled by the late Edward Hawkins, and entitled " Medallic Illustrations of the History of Great Britain and Ireland to the death of George II. " This book was edited by

The great Gold Medal of 1661, commemorating the restoration of Charles II.

A. W. Franks and H. A. Grueber, and printed by order of the Trustees of the British Museum. It is, for obvious reasons, indispensable to every collector of commemorative medals. In my book, " The Royal Miracle, " which Mr. Stanley Paul has lately published, I have given some account of the curious medals and badges worn by the adherents of Charles II between 1649 and the Restoration, many of which after the fateful year 1651 bore the symbol of the royal oak. On January 1st of that year the young King (not yet twenty-one) was crowned at Scone. The gold medal struck on that occasion, which is not illustrated here, is one of the rarest of the English coronation series. Mr. Hawkins thus describes it : " Bust of Charles II, *r*, crowned, hair long, in plain falling collar, ermine robes and collar of the Garter. Legend :

A Restoration Medal of 1660.

" Carolus 2. D.G. Sco.Ang. Fra & Hib. .Rex.Fi.De.*Cor. i.*ia. Scon 1651. " *Rev.* Lion rampant, *l*, holding a thistle in his paw. Legend : " Nemo.me.impune.lacessit. " In the British Museum there is a leaden medal, believed to be unique, which commemorates the escape of Charles II from Worcester (September 3rd, 1651), and his six weeks' wanderings between that date and his escape from Shoreham to Fécamp on October 15th of that year. On the

John Roettier's Gold Medal in honour of Giles Strangways, of Melbury, Dorset, executed after the Restoration, by order of Charles II. Only two examples in this Metal are known to exist.

obverse is a view of the walls and fortifications of Worcester with defenders ; outside, Charles on horseback attended by the four Penderels and Yates, and before him a company of soldiers, above, " Woster. " Legend : God—bles—my—Lord—Wilmot—Lady—Lane—Col—Carter—Capt—Tedersal—" Reverse, sword and olive branch crossed between C. R. Legend : " In—utrumque—paratus. " It is unnecessary to say that the names thus displayed on it are the names of the principal actors in the enterprise, and

Original from CORNELL UNIVERSITY

whose sterling loyalty mainly contributed to the escape of the King.

It was only two years later, while Charles was still in exile, that the first historic medal now illustrated was issued by the Commonwealth. It is commemorative in its character, but was given by the Government as a reward to Admiral Blake and the other principal naval officers engaged in the battle of Portland and the war against the Dutch. It was struck in two sizes. The specimen illustrated is of the smaller size, and was granted to captains. On the obverse is an anchor from which is suspended three shields charged with the crosses of St. George and St. Andrew, and the Irish harp. Reverse, ships in action. The larger medal granted to senior officers was surrounded by a wide border representing the bow, stem, mast, flags, drums, and arms taken from the enemy; both are in gold, and the work of the celebrated engraver, Thomas Simon. Blake's own medal was purchased by His Majesty, King William IV.

The fine example from which the reproduction has been made is now in possession of Messrs. Spink and is priced at £ 300. The medal is shewn conspicuously, together with a vignette view of Portland, below the fine mezzotint portrait of Admiral Blake, by Thomas Preston, after a painting belonging to Mr. J. Ames, now in my possession. Below it are the words: — "*Vindex Commercii.* — Robert Blake, General and Admiral of the Forces of England, etc., Denatus 29 Aug., 1659, ætat 59," and the lines:

Thy name
Was heard in thunder through th' affrighted shores
Of pale Iberia, of submissive Gaul
And Tagus trembling to his utmost source
O ever faithful, vigilant and brave,
Thou bold asserter of Britannia's Fame
Unconquerable Blake.

The Battle off Portland was fought on February 18-20th, 1653. The English admirals engaged were Blake, Deane, Lawson, Howett, Monck, Peacock, Martin, Penn, Lane and Bourne. It ended near the Isle of Wight on February 20th, when Blake, reinforced by the arrival of the remainder of the fleet, "re-engaged with great desperation, and after a most valiant fight drove the enemy before him and captured or destroyed eleven ships of war and sixty merchantmen. Fifteen hundred men were killed and seven hundred taken prisoners." Mr. H. Parker, in his "Naval Prints," mentions four small engravings of this engagement, but I have succeeded in discovering a large contemporary Dutch line-engraving measuring fifteen and a quarter inches by twenty-one and a half inches. It is surmounted by portraits of Blake, Penn and Van Tromp, encircled with laurels. In order to avoid possibility of error the rocks in the back-ground are lettered Portland.

One of the complete series of six Duke of Monmouth Medals, in the collection of A. M. Broadley.

A very rare anti-Jacobite Medal of 1688, ridiculing the birth of the Old Pretender, the legitimacy of whom it calls into question.

Nearly every county has its historic medals, Dorset being particularly rich in this respect. The large Strangways' gold medal does great credit to the ability of John Roettier, its designer. Copies in gold are in possession of Giles Strangways' descendant, the Earl of Ilchester, and the present writer. The legends on it are sufficiently legible. An account of Giles Strangways, and the part he took in helping the fugitive King during his concealment at Trent (Sept.-Oct., 1651) will be found in the "Royal Miracle."

George Bower's Silver Medal, struck in 1681 to celebrate the Rejection by the Grand Jury of a Bill for the Indictment against Anthony Ashley, Earl of Shaftesbury, for High Treason. The subject of Dryden's Poem, "The Medal."

This medal, executed after the Restoration, was one of an intended series ordered by Charles II in honour of distinguished sufferers in the royal cause. The design on the reverse of the medal—"the White Tower of London surmounted by the Royal Standard, with the sun bursting from behind a cloud," was personally suggested by the Sovereign. Giles Strangways was born at Melbury in 1615, commanded a regiment of horse in the King's service in the West, was persecuted by the Parliament, heavily fined, and imprisoned in the Tower with his father. Mr. Hawkins omits all mention of his generous behaviour in 1651 and subsequent prosperity. George Bower's medal in honour of the Earl of Shaftesbury (1681) also relates to a Dorset worthy, whose lineal descendant and successor still flourishes in the county and holds high office in the State. The design of reverse bears a strange resemblance to that of the Strang-

A Jacobite Medal of the Young Pretender, 1745.

ways' medal. In Figure 213 we have a view of London from Southwark; the Tower in the distance, and above, the sun bursting from behind a cloud. Dryden made this medal, struck at the instigation of the popular party, who celebrated Shaftesbury's acquittal November 24th, 1681, with great rejoicings and many bonfires, the subject of his well-known satirical poem, *The Medal*. In describing it he says:

> "One side is fill'd with title and with face;
> And, lest the King should want a regal place,
> On the reverse a Tower the town surveys,
> O'er which our mounting sun his beam displays
> The word, pronounced aloud by shrieval voice,
> *Lectamur*, which, in Polish, is rejoice."

And

> "Five days he sat for every cast and look,
> Four more than God to finish Adam took."

In the six medals connected with the fate of the Duke of Monmouth we find some curious side-lights on the state of English

Portrait Medal of Cardinal Henry of York, the last of the Stuarts.

politics in 1685. The tragedy of Sedgemoor began by the landing of Monmouth at Lyme-of-the-King in Dorset in June of that year. It was within the confines of the same county that his arrest was effected after his defeat in Somerset on July 6th. Out of these six medals (examples of the whole of which are in the collection of the writer) five ridicule somewhat timidly and obscurely his attempt to gain the crown. The first medal described by Hawkins is the work of Jan Smeltzing. In this we have a bust of the Duke, with long and abundant hair, wearing a breastplate decorated with the fulmen. On the reverse is a Roman soldier attempting to tear open a lion's jaw and a Latin inscription which may be translated "It has

Portrait Medal of Princess Louise, the sister of the Old Pretender.

succeeded little, I have acted diligently." It looks as if the medallist was, up to the last moment, sitting on the political fence. The second medal (by Bowers) is more decisive in its tone. Monmouth in trying to seize the three crowns has fallen into the sea. On the

A Medal of 1746, issued by the Hanoverians.

reverse (in Latin) are the words "The Gods derided, July 6th, 1685." In the third medal, the work of an anonymous artist, Monmouth is portrayed as falling from a column surmounted by the three crowns, surrounded by military trophies. Above the pillar is the word "Providentia"; below, "Improvidentia." There is no date. Hawkins says that "when Monmouth landed in Dorsetshire he proclaimed himself King under the title of James II, and exercised the royal privilege of touching for the King's evil." It may be noted that the example of this medal in the Royal Collection at Stockholm is stamped with the date 1685, and the base of the column is inscribed M. JUL, the month in which Monmouth was defeated and executed. The fourth Monmouth medal in my collection is seen in Figure above. The bust and hair are arranged very much as in the other specimens. The legend runs: "JACOBUS · DUX · MONVMETHENSIS." Below are the words, "G · BOWERS · F." On the reverse we see two infant genii amid clouds supporting a coronet over the cypher, J.E.D.M. (James Edward, Duke of Monmouth). There are cherubs above and below. The legend is CAPVT · INTER · NVBILA ("His head is amongst the clouds"). This is capable of various interpretations, but as Bowers worked for the Court, and has put his name to the production, it was probably in derision that he places the head of Monmouth in the clouds. There can be no mistake about the fifth medal, executed by Jan Smeltzing. In this the Duke's hair is short, and there is no drapery. The head is surrounded by the words JACOBUS INFELIX DUX MONUMETHENSIS. On the reverse is the decollated head on the ground spouting out blood and the words, HUNC SANGUINEM LIBO DEO LIBERATORI ("His blood I pour out to God, the Deliverer"). Also CÆSA CERVIX LON JULY $\frac{15}{25}$ 1685 ("Neck cut, London, July $\frac{15}{25}$, 1685"). This is the least rare of the six medals.

On the last of the series is a bust of James II resting on four sceptres, and so on. Neptune in his car, and ships in the distance. On the reverse is a pedestal inscribed, AMBITIO MALESUADA RUIT ("Ill-advised ambition fails"); on it Justice, trampling on a serpent, weighs three crowns against the sword, the torch and the serpent of Discord. At her feet lie the bodies of Monmouth and Argyle; their heads are on blocks inscribed, JACOBUS DE MONT-

MOUT & ARCHIBALD D'ARGYL. Above, the Sun ; on one side, lightning darting against the forces discomfited at Sedgemoor; on the other are seen two heads fixed over the gate of the Tower. Monmouth was executed on July 30th, 1685. It is curious to note that the royal shield on the obverse has Scotland in the first and fourth quarters as on the Scottish coins. The anti-Jacobite medal, the medal of Princess Louise, daughter of the Old Pretender, the Jacobite medal of 1745, the Hanoverian medal of 1741 and the medal of Cardinal of York, Henry IX of England, according to his tomb at St. Peter's, bring the story of the Stuarts down to its close, illustrating the strong interest inherent in the study of these striking and instructive memorials of an eventful past—Addison's " Critics in Rust. "

LES BILLETS DE BANQUE HISTORIQUES.

Parmi les curiosités historiques que recherchent les collectionneurs et qui sont extrêmement rares, il faut citer le billet de banque noir autrichien et le billet de banque rouge hongrois, qui eurent le sort des assignats. Le premier disparut en 1812; le second, qui avait assez régné, sous Kossuth. Le billet autrichien qui détermina à Vienne la crise financière, par suite de l'excessive abondance de l'émission cause d'un véritable déluge, aboutissant au désastre, se rattache aux événements des guerres napoléoniennes de 1809 à 1812. Ce papier-monnaie jeté sur le marché par le comte Wallis, un des fléaux de la finance, tomba si bas qu'il accula presque à la misère les personnalités les plus illustres. Beethoven connut les douloureux effets de cette catastrophe. Ses revenus annuels, qui s'élevaient à 4000 florins, se fondirent à peu près complètement dans ces circonstances. Le billet de banque noir était réduit au cinquième de sa valeur nominale et ne trouvait plus preneur. L'illustre compositeur écrivait à l'organisateur des concerts à Londres, l'impresario Salomon, pour invoquer son secours et lui envoyait la plus grande partie de ses œuvres, sonates, cantates, symphonies, partitions, en lui proposant de les vendre à tout prix et d'accepter au besoin pour chacun de ces chefs-d'œuvre jusqu'à la somme dérisoire de trente ducats. Il y eut un marchand de musique, Coutts et Cie., qui profita de l'occasion, et Beethoven était dans une telle détresse qu'il insistait pour obtenir le paiement comptant. Goethe souffrit aussi de cet avilissement du papier-monnaie pendant son séjour à Carlsbad. Ce symbole fiduciaire était si décrié qu'on ne l'acceptait plus que pour un dixième et même un douzième du chiffre qu'il portait. Il y est fait allusion dans la seconde partie de Faust. Goethe avait, du reste, connu la crise des assignats et il en est aussi question dans un passage de Grimm. « J'ai, dit-il, une paire de manchettes qu'aucun souverain d'Europe n'a payée aussi cher que moi. » Goethe sourit et les évalue au plus à 200 louis d'or. « Elles ont été payées 250,000 francs en assignats dont j'étais heureux d'être débarrassé à ce compte, et dont on ne donnerait certainement pas un misérable groschen (petite pièce valant deux ou trois sous). » (Max Reinitz, Oesterreichische Rundschau, 1er juin).

(*Revue des Revues.*)

THE PRIVATE TOKEN OF B. NIGHTINGALE OF LONDON.

Obv. The Dea Moneta seated, holding a cornucopia reversed, from which medals are issuing; a coin cabinet stands beside her. In the exergue the Nightingale arms between two laurel-branches : On a raised border is the following line from Horace, from the Epis ad Mæcenatem, " Vilnis est argentum auro, virtutibus aurum ".

Rev. The Initials B. N., underneath, the date 1843. On a raised border " Benjamin Nightingale, London : Private Token ".

In February 1843, the dies were finished, and the following number struck :

6 Dozen fine Bronzed Proofs.
1 Dozen fine Silver.
2 Impressions in burnished Metal ; bright Proofs !
7 $\frac{2}{12}$ Dozen.

In October 1845 the Obverse die was altered; the Arms being transferred to the field (over the coin cabinet) and their place in the exergue occupied by the *Rose Thistle and Shamrock* united. Of the thus altered dies were struck :

6 Dozen Bronzed Proofs.
1 Impression in Silver — unique, for B. N. !
1 — in Gold — unique, for Sir Geo. Chetwynd. !
6 $\frac{2}{12}$ Dozen.

I hereby certify that this is the correct statement. Dies destroyed.

(signed) B. Nightingale.

Clare Cottage, Priory Road, 18 May 1848.

The above memorandum was found in a copy of Sharp's " Catalogue of Tokens " belonging to the late Sir George Chetwynd and has been forwarded to us by a correspondent.

SOME COINS OF THE BRITISH EMPIRE.

The following abbreviations are used in describing the coins: —
O — Obverse.
R — Reverse.
E — Edge.

CYPRUS.
QUEEN VICTORIA.
BRONZE HALF PIASTRE.

TYPE I.

HALFPIASTRE, 1879.

O. — Legend : — VICTORIA QUEEN. Head and truncated neck of the Queen in profile, and looking to the left. Below the truncation of the neck, the date, 1879. Her Majesty is wearing a diadem adorned with gems and a scroll of oak leaves and acorns. The diadem is partly hidden by the wavy hair which is parted on the forehead, carried over the ear and collected into a knot behind the head. The whole within an ornamented rim.

R. — Upper legend : — CYPRUS. Lower legend : — HALF PIASTRE. A bead on each side between the legends. The numerals $\frac{1}{2}$, encompassed by a beaded circle. The whole within an ornamented rim.

E. — Plain.

Similar coins are dated 1881, 1882, 1884, 1885, 1886, 1887, 1889, 1890, 1891, 1896, and 1900.

Some half piastres coined in the year 1881 and all those coined in 1882, bear the letter H (for Heaton) above the date.

Those dated 1882 and 1884 are not given by Atkins in his book on British Colonial coins. He gives the date 1880 but none were coined in that year.

Henry GARSIDE.

AN EXTREMELY RARE PATTERN RUPEE FOR BRITISH INDIA.

O. — Legend : — EDUARDUS VII REX ET IMPERATOR. A five pointed star between the beginning and end of the legend. Head and truncated neck of the King-Emperor in profile, and looking

to the right. On the truncation of the neck : — K. W. incuse. The whole within an ornamented rim.

R. — Legend : — ONE RUPEE INDIA 1901. A tiger, statant,

with a Persian inscription above, and a Nagari inscription below, enclosed by thirty two curves with triply ornamented cusps. These are encompassed by a circle. The Imperial Crown above, and the Indian lotus below. The whole within an ornamented rim.

E. — Milled with straight lines.

In February, 1901, the work of preparing designs for the obverse and reverse of a new rupee rendered necessary by the death of the Queen-Empress Victoria and the accession of the King-Emperor Edward the Seventh was begun in the Calcutta Mint, the dies being subsequently completed by Mr. K. Wezel, the engraver, whose initials are on the truncation of the neck of the King-Emperor. No rupees of this type were issued for currency, another obverse and reverse design by George William De Saulles of the Royal Mint, London, being ultimately approved.

REVIEWS.

Chronos. A Handbook of comparative Chronology. *Chronological Notes in History, Art and Literature from 8000 B.C. to 1700 A. D. For the Use of Travellers*. By J. Hart. London, G. Bell and Sons, Ltd. 1912. 8vo. 300 pp. 6/= *net*.

Although the present volume has no direct connection with numismatics, it may not be out of place to bring it to the notice of the readers of the *Circular*. To any one desirous to possess an intelligent acquaintance of the sequence of historical events and the evolution of history, art and literature in the different countries of the world, Mr. Hart's handbook will supply in a concise form a remarkable amount of sound information.

These tabular lists were compiled by the author from the best authorities, during many winters spent in Egypt, Greece and Italy; they are the result of careful study and on the whole most reliable. "The selections have been made principally in view of what is considered likely to be of use to travellers", who being necessarily without the various books of reference, require a portable handbook supplying them with data and short notes on the history and process of civilization of the various countries in which they are travelling.

The first part deals with the prehistoric period; part II commences with the eighth century B. C. and continues to the eight century A. D., the coronation of Charlemagne and the foundation of the Holy Roman Empire; part III takes in the period comprized between that event and the end of the seventeenth century.

This is followed by XXXII Appendixes and an important Art Supplement, which are very useful. The only regret to a numismatist, is that the author has completely ignored the coinage and omitted the names of the Masters of the die-engraver's art, and Medallists, which are no less famous than many of the artists, painters and sculptors enumerated by him.

Nevertheless Mr. Hart's handbook will no doubt meet with the popular welcome it deserves and we warmly recommend it.

Pax in Nummis. Collection Le Maistre. Médailles, jetons et monnaies ayant rapport aux divers Traités de paix. Description illustrée par J. Schulman.
256 pp., text; 150 reproductions and 12 plates.
J. Schulman, Amsterdam, 1912.
May be obtained from Spink & Son Ltd *25/. Nett.*

Mr. Schulman tells us in his preface that Czar Nicholas II.'s invitation to the first Peace Conference at the Hague in 1897 suggested to M. Le Maistre the idea of forming the collection of Medals, jetons and coins bearing reference to the various treaties of Peace concluded from the sixteenth century to our days, which is described in the fine catalogue before us.

The collection comprises over eleven hundred items; to be exact, 828 medals and plaquettes, 163 jetons and 121 coins. The earliest coin is an aureus of the Emperor Claudius with the device PACI AVGVSTAE, struck about A. D. 41, but the earliest medal represented in the work commemorates the Peace of Cambrai concluded in 1529 between Charles V. and Francis I. No less than 130 coins and medals refer to the Peace of Westphalia which ended the Thirty years' War. The Peace of Westminster 1654, Pyrenees 1660, Breda 1667, Aix-la-Chapelle 1668, and London 1674; and later the Peace of Nymwegen, Lund, Ryswick, Altranstadt, Carlowitz, Utrecht, Rastadt, Baden, Utrecht, Dresden and Breslau have been recorded in various countries by numerous numismatic mementoes. The Peace of Versailles introduces the United States into the subject, and the warlike period of Napoleon I with the Treaties of peace of Campo Formio, Lunéville, Amiens, Pressburg, Schönbrunn, and Paris is a prolific contributor to the series. But few medals commemorate the later nineteenth century Peace contracts of Adrianople, Constantinople, Frankfort-on-M., Paris, Santiago, Tweebosch, Villafranca, etc., and the Congresses of Berlin, London, and Montevideo. An exception must be made for the two Peace Conferences at the Hague, which form the subject of numerous medallic productions of our contemporary artists.

The compiler of the Catalogue has not only carefully described each medal, jeton and coin, but also illustrated the more important specimens, and has given valuable historical notes which help one to understand in many cases the circumstances which led to the issuing of the particular mementoes.

The collection includes a number of personal medals giving the portraits of men of merit who laboured in the cause of peace.

It is only natural that had M. Le Maistre continued his collection he might have added many more treasures to his cabinet, which is however very rich in rarities and even unpublished pieces.

Collectors will find the work very useful, and of easy reference. The indexes are copious and accurate; the illustrations deserve praise; and indeed in every respect, Mr. Schulman, as author and publisher of the work, may be sincerely congratulated.

NUMISMATIC SOCIETIES, MUSEUMS &c.

ROYAL NUMISMATIC SOCIETY.

June 20th. — Percy H. Webb Esq. Treasurer in the chair.

The Reports of the Secretaries and Treasurer were read and adopted. The silver medal of the Society was awarded to General-Lieutenant Max Bahrfeldt, Dr. Phil., of the Prussian army, for his long and distinguished services to Roman Numismatics, particularly in the Republican series. In the unavoidable absence of General Bahrfeldt the medal was accepted on his behalf by Mr. Grueber, who read a letter from the recipient, expressing his gratification at the honour bestowed on him.

The result of the ballot for office-bearers for session 1912-1913 was announced and the following declared elected: *President*: Sir Henry H. Howorth, K. C. I. E., F. R. S., F. S. A.; *Vice-Presidents*: Sir Arthur J. Evans, M. A., D. Litt., L. L. D., F. R. S., F. S. A.; and Bernard Roth, Esq., F.S.A., J.P.; *Treasurer*: Percy H. Webb, Esq.; *Secretaries*: John Allan, Esq., M. A., M.R.A.S. and Frederick A. Walters, Esq., F.S.A.; *Foreign Secretary*: George Francis Hill, Esq., M.A.; *Librarian*: Oliver Codrington, Esq., M.D., F.S.A., M.R.A.S.; *Ordinary Members of the Council*: Thomas Bliss, Esq., G. C. Brooke, Esq., B. A., Miss Helen Farquhar, H. B. Earle Fox, Esq., Herbert A. Grueber, Esq., F.S.A., Barclay Vincent Head, Esq., D. C. L., D. Litt., Ph.D., L.A. Lawrence, Esq., F. S. A., J. Grafton Milne, Esq., M. A.; Lieut.-Col. H. Walters Morrieson, R. A., F.S.A. and Henry Symonds, Esq., F.S.A.

CATALOGUE

OF

COINS and MEDALS for SALE

Special attention is directed to the fact that every coin or medal catalogued in the following lists is guaranteed to be absolutely genuine (except when expressly stated in the description to be otherwise) and if not approved of can be returned, when the full amount paid will be refunded.

Collectors will also kindly note that every care is taken when compiling the catalogues not to overrate the condition of the pieces but to faithfully represent them according to their merits.

All orders should be sent to Spink & Son Ltd., 17 and 18, Piccadilly, London, W.

(For further particulars see first page of this Circular.)

COINS OF THE MOST FAMOUS RULERS IN THE WORLD'S HISTORY

(*Continued from Vol. XVI, col. 10350.*)

MARIA THERESA EMPRESS OF GERMANY

1717-1780

This great princess was Empress of Germany, Queen of Hungary and Bohemia, and was born on the 13th of May 1717. She was the daughter of the Emperor Charles VI, and was married in 1736 to Francis duke of Lorraine ; on ascending the throne in 1740 on the death of her father, she associated her husband with her in the government under the title of Francis I. ; no sooner had she done so, than despite the Pragmatic Sanction which assured her of her dominions in their integrity, she was assailed by claimants for various portions of her empire, and particularly by Frederick the Great of Prussia who, vi et armis, wrenched Silesia from her and held it fast.

This war is known as the War of the Austrian Succession ; it lasted seven years, and was concluded by the Peace of Aix-la-Chapelle in 1748 ; this peace however was soon broken, and the Empress Queen aided by France and counselled by Kaunitz, renewed hostilities in the hope of forcing the Prussian King to restore what he had taken, but the result of the war was to leave Frederick still in possession of the territory he had conquered.

In the interim of these wars, Maria Theresa devoted her attention to the welfare of her subjects, who were conspicuously loyal to her, and before the end of her reign, she saw what she had lost, made up to her in a measure, by the partition of Poland, in which she took part.

This remarkable woman cultivated the favour of Madame de Pompadour, wrote flattering letters to her, and styled her " cousin ", out of pure hatred of Frederick the Great who by his sarcasms had excited an equally violent dislike in the mind of the notorious mistress of Louis XV.

Maria Theresia died on the 29th November 1780, having earned from her subjects, the grateful title of Mother of her country.

103499 **Gold.** Kremnitz Double ducat 1765, M.THER.D.G.R.I.G.H. B.R.A.A.D.B.C.T. Queen standing to R., crowned, wearing royal robes, and holding sceptre and orb, at the sides K—B, and below, 2 between branches. Rℒ. PATRONA. REGNI.HVNGARIÆ.1765, the Madonna and Infant Jesus. V. F. 1 5 »

MITHRIDATES VI, KING OF PONTUS

B.C. 121-63

Mithridates VI surnamed " Eupator Dionysos ", but generally known in history as Mithridates the Great, was born about 132 B.C. and was brought up at Sinope, where he received a Greek education. His grounds of quarrel with the Romans began early, for during his minority they deprived him of Phrygia which had been possessed by his father.

He commenced his career by the conquest of Colchis and lesser Armenia, about 112 B.C., having first secured himself on the throne by the execution of his mother and brother. Being called in by the Greeks of Chersonesus Taurica or Crimea to their assistance against the Scythians, he expelled the latter from the Crimea, and carried his victorious arms as far as the Dneister.

Original from CORNELL UNIVERSITY

He appears to have established a strong influence over the Scythians even as far as the Danube — having in view already, his great contest with Rome.

He was an implacable enemy of the Romans, between whom and him there raged from B.C. 90 to 63, a succession of wars, with alternating successes, till he was finally defeated by Pompey near the Euphrates, when his soldiers mutinied against him, with his son Pharnaces at their head; so finding that no choice remained to him, but death or captivity, Mithridates put an end to his life in 63 B.C.

He was a great man of extraordinary talents and energy, and conquered many surrounding nations, but he was at the some time cruel, suspicious, and treacherous in the extreme; he was in truth an oriental despot with a Greek education.

Mithridates was a collector of works of art, and also made a special study of poisons, familiarising himself with all their antidotes, in view of possible attempts to take away his life.

With the solitary exception of Hannibal the great Carthaginian, he was the most formidable enemy that the Roman Republic ever encountered.

NAPOLEON THE GREAT, EMPEROR OF FRANCE

1769-1821

Napoleone Buonaparte was born on the 15th Augt. 1759 at Ajaccio in Corsica, soon after the annexation of that island to France; he was the second son of Carlo Bonaparte and Letizia Ramolino the most beautiful girl in Ajaccio. Trained at the military schools of Brienne and Paris, he was distinguished first as a captain of artillery at the siege of Toulon in 1793; on being elected general of brigade in the Italian campaign of 1794, he fell under suspicion, but was soon after invested with the supreme command of the army there, and the conduct of the war, which was rendered memorable by the victories of Montenotte, Lodi, Rivoli, Arcole &c. On his return to Paris, the enthusiasm with which he was received, excited in him the ambition to render himself indispensable to France.

To utilise his services in their own interest, the Directory determined to strike a blow at England, and so ordered him to sail in command of an expedition to Egypt in 1797, which he conducted with varying successes and reverses, till in 1799, the threatened fall of the Directory called him back for a coup d'état which he had meditated, and which he accomplished on the 18th Brumaire (9 Novr 1799), when a Triumvirate was established, with himself as First Consul, and eventually in 1802, Consul for life. Napoleon owed this elevation to his victories in the field, and " the sword must maintain what the sword had won ", so from this date began that long array of wars against the rest of Europe, distinguished by the victories of Austerlitz, Jena, Eylau, Friedland, Wagram, &c.; which contributed to inspire all the nations around, with a sense of the terror of his name; however with the unfortunate expedition into Russia in 1812, Napoleon's glory began to wane; and the tide to turn. After the battles of Lutzen and Bautzen, he might perhaps have signed an honorable peace, but he declined the terms offered by the Allies, who invaded France, and entered Paris in 1814, when he was compelled to abdicate at Fontainebleau, and retire to Elba 20th April 1814. The Emperor tried in vain to return from his retreat, and re-enter Paris on the following 20th March, but the Powers with England and Prussia at their head, leagued against him and crushed him at Waterloo; by this defeat he had forfeited the throne, and being unable to escape from France, delivered himself up to Capt. Maitland of H.B.M.S. " Bellerophon ", and was shipped off to St. Helena, where he died 5th May 1821. On the day he died, he bade farewell to the Generals who shared his captivity, and exclaimed " Je suis en paix avec tout le monde ", but his last words are said to have been " Tête d'armée ".

The remains of Napoleon were brought by the Prince de Joinville in a French frigate from St. Helena, and on the 15th Decr 1840 were temporarily deposited in a chapel of the Invalides, whence in the presence of the Imperial family in April 1861, they were transferred to the magnificent tomb sculptured by Pradier in the church of the Invalides.

NERO, ROMAN EMPEROR.

A.D. 54-68.

This Emperor's original name was Lucius Domitius Ahenobarbus, and he was born at Antium in A.D. 37, being the son of Cn. Domitius Ahenobarbus and Agrippina, daughter of Germanicus; after the murder of Claudius, instigated by Agrippina who four years previously had become that Emperor's wife; Nero seized the throne, excluding Britannicus the rightful heir.

During the first five years of his reign, his old tutor Seneca was his adviser in a wise and temperate policy, but gradually his innate tendency to vice broke through all restraint, and hurried him into a course of profligacy and crime. Britannicus was put to death, and his mother, and wife Octavia were subsequent victims; and in A.D. 64, numbers of Christians suffered death with every refinement of torture, on a trumped-up charge of having caused the burning of Rome, suspicion of which rested on Nero himself. After the death of his wife Octavia, Nero married Poppœa Sabina, who had been the wife of his dissolute companion Otho the future Emperor, but she in her turn fell a victim to his brutal passions.

These and many other similar crimes brought on inevitable rebellion; in A.D. 68 Galba the Governor of Hispania Tarraconensis raised the standard of revolt; a famine which prevailed at Rome, and the extortions of Nero to raise money for his lavish expenses, rendered the populace disaffected; the Praetorian soldiers proclaimed Galba Emperor, and Nero died by his own hand to avoid the indignities which awaited him from the Senate, whom he had so deeply injured.

Hateful as is his character in history, Nero seems to have been generally popular both with the soldiery and the lower class of citizens at Rome: for his cruelty and extortion were chiefly felt by the noble and wealthy; with the rest, his lavish profusion, and excessive love of public spectacles made him a favorite.

OFFA, KING OF MERCIA.

A.D. 757-796.

This prince was a famous ruler over Mercia during the Anglo-Saxon Heptarchy; the province over which he was King, extended over all the Midland Counties from the Severn to the Humber, and pressed on the borders of Wales. This Mercian Kingdom was one of the last of the Heptarchy to be overthrown, and its greatest prince was a man of energetic and violent character, therefore all the more fitted for the time in which he lived and the people over whom he reigned; he reasserted the superiority of the Mercian Angles, which had from circumstances been temporarily weakened, and achieved various important conquests over the neighbouring Saxon States. To secure his subjects from the inroads of the Welsh, he caused a ditch and rampart to be drawn along the frontier of Wales (a line measuring one hundred miles) beginning at Basingwere in Flintshire, and ending on the Severn, near Bristol. The extensive remains of this gigantic work, still go by the name of "Offa's dyke".

It is said that not satisfied with supremacy in the south of England, he also compelled the Northumbrians beyond the Humber to pay him tribute. Although actuated by insatiable and unscrupulous ambition, and guilty of many cruel and treacherous crimes, Offa, still possessed as a monarch certain high and indisputable merits; he died in 795, and the power and prestige of the Kingdom of Mercia, passed away with him for ever.

Offa was the first King to introduce a coinage of pennies into England, and they are the most remarkable and artistic in the Anglo-Saxon series, so much so, that it has led up to the suggestion that he employed Italian artists, more particularly as it is known that he had a good deal of intercourse with Rome on ecclesiastical matters, and with the Emperor Charlemagne on political matters, but that he visited Rome is discredited.

PETER THE GREAT, CZAR OF RUSSIA.

1672-1725.

This famous Czar and the Founder of the Russian navy, was born at Moscow on the 30th May 1672; and was the only son of the Czar Alexis, by his second wife. He succeeded his half brother Feodor in 1682, but was forced for a time, to share the throne with his half sister Sophia, acting as Regent for her brother Ivan; after a few years careful training however, he deposed Sophia, and entered Moscow as sole ruler in 1689.

With the help of Lefort, and Patrick Gordon a Scotsman, he proceeded to raise and discipline an army on the European model, and also to construct a navy; to reach the sea, he made war on the Turks, and possessed himself of the port of Azov, at the mouth of the Don; here he invited skilled artificers from Austria, Venice, Prussia and Holland, and a navy was built. From 1697 to 1698, he visited the countries on the Baltic, and England, acquiring vast stores of information, and working as a shipwright, finally taking back with him an army of mechanics.

On his return, he vigorously reformed the Russian press, schools and church, introduced European manners and literature, and encouraged Foreign trade: desirous now of an opening on the Baltic, he began in 1700 a long contest with Sweden marked at first by many defeats, notably that of Narva, when the Czar is said to have exclaimed "that the Swedes would at length teach his soldiers to beat them".

The seizure of Ingria and foundiug of the new capital St. Petersburg took place in 1703, the victory of Pultowa 1712, seizure of the Baltic provinces and part of Finland, 1713, and finally the Peace of 1721 which ceded the conquered territories to Russia. In 1722 war with Persia secured Peter three Caspian provinces; he continued to pursue a vigorous and enlightened policy for the good of Russia, but his disposition was often cruel; his son Alexis was condemned to death for conspiring against his father's life and throne, and died from the effects of a fit on hearing the sentence.

At his death in 1725, he was succeeded (in accordance with his wishes) by the Empress Catherine I. who had been his mistress previous to his marriage with her in 1712.

103557 **Gold**. Five-Rubals, 1720. Laureated bust to r. in armour and mantle. ℞. MOHETA OBA ЦЕА ДВА РУБАІ. St. Andrew on cross. V. F. S. 2 5 »

PHILIP II, KING OF MACEDON.

B.C. 359-336.

This great soldier and ruler, father of a still more brilliant son, succeeded his brother Perdiccas III. on the Macedonian throne 360 B.C.; having secured his position, he entered on a series of aggressive wars, making expeditions into Thrace and Thessaly; the siege of Olynthus brought him into conflict with Athens, the two cities being allies, and occasioned some of the most brilliant orations of Demosthenes.

The successive appeals for his aid against their enemies by the Thebans and the Argives, led him into Greece and into the Peloponnesus; in 339 B.C. a council of Greek cities appointed Philip commander-in-chief of their leagued forces in a projected war against the Locrians, but the Athenians and Thebans opposed his invasion; the defeat of their armies at Chæronea in 338 B.C. placed all Greece at the conqueror's feet.

His next project was an expedition against Persia, but whilst undertaking preparations on a very large scale in concert with the Greek cities, he was assassinated at Aegæ by Pausanias a Macedonian Noble in 336 B.C.

Philip was forty-six years of age at the time of his murder, and had reigned twenty-three years.

He was certainly a great man according to the common scale of Princes, though not a hero like his son; but he was an astute if not an unscrupulous politician, and possessed incomparable eloquence, energy, and military skill.

103564 **Gold**. Stater, laureated head of Apollo, with short hair to r. ℞. **ΦΙΛΙΠΠΟΥ**. Biga to r. with prancing horses, **ΔΥ** *mon.* below, and in exergue a torch. *Fine style*. E. F. 7 15 »

PHILIP II, KING OF SPAIN.

1555—1598.

The only son of the Emperor Charles V of the Holy Roman Empire and Isabella of Portugal, married Mary Tudor daughter of Henry VIII, and spent over a year in England; in 1555 he succeeded his father in the sovereignty of Spain, Sicily, Milan, the Netherlands, Franche Comté, Mexico, and Peru; he thus became at the age of twenty-nine, the sovereign of the most extensive and powerful monarchy that Christendom had ever known, in fact it was the pride of his subjects to boast that the sun never set upon his dominions.

His revenue far exceeded that of any other monarch of his time, his navy was more numerous than that of any other country, and he had in his service the ablest generals and the best troops of the age.

Philip overthrew the league between Henry II of France and the Pope, and on the death of Mary Tudor in 1558, he married the French Princess Isabella, and retired to live in Spain in 1559.

Wedding himself now to the cause of the Church, he encouraged the Inquisition in Spain, and introduced it to the Netherlands; the latter country revolted, and the Seven United Provinces achieved their independence after a long and arduous struggle in 1579. Philip now made his great effort to overthrow Protestant England; and prepared and sent out against this country the most powerful armada which ever sailed from the ports of Spain, which resulted in its defeat and dispersion by the tempest's blasts and the valour of English seamen in 1558.

His last years were embittered by the failure of his intrigues against Navarre; also by raids of English seamen on his American provinces. He was a bigot in religion, a hard, unloved, and unloving man, and a foolish King who fatally injured Spain by crushing her chivalrous spirit, and destroying her commerce by heavy taxation.

103574 **Gold.** Two Reales d'oro, PHILIPPVS.II.DEI.GRATIA. Memorial shield crowned between C — $\frac{A}{II}$. ℞. HISPANIARVM REX. Cross potent within tressure of four arches. F. 1 12 »

103575 **Silver.** Eight Reales. Obv. As before, but with S—VIII at sides of shield. ℞. Legend as on gold piece, Spanish arms in angles of plain linear cross within a tressure of eight curves. Mm. Cross-crosslet. V. F. R. 1 17 »

103576 — Four Reales, same legends and type as before, but with $\frac{O}{IIII}$ at side of shield. F. S. » 12 6

103577 — Two Reales, legends and type as before, but with $\frac{R}{II}$ on one side, and date 1595 on other side of shield. F. » 3 6

103578 — Eight Reales, undated, similar legends and type as previous piece of same denomination, and with mm. Cross-Crosslet, with treble archway of two tiers on one side, and VIII on other side of shield. E. F. R. 2 12 6

*The above is a restrike of an extremely rare piece, of which the dies are in the Madrid mint; and as an original specimen is such a "Rara avis", and not within the means of an ordinary collector, a few of these retrospective coins were struck to supply this deficiency.

ENGLISH AND IRISH COINS OF PHILIP II AND MARY TUDOR.

POMPEY THE GREAT.

B.C.106—48.

This great Roman general and statesman at a very early age entered into military service under his father in the Social and Italian wars; after the death of Marius however, he entered into public life, and associated himself with Sulla.

He distinguished himself in Africa, and in the Mithridatic war; was raised to the consulate with Crassus in 70 B.C., and cleared the Mediterranean Sea of pirates in 67—66. Pompey formed against the Senate along with Caesar and Crassus, the first triumvirate, and the former gave his daughter to him in marriage.

The death of Crassus in 53 B.C. broke the triumvirate, and after the death of Julia in the previous year, which had already partly dissociated Pompey from Cæsar, the former now aimed at the sole sovereignty, and entered into rivalry with Caesar, which soon resulted in war between them, when Pompey after a desperate struggle, was defeated at Pharsalia in 48 B.C., and escaping to Egypt was assassinated there the same year, by order of Ptolemy XII.

Pompey was fifty-eight at the time of his death; he was a warrior not a politician: and he lost his superiority by a want of constant adherence to one party, and an inability to retain the affections of his friends.

Military glory alone could not keep the multitude attached to his person; since he had few talents except those connected with the art of war.

103589 — Denarius *Cok.* 15. IMP.SEX.MAGNVS bare head of Pompey to r. ℞. PIETAS Piety standing holding patera and wand. F. V. R. 4 15 »

RICHARD I (Cœur de Lion), KING OF ENGLAND.

1189—1199.

Richard of the Lion Heart was the third son and successor of Henry II; his early years were spent in Poitou and Aquitaine, where he engaged in quarrels with his father.

After his accession to the throne, he flung himself with characteristic ardour into the Crusade movement.

In 1190 he joined his forces with Philip Augustus of France in the third crusade; Richard upheld the claims of Tancred in Sicily; captured Cyprus: and won great renown in the Holy Land, particularly after his defeat of Saladin which enabled him to reduce Jaffa and Ascalon, and even advance within sight of Jerusalem; after these events, owing to the reduction of his army by disease &c. he concluded a truce with Saladin for three years on favorable terms, and set sail for England, but being shipwrecked near Aquileia, he was treacherously arrested by Leopold Duke of Austria and thrown into prison, from which he was afterwards released, and ransomed at a heavy price by his English subjects, and landed in England in 1194.

The remainder of Richard's reign was chiefly occupied with a series of petty wars against Philip of France, and in a quarrel with one of his vassals Vidomar Viscount of Limoges, he was mortally wounded whilst besieging the castle of Chaluze, and expired on the 6th April 1199, in the forty-second year of his age. The incidents of his life resemble the adventures of a knight errant, rather than the actions of a great monarch.

Richard was a ready and powerful speaker, and was fond of literature, especially of provincial poetry; a few of his poetical compositions have been preserved and published in La Tour Ténébresse 1705.

103590 *Silver.* Poitou denier, RICARDVS.REX a cross pattée; ℞. PICTAVIENSIS in three lines across field. V. F. » 5 »

(*To be continued.*)

VARIA

Le *Figaro* annonçait l'autre jour la mort d'une vieille, très vieille demoiselle Mlle Adeline, qui vivait fort retirée dans le quartier de Grenelle, à Paris. Cette personne oubliée avait eu son heure de célébrité, et il y a même des gens qui demeurent fort engoués de son profil, même après sa mort : c'est ce profil en effet, qu'en 1848, — elle avait vingt ans — le graveur des monnaies du temps, Oudiné, avait couronné d'épis et de lauriers pour le substituer, sur les écus de cinq francs, à la « poire » de Louis-Philippe.

***

Fribourg. — Le Conseil d'État a appelé à la Bibliothèque cantonale et universitaire, pour remplacer M. le Dr W. Meyer, nommé à la Bibliothèque nationale, M. l'abbé F. Ducrest. Ce dernier qui a occupé les charges de professeur au Collège, d'archéologue cantonal et de conservateur du Cabinet de numismatique, est bien connu par ses nombreux travaux historiques, dans toute la Suisse romande.

***

Le statuaire Rodo-Niederhausern vient de terminer une médaille commémorative des têtes du bicentenaire, conçue dans le style des monnaies antiques. Pour évoquer les traits du « citoyen de Genève », l'artiste s'est inspiré du buste de Houdon et de la statue de Pradier. La face, sans lettre, donne le portrait lauré de J.-J. Rousseau, avec une pervenche, sa fleur de prédilection. Le revers porte une inscription avec les dates 1712-1912.

La médaille sera frappée en argent et en bronze, au module de 57 millimètres ; elle est éditée par souscription et ne sera frappée qu'au nombre des exemplaires souscrits, sans que ce nombre puisse dépasser cent pour les épreuves d'argent et deux cents pour celles de bronze. La souscription sera close le 25 juin.

(*Gazette de Lausanne.*)

***

M. Eug. Demole, conservateur du musée de numismatique de Genève, a présenté un petit travail sur la médaille de Voltaire frappée en 1769 sur l'ordre de l'Electeur palatin, par le graveur G.-C. Waechter, de Mannheim.

ADVERTISEMENTS

NOW READY

PART I and II

MONNAIES BYZANTINES

BY

COUNT JOHN TOLSTOY

Large 8vo, 112 pp. 7 plates. **Price 6/6** nett. each.

Extract from Prospectus:

"Subscribers will receive the parts as soon as published, on the following terms: the first, second and third parts for 6/6 (1 dollar 60 cents) net, each part; the subsequent parts for 5/6 each (1 dollar 30 cents), and the last for 2/2 (60 cents).

The price of each part to non-subscribers will be 8/6 (2 dollars 10).

Once the complete work is published the price will be raised.

N. B. Although the work is written in Russian, the author thinks that persons quite ignorant of the Russian language will be able to use it, as it contains reproductions of all the described coin-types and of over half the varieties. The text of the plates is in Latin of Greek, the values of the coins given in francs, and the weight in grammes. All the legends are reproduced in the text in fac-simile, and transcribed in Latin and Greek.

As all the parts will have one common pagination, and the plates enumerated in sequence, subscribers and purchasers will be able to bind the parts as they please.

The work will comprise the description of all the Byzantine coins known to the author, as well as those of the Empires of Thessalonica, Nicaea, Trebizond, and the imitations of Byzantine types issued by the Goths and Lombards of Italy".

The work will consist of 9 to 12 parts, two or three appearing yearly.

Subscriptions received by Spink & Son Ltd.
17 & 18 Piccadilly, London, W.

IGNOTI NVLLA CVPIDO

SPINK & SON'S
MONTHLY
NUMISMATIC CIRCULAR

THE *Monthly Numismatic Circular* will be forwarded post free on receipt of half-a-crown (= 3 francs = 2 ½ marks = 60 U. S. A. cents, in P. O. O. or stamps) for one year's subscription.

Should any applicant not receive it regularly by post, please notify the omission to us, when it shall be at once rectified. All communications respecting the Numismatic Circular (either referring to its literary portion or to its catalogue of coins, &c. for sale) should be made to our West-End house, 17 and 18 Piccadilly, London, W., where all letters and orders will receive immediate attention.

Cheques crossed National Provincial Bank of England, Piccadilly Branch.

Any coins or medals can be had on approval if the applicant is known to us, or, if not, on receipt of references. Postage on coins, as a rule, is paid out.

Orders for coins from the annexed list will be executed in rotation, but preference will be given to clients who are willing to purchase outright, providing the coins answer to the description.

Coins not approved of can be returned.

LA *Circulaire mensuelle de Numismatique* sera adressée franco à toutes les personnes qui voudront bien en faire la demande en nous faisant parvenir 3 francs 20 centimes par mandat postal pour un abonnement annuel.

Nous prions nos correspondants d'adresser toutes lettres et communications relatives à la partie littéraire du journal ou au catalogue des monnaies et médailles, à notre établissement, 17 et 18, Piccadilly, Londres, W.; nous y répondrons immédiatement.

Les ordres seront exécutés à tour de rôle en donnant la préférence aux commandes effectives.

Toutes les pièces seront envoyées *à condition*, si le client le désire, mais le port de retour est à sa charge.

Les personnes qui ne nous seraient pas connues sont priées de nous fournir des références.

DAS *Numismatische Circular* wird portofrei, nach Empfang von 2 ½ Mark (3 Kronen ö. W.) als Jahresbetrag, geschickt.

Sollte jedoch ein Abonnent dasselbe nicht regelmässig erhalten, so bitten wir, uns gefälligst Anzeige davon zu machen, um weitere Unregelmässigkeiten zu verhüten.

Alle Mittheilungen, welche dieses " Numismatische Circular " betreffen (gleichviel ob dieselben sich auf den literarischen Teil oder auf das Verzeichnis der Münzen, &c. zum Verkauf beziehen), sollten an unser West End Etablissement, 17 und 18 Piccadilly, London, W., gerichtet werden, wo Briefe und Aufträge sofortige Erledigung finden.

Jede Münze oder Medaille wird zur Ansicht gesandt. Bestellungen werden nach Reihenfolge des Einganges effectuirt und Nichtconvenirendes zurückgenommen.

Rückporto zu Lasten der Herren Besteller.

Uns unbekannte Herren Sammler werden um Aufgabe genügender Referenzen ersucht.

GREEK COINS.

THE ANCIENT COINS OF SICILY.

(*Continued from col. 13783.*)

CATANA.

DURING THE PERIOD OF FINE ART.

The original Chalcidic citizens who returned to their homes in 461 B. C. grew rich and powerful during the peaceful years which intervened between their return and the invasion of the Athenians in 427 B. C. During this period some of the types of the head of Apollo, with the quadriga on the Reverse, were continued to the time of Euainetus, who worked in the mint at Catana some time before the Athenian invasion. That artist also designed the beautiful head of the river-god Amenanus in profile.

Two other artists signed their names during this period on the coins of Catana, viz, Choerion (χοιριον) and Herakleidas; they appear to have been at work at the same time in the mint.

Choerion seems to have designed the fine three-quarter face of the river-god Amenanus; some coins bearing this same design were signed by Herakleidas.

The signatures of these two artists are usually dated from about 400 to 336 B.C. One coin of the Apollo type is signed by Herakleidas, thus shewing how long that type lasted.

When the Athenians arrived, the Catanians at first refused to receive them but they were compelled to allow them to enter the city and to espouse their cause. Catana thus became the headquarters of the Athenians during the first year of the war (Thuc. VI, Diod. XIII). The next event recorded is the taking of Catana in 403 B.C. by Dionysius, who sold the citizens as slaves and plundered their city, giving it to the rule of mercenary Campanians.

In 396 B.C. these troops left Catana and retired to Aetna on the approach of Himalco and Mago. The citizens must have been spectators of the sea fight fought off their coast, in which Leptinas the brother of Dionysius was defeated by the Carthaginians, who in consequence of their victory took the city (Diodorus XIV, 15, 58, 60). No information appears to be available as to the events of the next few years; we only know the city continued to exist, but who ruled and who were the inhabitants we know not. However the coinage appears to have continued to be issued even in those days of trouble and distress.

TETRADRACHMS.

Normal weight 268 grains.

I. a) Obv. **ΚΑΤΑΝΑΙΩΝ**. A young male head to left, diademed: border of dots. Probably the river-god Amenanus.

Rev. Quadriga to left: charioteer holding reins in both hands: horses in high action, and the rein of the farthest hanging loose; above, Nike, flying to right, holding wreath and fillet, crowning the charioteer: line of exergue triple; in exergue **Η**: border of dots.

I. b) Some specimens with the Reverse of the same die have the head on the Obverse bare, without the diadem.

II. Obv. **ΚΑΤΑΝΑΙΩΝ**. The Head of Apollo, to right, laureate; hair short: border of dots.

Rev. **ΚΑΤΑΝΑΙΩΝ** in exergue.

Quadriga to left, driven by male charioteer, holding reins in both hands; horses in high action; above, Nike, flying to right, crowning charioteer; in exergue a fish, to left, under the legend.

III. a) Obv. The head of Apollo, three-quarters face towards the left, laureate, his hair long; in the field to right the artist's signature **ΗΡΑΚΛΕΙΔΑΣ**.

Rev. Similar to No II but Nike holds fillet and wreath. Similar exergual a legend.

b) Obv. Same die as III a).

Rev. Similar but to right and beyond the horses an Ionic column fluted (the meta) and on the exergue a cray-fish to right.

IV. Obv. Head of Apollo, full-face, on left of head a strung bow, on right a lyre.

Under the neck **ΑΠΟΛΛΩΝ**.

In field to left **ΧΟΙ[ΡΙΩΝ]**: border of dots.

Rev. Same die as III b).

V. Obv. **[Κ]ΑΤΑΝΑΙΩΝ** above head of Apollo, to left, laureate; hair turned up behind; on left of head a knotted fillet with bell at lower end, on right a cray-fish, upwards.

Rev. A quadriga, to left, driven by charioteer, wearing long chiton, holding reins in both hands, and striking horses with his goad; horses in high action; on this side of the chariot the Meta; above, Nike, flying to right bearing wreath and tablet inscribed **ΕΥΑΙΝ**; under the horses' feet a pellet; the line of exergue double; in the exergue a crab: border of dots.

DRACHMÆ.

Normal weight 67·28 grains.

Obv. The head of the young river-god Amenanus, three-quarters face to right, with short horns and flowing hair: on either side of his neck a river fish, upwards.

Rev. Fast quadriga to right, driven by charioteer holding reins and goad, the rein of the farthest horse hangs loose; above Nike flying to left, crowning charioteer: border of dots in exergue ··**ΤΑΝ ΑΙ**.

Obv. Head of Seilen, full-face, with pointed ears: border of dots.

Rev. **ΚΑ ΤΑ ΝΑΙΩΝ**. Young male head to left, diademed: border of dots.

TRIOBOLON.

Normal weight 31.99 grains.

Obv. Head of Seilen, full-face, with pointed ears: border of dots.

Rev. **ΚΑΤΑΝΑΙΩ Ν**. Head of Apollo to right, laureate, hair rolled behind: plain border.

LITRA.

Normal weight 13.43 grains.

Obv. Head of Seilen to right: border of dots.

Rev. **ΚΑΤΑΝ ΑΙΩΝ**. Thunderbolt with curled wings: border of dots.

Note: on some specimens Seilen is crowned with ivy, and on others the letter **Γ** appears behind the head.

One specimen shews no wings on the thunderbolt.

The object usually called a thunderbolt is formed of a long oval form in the centre ending in two plain bosses out of which flowers or buds spring forming apex and base. On either side in the field a boss.

A similar floriated fulmen is found on staters of Alexander of Epirus 342-326 B.C. and on staters of Elis 421-365 B. C.

On coins of Sicily an upright thunderbolt occurs on No 312 of B.M.C. of Syracuse Æ.

Original from CORNELL UNIVERSITY

On coins of Bruttii cf. p. 186 "Italo-Greek Coins" a foliated fulmen is seen in front of an eagle. Alexander of Epirus struck coins in Italy B. C. 332-326 B.C. and these two last coins may be influenced by his coinage.

OBOL.

Obv. Head of nymph to left wearing sphendone: border of dots.
Rev. **ΚΑΤΑΝΑΙΩΝ.** Bull butting to right; in exergue, a cray-fish.

BRONZE COINS.

Obv. [**Κ**]**ΑΤΑΝΑ**[**ΙΩΝ**]. Head of Persephone to right, crowned with barley; behind, ivy-leaf: border of dots.
Rev. Thunderbolt with curled wings.
Obv. **ΑΜΕΝΑΝΟΣ**. Young head of the river-god to left with short horns; behind, an ivy-leaf: plain border.
Rev. **ΚΑ**. Thunderbolt with spread wings.
There are three Siculo-Punic bronze coins in the Brit. Museum now arranged as Catanian which were formerly in the list of the coins of Solus. As they are of the period of decline in style, they are not here described, although they are at present placed among the coins of the Fine Art period in the Museum trays.

ERYX

IN THE FINE ART PERIOD.

No Greek Colony ever settled in Eryx, yet the barbarian citizens were influenced by Greek art and thought, as we may see in the types of their coins. The influence of the Greeks came through the allied city Segesta, whose citizens made a treaty with Athens in 426 B.C. Although the relief of Segesta was one of the aims of the great Athenian expedition the war which followed was waged far from Eryx.

After the failure of the Athenians Eryx and Segesta appear to have been controlled by the Carthaginians. Diodorus Siculus mentions a sea fight which took place off the coast near Eryx between a Carthaginian and a Syracusan fleet in the year 406 B. C., and resulted in a victory for the Syracusans (XIII, 80).

Nine years afterwards, in 397 B.C. Dionysius came into the neighbourhood of Eryx and the citizens submitted to him, but in the next year they again fell into the hands of Himalco the Carthaginian general.

Soon afterwards the war was waged in the eastern part of the island, and Eryx was probably subject to Carthaginian influence for eighteen years. In 368 B.C. Dionysius returned to Eryx and was received, but in the following year he died. Of the influence of these two ruling powers that of the Greeks alone appears on the coinage, for we have seen that the Carthaginians themselves submitted to the artistic power of their enemies and produced only Greek types.

If such was the case in regard to a great power like that of Carthage we can hardly be surprised to find the men of Eryx and Segesta welcoming Greek artists to their mints.

TETRADRACHMS 450-360 B.C.

Normal weight 264 grains.

The Catalogue of the British Museum does not contain any mention of Tetradrachms of Eryx; but since it was compiled several specimens have been procured, from the Montagu Sale in 1896. (*Num. Ch.*, 1880, 1, 2.)

I. Obv. The figure of Aphrodite seated to left clad in chiton, on her extended right hand a dove, her left hand resting on her seat. Before Aphrodite, a figure of Eros, with his hand raised to that of the goddess.

Rev. **ƎΡΥΚΑΧΙΒ** on the broad raised exergual line, Hound to right with three ears of corn behind.

II. Obv. Similar type but with the legend **EPYKINON** behind the figure of the goddess, and border of dots.

Rev. Quadriga to right, with Nike flying to left above the horses.

THE SWASTIKA.

This most ancient symbol occurs on the Reverse types of the Litrae, in the field, above a hound. The best work on this symbol is that by Thomas Wilson, in his Report of the U. S. National Museum 1894. (Cf. pp. 757-1041. Confer also "Common Greek Coins", pp. 36-42). It has been said that this symbol is especially Aryan, and is never found in any works of Semitic or Egyptian art.

If this be true then we must regard the introduction of the symbol in Sicilian-Punic Coins as a mere copy of a Greek symbol.

It is found frequently with horses and geese, and when we see it on these litra over a hound it may be merely as a symbol of good luck to the hound, the parasema of the cities Eryx and Segesta.

This symbol occurs in front of the neck of the goddess on the Punic coins of Panormus; cf. figure 4 Plate VII A. J. Evans "Syracusan Medallions". That author says (on p. 108). "At Eryx this crux gammata seems to be associated with the cult of Aphrodite."

It is however on these coins of Eryx placed over the hound, and that animal is rather associated with the parasema of Segesta and has apparently no connection with Aphrodite. If we can trace any meaning for the symbol it will be probably the same as that intended by those who placed it over horses and geese on earlier Greek vases.

APHRODITE.

The goddess represented on these coins is evidently the Greek Aphrodite; confer the notes on this subject in the chapter on the coins of Eryx in the Transitional period.

We find evidences of this cult only at Eryx, Segesta, and Panormus in Sicily. Perhaps a head of Aphrodite occurs on Bronze coins of Syracuse no. 259 B.M.Catal.

LITRA.

Normal weight 13.45 grains.

Obv. Aphrodite seated to left, wearing long chiton; her left hand resting on her seat, on her right hand a dove, with spread wings; behind, a tree: border of dots.

Rev. **EPYKINO**. Hound standing to right, with head erect; above a swastika.

N. B. Some specimens occur with the goddess seated to right.

II. Obv. Similar type but the goddess holds the dove on her left hand.

Rev. Similar to last.

OBOL.

Normal weight 11.11 grains.

Obv. **EPY KI NON**. Aphrodite seated to left, on throne, wearing long chiton, and chlamys over arms; in front Eros flying to right, holding open wreath in both hands: border of dots.

Rev. Hound to right; above, a star of eight rays, with a dot between each ray: in front a floral ornament.

III. Obv. Similar. Reverse. Hound over a hare. No 229 Adolf Holm p. 637. Imh. M. G. 2, p. 17. Plate A, 19.

HEMIOBOL.

Weight of specimen in Brit. Museum 4.7. Size .35.

Obv. Head of Aphrodite to right, wearing necklace and sphendone.

Rev. **EPY KIN ON**. A Hound to right.

(*To be continued.*)

BIOGRAPHICAL NOTICES OF MEDALLISTS

Coin, Gem, and Seal Engravers, Ancient and Modern, with References to their Works.

B.C. 500 — A.D. 1900.

(Including the names of several hitherto unpublished artists.)

One-hundred-and-sixty-seventh article.

(*Continued from col. 13795.*)

THRONUS, JACOBUS is related by Gori (*Hist. Dact.*, p. 180) to have (about the year 1557) engraved on a diamond, with admirable skill, the arms of Mary Queen of England, consort of Philip II. King states that " nothing further is known of him, but his name would lead to the conclusion that he was a Hollander ".

I suggest that there is a confusion in the name, which should probably be **JACOPO DA TREZZO.**

THÜNAU, GEORG SITTICH VON (*Germ.*). Mint-master at Ludwigstadt and Lauenstein, 1622.

THUMANN *Vide* **CASPAR THÜRMANN.** Assistant-engraver at the Vienna Mint, 1767-1776.

THUN, JOHANN JACOB (*Germ.*). Mint-master at Sondershausen 1684-1689, and later at Gotha 1691-1723. He signed **I—T** or **IT.** For Count Christian Willhem I. of Schwarzburg he coined at Sondershausen Ducat, Half Ducats, Thalers, 24, 12 and 6 Mariengroschen, Double Groschen and Groschen, which are usually signed **I T .** (E. Fischer, *Die Münzen des Hauses Schwarzburg*, Heidelberg, 1904). He also struck coins and medals for Duke Frederick II., from dies engraved by Christian Wermuth. His initials occur on coins of the Saxe-Gotha series also. Amongst his productions is a Medallic Thaler of John William, Duke of Saxe-Gotha, 1707, in which this Prince is described as Lieutenant-general of the armies of H. M. the Emperor, of the Queen of Great Britain, &c. *Med. Ill.*, $\frac{304}{122}$).

THUNDL, ACHAZ (*Hung.*). Mint-engraver at Kremnitz under Ferdinand I., after 1536. He also engraved medal-dies; amongst these a Portrait-piece of 1541 (two sizes, *one illustrated*); and Religious medals of 1538 and 1546, Christ on the Cross, and the Paschal Lamb. (*K. K. Münz-und Medaillen Stempel-Sammlung*, Pl. IX, n° 3 and 6).

Medal of Ferdinand I., 1541.

THUNDORFER, HEINRICH and his son **GUMPRECHT** (*Germ.*). Moneyers at Ratisbon 1318.

THUNDORFER, KONRAD AN DER HAID (*Germ.*). Moneyer at Ratisbon, 1339 ; Master of the Mint, 1345.

THUNDORFER, STEPHAN (*Germ.*). Moneyer at Ratisbon, 1339.

THURMANN, JOHANN CASPAR. *Vide* **THIRMANN** *supra.*

THURSO, MATHIAS (*Germ.*). Contracted to work the mint at Skotschau, 1622.

THURY, or **TUREY, HUGUET** (*French*). Mint-master at Grenoble, appointed on 26. November 1543 for a period of four years. He was in office until March 1547. He coined Douzains à la croix blanche, Liards au dauphin, and Doubles tournois of Henry II.

BIBLIOGRAPHY. — Roger Vallentin, *Les Différents de la Monnaie de Grenoble*, Ann. num. 1894, p. 349.

THYRSOS. This signature occurs on a paste, formerly in the De Thoms collection, showing an altar and eagle.

THYVOYON, LEOPOLD (*French*). Medallist of Nancy, XVIII. Century. (Rondot and H. De la Tour, *Graveurs et Médailleurs*, p. 358).

T: I. *Vide* **THOMAS ISENBEIN.** Mint-master at Bremen, 1. November 1634 to 27. March 1669.

T. I. *Vide* **TIMOTHEUS IWANOFF.** Medallist at St. Petersburg, in the second half of the eighteenth century.

TIBERGHIEN, PIERRE JOSEPH JACQUES (*Belg.*). Engraver and Goldsmith of Ghent, born at Moenin, near Courtrai, on 30. July 1755, died at Ghent on 9. December 1810. He was apprenticed to a Goldsmith of Courtrai of the name of Nolf, and also studied drawing and even painting at the Art schools of his native city. He however found engraving and chasing a more congenial branch of study, and at this period of his career cut a number of artistic seals, among which one for the Corporation of Physicians of Courtrai. After some years Tiberghien went to Antwerp and found work with a distinguished Goldsmith, Verbert, a Director of the Academy, who developed in him a taste for classical forms. From Antwerp the artist moved on to Ghent where he definitely settled down. His first work there was a very fine wire-work railing for the front of the choir of the Church of Baudeloo, which attracted the attention of the Governor-General, Prince Albert of Saxe-Teschen.

Tiberghien's work in the various branches of art has been described and published in the form of three Albums, by his friend and pupil, Lievin De Bast, 1811. His medallic productions consist chiefly of engraved medals granted as Prizes by the Ghent authorities. None of them were struck, but all engraved by hand. M. Jean Justice has compiled a list of them, on which is based the following: Undated. Uniface medal, A flaming heart; above, the Holy Dove, etc. ; — Piety seated facing; St. Michael on horseback spearing the Dragon ; — AEN HET SCHOONSTE WIJF Mercury flying to r. placing a crown upon three superposed cages containing birds ; ℞ AEN DEN SCHOONSTEN MAN Two Genii, &c. ; — Prize medal : SOCIIS RHETORICES &c. ; — Prize medal for Poetry, with bust of Maria Theresia ; — Prize medal for Rhetoric, with bust of Maria Theresia ; — Medal Portrait of Leopold II. ; — République française ; ℞ Respect à la loi ; — Ticket, Messager de l'Adm : Mun : du Cant : de Gand ; — Force à la loi ; ℞ Greffier du Tribunal civil ; — Ticket, Commissaire de police ; — 9. Aug. 1789. Arcubus et Musis junctis &c. ; ℞ Phanori Soc : Font : Gand &c. ; TRIUMPHUS AMICITIAE ; — 1791. Medal of the Ghent School of medicine, presented to Jos. Franc. Kluyskens ; — 29. May 1792. Archery Prize medal to P. F. Cnockaert; — 1792. Ghent Academy ; Prize of Painting to Joseph Bailly ; — Christ receiving children brought to Him by a woman ; — 25. Aug. 1793. Medal of the Confraternity of St. Anthony to one of its members, J. B. Hellebaut ; gold ; signed **T** ; — 1794. Ghent Academy of Commerce ; — 1795. As last ; — Medal of the Ghent School of Medicine, ARTIS OBSTETRITIAE PRAEMIUM ; — 30. March 1796. II. Prize of the II[nd] Class, to J. B. Goetghebuer; — 28. June 1796. Prize Medal for Agriculture (at least two known) ; — 1796. Prize Medal for Music, to J. B. J. Hofman ; — 1797. Prize Medal for Rhetoric ; — 30. Sept. 1798. Medal " Aux artistes dramatiques et patriotes de Gand ; — 13. July 1809. Prix attribué au plus riche tableau &c ; — 4. Aug. 1800. Prix d'honneur, Fête sur la plaine St. Pierre ; — 13. Aug. 1800. Medal of the Mayor of Ghent ; — 31. March 1801. I. Prize for Reading ; — 14 July 1801. I. Prize for Modelling ; — 14. July 1801. I. Prize for Architecture ; — 25. July 1802. Prize for Painting, to Corneille Cels ; — Prize for Sculpture, to Jean Robert Calloigne ; — 1802. Prize for Drawing ; — Prize of the Directors of Ghent Academy, to Ferdinand Bral, architect ; — Prize for Drawing, Munificence municipale ; — I. Prize for Arithmetic, to P. J. Goetghebuer ; — 1803. Encouragement Prizes (several varieties) ; — 2. December 1804. Coronation of Napoleon I. ; Public Rejoicings at Ghent (several varieties, with

different names of recipients); — Prize Medals for Competitions in Archery, Rhetoric, Painting, Sculpture, &c.; — 1805. Medal presented to Lievin Bauwens, manufacturer &c.; — 16. August 1806. La Confr. de l'Arc, to C. Heyman, NULLA DIES PACEM &c.; — 1806. Les Confrères de l'Arc présentent à ceux de l'Arquebuse ce gage d'union et d'estime; — I. Prize for Reading, Ecoles prim. de la ville de Gand; — 5. July 1807, Société de l'Arbalète à Alost; — Obv. as last; Rℒ Prix d'honneur décerné à la Société de Bruges; — 2. August 1808. Prize for Architecture, to Louis Roelandt, of Nieuport; — 25. August 1808. Æ Medal for Archery, given to Count Jos. Dellafaille, mayor of Ghent; — Another, to J.B. de Rouck, Roi jubilaire XXI janv. MDCCCIX; — 6. February 1809. Prize Medal of the Botanical Society, to L. Le Bègue; — Similar, to T. du Colombier; — 8. October 1809. Uniface medal of the Society of St. George of Ghent; two varieties given to Js van Santen, and J. Roelants; — April 1810. Rejoicings at Ghent in connection with Napoleon I.'s marriage with Marie Louise of Austria; NEAPOLEONIS GALL. &c.; — Another, DE LEUR UNION NAITRA LE BONHEUR DE LA FRANCE ET DE L'AUTRICHE &c.; — 7. Aug. 1810. The pupils of the School of Architecture to P. J. Goetghebuer; — 1810. Public Festivals at Ghent in connection with Napoleon's Marriage: Rℒ COURONNEMENT DE NAPOLEON I &c.; (2 var.; one given to Blaise Déjourné); — 15. Aug. 1810. Elementary School of Medicine of Ghent; Prix des accouchements décerné à J. B. Bruggeman; — 1810. Prize medal for Drawing, SALON D MDCCCX.

At the Fine Arts Exhibition, which was opened at Ghent on 30. July 1810, Tiberghien exhibited a fine series of medals engraved by him.

Tiberghien was entrusted in 1810 with the building of the Triumphal Arch which was erected at Ghent to celebrate the arrival in that city of Napoleon I. and Marie Louise, 17. and 18. May 1810. This was one of his last important undertakings, as he died on December 9 of that year, at the age of 55. He was one of the Directors of the Academy of Drawing and Director of the Classes of Engraving of the Ghent Society of Fine Arts.

TIBS, T. (*Brit.*). According to the compilers of *Medallic Illustrations of British History*, "an English Medallist, whose works appear to extend from about 1727 to 1745. No particulars are known of this artist; his medals are of very inferior workmanship". His signature **TT.** occurs on a Coronation medal of George II., 11. October 1727; — **T. T.** on a Coronation medal of Queen Caroline; — **T. TIBS F.** on a Medal of the Platonic Society, 1730, with a terminal bust of Plato; — **T** (possibly meant for Tibs) on a Vernon medal, Capture of Porto Bello, 1739; — Battle of Dettingen; Bust of George II.; Rℒ Justice trampling upon Tyranny (*Med. Ill.*, II $\frac{378}{215}$).

BIBLIOGRAPHY. — Hawkins, ed. Franks and Grueber, *Medallic Illustrations, &c.*

TICCATI, GIROLAMO (*Ital.*). Sculptor, Architect, and Medallist of the first three decades of the eighteenth century, died at Florence in 1734. His initials **GTF** or also **HTF** (Hieronymus Ticcati) occur on medals. By him are Portrait-medals of Dr Lorenzo Bellini, of Florence (2 varieties, of which one is represented in the Boston Collection, signed **G. TICCATI**; — Julio Bened. Lorenzini; — Antonio Magliabecchi, the famous librarian of the Tuscan Grand Ducal Library.

BIBLIOGRAPHY. — Bolzenthal, *op. cit.* — Nagler, *op. cit.*

TIECK, FRIEDRICH (*Germ.*). Sculptor, born on 14. August 1776 at Berlin, died on 14. May 1851; pupil of Bettkober (1789-94), and Schadow (1797); brother of the well-known Poet. He visited Dresden, Vienna, Munich, and Paris, where he remained for three years with David, and won the second Prix de Rome. Goethe, Madame de Stael and the Bavarian Crown Prince employed him on sculptural work. In 1819 he returned to Berlin and became a member of the Council of the Academy.

His statues of Iffland, Schinkel, and numerous busts of contemporary celebrities are justly renowned.

During his residence at Weimar (1810) he modelled a large medallion on the Completion of the Castle, with bust of Duke Charles Augustus; and another on the Marriage of the Hereditary Prince, executed in the old Italian style.

TIEDEMANN, KONRAD (*Germ.*). Mint-warden at Crossen, 1674.

TIEFFENAU, RENNWARD GÖLDLIN VON (*Swiss.*). Mint-master at Lucerne, 1826-1847; he coined 1837-1839, and again 1841-42 for Tessin; died 12. March 1866.

TIELE, JOACHIM (*Germ.*). Mint-master at Lübeck, 1549; †1558.

TIERNA, FRIEDRICH VON (*Austr.*). Mint-master at Vienna, 1346, 1351. Father of Jans and Jakob von Tierna.

TIERNA, or **TIRNACH, JANS VON** (*Austr.*). Mint-master at Vienna, 1354-56, 1358-1360, 1362-1370.

TIERNA, or **TYRNA, JAKOB VON** (*Austr.*). Mint-master at Vienna, 1372, 1373.

TIERNA, JOHANN VON (*Austr.*). Mint-master at Vienna, 1377, 1378; died in 1388.

TIERNY, or **TIERNEY**, The Right Hon. **GEORGE** (*Brit.*). Deputy Master of the Mint under George IV., 1828. He it was who appointed Benedetto Pistrucci Chief Medallist with a salary of 350 l. per annum.

TIFALDI, C. (*Ital.*). This signature occurs on a Scholastic Prize Medal of Naples, 1867, with bust of Dante.

TIFFANY & Co. (*Amer.*). A famous firm of Silversmiths of New York, with branch houses in London, and Paris. The founder, Charles Lewis Tiffany, a Goldsmith, was born at Killingly (Connecticut), and died in 1902. First employed in his father's manufactory, he founded in 1837 a business of fancy goods at New York, to which he added later curios, Oriental goods, Bohemian crystal ware, porcelain and diamonds. The firm became renowned for the sale of plate.

C. L. Tiffany's son, Lewis Comfort Tiffany, who was born in New York in 1848, devoted himself to painting. He also distinguished himself in decorative art and has executed numerous designs for the Glass Works which he founded in 1879.

Messrs Tiffany have edited a number of medals, amongst which I have noted: Gold medal granted by the New York Chamber of Commerce and Citizens for services rendered in laying the Telegraph Cable between Europe and America, 1858; — 4th Centenary of the Discovery of America by Christopher Colombus, 1893 (designed by James H. Whitehouse; engraved by William Walker; illustrated in *Numismatic Circular*, II, 929); — Dr E. K. Kane (2 var.); — Nurses' Training School, Newport R. I. Hospital (*Amer. J. of N.* 1358-59); — 150th Anniversary of the Capture of Luisburg by American troops, 1895; — Grant Monument Medal, 1897; — Greater New York Medal, 1898.

At the New York International Medallic Exhibition 1910, Messrs Tiffany & Co had on show: Al Héroe de la Paz, estado de Chihuahua; — Jamestown Tercentennial Exhibition medal; — Peter Stuyvesant medal; — Edgar Allan Poe Centenary medal; — Commander Robert Edwin Peary; — The Hubbard medal, etc.

TILE, JOACHIM (*Germ.*). Mint-master at Lübeck, 1549; privy mark, a dog's head. *Vide* Madai, Thaler Cabinet, nos 4979, 4982, etc.

TILGER, GEORG (*Germ.*). Goldsmith of Munich, circ. 1554; Mint-warden there, 1569. (Kull 581. XIX 25. K. Hauptmünzamt, München).

TILL, WILLIAM (*Brit.*). Father of William Till, the coin-dealer and numismatic writer. He was a wine and spirit merchant, and the proprietor of the Red Lion Inn at Slough. A Farthing token issued by him reads on obv. HALFPENNY TOKEN. SLOUGH. BUCKS * RED LION INN *. Lion rampant to left; Rℒ. Shield of arms, with motto PRO REGE ET PATRIA 1794, and W. TILL. WINE & SPIRIT

MERCHANT *. Several varieties exist of this token, of which proofs in gold and silver were also struck.

TILL, WILLIAM (*Brit.*). Son of the preceding; coin-dealer and Numismatic writer; died in 1844. His place of business at 17 Russell St., Covent Garden, was a famous relic of the past, as it was originally "Tom's Coffee House", and the tables on which he exhibited his coins were those that were used by the best political, literary, and theatrical celebrities of the eighteenth century.

Wm Till was the grandson of William Till, the proprietor of the once famous Windmill Inn at Salthill (who died in 1764).

He was one of the founders, and an original member of the Numismatic Society of London, (1837), and a contemporary of Wm Wyon R. A., Benjamin Wyon, Leigh Sotheby (a member of the firm of "Sotheby's"), Matthew Young, Charles Roach Smith, Edward Hawkins, and other famous artists and collectors.

Wm Till is the author of "An Essay on the Roman Denarius and English silver Penny", London, 1837. He issued Penny and Halfpenny Tokens, 1834 and 1839, which were engraved by W. J. Taylor.

On his death, he was succeeded by his nephew, William Webster, whose son Mr. Wm J. Webster is the well-known numismatist, and my esteemed colleague in the firm of Spink & Son, Ltd.

TILLESWORTH, WILLIAM (*Brit.*). A London Goldsmith; Mint-Master to the Archbishop's Mint, Canterbury, temp. Henry VIII.

"Amongst the manuscripts in the Lambeth Library is preserved an indenture between Archbishop Cranmer and William Tillesworth, of London, Goldsmith, in the 25th year of Henry VIII. By that instrument the archbishop appointed the said William to be master and worker of his monies of silver within the mint of Canterbury; and Tillesworth engaged to make three sorts of monies. viz. the halfgroat, the penny or sterling and the halfpenny, according to the terms of the indenture, which were the same as that of the 18th of Henry VIII.

"For the coinage of every pound troy the master was to take twelve pence by number, out of which he was to pay to the archbishop one penny, and to retain to himself eleven pence for wages and all other charges.

"If upon the trial of the pix it was found that the standard was not kept, the master was to make fine and ransom to the archbishop, at his will. He took an oath to the archbishop for the performance of covenants, and bound himself, his heirs and executors, by the present indenture.

"Respecting his transactions with the merchants, on account of bullion, he gave security, himself in four hundred marks, and four borrowes in one hundred marks each". (Ruding, *Annals*, etc., II, p. 182).

The initial **T** occurs, amongst others, on both sides of a Half-Groat of Henry VIII. issued by Archbishop Wareham, at Canterbury.

TILLET (*French*). Général des Monnaies, 1598.

TILLET, TITON DU. *Vide* **TITON DU TILLET** *infrà*.

TILLMANN, SAMUEL (*Swiss*). Goldsmith of Berne; † 11. December 1572. In 1554 he cut for the City Mint 12 pairs of coin-dies. (*Schweiz. Künstler-Lexikon*).

TILLY, CATHERINE DE (*Flem.*). Widow of Antoine de Laderrière, acted as Master of the Mint at Bruges, from 4. January 1690 to 3. July 1700.

TILLY, JEAN DE (*Flem.*). Mint-master at Bruges, 4. November 1513 to 8. May 1518.

TILLY, MAHIEU DE (*Flem.*). Mint-master at Ghent, 9. July 1489 to 2. December 1490; then at Bruges, 21. April 1492 to 10. July 1493, and again from 20. November 1493 to 14. May 1496 in conjunction with Pierre Michiel.

TILLOY, JEAN BAPTISTE (*French*). Sculptor of the second half of the nineteenth century; born at Berzieux (Marne). He exhibited at the Paris Salon the following Portrait-medallions in bronze: 1868. M. Boucher d'Aubanel; 1868. M. Legrand; — 1869. M. A. de Haussy; — Abbé Turquet, doyen de Péronne; — 1870. M. Tilloy, etc.

TIM.REF.MANT. Signature of Timoteo Refati, a Mantuan Medallist, of the second half of the sixteenth century. *Vide* Vol. V, p. 56; also *Armand*, I, 236; III, 113.

TIMOθEI, IVANOFF. *Vide* Vol. III., p. 37. Russian Medallist, 1729-† 1802.

TIMP, SIMON. *Vide* **SIMON TIMPFE.**

TIMPFE (*Germ.*). The name of a family of Mint-officials, several of whom filled offices as Mint-masters in various cities, during the seventeenth century.

1. SIMON TIMPFE Senior

2. THOMAS 3. SIMON Junior 4. SAMUEL 5. PETER

6. ANDREAS 7. THOMAS

BIBLIOGRAPHY. — M. Bahrfeldt, *Beiträge zur Münzgeschichte der Lüneburger. Lande*, 1893. — Chr. Lange, *Sammlung schleswig-holsteinischer Münzen und Medaillen*, 1908. — *Berliner Münzblätter*, 1896, 2096. — Jorgensen, *Danske Monter*, 1888.

TIMPFE, ANDREAS. The name also occurs as Timpe Son of Samuel Timpfe, who was Mint-master at Rostock. On 21st June 1643 he was appointed Mint-master at Lüneburg, resigned this post in 1649, and at first went to Stade, where he took the place of his relative Peter Timpfe. In 1650 he is said to have been Mint-warden at Rostock, and Mint-master there 1659-1660 (Evers, *Mecklenburgische Münzverfassung*, 1888).

M. Kirmis, *Handbuch der polnischen, Münzkunde*, states that Andreas Timpfe played an important role in the mint annals of Poland. From 1650 to 1660 he was Contracter and Mint-master of the mints of Fraustadt and Posen, 1659 General administrator of the Krakau mint and Superintendent of all the mints of the Crown. In 1660 he called to Posen his brother Thomas, who on 1. October undertook the working of the mint at Bromberg. In 1661 Andreas Timpfe contracted for the mint of Krakau, erected a Mint at Lemberg, coined at Lemberg, Krakau and Bromberg the Gulden pieces named after him, and in 1667 left Poland. He first went over to Pomerania, but his further whereabouts are unknown.

TIMPFE, DANIEL (*Germ.*). Mint-master at Posen, 1655.

TIMPFE, JOHANN (*Germ.*). Mint-master at Fraustadt, 1655.

TIMPFE, PETER (*Germ.*). Son of Simon Timpfe the Elder, administered the Mint at Gottorp under his brother Samuel's supervision from 31. December 1622, and succeeded to the latter. He was appointed Mint-master at Rostock on 7. October 1625 and coined there until 1635 (Bahrfeldt).

A good deal of confusion has arisen in conjunction with the identity of the various members of the Timpfe family. Schlickeysen-Pallmann are responsible for erroneous information, the names of Simon Timpf, Samuel Timpf and Samuel Timphe being introduced in their 'Münz-Abkürzungen', notwithstanding the fact that M. Bahrfeldt in his "Beiträgen zur Münzgeschichte der Lünburgischen Lande im ersten Drittel des XVII. Jahrhunderts" has devoted five pages to the engravers of the name of Timpfe. *Vide* also *Berliner Münzblätter*, n° 188, 1896, col. 2020-21.

Peter Timpfe signed **P** or **PT** (monogram), also **P T** or **P.** These marks occur on coins of Duke Frederick of Schleswig-Holstein up to 1636. From 1640 to 1641 he was Mint-master at Stade, and from 1641 to 1643 Mint-master at Vörde for the Archbishop of Bremen. After the fall of Bremen to Sweden, Peter Timpfe was installed by the Swedish government as Mint-master at Stade, 22. March 1649, and definitely appointed by Queen Christina on 8. September 1649. Not long after he became ill, and his nephew Andreas took his place. He died towards the end of 1653.

TIMPFE, SAMUEL (*Germ.*). Son of Simon Timpfe the Elder; was installed Mint-master at Burg on Fehrmarn Island on 10. September 1617, and transferred on 4. December 1620 to the Mint at Steinbeck near Hamburg. He apparently resigned his post in 1628,

and was succeeded by his brother Peter, who had been administering under Samuel's responsibility the mint at Gottorp since 31. December 1622, for Duke Frederick of Schleswig-Holstein. On 25. August 1635 he was appointed Mint-master at Rostock, and remained in office until 1635. He signed **ST** or **ST** (monogram). He died at Güstrow, 1656.

His monogram occurs on Thalers of Frederick III. of Schleswig-Holstein, 1622 and 1626.

TIMPFE, SIMON the Elder (*Germ.*). A native of Minden; Mint-master at Hanau 1607-1611; appointed in 1611 Mint-master to the Archbishop of Bremen at Vörde (Bremervörde), 1612 also Mint-master at Burg on Fehrmarn Island for the same ruler. In 1614 he undertook the city mint of Stade, still retaining office at Vörde, and at Burg, until 1616. On 19. September 1615 he was appointed by Duke William of Brunswick-Lüneburg as Mint-master for a period of six years at the newly erected mint at Hærburg, upon which he resigned his post at Stade. On 1. October 1619 he retired from work altogether on account of old age, and died in 1621. He never signed **S. T.** as implied by Schlickeysen-Pallmann, but had for privy-mark the sign ᛉ. It is not known where Simon Timpfe was officiating previous to 1607.

TIMPFE, SIMON (*Germ.*). Son of Simon Timpfe senior; resided first at Harburg; in 1623 he applied for the post of Mint-master at Winsen, but was unsuccessful; appointed on 12. October 1627 Mint-master to Anna, née Countess von der Mark, Abbess of Thoren, and on 15. May 1628 Jüliers-Berg Mint-master. From 1640 to 1643 he filled the office of Mint-master at Glückstadt; 14. May 1645 to 1646 Mint-master at Ratzeburg for Duke Augustus von Lauenburg; and 31. December 1647 to 1650 Mint-master at Wismar, but did not coin there. Simon Timpfe never signed **S. T**, but his usual privy-mark was a heart adorned with two sprigs of laurel.

TIMPFE, THOMAS (*Germ.*). Son of Simon Timpfe the Elder; was assisting his father in his office at the Mint since 23. December 1618. On 1. October 1619 he was appointed Mint-master at Harburg for the rest of the six years' contract of his father's, and retained his post until 1. April 1625. In the meantime he also worked for Johann Friedrich, Archbishop of Bremen, at Vörde 1618-1620, for the Cathedral chapter of Verden, 1620, and for Duke Augustus Junior at Hitzacker, 1623. He unsuccessfully applied in 1627 for the office of Mint-master at Winsen, but nothing further seems to be known about him.

TIMPFE, THOMAS (*Germ.*). Brother of Andreas T., and son of Samuel T. In 1660. he petitioned the Rostock city council to have the seals removed from his brother's property.

TIMPKE. *Vide* **TIMPFE.**

TIOLIER, NICOLAS PIERRE (*French*). Son of Pierre Joseph Tiolier, born in Paris in 1784. Sculptor, Gem-and Coin-engraver, and Medallist. He was appointed Engraver-general of the coins on his father's resignation in 1816, and remained in office until 1843. He died on 25. September 1853. His signature on medals occurs as **N. TIOLIER F.**; **N. P. TIOLIER F.**

N. P. Tiolier was a pupil of his father, and of Jeuffroy, and Dejoux. In 1805 he obtained the First Grand Prix for "Le Génie de la gravure présentant un cachet à l'Empereur qui lui donne une couronne." In 1824 he won a Medal of the Second class; was knighted on 23. April 1821, and promoted to the rank of an Officer of the Legion of Honour on 31. July 1825.

The following exhibits by the artist at the Paris Salon are recorded by Chavignerie et Auvray: — 1812. A frame containing several medals, cameos and intaglios; — 1814. Impressions of the Great Seal of H. M. the Emperor, and two others of the Privy Seal; — Impressions of medals, jetons, and engraved stones (one of the Jetons representing the principal façade of the Bourse); — 1817. A frame containing various patterns of medals and jetons; — 1819. A similar exhibit; — 1822. La Force asservie par l'Amour; — Un jeune faune jouant de la flute; — A frame containing a number of wax models; — A frame of medals, jetons, engraved stones and coins; — 1824. A frame containing models in wax, medals, jetons, and engraved stones; — A large sketch in wax (a rough draft for the Inauguration medal of the new Bourse at Paris); — Portrait of Duvivier, late Mint-engraver general; — Bust of Antoine, architect; — 1827. A frame containing models in wax, one of which represents the Great Seal of France, and an impression of the same Seal; — A frame of medals, jetons, and engraved gems; — 1831. A frame containing the Seals of France, impressions of coins and medals; — Virgin and Child, marble group.

Amongst the coin-dies engraved by N. P. Tiolier I have noted the following: Pattern *Æ* 40 Francs (2 var., crowned and uncrowned head), and *Æ* 5 Francs (2 var.) with crowned bust of Louis XVIII., dated 1815, but issued for the Competition of 2. August 1814 on the first Restoration (Dewamin, *Cent ans de numismatique française, de 1789 à 1889*, Paris, 1889; Pl. 39, 9-10; 40, 11-12). These are signed: **N. TIOLIER F.** *Louis XVIII., Second Restoration*: Quarter Franc 1816-1824, signed *T*r (the mark of P. J. Tiolier); — 1817. Pattern ½ Franc, 10 Centimes, 5, 3 and 2 Centimes; — Pattern 10 and 5 Centimes 1817, 1821, by Michaut, with *N. Tiolier* on ℞; — Medallic 5 Franc pieces on the Visit of the Duchesse d'Angoulême to the Paris Mint, 25. April 1817 (signed: *N. Tiolier* on truncation); — H. E. Count Corvetto, Finance Minister, 1817 (signed: *N. Tiolier*; — Visit of the Duc d'Angoulême to the Mint of La Rochelle, 6. November 1817; — The Duc and Duchesse de Berry visit the Paris Mint, 18. November 1817 (and 2 Franc piece on same event with bust of Louis XVIII.); — Charles Philippe de France visits the Paris Mint, 11. June 1818; — H. E. M. Roy, Secretary of State &c., 1820 (*N. Tiolier*); — The Prince and Princess of Denmark visit the Paris Mint, 17. April 1822 (2 Franc size). — *Charles X.* Pattern 40 Francs, 1824, signed: *N. Tiolier* (*Dew.* Pl. 45, 11); — Pattern 5 Francs, 1824 (*Dew.* Pl. 46, 14 and 16); — Undated Patterns for 100 Francs, and 10 Francs (*T*r; *Dew.* Pl. 47, 2 and 7); 5 Francs, 1824 (*N. Tiolier*; *Dew.* Pl. 47, 9); Æ Pattern 10 Centimes, undated (2 var.; signed: *N. Tiolier*); Æ Pattern 5 Centimes and 2½ Centimes (*Dew.* Pl. 47, 11-14); — Pattern *Æ* 5 Francs 1824, by Michaut (with *T*); — Medallic 5 Franc piece on the Visit of the Prince of Salerno and the Duchess of Berry to the Paris Mint, 22. July 1825 (*N. Tiolier*); — Visit of H. M. Charles X. to the Mint at Lille, 8. September 1827 (*N. Tiolier*); — Visit of the Duke of Bordeaux to the Paris Mint, 24. December 1828); — Visit of the King and Queen of the Two-Sicilies to the Paris Mint, 11. June 1830 (*Dew.* Pl. 49). — *Louis Philippe I.* Pattern 5 Franc pieces 1830 (several varieties; *Dew.* Pl. 51, 3 6); — The current

Five Franc piece 1830, by N. Tiolier.

5 Franc pieces 1830 (2 var. one with LOUIS PHILIPPE &c. (*illustrated*) and the other with LOUIS PHILIPPE I; signed: **N. TIOLIER** on truncation); — *Æ* 20 Francs 1831; *Æ* 1 Franc 1831 (*Dew.* Pl. 51, 7-10); — Pattern 100 Francs 1831 (*illustrated*); — Pattern 5 Francs 1831, with CINQ | FRANCS 1831 on ℞ (*Dew.* Pl. 53, 10);

Pattern 100 Francs, 1831.

— Various Patterns, with obv. head of Louis Philippe, by N. Tiolier, and on Rℒ. Inscriptions commemorative of Tonnelier's press being introduced at the Paris Mint, dates 1833, 1839, 1840 1845 (*Dew.* Pl. 56, 10-15; *one illustrated*).

Trial piece with Thonnelier's coining press, 1833.

Besides these coins, *A* Tiolier was responsible also for the dies bearing as privy-mark a horse's head (under Louis XVIII), *T*, or a star (under Louis Philippe).

Amongst N. Tiolier's medals I may mention : Portrait-medal of P. J. Tiolier, his father, 1823; — Masonic Medal of the Loge d'Anacreon O.·. de Paris (signed : **N**.·.**TIOLIER**.·.; *Marvin.* p. 64, CXXXVII); — Camille Beauvais, 1835; — A. L. Girodet-Trioson, painter; — A. F. Michallon, painter, 1823; — Saint-Etienne to Lyons Railway, 1826 (*Moyaux*, 105); — French Imperial Academy of Fine Arts at Rome, 1808; — Birth of the King of Rome, 1811 (in conjunction with Galle); — Visit of the Empress Marie-Louise to the Paris Mint, 1812; — Raphael, 1812; — J. B. Regnault, 1812; — Agents de change of Paris (octagonal jeton), 1813; — Silk brokers of Lyons (oct. Jeton), 1814); — King Murat visits the French Imperial Academy of Fine Arts at Rome, 1809.

The State seals of Napoleon I., 1814, Louis XVIII. and Charles X. were engraved by N. P. Tiolier.

BIBLIOGRAPHY. — Dewamin, *op. cit.* — Chavignerie et Auvray, *op. cit.* — N. Rondot & H. de La Tour, *op. cit.* — Bolzenthal, *op. cit.* — Marvin, *Masonic Medals*, 1880. — E. Faivre, *État actuel des Ateliers monétaires français et leurs différents*, Paris, 1895. — Bramsen, *Médallier Napoléon le Grand*, 1907. — E. Edwards, *The Napoleon Medals*, 1837.

TIOLIER, PIERRE JOSEPH (*French*). Medallist and Coin-engraver, born in London in 1763 : appointed Engraver-general of the French coins in March 1803, and resigned his office in 1816. He died in 1819 at Bourbonne-les-Bains.

He was a pupil of his brother-in-law, Benjamin Duvivier. In 1816 he was awarded the cross of St. Michel.

There is a Portrait-medal of him by his son, 1823.

The coins of Bonaparte, as First Consul, appear to be all his work. His full signature is retained on the subsidiary currency of the First Empire, whereas the gold coinage and 5 Franc pieces, the dies of which were cut by other engravers, only bear *T*ʳ.

From Dewamin I have been able to reconstitute the following list : *Bonaparte, Premier Consul.* An II (22. Sept. 1802 to 21. Sept. 1803). Pattern 20 Francs (*Dew.* Pl. 28, 2-3); Uniface Portrait-piece, bust laureated, lion's skin around neck (*Dew.* Pl. 28, 8); — Pattern

5 Francs of Bonaparte, Premier Consul, An XI.

40 Francs, unsigned (*Dew.* Pl. 28 12); — Pattern 5 Francs, AN XI; signed : **TIOLIER. F.** (*Dew.* Pl. 30,9). Current coinage of An XI : *A* 40 and 20 Francs; *A*R 5 Francs (*illustrated*), 1 Franc, and Demi-Franc. Two sizes of the 5 Franc piece of that date exist. All these are signed : *Tiolier*. Also of the same date : Pattern 5 Francs commemorative of the Visit of the First Consul to the Paris Mint; signed : **TIOLIER. F.**, and Uniface Pattern for Rℒ of 1 franc piece (*Dew.* Pl. 31, 1-6); — An 12. *A* 40 and 20 Francs; *A*R 5 Francs, 1 and ½ Franc of types of An XI; *A* 20 Francs; 5 Francs (2 var.; one with Bonaparte Premier Consul, signed *Tiolier*, and the other with Napoleon Empereur, and signed : **TIOLIER. F.** on truncation); 2 Francs (2 var.); 1 Franc; Demi-Franc (2 var.); Quart (2 var.); all signed *Tiolier* (*Dew.* Pl. 32, 1-10). The varieties are distinguished by the earlier bearing the title of BONAPARTE PREMIER CONSUL and the later NAPOLEON EMPEREUR; — An 13. *A*R 2 Francs, 1 Franc, ½ and ¼ Franc of preceding types, with NAPOLEON EMPEREUR and REPUBLIQUE FRANÇAISE; *A* 40 and 20 Francs, by J. P. Droz, signed *T*ʳ beneath bust; *A*R 5 Francs, by Brenet; signed *T*ʳ, with bare head of Napoleon I. (*illustrated*); — An 14 (22. Sept. to 31. December

Obverses of Napoleon I, 5 Franc piece, by Brenet, (bearing also Tiolier's signature).

1805). *A* 40 and 20 Francs; *A*R 5, 2, 1, ½ and ¼ Franc of types of An 13. I give these on the authority of Dewamin, but I have never come across any coins of that date. — 1806. *A* 40 and 20 Francs, by Droz; *A*R 5 Francs, bare head, by Brenet; 2, 1, ½ and ¼ Franc (*Tiolier*); Medallic 2 Franc pieces on the Visit to the Paris Mint of the Prince of Bavaria, 3. March 1806 (**TIOLIER. F.**), and of the Prince of Baden, 5. April 1806 (unsigned). — 1807. *A* 40 and 20 Francs, bare head, and laureated, by Droz (with *T*ʳ beneath bust); *A*R 5 Francs, bare head, and laureated, by Brenet (with *T*ʳ; *illustrated*); 2 Francs, 1 Franc, Demi-Franc, and Quart (two types; the one so-called 'Tête de nègre', with bare head of the Emperor, and the other with laureated head; all signed : *Tiolier*). Also Pattern 2 Francs, *Tiolier* (*Dew.* Pl. 34, 17). — 1808. *A* 40 and 20 Francs; *A*R 5, 2, 1, ½ and ¼ Francs, all with laureated head, of 1807 type. — From 1809 to 1814 all the above denominations were issued each year, except 40 Francs of 1814, and Quarter Francs of 1810, 1811, 1812, 1813 and 1814. — In 1808 Pattern 10 Centimes in billon, and 5 Centimes in copper (2 var.) were also engraved by Tiolier, whose signature they bear. A similar 10 Centimes was issued for currency in 1809. Tiolier engraved also in 1809 medallic 2 Franc pieces commemorative of the Visits to the Paris Mint of the King of Saxony, 7. December 1809, and King of Wurtemberg, 27. December 1805 (*Dew.* Pl. 35, 11.12). — *Louis XVIII. First Restoration.* 1814. *A* 20 Francs, and *A*R 5 Francs, the former signed *Tiolier* beneath the bust, and the second **TIOLIER. F.** on truncation; Medallic 5 and 2 Franc pieces, struck in honour of Alexander I. of Russia, Au Pacificateur de l'Europe; Francis I. of Austria, Ange de Paix; Frederick William III. of Prussia, Ange de Paix; all dated April 1814, and signed *Tiolier* (*Dew.* Pl. 38). *A*R Medallic 5 and 2 Franc pieces on the Visit of the Duc de Berry to the Mint at Lille, 5. August 1814, and of Monsieur Comte d'Artois to the Mint at Marseilles, 4. October 1814; — 1815. *A* 20 Francs, and *A*R 5 Francs, of 1814 type. It is possible that the dies of Louis XVIII.'s first coinage may have been prepared by Pierre Joseph Tiolier's son, Nicolas Pierre, with whose dies they bear a striking analogy. — *Napoleon I.* (The Hundred Days). *A* 20 Francs, by Droz; and *A*R 5 Francs, by Brenet; both signed *T*ʳ beneath bust; and 2 Franc piece of new type, signed : *Tiolier* (*Dew.* Pl. 41, 1).

P. J. Tiolier was responsible for the dies of the Napoleonic coinage of *Genoa* (**CL** and a prow, 1811-1814, i. e. from 15. November 1811 to 1814. The prow was the privy-mark of the Mint-master, Podesta); *Geneva* (**G** and a lion, from An 7 to An 12; lion,

Original from CORNELL UNIVERSITY

privy-mark of Mint-master Daubigny; — G and a fish, An 13; fish, privy-mark of Mint-master Froidevaux); *Westphalia* (J and a horse's head, Paris 1808-1809, for King Jérôme of Westphalia; horse's head, privy-mark of P. Tiolier); *Rome* (R. crowned and wolf and twins, 1811-1814; wolf and twins, privy-mark of the Mint-master, Mazzio); *Turin* (U and a heart, 1803-1814; heart, privy-mark of Mint-master Paroletti); *Utrecht* (mast and a fish, 1811-1814; mast = Utrecht mint-mark, and fish, privy-mark of the Mint-master, Dumarchis Sarvãas). The coining of the French coins at Utrecht began only on 16. November 1812 and did not last beyond 1813.

By P. J. Tiolier are also medals: Foundation of the Lodge of the French Ocean, 1798 (Marvin, p. 72, CLXV); — Charles Philippe, Comte d'Artois, Hommage de la garde nationale, 1815; — Coronation medal of Napoleon I., 1804; — Medal commemorating the French Revolution, Winged Liberty, with motto: ELLE FERA LE TOUR DU MONDE (*Trésor de numismatique, Médailles de la Révolution française*, Pl. 53, n° 6); — Prize Medal for Literature (Prix littéraire du Musée); signed: **T. F.**; — Visit of the Russian ambassador to the Paris Mint, 1801 (2 var.); — Construction of a Bridge at Dourdan, 1801; — Society for the promotion of Industry, 1802; — Jeton of the Chamber of Commerce of Rouen (octagonal), 1802; — Masonic medal of the Lodge 'Océan français', 1802; — Jeton of the Chamber of Commerce of Bordeaux (octagonal), 1803; — Medallic coins struck after Gengembre's process, 1804; — Jeton of the 'Tribunal de première instance', 1805; — Salines de l'Est (octagonal jeton), 1806; — Notaries of Château-Thierry (jeton), 1806; — Notaries of the Department of the Seine (octagonal jeton), 1806; — Notaries of Bordeaux (oct. jeton), 1806; — Avoués de la Cour d'appel (oct. jeton), 1806; — Chamber of Commerce of Bordeaux (oct. jeton), 1806; — Manufacture of the Rue Martel (oct. jeton), 1807; — Commissaires priseurs à Paris (oct. jeton), 1807; — Notaries of Clermont-Ferrand (oct. jeton), 1810; — Notaries of Meaux (oct. jeton), 1813; — Conseil de Prud'hommes à Rouen (oct. jeton), 1813; — The King and Queen of Bavaria visit the Paris Mint, 1810, etc.

BIBLIOGRAPHY. — *As before.*

TIRNACH, JANS VON (*Austr.*). Son of the Mint-master Friedrich von Tierna, and Mint-master himself at Vienna, 1354-56, 1358-1360, 1362-70, 1377-78.

T'SANTELEN, JAN (*Dutch*). Goldsmith and Seal-engraver of Oudenarde, *circ.* 1453.

TIROEN, JAN (*Dutch*). Goldsmith and Seal-engraver of The Hague, *circ.* 1433.

TISEO, ELIA (*Ital.*). Mint-master at Parma, 1644-1652. His initials **E. T.** or **ET** (mon.) occur on the coinage.

TISEO, SALVATOR (*Ital.*). Mint-master at Parma, 1673-1679. He signed **S. T.**, which initials I have noticed on a Double Testoon of Ranuzio II. Farnese of Parma.

TISNÉ, JEAN LUCIEN (*French*). Contemporary Sculptor, born at Salles-Mongiscard (Basses-Pyrénées), pupil of Mercié, and Henri Dubois.

TISSIÉ, P. (*French*). Mint-master at Angers, 1657.

TITON DU TILLET, EVRARD (*French*). Born in Paris 1677, died in 1762. His long life was devoted to letters and arts. He caused a series of medals to be struck representing Louis XIV. and the principal poets and musicians of his reign. He wrote an "Essai sur les honneurs et les monuments accordés aux illustres savants pendant la suite des siècles" (1734). But his great work was the "Parnasse français", of which he gave later a "Description du Parnasse exécuté en bronze, suivi d'une liste alphabétique des poètes et des musiciens assemblés sur ce monument" (1727). It was a mountain adorned with laurel, myrtle, and palm-trees. Louis XIV., in the character of Apollo, holding a lyre, standing on the summit, surrounded by the three Graces, shown with the features of M^mes^ de la Suze, des Houlières, and de Scudéri. Lower, on a circular terrace, stood Corneille, Molière, Racine, La Fontaine, Racan, Segrais, Chapelle, and Lully, etc. The model in bronze exists at the Bibliothèque Nationale (*Nouveau Larousse Illustré*).

T. L. *Vide* **TRUEIS LYNG.** Mint-master at Kongsberg, 1737-1770.

T. L. B. *Vide* **TITUS LIVIUS BORATYNI.** Mint-master at Warsaw, 1656-83.

T. M. *Vide* **TOMMASO MERCANDETTI.** 1760-† 1821. Roman Medallist.

TOBER, GEORG (*Austr.*). Mint-engraver at Kremnitz, 1580.

TOBERENTZ, Mrs **CATHERINE** (*Germ.*). Contemporary Modeller, born at Bradford; pupil of Rodin and Falguière. At the Salon of 1886 she exhibited two Portrait-medallions in bronze.

TOBERENTZ, ROBERT (*Germ.*). Contemporary Sculptor of Breslau, by whom are also a number of medals: Prize medal of the Industrial Exhibition at Breslau, 1881.

TOBON-MEJIA, MARCO (*Amer.*). Contemporary Sculptor, born in Columbia; pupil of Jean Paul Laurens; now residing in Genoa. He exhibited some medals at the Brussels International Medallic Exhibition, 1910, and at the Paris Salon, 1912: Femme à la cruche; — Sainte-Geneviève; — Femme de bûcheron; — Portrait; — Hope, after Watts; — Salomé; — Beggar, bronze plaquette.

TOC, JAUFFRE DEL (*French*). Mint-engraver at Montpellier, 1360-1372.

TOD, THOMAS (*Brit.*). Mint-master at Edinburgh, under King James III. of Scotland, 1476-1487. Thomas Tod and Alexander Livingstoun were the king's coiners. Their initials occur on groats of Berwick and Edinburgh. The early groats of this reign were current for 12 *d.*, but they subsequently rose to 14 *d.*

BIBLIOGRAPHY. — Cochran-Patrick, *Records of the Coinage of Scotland*, 1876. — H. A. Grueber, *Handbook*, &c.

TODA, BONIFACIUS CHRISTIAN SALVATOR (*Austr.*). Mint-engraver at Hall in Tyrol, 1761-1787; son of Josef Anton Toda; married Maria Magdalena Waldreich; was born in Vienna, but is said to have died at Hall on 26. January 1787. He was apprenticed at the Vienna Mint, which he entered on 14. June 1752; in 1759 he was transferred to Carlsburg, and on 10. June 1761 he was appointed third Engraver at the Mint of Hall, in succession to Wellisch. In June 1772 we find him at Günzburg. He died on 26. January 1787.

TODA, JOSEF ANTON, or **GIUSEPTE ANTONIO** (*Austr.*). Chief-engraver at the Vienna Mint, 1756-† 1769. Succeeded M. Donner. He was of Italian origin, and as his earliest production on record is a medal dated 1739 commemorating the triumphal entry of Francis III. as Grand Duke of Tuscany into Florence, it might be conjectured that the Engraver was domiciled at Florence at the time and learned the art of die-sinking in his own native country. His first connection with the Vienna Mint dates from about 1746, in which year he was paid, under Donner's administration, a sum of 492 fl. 43 kr. for the cutting of various seals. But he did not receive an official appointment until 1746. Two years later he was commissioned to engrave the various Transsylvanian Seals of State. On 25. February 1749, his yearly salary was fixed at 500 fl. and free lodging, etc., and on 12. September 1756 he was promoted to the office of Chief-engraver, which post he retained until his death in 1769.

The Vienna Mint-Museum preserves the following dies by Toda: Visit of Francis III. and Maria Theresia to Florence, 1739 (signed: **G. TODA. F.**); — Quarter Kreutzer, 1750; — Others, of 1759 (signed: **TODA**); — Heller (Half Pfennige) 1765 (signed: **TODA. F.**); — Coronation medal of Francis I. at Frankfort-on-M., 1745 (signed: **G. TODA. F.** on obv. and **G. T. F.** on ℞); — ℞ of Maria Theresia's Coronation medal as Roman Empress, obv. by M. Donner, ℞ IVSTITIA ET CLEMENTIA, 1745; — Restoration of Mining laws in Transsylvania, 1747 (obv. by Donner, ℞ by Toda); — Another, on the same event (signed on obv. **G. TODA. F.** and on ℞ **T. F.**); — Prize medal for the Promotion of the Mining Industry, 1765; — Victory of Prague and Institution of the Order of Maria Theresia, 1757; — Medal on the Motto of Archduke Peter Leopold of Austria (obv. by Wideman; ℞ **G. T. F.**); — Coronation of Archduke Joseph at Frankfort as King of the Romans, 1764, etc.

INDO-PORTUGUESE NUMISMATICS.

THE SILVER ISSUES OF GOA: — THE SAINT TYPE.

From the earliest period of their endeavours to reach India by sea the Portuguese were influenced by religious as well as by mercenary motives. Prince Henry, surnamed the Navigator, the early inspirer of Portuguese Voyages of Discovery, in a letter to the Pope, about A. D. 1441, expressly stated that the salvation of the people in the lands discovered was the principal object of his labours (*The Portuguese in India*, Vol. I, fo. 21, Danvers, London, 1894). Later, the celebrated bull issued by Pope Alexander VI, May 4th 1493, placed on the Portuguese the obligation to propagate the Catholic Religion in all new lands discovered as a condition of being allowed to hold such lands, on conquest, with the papal sanction and benediction (Danvers, Fos. XXXVI and 39). History shows how, in India, the Portuguese, to their cost, faithfully carried out this papal obligation. The coins issued by them from their Indian Mints also amply reflect this religious spirit. Until the introduction, early in the 18th century, of the device of the bust of the reigning monarch for the silver coinage, the coins, in all metals, invariably displayed the figure of a Saint or some form of Cross. And on the issues of the Diu Mint and on the gold pieces of Goa religious emblems were retained to the last.

When Affonso d'Albuquerque, in 1510, established, at Goa, the first Mint opened in Asia by the Portuguese, he caused gold, silver and copper coins to be issued with the Cross of the Order of Christ on one side and on the other an armillary sphere — the device of his king, D. Manoel I. Those coins were issued without any Mint-mark — there being at the time no other Portuguese Mint in India. A Mint-mark was, probably, first introduced after a Mint had been established at Cochim, in 1544, for the issue of copper bazarucos, and, in 1568, for the issue of gold and silver pieces. The earliest known silver pieces displaying the Goa Mint-mark are the Xerafim or Bastião and the half-Xerafim issued, in 1569, in the reign of D. Sebastião. The Mint-marks, subsequently adopted at the Goa Mint, are: — a wheel (roda), G A, G, GOA, D GOA and DE GOA. On some of the later tutenag issues the G is very irregularly formed and resembles J.

The issue of d'Albuquerque's silver pieces: — the Espéra and the Meia (half) Espéra — was suspended, in 1519, by order of the Governor of Goa (Aragão Document 3 of March 23 1519) and no more silver coins were struck at the Goa Mint until 1550, when the Viceroy, Affonso de Noronha, ordered the issue of silver pieces called silver S. Thomés or Patacões.

Volume 3 of Dr. T. de Aragão's great work "Moedas cunhadas em nome dos reis, &c. de Portugal", Lisbon, 1880, contains over 140 official documents relating to the Indo-Portuguese coinage. Document 16 mentions the issue, in 1550, of silver coins called Patacões and also expressly states that no silver coins were struck in Goa between 1510 and 1550. The needs of the GOA community, in the interval, were met by supplies of the home coinage of Portugal and the approved coins of neighbouring princes which the Portuguese allowed to circulate in all their settlements even in their Mint towns (Contributions to the Study of Indo-Portuguese Numismatics, Fo. 93, by Dr. G. da Cunha, Bombay, 1883).

The later silver issues of the Goa Mint are of three main types, the respective characteristic designs of which are: —

1. The standing figure of a Saint.
2. The Cross of the Order of Christ and
3. The bust of the reigning monarch.

Broadly speaking the issues of pieces of the first type continued for Goa till the year 1650 when the issues of the second type were introduced, and the issues of the third type, displacing the issues of the second type, commenced in 1726 and lasted till 1869, in which year the Mint was closed. During these three hundred and odd years a few pieces of other types were issued and, in some instances, the three principal types overlap.

The Gold issues of the Goa Mint were considered in an article which appeared in the Numismatic Circular of May 1912.

The present article is concerned only with the Silver issues of the Goa Mint having as the characteristic device a standing figure of a Saint. Whereas the gold coins displayed only the effigy of St. Thomas the effigies on the silver pieces are those of St. Sebastian, St. Philip and St. John — the name-saints of the respective kings in whose reigns the pieces were issued.

Not a single specimen of the silver issues of the reign of D. João III (1521-1557) has yet come to light and, unfortunately, documents Nos. 10 and 16, which refer to them, do not, in any way, give a clue to the type. Documents 10 and 16 shew that large silver pieces called silver S. Thomés or Patacões were issued of the nominal value of 360 reis weighing at first 27.2 grammes then only 24.3 grammes and later less. The nominal value was retained throughout although the weight and consequent intrinsic value was repeatedly lowered. As first issued, of the weight of 27.2 grammes, they were equal to the Spanish and Spanish-American Duros or Pieces of eight Rials which, in consequence of their constant purity and weight, were fast finding favour with the maritime nations of Asia. By maintaining the silver S. Thomés at a proper and fixed standard the Portuguese, with their monopoly of the sea-borne Asiatic trade, could have made those pieces the regular medium of barter throughout the East. But instead they helped to establish the Spanish Piece of Eight in that position which it has retained almost to the present day. Although the official documents do not give any clue to the type of the Silver S. Thomé the following extract from the letter of Wm. Barret written in 1584 (not 1684 as stated by Dr. da Cunha on Folio 65) and published in Hakluyt's Collection of early Travels, &c. may possibly throw a side-light on the subject. Speaking of the coins which he had seen, some years previously, circulating in Malacca, he says: —

"There is also a sort of silver Mony which they call Patachines and is worth six tangas of good mony which is 360 reyes and is stamped with two letters S T which is St. Thomas on one side and the arms of Portugall on the other side".

There may have been the figure of a Saint between the letters S—T which Wm. Barret has omitted to mention. The gold pieces of the period bore the figure of St. Thomas and were called, in consequence, S. Thomés, and the Patacões were also called S. Thomés, silver S. Thomés and perhaps for the same reason.

In the following reign, that of D. Sebastião (1557-1578), the coining of the debased Patacões was stopped and those in circulation were ordered to be current at their metal value (Aragão Document 9 and Clause 18 of Document 10). It is also said, in Document No. 9, that no more Half Patacões and Tangas should be issued. from which it would appear that coins of those denominations had been struck in the reign of D. João III, but most documents only refer to Patacões. No. 10 is an important document as it is practically a code of regulations for the conduct of the Goa Mint issued by the Viceroy D. Luiz de Athayde, August 27th 1569. Clause 22 of that Document, referring to the silver S. Thomés, the coining of which had been stopped, gives a description of pieces that should replace them when silver coins should be again minted. It says that a piece of 300 reis with the figure of St. Sebastian on one side and the arms of Portugal on the other and weighing a little over 22 grammes should be issued — also the half of such pieces, but without giving a description of the type — and a Tanga to weigh 4.4 grammes and

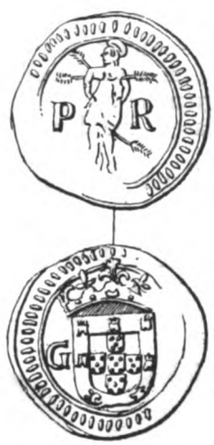
Original from CORNELL UNIVERSITY

having an arrow on one side and the arms on the other. The document, however, does not mention the name that was to be given to the piece of 300 reis. Colloquially it has been called a Bastião but Document No 11, of October 15th 1569, shews that, when issued, the piece was officially called a Xerafim. Fortunately specimens have been preserved of the two larger pieces and the Half Xerafim or Half Bastião has, on one side, two arrows crossed under a crown instead of the figure of the Saint and, on the other, the crowned arms of Portugal between the letters G A (Goa). The Tanga of the issue has not yet been found. Dr. da Cunha, Fo. 34, speaks of a Double Bastião, of the value of 600 reis, but no such piece was issued. The following is a description and illustration of the Xerafim or Bastião: —

Obv. : Crowned Arms of Portugal between the letters G -(A) surrounded by two line circles enclosing a circle of dashes.

Rev. Standing figure of St. Sebastian pierced by four arrows between the letters P R (Portugaliae rex) surrounded by two line circles enclosing a circle of dashes. 29 mill. 19 grammes.



The above piece, of the value of 300 reis or five Tangas, is illustrated by Aragão Pl. I No. 10 and is described by him, on Folio 154, as belonging to the collection of Filippe Nery. It is the earliest known specimen of a silver coin of the Indo-Portuguese series displaying the figure of a Saint as its characteristic design ; and, as no specimen of the silver Xerafim, ordered to be struck at the Cochin Mint in 1658, has yet come to light, it is also the earliest known specimen of a Portuguese Indian silver piece called a Xerafim. The Xerafim, from first to last, was always worth 300 reis, but its weight varied greatly in the course of the 300 years during which it was issued. In 1569, when first issued, it weighed 19 grammes; from 1640 to 1650 11 grammes; from 1650 to 1726 about 10.4 grammes and from 1726 to 1868, when the last specimen was struck, only 5.8 grammes. The Goa Mint continued the issue of these pieces till late in the century but ever of a lower standard until, at last, the composition of the coins was only seven parts of silver to three of copper. Hence specimens of the same pieces will also be found of varying weights. The half Xerafim, in the writer's collection, weighs 9.82 grammes whereas the specimen illustrated by Aragão, Pl. I, No. 11, weighs only 9.2 grammes.

In the first years of the reign of D. Filippe I (1580-1598) the further issue of the above pieces was stopped by order of the Viceroy D. Telles de Menezes and by his successor D. Francisco Mascarenhas. The next Viceroy, D. Duarte de Menezes (1584-1588), however, caused the Xerafins to be re-issued and, evidently, of a very low standard for, on January 28th 1588 (Aragão Document 21), the King wrote a letter to the Viceroy in which it is stated that the Xerafins, which had been issued as of the value of 5 tangas, were really only worth 3 ½ tangas, that they should pass now at their metal value and that no more of such pieces should be put in circulation. It is not known whether these later Xerafins continued to be of the same type as those first issued in 1569. The letter of the King, dated Jany 28th 1588, was, evidently, disregarded and the circulation of the pieces continued to cause trouble, for Document 14, of October 20th 1591, contains an order that a punishment of two years degradation should be inflicted on any one receiving or paying these Xerafins in exchange for goods or in satisfaction of debts.

On February 16th 1594 (Document 31) the Senate of Goa decided to call in and melt down the silver Xerafins and, with the silver derived therefrom, to issue pieces of the value of a Tanga and a Meia (half Tanga).

The following pieces are specimens of this issue : The Tanga :

Obv. Crowned Arms of Portugal between the Mint letters G—A surrounded by two line circles enclosing a circle of beads.

Rev. A full face standing figure of S. Filippe (St. Philip), holding in right hand a long Cross, between the letters T—A (Tanga), surrounded by two line circles enclosing a bead circle. 16 mill. 3.60 grammes.

The Meia (half) Tanga :

Obv. Crowned Arms of Portugal between the Mint letters G—A surrounded by two line circles enclosing a bead circle.

Rev. A full face standing figure of St. Philip, holding in right hand a long Cross, between the letters M—A (Meia-halt), surrounded

by two line circles enclosing a bead circle. 13 mill. 1.80 grammes. Neither piece is dated.

The above Tanga is the earliest known specimen of a coin of that denomination issued by the Portuguese. The Tanga previously, unless such a piece was really issued with the Xerafim and Half Xerafim in 1569, had been, with the Portuguese, merely a money of account not a coin. The silver Tanga was of the fixed value of 60 reis but, like the Xerafim, its weight varied. The Tanga which, according to Document 10, was to be issued in 1569 was to weigh 4.4 grammes. The 1594 specimen weighs 3.60 grammes. In 1614 it weighed 3 grammes. From 1640 to 1650 2.20 grammes. From 1650 to 1727 about 2 grammes. And from 1727 till 1858, when the last silver Tanga was struck, it weighed about 1.2 grammes.

The Meia (half) Tanga, above described and illustrated was described in a recent Sale Catalogue, as a Tanga issued for Mozambique in the reign of John V (1706-1750); and Dr. da Cunha (Fos. 72 & 73), through never having seen the Malacca pieces issued by the Conde de Linhares in 1631, considered that the M-A, on the reverse, stood for Malacca and that the piece was a Malacca Meia Tanga of the reign of D. Filippe III. Da Cunha's illustration of the piece, Pl. VI, No. 8, is inaccurate in every detail and does not even correspond with his description on Folio 72. Such mistakes are, practically, sign-posts, with the fingers pointing in wrong directions.

When the above Tanga and Meia Tanga are seen together there can be no doubt that they are of the same issue and that the latter is the half of the former.

These are the only known Goa silver coins of the reign of D. Filippe I.

In the reign of D. Filippe II (1598-1621) no silver pieces were issued of the Saint-type, but in 1614 (Doc. 56 of Jany 8th 1614), the Senate of Goa decided to issue silver pieces of ½, 1 and 2 Tangas, and, later, about 1619, silver pieces of the value of 30, 20 and 10 bazarucos. Specimens of the Tanga and Half Tanga weighing, respectively, 3 and 1.5 grammes are known and are illustrated by Aragão, Pl. I, Nos 2 & 3. The Crowned Arms, on the larger piece, are between the letters I—T (One Tanga) and, on the smaller piece, between M—T (Meia Tanga).

The reverse of both pieces consists of a Cross of Calvary instead of the figure of a Saint. Da Cunha (Fo. 57) mistakes this Meia Tanga for a Malacca piece and assigns it to the reign of D. Filippe III although the legend on the obverse clearly mentions D. Filippe II. The Double Tanga (Duas Tangas) — the earliest issue of a piece of that denomination — has not yet come to light. The silver 20 bazaruco piece also has not yet been discovered. The 30 bazarucos is illustrated by da Cunha Pl. IV, No 11 and the 10 bazarucos by Aragão Pl. I, No. 6. On the reverse they have merely the value 30 and 10, in figures, surrounded by line and bead circles,

Original from CORNELL UNIVERSITY

and, on the reverse, the Crowned Arms ot Portugal between the Mint letters G—A., also surrounded by line and bead circles. Aragão's illustration of the 10 bazaruco piece does not shew the Mint letters G—A, but the specimens, of both the 30 and 10 bazaruco pieces, in the writer's collection, have the arms between G—A and weigh, respectively, 80 and 30 grammes.

In the reign of D. Filippe III. (1621-1640) silver pieces of the Saint-type were again issued but not till towards the end of the reign. About 1630 the Conde de Linhares issued silver pieces for Goa with the Cross of Aviz, instead of the effigy of a Saint, on the Reverse. The issue consisted of a Patacõe of 360 reis (the only silver piece of that value and denomination issued by the Portuguese for India except the silver S. Thomé or Patacõe of the reign of D. Joao III.) and its fractions. The Patacõe and Half Patacõe, of this issue, were illustrated, in the article on the gold issues of Goa, in the *Numismatic Circular* of May 1912.

In 1640 silver pieces of the Saint-type were issued and in four values : — Xerafim, Duas Tangas or Double Tanga, Tanga and Meia (half) Tanga — and again in 1641.

The following are descriptions and illustrations of the three larger pieces :

The Xerafim :

Obv. Crowned Arms of Portugal between the letters G—A surrounded by line circles enclosing a circle of dashes.

Rev. Standing figure of S. Filippe (St. Philip) facing to left holding, in right hand, a long Cross between the letters S—F (S. Filippe) and the figures, 16—41, of date surrounded by line circles enclosing a circle of dashes. 25 mill. 11 grammes.

The Double Tanga :

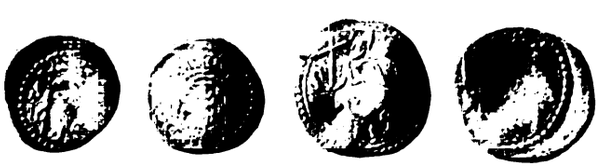
Obv. As above — but the line circles enclose a circle of beads.

Rev. As above but the date is 16 40 and the line circles enclose a circle of beads. 20 mill. 4.35 grammes.

The Tanga :

Obv. As above.

Rev. As above — but date 16—4(—). 17 mill. 2.20 grammes.



The illustration of the Xerafim is taken from Aragão, Pl. 2, nº 9, but in the text, on Fo. 226, the piece is not described[1]. The Meia Tanga of this issue has not yet been discovered.

The Double Tanga has been called a Half Xerafim but the weight of the piece proves it to be a Double Tanga. The Xerafim of the period was equal to five Tangas and the Tanga weighed 2.20 grammes. The Double Tanga ceased to be coined at the Goa Mint, for circulation in Goa, in 1650, and it was then replaced by a real Half Xerafim. The British Museum possesses a Double Tanga of the above type dated 1641.

Although the separation of Portugal from Spain was effected in 1640 and the Duke of Braganza had been raised to the throne of Portugal, as D. João IV, on December 1st of that year, the news did not reach Goa till September 1641. Hence the pieces of 1641 bear the letters S—F — the initials of S. Filippe the name Saint of Philip of Spain who had then ceased to be Philip III of Portugal. During the sixty years (1580-1640) of the Spanish connection the administration of the Portugese interests in Asia was left, as had been arranged by the treaty of Union (Danvers, Vol. I, Fo. XL), entirely in Portuguese hands and even the Indo-Portuguese coins, of the period, never displayed the Arms of Spain but only those of Portugal. The Spanish Kings, when referred to on the coins, are called Filippe II. and Filippe III of Portugal although they were Philip III and Philip IV of Spain.

In the reign of D. João IV. (1640-1656) Saint-type pieces, similar to those of the previous reign, were again issued, but with the S—F replaced by S—I (S. João) and the figure of St. John substituted for that of St. Philip. Pieces dated 1642, 1643 and 1644 are known and they may have been issued in other years.

The following are descriptions of the Xerafim, Double Tanga, Tanga and Meia (half) Tanga.

The Xerafim :

Obv. Crowned Arms of Portugal between the letters G—A surrounded by line circles enclosing a circle of dashes.

Rev. Standing figure of S. João (St. John) facing to right, holding, in left hand, a banner with the Cross of the Order of Christ thereon between the letters S I (S. João) and 16—44 the figures of the date, surrounded by line circles enclosing a circles of dashes. 23 mill. 11.09 grammes.

The double Tanga : — similar to the Xerafim but dated 1643 and with the lines circles, on obverse and reverse, enclosing a circle of beads. 20 mill. 4.40 grammes.

The Tanga : — similar to the double Tanga but dated 1644. 17 mill. 1.65 grammes.

This piece should weigh 2.20 grammes but the specimen is much worn and scratched.

The Meia (half) Tanga : — similar to the Tanga but undated and the bead circle, on obverse and reverse, not enclosed by line circles. 13 mill. 1.05 grammes.

The four pieces are here illustrated.

Aragão, on Pl. 2, illustrated (No. 2) a Xerafim of 1643 and (No. 1) a Double Tanga of 1643 and, on Folio 228, gives the weight of the former as 8.9 grammes. This weight is not correct and must have been a guess calculated on the weight (4.4 grammes) of

the Double Tanga which he mistook for a Half Xerafim. On Folio 231 he mentions that the Xerafim of the period weighed 11 grammes.

This is the last issue of silver pieces of a Saint-type by the Goa Mint for currency in Goa. On February 18th 1650 (Aragão Document 90) the Council of Goa ordered the issue of a Xerafim, Meio (half) Xerafim and Tanga of an entirely new type : — with the Cross of the Order of Christ on the reverse of the pieces instead of the figure of a Saint.

But although the Goa Mint ceased, in 1650, to issue silver pieces of a Saint-type for circulation in Goa itself pieces of that type were issued to the end of the reign of D. João IV, for use in other Indo-Portuguese possessions.

In 1650, 1651, 1652 and 1653 a Double Tanga of the Saint John type and with the Portuguese Arms still between G—A (the Goa Mint-mark) was issued for circulation in Ceylon : — see the article on Portuguese Ceylon Coins in the *Numismatic Circular* of July

1. There Aragão describes nº 10 as a Xerafim whereas it is the Double Tanga and calls the Tanga (nº 11) a half Xerafim.

1911. The following is an illustration of the Double Tanga of 1652, which weighs 4.20 grammes.

In 1653 Double Tangas, weighing 4.20 grammes, and Tangas, weighing 2.10 grammes, of the Saint-John Type were also issued but with the Portuguese Arms between the Mint Letters C. B or B-C.

The Tanga above illustrated is in the British Museum. Aragão also illustrates (Pl. 2, No. 4), a specimen of the Tanga, here reproduced : —

but with the letter B on the left, instead of on the right, of the Portuguese Arms. On Fo : 247 Aragão describes this piece as of the date *1665* and assigns it to the reign of D. Affonso VI whereas his illustration shews the date to be *1653*. This Tanga also weighs 2.10 grammes. Although these Tangas were both issued in the same year (1653) the piece with the letter B on the left side of the shield has the Portuguese Arms correctly rendered while the specimen with the C on the left of the shield has the quinas of the central shield of the Portuguese Arms represented by 5 beads only. The same peculiarity is noticeable in the following illustrations of two copper bazaruco pieces dated 1654.

These bazarucos have the Arms between C-B. or B-C. and were the issues of the Chaul Mint which, in 1646, had been opened, by Royal licence, for the issue of copper bazarucos. The licence did not include permission to strike silver money. Otherwise, there could not be any doubt that the above Double Tanga and Tanga were also issued by the Mint at Chaul — for circulation there and at Baçaim (Bassein). The letters C-B stand for *C*haul and *B*assein — neighbouring Portuguese territories to the North of Goa. The Mint at Bassein was not working at the time, so the Chaul Mint struck the above bazarucos — and perhaps the silver pieces too — to be current there as well as at Chaul : — those pieces with B to the left of the Arms being for Bassein and those with C to the left of the Arms being for Chaul. This is not a solitary instance of pieces displaying a double Mint-Mark. The issues of the Damão (Damaun) Mint, in the first part of the 18th Century, had the Portuguese Arms between D-B and such pieces, — of copper as well as of tutenag, — were for circulation both in Damaun and Bassein. The local issues of the Portuguese in India were "uncurrent", to use Da Cunha's expression, Fo : 93, out of the locality for which they were issued. The work on the Double Tanga and Tanga differs much from that on the recognized Saint-type pieces of the Goa Mint. In the absence of official documents relating to the issue it is not possible to say whether the pieces were issued by the Goa Mint or by the Mint at Chaul but the evidence of the pieces themselves seems to be in favour of the latter.

In 1654, 1655 and 1656 Double Tangas of the Saint-John type were again issued but, on these pieces, the Arms of Portugal are between the Monogram $\overset{\circ}{\text{A}}$ and D. The Monogram stands for "The Tanga", in the sense of Money, and the letter D may stand for Damão (Damaun) — a Portuguese possession to the North of Bassein. These pieces also weigh 4.20 grammes and were, probably, struck at the Goa Mint for circulation in Damão — or may have been struck at the Damão Mint itself. There is not any official Document relating to the issue. A specimen of the Double Tanga of 1654 is in the British Museum and is here illustrated ; — together with the Double Tanga of 1656.

The Double Tanga of 1656 is not only the last piece of that denomination but it is also the last silver coin of a Saint type issued by the Portuguese for their Indian possessions.

The coins of the Indo-Portuguese series are not machine-made coins. They were either hand struck or cast. The flans used were irregular in shape and thickness and with surfaces so uneven that very few specimens display the whole of the device.

Henry T. Grogan.

HOPPER'S MONEY OR TALLIES.

These coins were a common and general institution in the days when general ignorance of bookkeeping was the rule, and were used as follows : — When a picker had picked a given amount of hops he was handed a leaden disc, which as will be noted bore either a money value or a number stating the bushels picked. When the "hopper" had for instance five 1/- coins the Tallyman gave him a 5/- coin and so on. The workers were paid for what coins they produced at the end of the task, the system being simple and primitive, though not in vogue now.

The 5/- and 1/- coins illustrated have no reverses; the three centre ones are for showing the number of bushels picked, and the bottom coins show the obverse and reverse of the same coin; these are the actual sizes.

SOME COINS OF THE BRITISH EMPIRE.

The following abbreviations are used in describing the coins: —
O — Obverse.
R — Reverse.
E — Edge.

CYPRUS.
QUEEN VICTORIA.
BRONZE QUARTER PIASTRE.
TYPE I.

QUARTER PIASTRE, 1879.

O. — Legend: — VICTORIA QUEEN. Head and truncated neck of the Queen in profile, and looking to the left. Below the truncation of the neck, the date, 1879. Her Majesty is wearing a diadem adorned with gems and a scroll of oak leaves and acorns. The diadem is partly hidden by the wavy hair which is parted on the forehead, carried over the ear and collected into a knot behind the head. The whole within an ornamented rim.

R. — Upper legend: — CYPRUS. Lower legend: — QUARTER PIASTRE. A bead on each side between the legends. The numerals $\frac{1}{4}$, encompassed by a beaded circle. The whole within an ornamented rim.

E. — Plain.

Similar coins are dated 1881, 1882, 1884, 1885, 1887, 1895, 1898, 1900 and 1901.

Some quarter piastres dated 1881 and all dated 1882, bear the letter H (for Heaton) above the date, and were coined in The Mint, Birmingham.

Those dated 1882 and 1884 are not given by Atkins in his book on British Colonial coins. He gives the date 1886 but none were coined in that year.

The last paragraph "Numismatic Circular", June, 1912, column 13657, should read as follows: —

On the piastres dated 1879, on some coined in 1881, and on those minted in 1884, the obverse legend is in smaller letters and the numerals of the date are not so large as on other coins of this denomination and type, and the numeral of value on the reverse of those dated 1879 and a portion of those coined in 1881, is more slender than that on the other piastres of this type.

STRAITS SETTLEMENTS.
QUEEN VICTORIA.
SILVER TWENTY CENTS.
TYPE I.

TWENTY CENTS, 1871.

O. — Legend: — VICTORIA QUEEN. Head and truncated neck of the Queen in profile, and looking to the left. Her Majesty is wearing a diadem richly jewelled and heightened with alternate crosses pattee and united roses, thistles, and shamrocks. The diadem is partly hidden by the wavy hair which is parted on the forehead, carried over the ear and collected into a knot behind the head. The hair is bound by a fillet, which is tied into a bow at the back of the head, the hanging ends being crimped. The whole within an ornamented rim.

R. — Upper legend: STRAITS SETTLEMENTS. Lower legend: — TWENTY CENTS 1871. A bead on each side between the legends. The decorated numerals 20, encompassed by a beaded circle. The whole within an ornamented rim.

E. — Milled with straight lines.

Similar coins are dated 1872, 1873, 1874, 1876, 1877, 1878, 1879, 1880, 1881, 1882, 1883, 1884, 1885, 1886, 1887, 1888, 1889, 1890, 1891, 1893, 1894, 1895, 1896, 1897, 1898, 1899, 1900, and 1901.

Those dated 1872, 1874, 1876, 1879, 1880, 1882 and 1890, and some dated 1883, 1897, and 1900, bear the letter H (for Heaton) on the obverse, below the truncation of the Queen's neck, and were coined in The Mint, Birmingham.

* *

CEYLON.
KING GEORGE THE FIFTH.
COPPER CENT.
TYPE I.

CENT, 1912.

O. — Legend: — GEORGE V KING AND EMPEROR OF INDIA. A bead between the beginning and end of the legend. Truncated bust of the King and Emperor in profile and looking to the left. On the truncation of the bust: — B. M. His Majestys is wearing the Imperial Crown and the ermine Robe of State, the Collar of the Most Noble Order of the Garter and the Badge of the Most Honourable Order of the Bath. The whole within an ornamented rim.

R. — Legend: — CEYLON. ONE. CENT. The date, 1912, with a bead on each side between the beginning and end of the legend. A talipot palm tree with the value in Tamil letters to the right and left encompassed by a circle. The whole within an ornamented rim.

E. — Plain.

HENRY GARSIDE.

SOME METALLIC BADGES, TICKETS AND PASSES.

BY A. M. BROADLEY,
Author of "The Royal Miracle".

FROM the consideration of those medals which are exclusively commemorative and historical in their character, and were generally

Badge of Charles I and Henrietta Maria
distributed on the occasion of their marriage.

preserved by their purchasers in cases and cabinets, we pass to another class which, when worn or exhibited, served to indicate the political sympathy or opinions of the owner; to denote the membership of some particular club, association or fraternity; to procure admittance to a theatre, concert room or social gathering, or to testify to the successful accomplishment of some mental or physical achievement. In most instances medallions of this kind are provided at the upper end with a loop or ring through which a ribbon could be conveniently passed. The custom of displaying them on the breast is, however, not universal. We have a notable exception in the trophy of the waterman alluded to by Charles Dibdin in the familar lines: —

Then farewell, my trim-built wherry
Oars, and coat, and *badge* farewell.

The winner of Doggett's "badge" (a facsimile of which is embossed in gold on the cover of the admirable work of Messrs. T. A. Cork and Guy Nickalls, dealing with the history of the

A smaller Badge of Charles I and Henrietta Maria.

A very rare Medallion commemorating Sir Henry Slingesby who was beheaded in 1658.

Loyalist Badges and Medals associated with the adventures of Charles II between 1649 and 1660. Arranged by Messrs. Spink for the collection of A. M. Broadley.

annual contest since 1714) wears the outward and visible sign of victory on his right arm. Thomas Rawlings was the maker of some of the beautiful badges which were distributed on the occasion of the marriage of King Charles I and Queen Henrietta Maria, with a view, apparently, to their being worn by the recipients. I am enabled, by the courtesy of Messrs. Spink, to reproduce two examples of these charming medallions. In the first we have the bust of Charles I, to right, hair long, falling lace collar, doublet buttoned close, scarf across the breast. Legend incuse — CAROLVS. D.G.MAG.BRI.FR.ET.HIB.RX.

Reverse : Bust of Henrietta Maria, to left, hair flat at the top, curly at the sides, drawn through a small coronet behind and tied into a bow, pearl necklace and pendant, figured bodice with brooch in front, bust terminated in drapery. Legend — HENRETTA. MARIA. D.G.MAG.BRITAIN.FRAN.ET.HIB.REG. Below, T. Rawlins. F. Size— 1.45 by 1.15.

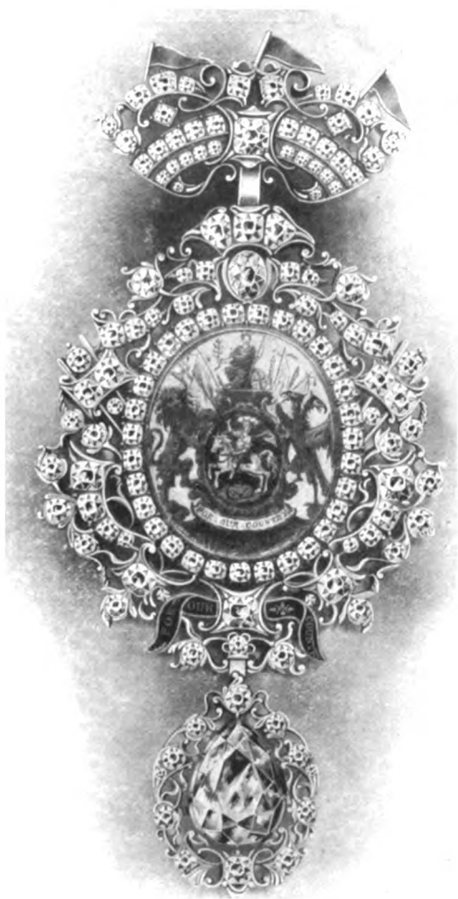
Original from CORNELL UNIVERSITY

In the second variety we see the bust of Charles I, l., laureate, hair long, in armour, with lion's head on shoulder, medal suspended to a chain, and mantle festooned upon the breast. On the reverse is the bust of Henrietta Maria, l., hair flat at the top, curly at the sides drawn through a coronet behind, and tied into a bow, pearl necklace and pendant, figured bodice with brooch in front, bust terminated in drapery. In this case there is no legend, but we have neat floral and corded borders on both sides. Size 1.25 by 1. In both instances there are rings for suspension, but this medal occurs without the borders. These pieces are both by Thomas Rawlings.

Exceeding scarce is the medallion worn as a memento of that gallant gentleman, Sir Henry Slingesby, who was beheaded in 1658, a specimen of which was in the collection of Messrs. Spink. It is thus described:—Half-length figure of Sir Henry Slingesby, nearly full face, hair long, in armour and sash round his waist. Outer



The Badge of the Loyal Association of 1745.

Legend—EX. RESIDIVS. NVMMI. SUB. HASTA. PIMMIANA. LEGE. PRÆDATI. IVXTA. DAVENTRIAM. (From the residue of the money plundered near Deventer under the military authority of Pym.) Inner Legend—AN. EARNEST. PENNY. FOR. MY. CHILDREN. THO: H: B: SLINGESBY B. OXON. 1644. Reverse engraved. Armorial shield with mantling and crest, Slingesby impaling Belasyse. Below, Beheaded Iun: $\frac{e}{y}$: 8: by O: C: 1658. Size—1.85 by 1.55. Cast, untouched by the graver: ring for suspension. This badge has a very special interest for York collectors for Sir Henry Slingesby belonged to an ancient family in that county. He was attached to the royalist party, and having been made prisoner, was, after two years' confinement at Hull, brought up to London and executed on Tower Hill, 8th June, 1658: or, as it is stated in the Harl. M. S. 4630, "he was condemned by a High Court of Justice, as it was then called, upon the information of one Rafe Waterhouse, a very mean person, and beheaded or basely murthered". He had married Barbara, daughter of Thomas Belasyse, Viscount Fauconberg, and aunt to Thomas, Lord Fauconberg, the husband of Mary, daughter of Cromwell, and had issue the three children Thomas, Henry, and Barbara, for whom this medal was made. After the surrender of York, Sir Henry Slingesby, with a portion of the army, made his way to Oxford, where he arrived after many perils, especially from an attack of the rebel horse near Deventer, where he lost all that he had. At Oxford he had his quarters with Sir William Parkhurst, Master of the Mint, which may account for the execution of this medal. It is probably the work of Thomas Rawlings.

In my book, "The Royal Miracle", just published by Mr. Stanley Paul, I have described at length the various badges worn or preserved between 1649 and 1660 by the loyal adherents of the exiled King. The entire series of these interesting medals in my collection is now reproduced. In the centre will be seen a small miniature painting of the fugitive Charles, executed on copper, which has been pierced at the upper end, evidently to facilitate its being worn by the original owner. It is possible that other examples of these loyalist badges are in the Stuart collection of Miss Helen Farquhar.

It is curious to contrast the two badges of 1745, both of which are

Badge of the President of the Beefsteak Club, formerly the property of Sir Henry Irving, now in the collection of A. M. Broadley.

now illustrated. On one we have a very fair portrait of the Young Pretender. Its object is sufficiently obvious. England and Austria were closely allied during the war of the Austrian succession (1741-1748), and at this critical juncture, especially in 1745, many associations were formed to support the reigning House of Hanover. The badge or medal of the Loyal Association of 1745 is thus described: —Round it runs the legend, WHERE HEARTS ARE RIGHT, LET

Portrait Badge of Prince Charles Edward, 1745.

HANDS UNITE. Two men grasp hands. Ex. FOUNDED IN THE FRENCH WAR. 1745. Reverse. THESE BANNERS SPREAD ARE GALLIA'S DREAD. Shield bearing St. George piercing the shield of France; supporters, the British lion and the Austrian eagle; crest, Britannia, two flags at either side; motto, FOR OUR COUNTRY.

The reverse of this medal is beautifully reproduced in enamel in the centre of the elaborate badge, surrounded with fine paste ornaments, — now in my collection. This was probably worn by the President of the Loyal Association, who may have belonged to the fair sex.

In 1789, after the famous battle of the Regency, a medal was struck both in pewter and gilt bronze in honour of William Pitt,

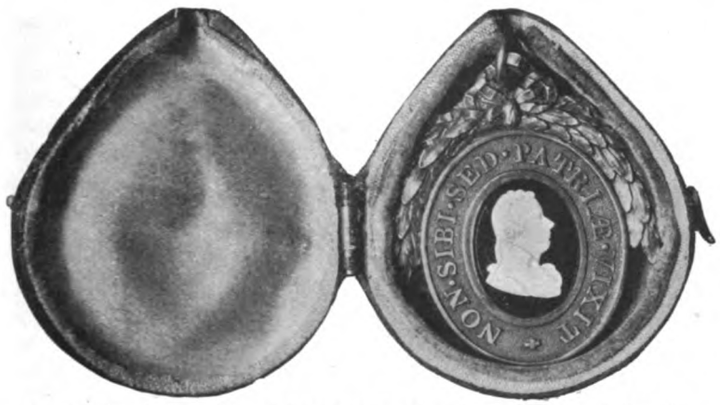
Original from CORNELL UNIVERSITY

bearing on the reverse the words: "May Britain still flourish under our good King and his virtuous Minister". Another medal of that momentous year shewed the head of Pitt, the Premier, on one side and that of Thurlow, the Chancellor, on the other. From 1789 onwards Pitt was the object of many medallic honours, but it was not till after his death at the beginning of 1806 that inumerable



Cameo Jewel of the London Pitt Club, in the collection of A. M. Broadley.

Pitt Clubs came into existence with a view to perpetuate at once the policy, the patriotism and the memory of the "Pilot who weathered the storm". Of these loyal associations the London Pitt Club is probably the sole survivor, for the non-political Cambridge Pitt Club was founded at a later date, and for a different purpose. Nearly every Pitt Club had its own distinctive badge, some of them

The very rare silver gilt Badge of the Beggar's Benison Club at Anstruther, Scotland. In the collection of A. M. Broadley.

being now extremely rare, but in one or two instances a Pitt commemorative medal was used, with a special border and suspensory loop added to it. The silver gilt and cameo badge of the parent Pitt Club, that of London, is now reproduced. The original cameo, from which the others were copied, is, I believe, now in possession of Dr. Fletcher, the President and Treasurer of the Cambridge Pitt Club. It was cut about 1790 by James Tassie, a British modeller (1735-1799), a full account of whose work will be found in the issue of the *Numismatic Circular* of May, 1912. The provincial Pitt Club badges in my possession are those of Liverpool (Wyon, Junr.) 1814, Nottingham (Webb) 1814, Manchester (Wyon) 1813, Stirling 1814, Warrington 1814, Birmingham 1814, Wolverhampton (Wyon) 1813, Leicester Town and Country (Webb) no date, Blackburn (Halliday) 1814, Rochdale (Webb), 1813 and Sheffield 1810. They are all in silver. The finest of them is that of Rochdale, which has on the obverse a profile portrait of Pitt, with the words "Gulielmo Pitt. R.P.Q.B." On the reverse is a storm-beaten rock and the legend *Patriae columen decus*. The majority of the Pitt medals have the motto *Non sibi sed patriae vixit*.

Most of the eighteenth-century clubs (and their name was legion)

Gilt and enamel badge given by George III to his physicians after his recovery from his mental affliction in 1789. In the collection of A. M. Broadley.

had their distinctive badge. The Beefsteak Club certainly dated from that period, but on the reverse of the large and handsome silver gilt badge (once the property of Sir Henry Irving) now reproduced, are the following words: — "15 Nov: 1803. Founders Sir John Turner, E. Foulkes, R. Ramsbottom, I. Nixon". Any explanation of this inscription would be welcomed by me. On the obverse is

Silver Masonic Medal or Badge given by William, Duke of Cumberland, to Ralph Allen of Bath, in 1752. In the collection of A. M. Broadley.

engraved the motto *Esto perpetua ad libitum*. At the establishment of Mr. A. H. Baldwin in Duncannon Street the writer recently saw the badge of the "Leg of Mutton" Club — a *gigot au naturel* neatly chased in solid silver. The rare badge of the Beggar's Benison Club which was obtained for the writer by Mr. Baldwin, is characteristic of the eighteenth century, to which it belongs. On the

end about 1830. The badge given by George III to his medical attendants after his recovery in 1789 is very scarce but needs no special description. Later in this year many medals and tokens were struck to commemorate the visit of the King and Royal Family both to

Silver box pass of Smock Alley Theatre, Dublin. In the possession of Messrs. Maggs.

Weymouth and Plymouth. Books might very well be written both on the Pitt Club badges and those which form part of the insignia of Freemasonry.

The Grand Lodge of Freemasons originated in 1717, and enormous prices are given for medals and badges connected with the early portion of the history of that powerful social and philanthropic society. Badges were also used by the members of other associations formed in imitation of the Freemasons, like the "Bucks", the "Sols", the "Gregorians" and many others. Colonel Sir W. Watts, K.C.B., has succeeded in obtaining specimens of the badges worn both by the "Bucks" and "Sols". A very rare and curious medal of a Masonic character (certainly intended to be worn) is in the possession of the writer. It was thus described in the Buick Sale, of November 27th-29th, 1907, at Sotheby's: — "A large engraved badge; on one side engraved the Royal Arms, and the legend—

The gift of His Royal Highness W. D. of Cumberland
To the Famous Mr. Allen 4 Dec 1752

The reverse has a number of Masonic emblems and the name of *John Campbell* of Armagh". After seeing an illustration of it, the late Mr. W. J. Hughan wrote to me that he regarded the badge "as one of the most curious and valuable in existence". I have already dealt in detail with the history and associations of the Ralph Allen medal in the pages of *The Numismatic Circular, Somerset and Dorset Notes and Queries*, and the *Transactions of the Dorset Masters Lodge, N° 3366*. It is not absolutely certain that Duke William was a member of the Masonic Order, but there are grounds for believing that he belonged to it. The inscription on the reverse is certainly posterior to that on the obverse by at least eleven years, and the late Mr. Hughan was of opinion that the emblems themselves are of the 1752 period if not earlier. The late Mr. Sadler said the postdating of Mason medals is of frequent occurrence, and several examples of it occur in the collection which owes so much to his knowledge and enthusiasm. Possibly Ralph Allen, not being a Freemason, may have given the medal to John Campbell, who belonged to the Craft, for the genial owner of Prior Park lived quite six months after the formation of the lodge at Armagh. It may be that the relic came to him through Allen's heir, and that the second inscription is older than 1763 or 1764. The only one of the numerous John Campbells in the N. D. B. whose dates coincide with it on the medal, is a gallant sailor who went round the world with Anson. Admiral Campbell was born in 1720 and died in 1790.

The learned Dorset editor of the *Somerset and Dorset Notes and Queries* added the following note to my original remarks on the Cumberland-Allen Medal, with my entire acquiescence: —

"I believe that this interesting badge was not, at first, of a Masonic character, but a simple *pignus amoris* from the Duke of Cumberland to his friend, I take it that when it came, by gift or purchase, into the hands of John Campbell, the reverse, hitherto blank, was engraved with the present Masonic design, and the two small Masonic emblems inserted on the obverse. The engraving of these two emblems, and of those on the reverse, suggest the hand of an inferior workman, and the crookedness of one of the pillars, the want of correctness in the curve of the surrounding oval, the irregularity of the lettering, and the poverty of the mantling on the reverse, so different from the fine work of the mantling above the Royal Arms, seem to indicate additions by a less skilled or a provincial engraver, who may have copied an old model, or whose want of skill has imparted an antiquated character to his work".

Edmund Kean, quite early in life, became a Freemason, and it was the "brethren of the Mystic Tie" in Dorchester who helped him on his road to Drury Lane and celebrity, when the chance of a lifetime came to him on January 26th, 1814. From the collection of the late Sir H. Irving (also a Freemason) came the fine and curious badge given to Kean by Mr. J. Labrode Wright, of Lodge No. 230, Waterford.

Admission tickets to theatres, masquerades, concerts and other entertainments are sufficiently abundant. They are generally of metal, but are occasionally engraved on bone or ivory. The unique badge-ticket to Drury Lane (for it has a loop for suspension) which David Garrick gave to his medical attendant, Dr. Isaac Schomberg, is extremely interesting. A full-length figure of Shakespeare appears on the silver pass to the Smock Alley Theatre, Dublin, now in possession of Messrs. Maggs, of 109, Strand. It is thus described by the present owners: — "A very rare silver pass engraved with full-length portrait of Shakespeare shewn leaning on pedestal; on the reverse, inscription along top '*Theatre in Smock Alley*', and underneath '*The Rt. Honble. the Countess of Branden*'. The Pass in circular in shape and measures about four-and-a-half inches in circumference. Preserved in a neat leather case".

In the fine collection of the late Mr. Montague Guest were several metal passes to Vauxhall and Ranelagh Gardens. The writer possesses similar admission-passes to both the historic theatres in the Haymarket. They vary from the humble copper pit order, which enabled the possessor to enjoy the drollery of Samuel Foote, to the gold and silver medals given to the box-holders of the Italian Opera across the way. The elaborate silver-gilt badge now reproduced was presumably an open sesame to the King's Theatre box of the Prince Regent between 1812 and 1820. Its weight must have proved somewhat trying to the wearer.

DISCOVERIES OF ROMAN GOLD COINS AT CORBRIDGE.

Accounts have from time to time been given in *The Times* of the excavations that are being conducted on the site of the Roman town of Corstopitum, near Corbridge-on-Tyne, in Northumberland. The work has been proceeding since 1907, and is continued for three or four months in every summer under the direction of the Corbridge Excavation Committee. It has already revealed the existence of a site of more than usual interest, not exclusively military in character, but containing civilian population, and hence comparable only to one other Roman settlement in the North of England — namely, the Roman town that underlies modern Carlisle. Apart from a great storehouse and granaries — military buildings of unusual massiveness, erected in the Antonine period — the majority of the buildings hitherto excavated are shops. They indicate the existence of a considerable trading population, and the character of the finds shows that occupation was more or less continuous during the whole of the second, third, and fourth centuries of our era.

Corstopitum was a place of some wealth and one in which money passed from hand to hand freely. The profusion of bas-reliefs and fragments of sculpture that have been discovered in the course of excavations is evidence of the ornamental character of some of the town buildings. The population was cosmopolitan; traders from the Levant set up altars here with Greek dedications to Herakles of Tyre and to the Phœnician Astarte; only last year a tombstone was discovered that had been erected to the memory of Barates, a native of Palmyra in the Syrian desert; some of the smaller finds, such as brooches and sword-scabbards, though datable to the Roman period, exhibit Teutonic workmanship and prove commercial intercourse with Central Europe. As long ago as the time of Henry VIII. the antiquary Leland wrote of Corbridge in his "Itinerary": — "Great tokens of old foundations be yet found there, and also *numismata Romana*". Four hundred years ago the fields that cover the ruins of the Roman town were fertile in coins, and every year's ploughing has brought up more coins to the surface. Still the supply remains unexhausted, and since systematic excavation has been commenced each year's exploration, covering two acres of ground, has yielded 800 to 1.000 specimens of Roman currency.

The coins thus found lying loose in the soil are, without exception, silver or bronze. Identification is often difficult owing to the corrosive action of the soil; yet the coins have been carefully catalogued in the annual reports issued by the Corbridge Excavation Committee. They include one or two examples of Greek coinage, which are the more interesting since doubt attaches to the place of discovery of most of the Greek coins claimed to have been found in this island. They comprise some hitherto unknown varieties of types and add materially to our knowledge of the London Mint. A coin of Constantine the Great, minted at London in the early part of his reign and bearing the Christian monogram, deserves special mention, since it proves that Christian symbols were officially employed in this country before they were introduced into Italy or Gaul.

Besides this great mass of inferior currency two hoards of Roman gold coins have been discovered in the course of the excavations. Mixed hoards of Roman gold and silver have formerly been unearthed in this country, and Roman gold has been found in enormous quantities in other parts of the Empire; yet the only recorded instance of the discovery of an unmixed gold deposit in England is the hoard discovered in 1811 at Cleeve Prior, near Evesham. The Cleeve Prior hoard was rapidly and secretly dispersed, and few details are known regarding it. It appears to have consisted of 450 to 600 *aurei* ranging in date from Valentinian I. to Arcadius. The Corbridge gold finds are less extensive; yet they stand alone in having been found in the pursuit of archæological inquiry; they have been preserved intact and have been subjected to proper examination.

Original from CORNELL UNIVERSITY

The circumstances of the discovery of the two Corbridge hoards differed materially. The first find was made in September, 1908. A workman engaged in excavating a house belonging to the latest period of the occupation of Corstopitum found beneath the floor a sheet of lead of which the two ends had been bent over to form a case or receptacle. The leaden covering was unwrapped and was found to contain a gold ring and 48 *aurei solidi* of the Lower Empire. Exactly three years later, in September, 1911, while excavations were being conducted on a portion of the site that had been inhabited in the Antonine period and had probably lain waste during the remainder of the Roman occupation, two workmen in the employ of the Excavation Committee came on a bronze jug standing erect in the soil. They lifted the jug; the bottom fell out; and a stream of gold coins poured forth. The coins were collected and found to number 159, ranging in date from Nero to Marcus Aurelius. Archæologists differ as to the nature of the site in which the jug was found. There was no trace of a floor and practically no foundations suggesting walling. Either the spot in which the jug rested was perfectly fortuitous, or the treasure was hidden beneath the floor of a house that has been completely demolished.

The first Corbridge find consists of coins of Valentinian I., Valens, Gratian, Valentinian II., Theodosius, and Magnus Maximus, and may be assigned to the reign of the last-named Emperor. It is datable approximately to the years 385-387, and is a very few years earlier than the Cleeve Prior find. Other coins found upon the site prove that Corstopitum was occupied as late as A. D. 390; but it had probably been abandoned before A. D. 395; and this little hoard of gold, carefully hidden yet never claimed, is one of the last vestiges of the Roman occupation of the north of Britain.

The second find covers a longer period, and comprises coins of Nero, Galba, Otho, Vitellius, Vespasien, Titus, Domitian, Trajan, Marciana, Hadrian, Sabinia, Ælius, Antoninus Pius, Faustina the Elder, and Marcus Aurelius. The date of the latest coin is A. D. 159, and the hoard may consequently be taken to have been laid down in 159-161. There are various indications that this was a time of prolonged trouble in the North. The Governorship of Julius Verus (*circa* 157-160) was marked by the importation of military reinforcements from Germany and by the erection of forts round the territory of the discontened Brigantes. When Marcus Aurelius came to the throne in 161, war was on the point of breaking out in Britain, and a new Governor, Calpurnius Agricola, was sent out to carry on the campaign. The struggle was a hard one. Signs of it are apparent at Corstopitum in the burnt *débris* of a pottery shop — consumed with its wares — in the cessation of building of the great store-house, and in the loss of the second gold hoard.

The coins of both hoards are in an unrivalled state of preservation. From a numismatic point of view the second hoard is by far the more interesting, since it contains a much greater variety of types, and some of these (such as the coin of Vitellius with his father's head on the reverse, and a beautiful specimen of the Pvellae Favstinianae type of Faustina the Elder) are of exceptional rarity.

Both finds have been handed over, as treasure trove, to the Lords of the Treasury, and have been conveyed by them to the British Museum. The Trustees of the British Museum have decided to retain both hoards intact and distinct, in place of amalgamating them with the general series of Roman coins. Consequently the two Corbridge finds have been set out in separate coin-trays in the Coin Room of the British Museum. The Trustees are to be congratulated upon their decision, since it gives to students the rare opportunity of studying in their entirety hoards that are of more than usual interest.

* *

TO THE EDITOR OF THE TIMES.

Sir, — Your excellent account of the Corbridge gold coins may be supplemented in two points. The Cleeve Prior hoard is not "the only recorded instance of an unmixed gold deposit in England". In the first place, that hoard contained, besides some hundred gold coins, five or six times as many silver coins. No more remarkable discovery of ancient coins has ever been made in this island. But it has been sadly ill recorded, and he would do a service to history who could track out the fate of the coins. The late Canon A. H. Winnington Ingram exhibited some of them at Worcester in 1882, and some, it is said, are still in the possession of an English clergyman, but I have failed to trace these. Secondly, this great hoard does not stand quite alone. In 1781, 50 Roman gold coins and a stamped ingot of silver were dug up on Stanmore Common, near Bushey; and — oddly enough — in the same year 600 gold coins of the latest Empire were found near Eye, in Suffolk.

The Corbridge hoards have great historical value. The larger of them supports deductions already drawn by myself and others as to the condition of North Britain about A. D. 158-165. But they are still more notable since they are the first important hoards of Roman coins found in this country which have been preserved entire, have been fully and scientifically listed, and are to be kept together. Hitherto the British Museum — or rather the Treasury — has done its best to break up hoards which could be claimed as treasure trove and offered to the Museum. Every one will rejoice that this bad custom has ceased. It would be foolish to keep all hoards intact; it is equally foolish to keep none.

I am, Sir, yours,

F. HAVERFIELD.

NUMISMATIC REFERENCES IN SHAKESPEARE.

THE THREE PLAYS ("PARTS") OF KING HENRY VI.

Abbreviations: H. VI, Pts. I, II, III.

The first of these three plays having for their title the name of the sixth King Henry, characters that run from one to another and a visible sequence and connection both of events and style, is only partly the work of our Master Poet. It betrays archaisms in quantity that connect it with an earlier form of dramatic composition to that characteristic of even Shakespeare's earliest work. In many respects it bears the strong tragic touch of our greatest writer of tragedy, Marlowe, but, in other parts, it is crude and childish. It probably was the work of many hands, as has often been stated. Two scenes (II, IV and V, III, 45 sqq.), have appropriately been assigned to Shakespeare's innately artistic hand, but many other might be mentioned which no other pen could have inscribed. It was also, no doubt, the inspiration of this play which led him to continue the theme in two other dramas unquestionably his own work. Professor Dowden assigns it to the years 1590-91 and it certainly is not of later date.

In a matter of such questionable chronology, the presence of numismatic references would have to be regarded as of very great importance. Unfortunately, a careful research through its pages reveals only one direct mention of a coin and that not a decisive one.

PART I.
ACT V.
SCENE IV.

"'Tis true, I gave a NOBLE to the priest
The morn that I was wedded to her mother".

NOBLE. — This coin, with its Half and Quarter, originated in the reign of Edward III, sharing with the Florin and its divisions, the honour of initiating our national gold coinage, for the spasmodic Gold Penny of Henry III was too ephemeral to deserve that dignity.

The Noble as first struck carried the value of 6s 8d. The Half-Noble was known as the Maille-Noble and the Quarter as the Ferling-Noble in the rich English of the day, which had a separate name for every difference of a thing and whose antithesis is reached in the vernacular of the United States to-day, whose degeneracy does not even recognize such words as "fortnight" and similar coupling of simple ideas.

With the accession of Richard II, the Gold Florin disappeared from our coinage, but the Noble and its divisions continued as the characteristic English denomination in this metal, to which was added the Angel in the reign of Henry VI.

Original from CORNELL UNIVERSITY

Under Edward IV, the Noble underwent further development, giving birth to the Rose-Noble Royal, also known as the Rial, while the Half-Noble was also known as the Half-Rial and the Quarter-Noble as Quarter-Rial.

With the advent of Richard III the Noble was discontinued during his short reign of less than two years, the Angel and its Half being during that time the sole English coin in gold, but it was given back its place at the head of our Gold Coinage under the first of the Tudors, reappearing under the name of Rose-Noble or Rial, without divisions. In this reign, a third denomination was added to the Gold Series under the name of Sovereign or Double-Rial, together with a double of itself, and while the Noble and Angel have disappeared long ago from our money, the Sovereign has taken their place as the characteristic English gold coin, carrying in its high quality ot metal and its nobility of design a token of the straightforwardness and dignity of the nation which produces it, qualities which that nation has long been renowned for in an eminent degree above all other peoples, just as its gold coinage excels that of every other nation, a quality fully shared by the Angel and the well-named Noble of former days.

With the reign of Henry VIII we find the Noble reappearing under its new name of Rial with its Half and Quarter, but the historic name was perpetuated by the George-Noble which banished the characteristic type of the Noble, the typically English ship, to the reverse side, and replaced it on the obverse with an equestrian figure of St. George, the patron saint, transfixing the dragon, a type which under the influence of a very different art was happily revived by Pistrucci at the restitution of the Sovereign to our coinage.

Under Edward VI, the name of Noble disappears forever from our gold series, but that coins known by that name were commonly current in Elizabeth's time is proved by the reference quoted above from Shakespeare, unless this reference is to be taken as a sign of the greater antiquity of the play, which cannot be altogether conceded, since, as these papers often show, our bard frequently mentions coins of an earlier age than his own time and speaks of them as unconcernedly as if they were still current in his day, which, from other sources, we know actually to have been the case.

From now, onwards, the Sovereign takes the place of the Noble as the characteristic English coin, although the Rial and its double, the former, as we have shown, the lineal descendant of the Noble, continued to be issued until, under James I, the Noble is most interestingly connected with the Sovereign through the engrafting of the Rose-Rial with the Sovereign of 30 Shillings, by means of which we may consider that our original gold coin, the Noble, is perpetuated in our Sovereign of to-day, a transition unexpected, but often reöccurring in Antiquities, as in Costume, for instance, where the continual combining of features with other features, and thus producing further results as a natural consequence, is one of the most fascinating traits of the study and goes to enforce the truism that nothing that really is worth while and of lasting quality is ever achieved by sudden impulse but is the result of gradual growth and blending, which is, therefore, as characteristic of human affairs as of, what we denominate, the province of Nature. By the immediate application of the reference to the exigency of the action of the scene in question of the play, one must be struck with the largeness of the amount of money given by a simple peasant to a priest for marrying him, but, when one remembers that marriage was one of the minor, but by no-means unlucrative sources of revenue of the Church, and that peasants in all ages continue in their customs the aboriginal trait of making marriage an act accomplished through purchase, the higher amount paid being a lasting honour to the families concerned, our wonder will be lessened. Yet here our ecclesiastical antiquarians might contribute an interesting note on the marriage charges during the wide period assigned to the origin and completion of this play.

A. H. Cooper-Prichard.

COUNTERMARKED OR PLUGGED PORTUGUESE GOLD COINS IN THE WEST INDIES AND THE AMERICAN CONTINENT.

(Translation of an article by the late Dr Julius Meili, contributed to *O Archeologo Português*, VII, nos 10-11, 1902.)

*
* *

On account of the great importance and interest of Dr Meili's paper to collectors and students of the British Colonial Series, it has been suggested that we should give a translation in English for the benefit of the readers of the *Numismatic Circular*. *Eds. N. C.*

*
* *

In my work on 'The Coins of the Colony of Brazil' I was enabled to publish half-a-dozen different countermarks, occurring on Portuguese gold coins issued in various places in the West Indies. These countermarks are chiefly met with on the Half Dobras, which had a wide circulation in that part of America from the second half of the eighteenth century, that is, from the time of the considerably increased output of the gold mines of Brazil. The Half Dobras were issued in large quantities, which accounts for the fact that they are still so abundant, and turn up in foreign countries, like Canada and Great Britain, where they had free circulation. Under the reign of D. John V. the issue of these coins was especially considerable. The Dobras were known in the British West Indies under the name of 'Johanneses'[1] (the plural form of Johannes), or under the abbreviated denomination of 'Joes'; and the Half Dobras were called 'Half Joes'. The striking of the Dobras ceased, in virtue of a Portuguese proclamation of 29. November 1732; they gradually disappeared from circulation, and in time the Half Dobras became to be improperly called in some places 'Joes', instead of 'Half Joes'. The gold coins of 4 $ 800 reis were called 'Moidores' by the English. For a time, from about 1790 to 1820, the Portuguese gold coins constituted the principal medium of exchange, besides the Spanish silver whole or cut and fractional dollars. The Half Dobras had a current value of 8 Spanish dollars. These gold coins often happen to be very much clipped, and the origin of this evil practice of clipping them is to be found in the circumstance that the market value of the gold coins was very much superior to that officially established. The abuse of clipping rose to such a point that the coins, instead of weighing four Oitavas, came to weigh only about 3, thus threatening to produce a veritable calamity and obliging the respective administrators to take serious measures. These consisted in the adoption of an arbitrary standard of value, the fixing of a unity of weight, and in the case of coins whose weight came within certain limits (which had been permitted or tolerated in some places), in increasing the weight by means of a plug fixed in the centre of the piece (in French, "clou"[2], and in English, a "plug"[3]). The plug was in many cases composed of an alloy of gold with common metals. In conformity with the different established systems, each isle, or group of islands, proceed to counterstamp the coins with a special stamp, in order to nationalize them. This practice continued down to the first quarter of the nineteenth century, until the coins became demonetized owing to their defaced

---

1. The characteristic feature of the Windward Islands was the prevalence of the Portuguese Johannes as the standard coin. The underrating of this coin at $ 8 led to the circulation of light "Joes" and to the mal-practices of clipping, sweating, etc. *History of Currency in the British Colonies*, by Robert Chalmers, London, 1893, p. 82.

2. Lorsqu'une moëde se trouvait rognée, un orfèvre y pratiquait un trou de façon à écarter le métal et le bouchait avec un morceau d'or d'un titre quelconque qu'il aplatissait ensuite et qui formait une tête de clou. Il donnait ainsi à la pièce le poids légal. *Histoire Monétaire des Colonies françaises*, par E. Zay, Paris, 1892. p. 163.

3. When a gold coin which had been clipped was raised again to the standard weight, the additional gold, fixed on the clipped coin, was called the "plug" and the lumpish result was a plugged gold coin. Needless to say the plugs were frequently adulterated. The coin most commonly plugged was the "Joe". Robert Chalmers, *op. cit.*, p. 23.

and worn condition, and disappeared in the crucibles of the goldsmiths, or were taken out of the country by European dealers. In this way these stamped or plugged coins have become very scarce, and it is easier to come across a specimen either in Paris or London than in the West Indies.

I acquired my first countermarked Half Dobra from the trade at Rio de Janeiro about twelve years ago. On my observing to the moneychanger that the coin appeared to be of very light weight, he replied that it was precisely the reason which made it more valuable, and he showed me that the Half Dobra weighing only 3 Oitavas was in itself already of great rarity, without taking into account the countermark (the numeral 20 beneath which the figure of a small eagle) which doubled its value. I was thus led to study the Half Dobras of short weight and endeavoured to obtain the few specimens which were offered for sale at long intervals on the European market, whilst becoming acquainted with those in other collections.

In the catalogue of the famous *Collecção de Moedas e Medalhas Portuguesas*, of Eduardo Luis Ferreira Carmo, of Porto, I met with the description of three Half Dobras with foreign countermarks (n^{os} 546^{b}, 597 and 598) which appeared to me to belong to the category I was interested in, and on enquiring from the present owner of the collection, H. E. Sr. Aires de Campo, I found my supposition confirmed. This gentleman had the courtesy to allow me to take a photograph of n^{o} 597, which I have reproduced in my book, on p. 169, n^{o} 99.

I found, however, more valuable information concerning the countermarking of the Portuguese gold coins in the Columbian archipelago, in the two publications of E. Zay, Paris, and Robert Chalmers, London, the titles of which I have already given above. The authors of these interesting works, by searching the records of their respective public archives, were able to discover official documents, from which they have quoted, and which explain a good many of these countermarks. We owe to these authors the knowledge of the particular circumstances which led to the counterstamping of the coins, and thus we can now with probable certainty locate the provenance of some of these countermarks.

There exist no doubt other countermarks of these numerous islands which are not yet known. I shall however consider myself fortunate if by these few lines I succeed in awakening the interest of collectors for that particular series and urging them to look for specimens which perchance may lie unnoticed and unappreciated in their cabinets.

I shall now proceed to describe the coins reproduced in the text, and mention at the same time the other specimens known to me, thus presenting to my readers a short résumé ofthe subject.

(*To be continued.*)

QUEEN ANNE'S FARTHINGS.

The following interesting account is taken from the "World of Wonders", a work published by Messrs Cassell, Petter, and Galpin about 1870 : —

Few errors have become more popular than that of the extreme rarity of the farthing coinage of Queen Anne. Many a tyro in numismatics, on inspecting the cabinet of a coin-collector, has exclaimed, "But you have no farthing of Queen Anne! You know there were only three of them struck." And so current has been this belief, that probably no practical error has occasioned more mischief and mortification to those who have been misled by it, than that which I think I can partly elucidate.

The task has often been attempted, but has never been so satisfactorily performed as by Mr. William Till, a medallist in London, who, in the year 1835, drew up as complete an explanation of the error as his extensive acquaintance with numismatics, and his long experience in coin-dealing enabled him to accomplish.

Mr. Till observes : "It will scarcely be believed that persons from almost all parts of England have travelled to the metropolis on the *qui vive*, to make, as they supposed, their fortunes with a farthing of Queen Anne in their possession ; and which, on being taken to the British Museum, has been found to be almost or entirely worthless. From York, and even Ireland, persons have come ; a poor man from the former, and a man and his wife from the latter place."

In the *Times*, Sep. 26, 1826, a magistrate relates the circumstance of a poor man coming from Bedfordshire to London with a real but common farthing of Queen Anne, in the hope of making his fortune by it.

Mr. Till goes on to say, "Indeed it is to be regretted that these are not the only instances known by many. Most of our countrymen labour under the delusion that Queen Anne struck only three farthings, and that the die broke in the third." He says : "I beg leave most unequivocally, and with deference, to assure them that farthings of her reign were struck to the number of some hundreds."

To trace with any degree of certainty this fable to its origin, would be extremely difficult; but from information obtained from one medallist, it appears that some years since, a lady in Yorkshire, having lost a farthing of Anne, which, from some circumstances or other, was rendered valuable to her, offered a reward for the same, thereby stamping a fallacious and ridiculous value on it.

MAN WEIGHING COINS.

The illustration is taken from an old engraving and is identical in size. It is of interest not only as showing the manner of weighing coins at the time, but also the correct way of holding a piece for inspection, which was commented on in the "Numismatic Circular" Vol. XIII, col. 8276, where the right and wrong way to hold a coin is shown.

WEIGHING COINS.
AFTER METZ. 1615-67.

As the engraving is from a picture by Metz, it may be stated he was noted for "portraits and excellent small conversation pieces which are most elaborately finished"; born in 1615, early in life he went to Amsterdam, the date of his death is unknown, but a picture by him bearing the date 1667 was discovered in the Van Loon Gallery at Amsterdam, which appears to be the last definite record known.

LEAVES FROM MY NOTE BOOK

(*Continued from col. 13666.*)

Through the courtesy of Colonel F. W. Leckie of the Indian Army, I am able to illustrate and give the following particulars of an interesting gold medal presented to a native Officer of the Old East India Company. It is a circular engraved medal, $1\frac{7}{8}$ inches in diameter, with a solid cylindrical loop $\frac{1}{4}$ inch for suspension.

Obv. "Presented by Government to Subahdaur Sheikh Soolimaun, 2nd Battn, 2nd Regt. N.I., 20th March, 1810".

Rev. "In token of the high sense entertained by Government of his long services, and of his gallant and meritorious conduct in the attack on the Town of St. Pauls, on the Isle of Bourbon on the 21st September, 1809, in which he was disabled by wounds".

It is verified by the records in General Orders by the Honourable The Governor in Council, dated Bombay Castle, 2nd December, 1809, — Verification of inscribed gold medal presented to Sabadar Shaik Saliman, 2nd Batn 2nd Regt. N.I. for gallantry, 1809.

Bombay Castle, 20th March, 1810.

Read the following letter from the Secretary to the Military Board: —

To

Francis Warden, Esq.,
Chief Secretary to Government.

Sir,

I am directed by the Military Board to request that you will have the goodness to lay before the Hon'ble The Governor in Council the following list of unfits of the 1st Batt. 2nd Regt. N.I. ..... upon which they have merited their recommendation. In laying before the Hon'ble Board the above documents, the Military Board instruct me to request you will solicit the attention of Government to the case of *Sabedar Sheik Saliman of the 2nd Battn, 2nd Regt. N.I.*, an officer whose long service, added to his very gallant and meritorious conduct at *Saint Pauls* on the Island of Bourbon, where he received a wound in the leg, which has disabled him for life, entitle him to a conspicuous mark of the approbation of Government. The Military Board therefore beg leave to recommend that he may receive, in addition to his pension or full pay, a Badge descriptive of his conduct, as well as expressive of the high sense entertained by Government of his Services, on that memorable occasion.

I have the honour to be, &c.,
(Signed) Wm. Newnham,
Secretary to the Military Board,
Bombay Military Boards Office,
10th March, 1810.

The recommendations of the Military Board merited on the documents accompanying the above letter are approved and confirmed by the Hon'ble The Governor in Council, inclusive of the Honorary mark to be bestowed upon Sabedar Sheikh Saliman, 2nd Battn, 2nd Regt.

The medal was purchased from a relative of the recipient.

C. W.

SALES.

THE EARLE COLLECTION.

The most important Auction Sale of coins ever held in the United States took place on June 25, 26, 27, 28 and 29 at Philadelphia under the direction of Mr. Henry Chapman, and from the high prices realized, many of which form records, it proved a great success.

The beautiful catalogue of the Collection, illustrated with numerous autotype plates of the coins, taken direct, and not from plaster casts, does great credit to the compiler.

The lots numbering 3875 comprized ancient Greek and Roman coins, mediaeval and modern coins of Europe and Asia, among which many rarities, and a remarkable series of Americana, which of course predominate.

The Earle Collection was formed with much taste. The coins of the ancient series, especially the Greek, have been selected for their artistic merit and extraordinary beauty. But to obtain an accurate idea of the wealth of this Cabinet, it would be necessary to refer to the Catalogue.

It is therefore no wonder that United States collectors should have availed themselves of this unprecedented opportunity to enrich their collections with specimens from their countryman's numismatic treasures, and that some of the high prices figured below should have been realized by the gems and rarities.

REVIEWS.

Die Münzen und Medaillen des Fürstlichen und Gräflichen Hauses Solms beschrieben von Paul Joseph. Frankfurt a. M. 1912. 1 vol. 8vo, 191 pp. text, 18 plates.

This excellent monograph is dedicated to Prince Carl zu Solms-Hohensolms-Lich at whose instigation, I understand, it was compiled. The original possessions of the princely house of Solms were situated on either side of the Lahn between Wetzlar and Weilburg. Marquard I, *dictus de Solmis*, is the earliest known bearer of the name, which first occurs in 1129. Charles V. granted the right of coinage to Count Reinhard zu Solms on 8. February 1552 and the family, which subdivided into various branches, preserved the right until the nineteenth century : Solms-Lich, Hohensolms, Rödelheim I, Laubach I, Rödelheim II, Laubach II, Baruth, Braunfels, Hungen and Greiffenstein.

Not only the coin-issues, but also the medals known of the various rulers of the house of Solms are carefully described and illustrated. A descriptive chapter is dedicated to the medals of the ladies of the same family who married abroad.

Such works as this do much to advance our knowledge of German numismatics in all its manifold ramifications.

NUMISMATIC SOCIETIES, MUSEUMS &c.

BRITISH NUMISMATIC SOCIETY.

June 26. — Mr. Carlyon-Britton, President, in the chair. — Messrs. B. F. Fletcher and H. Stroud were elected Members. — The President announced that Mr. J. Sanford Saltus had increased his contribution to the Society's research fund to nearly 200 *l.* — Mr. Henry Symonds read a paper on the coinage of James I. as recorded in the trials of the pyx, the results of which he had transcribed from the original verdicts of goldsmiths. The preliminary procedure at the mint and the subsequent ceremony at Westminster were set out in detail, and traced in an unbroken sequence from the fourteenth century. The Irish section of the coinage was more particularly discussed, the author showing from documentary evidence, as well as by means of an assay, that James I. provided his subjects in Ireland with silver money of the standard used in England, thus refuting the generally accepted belief that the coins for the smaller island were of a lower degree of fineness. Mr. Symonds also read extracts from the Exchequer accounts dealing with Touch-pieces, Maundy-money, and the working appliances and tools used in minting operations at the Tower during the Jacobean period.

Lieut-Col. Morrieson followed with a supplement to his treatise on the silver coins of James I., in which he compared the known coins of the reign with the complete records of the issues as disclosed by the preceding paper.

Mr. Symonds and Lieut.-Col. Morrieson exhibited examples of James I'.s money in illustration of their papers; Mr. Shirley-Fox, a half-groat of Edward III. with the open € in the lettering, and from the same reverse die as the Montagu *pied-fort*; and Mr. Lawrence, eight varieties of the Calais pence.

COINS OF THE MOST FAMOUS RULERS IN THE WORLD'S HISTORY

(*Continued from col. 13824.*)

ROBERT BRUCE, KING OF SCOTLAND.

1274-1329.

This Prince, the restorer of Scottish independence, was born in 1274, the year in which Edward I. of England was crowned; he was the son of Robert Bruce Earl of Carrick, and for a time did homage to Edward I. of England, but afterwards joined the national party, and became one of a regency of four, with William Wallace, John Comyn of Badenoch, and Lamberton bishop of Glasgow, as his colleagues.

Comyn and Bruce at length quarrelled over their rival pretensions to the Scottish throne, and in the heat of an altercation between them in the Church of the Greyfriars in 1306, Comyn was slain by Bruce; and in the same year the latter was crowned at Scone.

He was defeated by an English army sent against him under the Earl of Pembroke, and obliged to flee to Rathlin in Ireland; but afterwards returned and landed in Carrick, cleared the English out of all the fortresses except Stirling, and on the 24th June 1314, defeated the English under Edward II. at Bannockburn.

After this memorable battle, which both in its immediate consequences, and its more remote effects, must be regarded as one of the most important events in the history of Scotland, it paved the way in 1328, to the acknowledgement of the independence of Scotland, as well as Bruce's right to the crown.

This termination of the war of independence which had lasted for thirty-two years, was not long survived by him to whom this successful result was chiefly due, for King Robert was attacked by a leperous malady which caused his death at Caldross Castle in 1329, in the fifty-fifth year of his age.

His heart was taken out and embalmed, and delivered to Sir James Douglas, who in obedience to the dying commands of the King, proceeded to carry it to Jerusalem for the purpose of interring it in the church of the Holy Sepulchre. Douglas however was killed at Seville on his journey, in an engagement with the Moors, and his companions brought back the heart of Bruce which was finally buried in Melrose Abbey.

" And ages after he was laid in earth
' The Good King Robert ' was the name he bore ".

104793 — Halfpenny, same legends and type, but with pierced mullet in two angles only of the cross. F. V. R. 1 » »

RIENZI THE TRIBUNE.

1313-1354.

Cola di Rienzi is the hero of a strange historical episode in the XIVth century.

He was the son of a water carrier; but although of so humble a birth, he had acquired great learning, and was remarkable for his profound knowledge of antiquity. A disciple of Petrarch he dreamed like that poet of the regeneration of Italy.

He became inspired with a noble ambition to restore the ancient glory of Rome, and being endowed with an eloquent tongue persuaded (with sanction of Pope Clement VI. who was then at Avignon) his fellow citizens to rise against the tyranny to which they were subjected at the hands of the Nobles, in which he at length was successful.

To create this new Rome, Rienzi was elected Tribune, and at first as unquestioned ruler of Rome, he displayed much wisdom and vigour; but the long fantastic and dramatic elements began to mingle with the valiant reality.

Proud of having been deliverer, Rienzi deliriously imagined that he was a demigod, so as his sway had risen as a show, it vanished as a show.

After a dictatorship of seven months, Rienzi fled, and anarchy resumed at Rome its dominion; he was afterwards assassinated in an émeute just seven years after the commencement of his political career.

SIGISMUND III. OF POLAND.

1587-1632.

This monarch the son of John III. King of Sweden, was elected King of Poland by the Nobles to the exclusion of Maximilian of Austria. Being also King of Sweden, but by name only, as his uncle Prince Charles of Sudermania usurped the Swedish throne in detriment to his nephew Sigismund III., the latter appealed to the Poles for their assistance against the Swedes who sought to deprive him of his hereditary rights.

He arrived in Stockholm in 1594, and caused himself to be crowned, but he only obtained the empty title of King of Sweden, as all authority remained in the hands of the Prince of Sudermania who convoked a diet soon afterwards, and had himself nominated Regent with unlimited powers.

Sigismund then obtained the consent of the States of Poland to make a second journey to Sweden.

He set out in 1577 at the head of an army of 3000 men to oppose his uncle, but he did not know how to profit by the favorable dispositions of a few provinces, nor by the victory he gained over his rival on the 8th February 1598, instead of pursuing his advantages, he entered into " pourparlers " with Charles, who having received reinforcements for which he had been awaiting, attacked Sigismund in his turn, and defeated him completely.

Following this disaster Sigismund found himself compelled to abandon his rights to the decision of the Swedish diet, and returned to Poland.

However the States convoked by the Prince of Sudermania in 1599, declared at his suggestion that Sigismund should be deprived of his rights unless he returned at once to his hereditary estates, or sent his son to be brought up in the Lutheran religion.

Some years later Charles threw off the mask and proclaimed himself King of Sweden, being recognized as such by the principal European powers.

SIXTUS V. ROMAN PONTIFF.

1585-1590.

This Pope was born near Monalto in 1521, of poor parents; he was of the Franciscan order, and famous as a preacher; was elected successor to Gregory XIII., during whose pontificate, he affected infirmity, to reveal himself a vigorous pontiff as soon as he was installed.

He set himself at once to stamp out disorder, reform the administration, and replenish the exhausted treasury of the Church; he allowed freedom of worship to the Jews, and yet was zealous to put down all heresy in the Christian States of Europe.

His services to Rome were not repaid with gratitude, for the citizens destroyed his statue at his death.

STANISLAUS, AUGUSTUS, KING OF POLAND.

1732-1798.

The last King of Poland was born at his father's seat in Lithuania on the 17th January 1732. He was educated with care in the Roman catholic religion, and soon became distinguished by the external graces of his person, and by the superiority of his mental attainments, on making a tour through Europe, he lived too extravagantly for his small fortune, and was arrested for debt in Paris.

At London he made the acquaintance of Sir Hanbury Williams, chief of the English Embassy at St. Petersburg to which he was attached in 1755, one part of William's instructions, was to gain over to English interests the Grand-duchess Catherine, who looked with favor upon the handsome Polish attaché, then in his 23rd year.

From this time forth, the Grand-duchess became the arbiter of his fate, and on her dethronement of her sottish husband Peter III. in 1762, when she became Empress Regnant, she wrote to Stanislaus offering him the throne of Poland, about the acceptance of which however, there was great hesitation on his part, as he replied to the Empress " I do not wish to be King, unless I can rely upon being married to your Majesty, without you a crown has no attractions for me ".

Nevertheless he accepted the crown which was to bring him so much sorrow and humiliation; he soon found out however, that as the nominee of Russia, he had lost all independence as a sovereign.

Stanislaus tried to govern Poland wisely and liberally, but was thwarted by the opposing factions, and later when he witnessed the partition of his country, and was embarrassed by debts, his health gave way under the treatment he met with, and resulted in his death on 12th February 1798; he was buried in the Catholic Church at St. Petersburg.

SEPTIMIUS SEVERUS, ROMAN EMPEROR.

146-211 A.D.

Lucius Septimius Severus was born in A.D. 146. He filled the office of prætor at the age of 32; and was appointed, soon afterwards commander-in-chief in Illyricum and Pannonia. Here after the murder of Pertinax, he was proclaimed Emperor by the soldiers at Carnutum in 193.

His presence now was urgently required in Asia to oppose his rival Pescennius Niger who had assumed the purple in Syria. After a sanguinary campaign, Niger was defeated and taken prisoner by Severus at Issus, near the scene of Alexander the Great's victory over Darius; Niger was at once put to death along with his family in 194. On his return from the East, Severus had to encounter a new adversary Clodius Albinus who had assumed the title of Emperor in Gaul. He defeated him in battle near Lyons in 197.

Severus soon hurried back to the East where the incursions of the barbarians were a menacing danger to the Romans, and crossed the Euphrates in 198, accompanied by his sons Caracalla and Geta. His expedition was eminently successful; he took the cities of Babylon Seleucia and Ctesiphon, and reduced the Parthians to terms of submission. He also attempted the conquest of Arabia, but in this he failed like all previous conquerors. In 208 he undertook a campaign in Britain, in which the Romans were then sorely harassed by incursions of the Picts, to repel whose inroads, he built the famous rampart, still known as the wall of Severus.

His presence checked the barbarians for a time, but he is said to have lost more than fifty thousand men. Worn out by incessant fatigue, Severus died at York in 211.

THEODORA EMPRESS OF THE EAST.

1055-1056.

This Princess who was the daughter of Constantine VIII, and also the sister of the Empress Zoë, reigned alone, after the death of Constantine IX, when she was seventy-six years of age.

Old as she was, she shewed great vigour, and the Empire was at peace during her short reign; she was the last of the Basilian dynasty, and died in 1056 of an internal complaint; a few days before she died, she named Michæl Stratiotikos her successor, and her choice was confirmed by the senate and people.

THEODOSIUS I (THE GREAT), ROMAN EMPEROR.

346-395.

Theodosius was the son of Theodosius the Elder, a noted General, in whose campaigns in Britain and elsewhere he participated; he was marked out for distinction by his military prowess, and in 379 was invited by the Emperor Gratian to become Emperor in the east so that he might stem the advancing Goths. In this Theodosius was successful, as the Goths were defeated, conciliated, had territory conceded to them, and became in large numbers, Roman citizens. Rebellions in the Western Empire and usurpations of the throne compelled Theodosius to active interference, which led to his becoming sole head of the Empire (in 394) after successfully combating the Revolutionaries, Franks and others.

This Emperor was a Zealous Churchman and stern suppressor of the "Aryan heresy"; the close of his reign marks the beginning of the end of the Roman Empire, for his death opened the floodgates of barbarian invasion, and from this date begins the formation of the new Kingdoms of Europe.

TIBERIUS ROMAN EMPEROR.

A.D. 14-37.

Tiberius was born at Rome, and was of the Claudian family; he became the stepson of Augustus, who had married the mother of Tiberius when her son was only five years old. This prince was himself married to Agrippina the daughter of Agrippa, but was compelled to divorce her and marry Augustus's daughter Julia, by whom he had two sons, and on her death, he was adopted as the Emperor's successor, whom after various military services in different parts of the empire, he succeeded in A.D. 14. His reign was distinguished by acts of cruelty, especially at the instance of the minister Sejanus whom out of jealousy he put to death; given up to debauchery, he was suffocated in a fainting fit by the captain of the Prœtorian Guards in A.D. 37, and succeeded by Caligula; it was during his reign that Christ was crucified.

TITUS ROMAN EMPEROR.

A.D.41-81.

Titus Cæsar Vespasianus, son of Vespasian and Domitilla, was born at Rome in A.D.41. Whilst quite young he accompanied Vespasian into Germany and Britain, and his valour, intrepidity, and filial love were conspicuous, in delivering his father out of the hands of the Barbarians who wished to keep him in captivity.

When Nero sent Vespasian into Judæa, Titus had the command of a legion, and subdued Tarichea and Gamala, the chief towns of this country. In A.D.68 having been sent by his father to salute the coming of Galba, he learnt at Corinth of his death, and the revolt of Vitellius.

Vespasian having gone to Rome in A.D.69, Titus received orders to remain in Judæa.

This same year after the death of Vitellius, he was named Caesar and Prince of Youth, and made Consul with his father for the following year.

In A.D.70 took place the conquest of Judæa, and the complete destruction of Jerusalem; following this memorable event, Titus was proclaimed general. In A.D.79 he succeeded Vespasian, and obtained a victory over Julius Agricola who was devastating Brittany.

This year was memorable for the terrible eruption of Vesuvius which engulfed Pompeii, Herculanæum and Stabia, already shaken by the earthquakes of the year 63.

In the year 80, a fire destroyed again the temple of Jupiter Capitolinus, and several other buildings; Titus dedicated the Amphitheatre (now the Coliseum) and the public baths, and caused to be celebrated the great games.

In 81 Titus died, the object of universal regret, not without suspicion of having been poisoned by Domitian.

Titus was the idol of the citizens, and it is a matter for regret that his reign only lasted three years; during that short period however, he won for himself the title of the "Delight of Mankind"

TRAJAN, ROMAN EMPEROR.

A.D.97—117.

Marcus Ulpius Trajan was the first Roman Emperor of foreign extraction; he was born at Italica near Seville in A.D.53, of an ancient but not noble family, as his father was the first of his race to be invested with the dignity of consul. He was at Cologne when he heard of the death of Nerva in 98, and was immediately recognised as Emperor by the Senate, the people and the army; the following year he made his entry into Rome and distributed a largesse to the people.

Trajan conquered Dacia in 105, and reduced it to a Roman province; he returned to Rome for his second triumph in 106, and commenced the construction of the Via Trajana. At the same time he began to build the famous Trajan Column, which still exists to this day, and illustrates various episodes in the Dacian war.

In his sixth consulate, Trajan ordered the building of the port of Centumcellæ (now Civita-Vecchia), and threw a bridge over the Danube, besides building the Forum and the Basilica Ulpiana.

Pliny relates that Trajan furnished the means for the needs and education of nearly 5000 young children; he also distributed three largesses to the people, conquered Parthia, imposed his will on king Parthamaspates, and at length placed Armenia and Mesopotamia under the laws of the Roman people.

Trajan died at Selinus in Cilicia in the year 117, and left behind him the reputation of being one of the most perfect princes that ever graced a throne; he was also the first Emperor to whom the Romans gave the magnificent title of "optimus Princeps".

VALENTINIAN I. ROMAN EMPEROR.

A.D. 364-375

Valentinian was born of humble parents in Pannonia A.D. 321; he was elected Emperor by the troops at Nicæa in 364, ten days after the death of Jovian, and as soon as he returned to Constantinople he associated his brother Valens with him in the Empire, and gave him the title of Augustes.

Valentinian chose the West for his empire, and gave the East to Valens in 367.

Having built a fortress on the banks of the Danube in the country of the Quades, these people represented to him that he had violated the right of nations in building a fortress in an independent country; the Gaulish præfect Maximian, pretending to listen to the remonstrances of the King of the Quades, invited him to supper and assassinated him.

The indignant Quades rushed to arms and aroused the Sarmatians; on this news coming to the ears of Valentinian, he assembled his troops, entered the country of the Quades and put them to fire and sword, after which he repassed the Danube and encamped in Pannonia. The ambassadors of the Quades came there to him to sue for peace, but Valentinian believing they had come only to insult him, put himself into such a violent passion, that he broke a bloodvessel and died the same day (375).

This Emperor passed a great number of excellent laws, but in spite of many good qualities, he had several faults; he was however distinguished for his capacity and valour, the greater part of his reign being spent in repelling the inroads of the barbarians.

VESPASIAN, ROMAN EMPEROR.

A.D. 69-79.

Titus Flavius Vespasianus (the tenth of the twelve Caesars) was born in the Sabine territory, A.D. 9 of humble parentage. Under Claudius he assumed the command in Germany, and afterwards in Britain, and gained there such brilliant successes that he received Triumphal honours.

Under Nero he governed Africa with great integrity, he accompanied the Emperor to Achaia, and was ordered by him in 66 to pacify Judæa and become the Governor.

He acquitted himself of this duty with much glory during the strife between Galba, Otho, and Vitellius.

Being proclaimed Emperor by the army of the East, he was recognised successively by the legions of Egypt, Judæa, and Syria, and soon after by those of Moesia and Pannonia, which marched on Rome and put Vitellius to death.

His authority was recognised at Rome without any contest, and he made his entry into the city in 70; the following year his son Titus returned from the East, and triumphed with him after the conquest of Judæa.

The temple of Janus was closed, and Vespasian rebuilt the Capitol which had been burnt during the troubles in the reign of Vitellius.

In 72 Paetus Governor of Syria invaded Commagene by order of Vespasian, because Antiochus King of that country was suspected of collusion with the Parthians; Antiochus came to Rome with his two sons, and was honorably received there.

This same year Vespasian was made Censor with his son Titus; in 74 he gave back their freedom to the peoples of Achaia, Lycia, Rhodes, and Cilicia, and in the year 75, he consecrated the temple of Peace.

Vespasian had waged war successfully in Germany, Britain and Jerusalem, and nearly all through his reign, the temple of Janus was closed; he died at the age of 69 and seven months, after a reign of ten years.

VICTOR EMMANUEL II, KING OF ITALY.

1849-1878.

Victor Emmanuel the eldest son of Charles Albert was born at Turin in 1820; he ascended the throne of Piedmont on the abdication of his father in 1849, after the disastrous three day's campaign of Novara. His first act was to sign an armistice with Radetzky, by which he consented to the invasion of his lands as far as Sesia, and to the partial occupation of the citadel of Alessandria by an Austrian garrison.

England and France however obtained the evacuation of Piedmontese territory by the Austrians, and the King and his counsellors had leisure to recompose the internal affairs of the Kingdom sadly disorganized by the disastrous war with Austria.

He sought by participation in the Crimean war to strengthen the position of Piedmont in Europe; then in 1859 gladly accepted the French alliance against Austria, handing over to France the province of Nice and the faithful Savoy — the cradle of his race — in exchange for the plains of Lombardy minus the fortress of Mantua and Peschiera.

The popular enthusiasm for the King rose to its height when on the field of battle, he led his troops in person exposing himself in the foremost ranks fighting as heartily as the meanest of his soldiers which earned him the name of "Il re galantuomo"; with the help of Garibaldi the King annexed Naples and Sicily, and the former believing the latter willing to be named King of Italy at Rome, rallied his volunteers and proclaimed his intention of giving Rome to Italy and crowning Victor Emmanuel King from the capitol.

Victor Emmanuel however forbade this enterprise, and sent orders to General Cialdini to "crush destroy and annihilate" Garibaldi, which orders were obeyed, with the result that Garibaldi was wounded and his followers dispersed on the fatal field of Aspromonte in 1862.

Victor Emmanuel was afterwards proclaimed King of Italy, and in 1870, he entered Rome as his capital city; as the monarch of United Italy, he reigned eight years, dying in 1878, when he was succeeded by his son Humbert.

104870 **Gold**. Five-franc piece 1863. VITTORIO EMANVELE II. Bare head to left, below the date. ℞. REGNO D'ITALIA. Shield of arms crowned within wreath, below, L.5. V. F. » 6 6

28th & 61th FOOT, THE GLOUCESTERSHIRE REGIMENT.

105548a 28th FOOT GLOUCESTERSHIRE REGIMENT. Regimental silver medal. Obv. XXVIII crowned within a wreath, above, on a scroll, THE SLASHERS. Rℒ. PRESENTED TO PRIVATE... (No 8 COMP.) BY THE NON COM. OFFICERS AND PRIVATE SOLDIERS OF THE RECT. IN TESTIMONY OF HIS NOBLE AND MERITORIOUS CONDUCT AT NOGALES 4th JANY. 1809. F. & E. R. 12 » »

Nicknamed the Slashers from its conduct at the passage of the river Brunx 1776.

The reserve reached Nogales on the evening of the 4th after having gained twelve hours start of the enemy by a forced march of thirty- six miles. " Under the most favourable circumstances, the tail of a retreating force exhibits terrible scenes of distress, and on the road near Nogales the followers of the army were dying fast from cold and hunger. The soldiers barefooted, harassed, and weakened by their excesses at Bembibre and Villa Franca, were dropping to the rear by hundreds, while broken carts, dead animals, and the piteous spectacle of women and children, struggling or falling exhausted in the snow, completed a picture of war, which, like Janus, has a double face. Vide Napier.

ADVERTISEMENTS

NOW READY

PARTS I and II

MONNAIES BYZANTINES

BY

COUNT JOHN TOLSTOY

Large 8vo, numerous plates. **Price** 6/6 nett. each.

Extract from Prospectus:

"Subscribers will receive the parts as soon as published, on the following terms: the first, second and third parts for 6/6 (1 dollar 60 cents) net, each part; the subsequent parts for 5/6 each (1 dollar 30 cents), and the last for 2/2 (60 cents).

The price of each part to non-subscribers will be 8/6 (2 dollars 10).

Once the complete work is published the price will be raised.

N. B. Although the work is written in Russian, the author thinks that persons quite ignorant of the Russian language will be able to use it, as it contains reproductions of all the described coin-types and of over half the varieties. The text of the plates is in Latin or Greek, the values of the coins given in francs, and the weight in grammes. All the legends are reproduced in the text in fac-simile, and transcribed in Latin and Greek.

As all the parts will have one common pagination, and the plates enumerated in sequence, subscribers and purchasers will be able to bind the parts as they please.

The work will comprise the description of all the Byzantine coins known to the author, as well as those of the Empires of Thessalonica, Nicaea, Trebizond, and the imitations of Byzantine types issued by the Goths and Lombards of Italy".

The work will consist of 9 to 12 parts, two or three appearing yearly.

Subscriptions received by SPINK & SON Ltd.

17 & 18 Piccadilly, London, W.

MONTHLY

NUMISMATIC CIRCULAR

THE *Monthly Numismatic Circular* will be forwarded post free on receipt of half-a-crown (= 3 francs = 2 ½ marks = 60 U. S. A. cents, in P. O. O. or stamps) for one year's subscription.

Should any applicant not receive it regularly by post, please notify the omission to us, when it shall be at once rectified. All communications respecting the Numismatic Circular (either referring to its literary portion or to its catalogue of coins, &c. for sale) should be made to our West-End house, 17 and 18 Piccadilly, London, W., where all letters and orders will receive immediate attention.

Cheques crossed National Provincial Bank of England, Piccadilly Branch.

Any coins or medals can be had on approval if the applicant is known to us, or, if not, on receipt of references. Postage on coins, as a rule, is paid out.

Orders for coins from the annexed list will be executed in rotation, but preference will be given to clients who are willing to purchase outright, providing the coins answer to the description.

Coins not approved of can be returned.

LA *Circulaire mensuelle de Numismatique* sera adressée franco à toutes les personnes qui voudront bien en faire la demande en nous faisant parvenir 3 francs 20 centimes par mandat postal pour un abonnement annuel.

Nous prions nos correspondants d'adresser toutes lettres et communications relatives à la partie littéraire du journal ou au catalogue des monnaies et médailles, à notre établissement, 17 et 18, Piccadilly, Londres, W.; nous y répondrons immédiatement.

Les ordres seront exécutés à tour de rôle en donnant la préférence aux commandes effectives.

Toutes les pièces seront envoyées *à condition*, si le client le désire, mais le port de retour est à sa charge.

Les personnes qui ne nous seraient pas connues sont priées de nous fournir des références.

DAS *Numismatische Circular* wird portofrei, nach Empfang von 2 ½ Mark (3 Kronen ö. W.) als Jahresbetrag, geschickt.

Sollte jedoch ein Abonnent dasselbe nicht regelmässig erhalten, so bitten wir, uns gefälligst Anzeige davon zu machen, um weitere Unregelmässigkeiten zu verhüten.

Alle Mittheilungen, welche dieses "Numismatische Circular" betreffen (gleichviel ob dieselben sich auf den literarischen Teil oder auf das Verzeichnis der Münzen, &c. zum Verkauf beziehen), sollten an unser West End Etablissement, 17 und 18 Piccadilly, London, W., gerichtet werden, wo Briefe und Aufträge sofortige Erledigung finden.

Jede Münze oder Medaille wird zur Ansicht gesandt. Bestellungen werden nach Reihenfolge des Einganges effectuirt und Nichtconvenirendes zurückgenommen.

Rückporto zu Lasten der Herren Besteller.

Uns unbekannte Herren Sammler werden um Aufgabe genügender Referenzen ersucht.

GREEK COINS.
THE ANCIENT COINS OF SICILY.

(*Continued from col. 13852.*)

GELA.

GELA IN THE FINE ART PERIOD.

In 466 B.C. after the expulsion of Thrasybulus from Syracuse the men of Gela who had been forced to reside in that city returned to their own homes, and a new period of liberty was commenced at Gela which lasted until the invasion of the Carthaginians in 406 B.C.

The citizens appear to have joined in the policy of the other Dorian cities of Sicily, and to have been among the first to promise their support to the Syracusans in 415 B.C., when the Athenian expedition threatened the island. Thucydides tells us "the Geloans sent a squadron of five ships, four hundred dartmen, and two hundred horse" (VII, 33). When Gylippus arrived to assist the Syracusans Thucydides tells us: "To the aid of the Syracusans came the Camarinaeans who lived on their borders; the Geloans who lived next to them" (VII, 58). Diodorus Siculus (XIII, 4) mentions the Geloans as among those who promised to side with the Syracusans. In c. VII he mentions the Geloan soldiers who joined the forces of Gylippus.

In c. XII he mentions additional help from Gela. A few years later the Carthaginians arrived, and Himera, Selinus and Agrigentum fell into their hands. Many of the citizens of these towns had fled to Gela for refuge, and were kindly entertained. The Geloans begged the Syracusans to help them, and Dionysius who was then rising to power visited Gela, and brought about a democratic revolution in the city, but did nothing to help them against their enemies.

In the spring of 405 B.C. the Carthaginians began the siege, and Dionysius came to their assistance, but when his first attack upon the Carthaginians was unsuccessful he recommended the Geloans to abandon the city, and take refuge with their families in Leontini, leaving their city to be laid waste and plundered by the enemy (Diodorus Sic. XIII, c. 108, 111, 113).

When Dionysius made peace with Himalco, the Carthaginian general, the Geloans returned to Gela, on condition that they did not rebuild the fortifications, and that they should pay tribute to Carthage (Diod. XIII, 114).

Gela never rose again to its former prosperity; this subjection to Carthage only lasted nine years, for in 397 B.C. the Geloans joined Dionysius in his expedition to the western cities, and at last secured their independence by the treaty concluded in 383 B.C. (Diod. XV, 17).

The coinage shews by its types but few references to the events described above, and probably many of our coins of this period were struck before the fall of the city.

The ear of barley, however, which appears on the obverse of the coins of this time over the head of the bull, may have been copied from the coins of Leontini, the city which received the refugees, but the coins are earlier than the date of that flight. Adolf Holm dates these coins between 430 and 360 B.C.

There is however one type (no. 55 B. M. C.) on a didrachm of Gela which Adolf Holm conjectures to have commemorated the assistance rendered by the Geloan cavalry to the Syracusans in their struggle with the Athenians.

There is a difference in the shape of the helmet of the horseman which is Phrygian in character, and that of the prostrate foe, which is provided with ear pieces and a long crest, similar to those in the exergues of the Syracusan dekadrachms, and the shield is exactly of the same shape. These Syracusan dekadrachms, copied from the older Damarateia, were most probably issued to commemorate the victory over the Athenians.

One of the exceedingly rare gold coins of Gela bearing the fore-part of a horse was copied immediately after the fall of Gela by the Carthaginians; it is described and illustrated on p. 99 of A. J. Evans' "Medallions".

Evidently Greek artists were employed by the Carthaginians.

A distinguishing mark of the coins of this period issued in Gela is the flying eagle which appears over the quadriga on the reverse of the tetradrachms instead of the more common Nike.

Some of the types shew a serpent in the talons of the eagle (No. 58 B.M.C.). No explanation of the introduction of an eagle in place of Nike has been given by any writer on the subject.

The tetradrachms with the man-headed bull shew a gradual improvement in style up to the time of the destruction of the city.

Both in the lists of coins in the British Museum, and that in Adolf Holm's work those which bear the human head of the young river-god are placed first, before those bearing the fore-part of a human-headed bull.

The horses in the quadriga on the Reverse of the former are advancing at a slow pace, either walking or trotting, while the horses on the latter coins are galloping; the slow pace is generally found on the earlier coins and the galloping horses on the later. Note also that the legends on the Bull type coins are retrograde. Yet for all this as the young human head is found on the didrachm bearing reference to the Geloan cavalry sent against the Athenians it seems probable that both series were contemporaneous.

If the beautiful tetradrachm bearing the figure of the City-goddess crowning the monster bull is evidence of the Geloans having in some way overcome the natural rush of the waters and used them for irrigation, then the appearance of the youthful human head instead of the bull form would be accounted for, the river having lost its old wild rush, and become manageable. If this is so, then the old bull form would be the earlier and this would be in harmony with the usual development of types, as these bull form types are more like those of the transitional period.

The name **ΣΟΣΙΓΟΛΙΣ** "Saviour of the city" would then imply salvation from danger from the river. The question arises how far may we regard the type as a commemoration of the saving of the city by Dionysius when he made peace with the Carthaginians and brought back the exiles from Leontini?

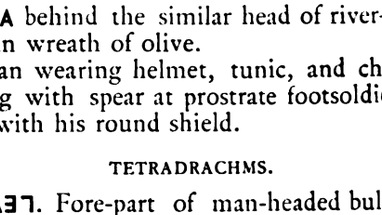
SILVER COINS OF THE FINE ART PERIOD.

Tetradrachm. 265 grains.

I. Obv. Young head of the river-god Gelas, to left, with short horn on his brow, diademed; around, three river fishes, beautifully wrought.

Rev. **ΓΕΛΩΙΟΝ** in the exergue.

Quadriga to right, driven by Nike wearing the charioteer's long chiton; the horses trotting; above in field, olive-wreath: plain border.



DIDRACHM.

Normal weight: 134 grains.

II. Obv. **ΓΕΛΑ** behind the similar head of river-god to left; no fishes. All within wreath of olive.

Rev. Horseman wearing helmet, tunic, and chlamys galloping to right, striking with spear at prostrate footsoldier, who tries to shelter himself with his round shield.

TETRADRACHMS.

III. Obv. ƷΛΛƎ⅂. Fore-part of man-headed bull, swimming to right; above, in field, a barley-corn; on edge where bull's body is divided ⅂Λ? Legend above barley corn.

Rev. **ΓΕ ΛΩ ΙΩ**.

Quadriga with horses galloping to right, driven by Nike holding goad and reins, above, an eagle flying to right holding serpent in its talons.

Original from CORNELL UNIVERSITY

Some specimens have a stalk of barley in the exergue.
Some specimens have the Quadriga to left.

Between 461-430 B.C.

TETRADRACHM.

IV. Obv. **ΣΟΣΙΓΟΛΙΣ**. Female figure standing to left holding laurel-wreath over the head of a human-headed bull of which the fore part only is represented in the action of swimming; the legend in the field above.
Rev. **CΕΛΟΙΟΝ**. Quadriga driven at a walking pace by male charioteer holding reins and goad. Legend in the exergue.
Illustrated Tafel II, no. 10, Adolf Holm, *Ges. Sic*; also on plate V, no. 11 of G. F. Hill's *Coins of Anc. Sic.* Sosipolis is interpreted by Schubring to mean Persephone; by Imhoof, Nike; by Eckhel, Holm, and Head as the Tyche of Gela. Usener calls the figure "a conception of the common wellfare of the city considered as a goddess".
Num. Chron., 1883, pl. IX, 4. *N. Chr.*, III, Ser. X, 1890, p. 314. Cat. Banbury, 311.

OBOLS.

Normal weight 11.11 grains.

V. Obv. **Γ ΕΛΩΙΩΝ**.
Bearded head of river-god Gelas to left, crowned with barley: horn falling back from temple.
Rev. Head of young Heracles to right, wearing lion's skin: behind, astragalos.

HEMIDRACHM.

VI. Obv. **ΓΕΛΑΣ**. Forepart of a man-headed bull.
Rev. Horseman, but with no footsoldier. Imhoof, M.Gr.B. 2.

Gold Coins.

Weight of specimen in Brit. Mus. 26.9 grains.

I. Obv. **ΓΕΛΑΣ**. Forepart of man-headed bull swimming to right; above, a barley corn.
Rev. Horseman to right, wearing Phrygian helmet, short tunic and cothurnai, holding reins and spear: horse walking with high action.

II. Weight of specimen in Brit. Mus. 17.7 grains.
Obv. **ΣΩΣΙΓΟΛΙΣ**. Female head to left wearing necklace and sphendone, broad in front and behind: plain border.
Rev. **ΓΕΛΑΣ**. Forepart of man-headed bull, swimming to left: plain border.
III. Weight of specimen in Evans Collection 13½ grains.
Obv. Female head to left similar to last, **ΣΟΣΙΓΟΛΙΣ** in front of face.
Rev. Forepart of horse, bridled, swimming.

Bronze coins of fine art period.

TRIAS.

I. Size .95 to .75. Obv. Young head of the river-god Gelas to right, with short horns over his forehead, hair erect; behind, a barley-corn: border of dots.
Rev. **ΓΕΛΑΣ**. Bull walking to right with head lowered; in exergue •••: border of dots.

N. B. On some specimens a barley corn appears over the bull on the Reverse.
II. Obv. **ΓΕΛΑ**. Similar head, and symbol.
Rev. Similar to no. 1 but for symbol a branch of olives; in exergue •••; border of dots.
III. Obv. Similar head to right, but wearing taenia.
Rev. Bull walking to left, above Γ; same exergue and border.
IV. Obv. Similar, but no legend.
Rev. **ΓΕΛΑ**. Similar.

UNCIA.

V. Size .45. Young head of Gelas to right, short horns on forehead, hair erect, behind, barley corn: border of dots.
Rev. **ΓΕΛΑ**. Bull walking to left with head lowered; above a barley corn; in exergue •: border of dots.

Coins without marks of value.

VI. Size .65. Obv. Head of bearded Heracles to right, wearing lion's skin; behind, astragalos?
Rev. **ΓΕΛΩ I ΩΝ**. Bearded head of Gelas to left with short horns over forehead, and crowned with barley.
VII. Size .45. Obv. Head of young Heracles to right, wearing lion's skin.
Rev. **ΓΕΛΩΙ**. Similar type but horn not visible.
VIII. Size .55. Obv. Head of Demeter or Persephone three-quarter face towards right, wearing wreath of barley, earring and necklace.
ΓΕΛΩΙ ΩΝ around lower edge.
Rev. Similar to nos. VI and VII. (*To be continued.*)

BIOGRAPHICAL NOTICES OF MEDALLISTS
Coin, Gem, and Seal Engravers, Ancient and Modern, with References to their Works.

B.C.500 — A.D.1900.

(*Including the names of several hitherto unpublished artists.*)

One-hundred-and-sixty-eighth article.

(*Continued from col. 13865.*)

TODESCHINI, GIROLAMO (*Ital.*). A Venetian Painter of the second half of the fifteenth century. Milanesi has suggested that he may be the author of four medals, signed **G. T. F.**, which represent Venetian personages and were modelled *circ.* 1474-1478. These medals are: Zaccaria Barbaro, procurator of St. Mark; uniface; 113 mill. (about 1478); — Stefano Memmo; uniface; 98 mill.; — Niccolo Marcello, 69th doge of Venice (1397-1473, † 1474); obv. Bust to l., signed **G. T. F.**; ℞. IN.NOMINE.IHE.OMNE.GENV.FLECTATVR.&c. Flaming monogram; 98 mill. (issued probably between August 1473 and December 1474, the dates of the accession and decease of the doge Niccolo Marcello); — Giovanni Mocenigo, 72nd doge of Venice (1408-1478, † 1485); uniface; 87 mill. (issued soon after the election of Giovanni Mocenigo about Mayor June 1478).
Dr Friedländer was inclined to consider these medals as retrospective.
Heiss remarks: "Le modelé de ce Médailleur était très fin, de peu de relief, très ferme et très savant; ce devait être un graveur de monnaies de premier ordre."

BIBLIOGRAPHY. — Armand, *op. cit.*, I, 56; III, 13. — Heiss, *op. cit.*, *Venise*, p. 112. — Friedländer, *op. cit.* — *Dict. of Medallists*, II, 323.

TODMAN (*Brit.*). Die-sinker of London, about the middle years of the nineteenth century. His signature is found on Australian, &c. Tokens (D. F. Howorth, *Colonial Coins and Tokens*, London, 1906, p. 83).

TOEPFFER, JEAN CHARLES (*Swiss*). Sculptor of Geneva, born in that town on 23. April 1832, died in Paris on 13. March 1905, at the age of 73. He was a pupil of his father, and of Barthélemy Menn. He left numerous works of statuary, busts, medallions and medals, amongst which a bust of Brazza, a portrait of his father, Rodolphe Toepffer, the famous novelist, and draughtsman, 'La Baigneuse', wood statuette, 'La Toilette', marble statuette, &c. He had been living for many years in seclusion in an old house in the Cour de Rohan, surrounded by a fine collection of works of art which he has bequeathed to the Geneva Museum, his native city.
Toepffer's name occurs among the names of exhibitors in the medallic art section of the Paris Salon in 1882: Maud, Portrait-medal; — 1885: Ste Cécile enfant, plaquette; — Miss Harriett,

bronze medallion, 1900, and his work is commented upon in *Revue de l'Art*, 1900, II, 39.

BIBLIOGRAPHY. — C. Brun, *Schweizerisches Künstler-Lexikon*, &c.

TOINTAULT (or **TROTAULT**), **JEAN** (*French*). Die-cutter at the Mint of Bordeaux, *circ.* 1519-1524. He was accused in January 1523 (1524) of making counterfeit money and imprisoned.

TOLLE, JOHANN JUSTUS (*Germ.*). Mint-warden at Oels, 1693.

TOLSA, EMMANUEL (*Span.*). Sculptor of the latter end of the eighteenth century, whose name occurs on a medal engraved by G. A. Gil in commemoration of the Erection of an equestrian statue of Charles IV., 1796, at Mexico, under the auspices of the Viceroy, Marquis de Branciforte (Medina, *Medallas Coloniales Hispano-Americanas*, 1900, p. 39, n° 24).

TOLSTOY, COUNT FEODOR PETROVITCH (*Russ*). Sculptor and Medallist, born in 1783 at St. Petersburg, where he died in 1873. He served at first in the marines, but soon devoted himself to the fine arts. He educated himself, forming his style after ancient works of art. Later in life he became Professor of Sculpture and Medallic Art, and was elected Vice-President of the Imperial Academy of Fine Arts at St. Petersburg.

Count Tolstoy engraved a series of nineteen medallions on the French War (1812-1814), which Dr F. P. Weber says, "are in classic style, and some rival in minuteness of execution the works of Pistrucci". Illustrations of these medals are given in the 'Official descriptive and illustrated Catalogue of the Great Exhibition at London', 1851, vol. III, nos 216-219. By him are also medals commemorating the Turkish War (1828-1829). The designs for the series of medals of the French War are described in 'Umrisse von Medaillen zum Andenken der Begebenheiten der Kriegsjahre 1812, 1813 and 1814 — entworfen und ausgeführt von Graf Theodor Tolstoy', St. Petersburg, 1818, quarto. The ℞. of one of these medals relating to the Relief of Berlin, 1813, is illustrated in Bolzenthal, Pl. XXX, The last represents on its ℞. the Taking and Peace of Paris, 1814.

By this artist I have seen also a medal commemorating the Third centenary of the Augsburg Confession, 1817 (signed : **THEOD C. DE TOL.**); — Centenary of the St. Petersburg Academy of Sciences, 1826 (Obv. Bust of Nicholas I., signed г. ѳеодор. толстой; ℞. Minerva and attributes, г. ѳеод. толстой).

Count Tolstoy's Bas-reliefs of Apuleius, Scenes from the Odyssey, etc. are famous. He also made the models for the bronze gates of St. Isaac's Cathedral.

A medal by Ljalin on the Transfer of the University of St. Petersburg to the building of the 12 Colleges in 1838 was executed after a design by Count Tolstoy.

Bolzenthal praises in very eulogious terms the work of this Medallist, who certainly stands first among the artists of his country.

BIBLIOGRAPHY. — Bolzenthal, *op. cit.* — I. Iversen, *Medaillen auf die Thaten Peter des Grossen*, St. Petersburg, 1872. — F. P. Weber, *Medals and Medallions*, &c., 1894.

TOMBAY, ALPHONSE DE (*Belg.*). Contemporary Die-sinker, born at Liège on 9. November 1843, whose signature is found on a Medal of award of the 'Fondation Jouniaux', granted every five years for the Promotion of security and welfare amongst Miners. The first were given in 1899 (*Revue belge de numismatique*, 1905, p. 213, n° 27).

A. de Tombay is an Officer of the Order of Leopold. He belongs to a family of artists, and was educated by his father Alexandre de Tombay (1814-† 1885), and at the Royal Academy of Fine Arts at Liège. In 1873 he was sent to Rome. He is now Professor of modelling and sculpture at the Academy of Fine Arts of St. Gilles, Brussels

TOMMASO. *Vide* **TOMMASO SCARLATINI** *supra.*

TOMSCHÜTZ. SAMUEL (*Germ.*). Mint-master at Frankfort-on-Main, 1836-1837, in which years his initials occur on Hellers. He was a native of Dresden, and worked first as assistant 'Münzmechanikus' to Johann Georg Bunsen at the Frankfort Mint, from about 1825.

TONNELLIER, CYPRIEN (*French*). Gem-engraver of Paris; pupil of Charles Gauthier. His name is recorded in the Paris Salon Catalogue for 1886, when he exhibited a Niobe, intaglio garnet, and 1887, Hercules at rest, cameo.

TONNELLIER, GEORGES (*French*). Contemporary Gem-engraver and Medallist, residing in Paris. Pupil of Charles Gauthier and Aimé Millet.

The following exhibits were made by him at the Paris Salon since 1885 : Night, cameo; — 1886. Descent from the Cross, amethyst intaglio; — 1887. Hope, cut in natural sardonyx; — Hercules with boar, cornelian; — 1888. Cameo; — 1889. Roman Bull, after Clesinger, blood red jasper; — 1890. Idyll, cameo in sardonyx; — L'ami Léon, sardonyx cameo of two strata; — 1891. Two Portrait-medals in bronze; — Mme la Marquise de P***, cameo; — 1892. Five cameos : Cyprien d'Entraygue; — E. Blanchet; — Ch. d'Esfontaine; — Mlle Clémence d'Esfontaine; — Félix Garrigue; — 1893. Crossing the Styx, cameo; — Charles Gauthier, statuary, cameo; — 1895. Le Pressoir, sardonyx cameo of three strata (acquired by the State, and now in the Luxembourg Museum); — Portrait-medal of Mme Marguerite C. S***; — Emperor Alexander III. of Russia, cameo in chalcedony; Mme C***; — 1896. J. C. Chaplain, Portrait-cameo in chalcedony; — Colonel S***, cameo in sardonyx; — M. C***, cameo in sardonyx; — Bonbonnière; — Le repas des moissonneurs, pink cameo; — 1898. Vision maudite, large cameo; — Mme Hamard, sardonyx cameo; — M. C***, sardonyx cameo; — 1900. Rape of Dejaneira, blood red jasper; — L'esprit chrétien envahit le monde et marque une ère nouvelle (in describing this work, M. Babelon remarks in *Revue de l'Art*, 1902, II, 24 : "Le puissant et fécond artiste a accompli un véritable tour de force de main-d'œuvre en composant ce groupe monumental en pierres fines, d'une hauteur de 40 centimètres); — Portrait-plaquettes of M. Michel Sextius, mayor of the XIX. arrondissement of Paris; — H. Cante; — Dr G. Leboucq; — Pierre Felgères; — 1905. Three Plaquettes in bronze; — 1907. Portrait-medal of P. Hahn; — 1909. Portrait-plaquettes of M. Hubert; — M. Rey; — 1910. Délassement, statuette in precious stones; — 1912. Vin de France, statuette in white chalcedony; — Pas de danse, statuette in Uruguayan saphirine, etc.

BIBLIOGRAPHY. — E. Babelon, *La gravure en pierres fines.* — *Catalogue du Salon*, 1885-1910.

TONSTALL, CUTHBERT (*Brit.*), 1474-1559. Master of the Rolls and Bishop successively of London and Durham; studied at Oxford and Cambridge; LLD. Padua; became learned in Greek, Hebrew, mathemathics, and civil law; extolled by Erasmus; friend of More and one of the leaders; Keeper of the privy seal, 1523; author of religious works. Refused oath of supremacy and was deprived by Queen Elizabeth. As bishop of Durham 1530-1560 he exercised the right of coinage.

Archbishops Cranmer and Lee and Bishop Tonstall were the last ecclesiastics to strike money. Tonstall issued Pennies of Durham bearing the letters C D at sides of shield. From the fact that these

Original from CORNELL UNIVERSITY

coins were the last coined at Durham, it may be concluded that this mint had been latterly a purely ecclesiastical one (*Vide* Grueber, *Handbook*, &c., p. 80).

Obv. h' D' G' ROST·SIG·SPIT. Mm. Star; King enthroned, holding sceptre and orb. Rℓ. CIVITAS DVRRAM. Mm. Star; Royal shield on cross fourchée with C D at sides (*Rud.*, VII, 9. *Hks.*, XXX, 399).

Durham pennies occur with the mm. star, without any letters or allusion to any Bishop. These, it has been suggested, were struck just before this See was deprived of its mint, when, "to avoid that jealousy which the king discovered at these charter mints, it might be judged prudent to omit every episcopal and local distinction that could give offence" (*Rud.*, II, p. 171).

Tonstall was installed at Durham on the translation of Wolsey to Winchester, 1529.

TONSTALL, SIR RICHARD (*Brit.*). Master of the Mint, London during the restoration of Henry VI., 1470-1471. He had previously acted as Warden of the Exchange in the 27th, 31st (in conjunction with William Avener) and 36th years of the same reign. The alterations adopted in the coinage between 1461 and 1470, while Edward IV. was on the throne, were maintained at the Restoration, but only Angels, Angelets, and Quarter Nobles were struck at this period, and for the latter coins it was necessary to recur to the old type, the device of Edward, the rose and sun united, appearing on the Nobles, half and quarter Nobles, whereas upon Edward's angel coinage "there was nothing peculiarly appropriate to the Yorkist as distinguished from the Lancastrian faction' (Kenyon, p. 52).

Bristol Angel of Henry VI., 1470-1471.

Groats of London, Bristol, and York, Half Groats of London and York, and Pennies of York were issued during Henry VI.'s restoration. They are described by Hawkins under the name of his 'Light Coinage', p. 245.

TORBIDO, MARC ANTONIO (*Ital.*). A Roman Medallist, of the first half of the seventeenth century, mentioned by Bolzenthal.

TOREG, GEORGES (*French*). Contemporary Sculptor and Medallist, born at Vincennes. Pupil of Gaulard. At the Paris Salon, 1887, he exhibited a Portrait-medallion of M. A. Iker.

TORELL, WILLIAM (*Brit.*). Sculptor and Brass founder of Italian origin, temp. Queen Elizabeth. He executed effigies of the Queen for the tombs placed over her viscera in Lincoln Cathedral, and over her heart in the Church of the Blackfriars in London, both of which are now destroyed. The figures were made after wax models, and cast at the burial ground of the Abbots of Westminster. Cf. Fortnum, *Bronzes in the South Kensington Museum*.

TORES. *Vide* **TORRES** *infra*.

TORETTI, CLEMENT (*Amer.*). Mint-master at La Paz, Bolivia, 1868. His initials occur on a Pattern Boliviano of that date.

TORFF, EMIL (*Germ.*). Contemporary Sculptor and Medallist, residing in Berlin. He has modelled some medals which were struck at the private mint of A. Werner und Söhne. Amongst these I have noticed: Dedication of the Berlin Cathedral, 1905; — Silver Wedding of Kaiser William II. and Empress, 1906; medal and octagonal plaquette; — Portrait-medal of Dr Ernst von Bergmann, of Berlin; signed **TORFF** over right shoulder on obv.; — Memorial Medal of Josef Joachim 1907; — The Halley Comet medal, 1910 (*illustrated*); — Marriage medal (exhibited at the 'Salon International de la Médaille', Brussels, 1910; — Christening Medal, &c.

TORNAY, JEAN DE (*French*). Goldsmith and Seal-engraver of the first half of the fourteenth century. In 1326 he engraved the seals of King Charles IV., and in 1327, he was Die-cutter to Eudo IV., duke of Burgundy. We find him at Lyons in 1335, when his name is recorded in the Mint records as "Johan de Tornay lo talliour de fers".

The Halley Comet Medal, 1910.

BIBLIOGRAPHY. — N. Rondot, *Les Graveurs de Lyon*. — Rondot & H. de La Tour, *Les Médailleurs et les Graveurs de monnaies en France*, 1904. — Lecoy de la Marche, *Les Sceaux*.

TORNOTTI, F. (*Ital.*). Contemporary Goldsmith of Turin, whose name occurs on a medal commemorating the Launching of the 'Cristoforo Colombo' at Genoa, 1896.

TORRATO, GIROLAMO (*Ital.*). Mint-master at Vercelli, 1544-1548. The initials **V.** (Vercelli) **G. T.** occur on the currency issued by him.

TORRE, JEAN ALEXANDRE DELLA (*French*). Contemporary Sculptor, born at Halifax, but naturalized a Frenchman.

He is the author of Portrait-medallions, one of which was exhibited some years ago (1885) at the Paris Salon, and which was entitled, Mlle D. T***.

TORRE, GIULIO DELLA (*Ital.*). A Veronese Medallist and Advocate, afterwards Professor of Jurisprudence at the University of Padua, lived *circ.* 1480-1540. He belonged to a patrician house, members of which distinguished themselves as physicians, jurists, and theologians. "Although only an amateur in his art", says Fabriczy, he practised it with such love and industry that he has bequeathed to us no less than twenty signed pieces, and six, which although unsigned, are nevertheless undoubtedly from his hand. As is the custom of amateurs, he chiefly depicted the members of his own family (eight pieces); also some statesmen, patricians, and scholars of Verona, as well as his colleagues at the University of Padua; and two painters. Strangely small — two only — is the number of his feminine portraits; one of these, however, is to be reckoned his best work. It is that of his daughter Beatrice, who reappears at full length with her four children in a well-conceived group on the reverse. His own likeness on his only dated medal (1527) is a successful work; it shows, more especially in the treatment of the hair, the laboured carefulness of the dilettante. Less pleasing is the composition of the reverse, where the Genius of Justice is represented in a strained attitude and with clumsy gesture, della Torre in an affected pose; the folds of his robe as well as the chiton of his guide are very

conventionally treated. Much more original and happy in its realism is the reverse of the medal of Bartolomeo Socino, a member of a celebrated Sienese family of jurists. The representation of the teacher dispensing wisdom to the pupils *ex cathedrâ* (Socino was an orna-

Self Portrait, by Giulio della Torre, 1527.

ment of the University of Padua) is a free and highly skilful modification of the subject that we encounter, in an entirely constrained

Ursa.

form, on the tombs of mediaeval professors at Bologna, Pistoja, Pisa and elsewhere. In dignity of conception and monumental modelling, the portrait on the obverse also surpasses the more truthful likeness of della Torre himself". (C. von Fabriczy, *Italian Medals*, English edition, pp. 66-68).

The list of Giulio della Torre's medals is compiled after Armand: 1. Aurelio dall'Acqua, Venetian advocate, *circ.* 1471/9-1539; 70 mill.; Bust to l.; ℞ DEO. DVCE. VIRTVTE. COMITE. FORTVNA. FAVEN. Male and female figure on either side of an old man's head; signed: **IVLII. DELATVRRE. OPVS**; — 2. Another; 118 mill.; Bust to l.; ℞ IN. MEMORIA. AETERNA. ERIT. IVSTVS. Justice seated; signed: **OP.IV.TVR.**; — 3. Gianfrancesco Bevilacqua, a Veronese; 64 mill.; obv. Bust to l.; ℞ Nude female figure holding a serpent; signed:

Bartolomeo Socino.

OPVS IV.TVR.; — 4. Giovanni Caroto, Veronese painter, 1470-1546; 70 mill.; obv. IOHANNES. CAROTVS. PICTOR. Bust to l.; ℞ A youth, nude, seated at a desk, in the act of drawing; before him, a youth standing; signed: **OP.IV.TVR.** (*illustrated*); — 5. Giovanni Emo, a Venetian patrician; 100 mill.; obv. Bust to l.; ℞ Male figure seated pouring water into an urn; in front of him, Fortune and Justice, signed: **IVLII. M. DELATVRRE**; — 6. Marcantonio Flaminio, of Imola, † 1550; 68 mill.; obv. Bust to r.; ℞ COELO. MVSA. BEAT. Muse standing; signed: **OP. IV. TV.**; — 7. Girolamo Fracastoro, Veronese physician, astronomer and poet, 1483-1553; 70 mill.; obv. Bust to l.; ℞ MIVERVAE. APOLL. ET. AESCVLAP. SACRVM. The altar of Aesculapius; — 8. Gianbattista Gonfalonieri, Veronese

TORRIGIANO (*Ital.*). Florentine Sculptor, born in 1472, died in 1522, popularly known as the sculptor who broke Michelangelo's nose in a quarrel about 1491. For many years he served in the papal army under Cesare Borgia. About 1503 he went to England, where he won great reputation and made the tomb of Henry VII. in Westminster Abbey, which Lord Bacon called " one of the stateliest and daintiest monuments in Europe ". He afterwards wandered to Spain and is said to have been starved to death in a prison at Seville.

There are some beautiful bronze Plaques by Torrigiano. Specimens of his work may be seen also in the Victoria and Albert Museum, South Kensington. (Cf. Fortnum, *Bronzes*, &c.)

TORRICELLI, CAJETANO (*Ital.*). Gem-engraver by whom is a Portrait-intaglio of Antonius Pius, signed : **ΤΟΡΡΙΚΕΛΛΙΟC**, described by Raspe, *Tassie Gems*, n° 11758.

TORRICELLI, GIUSEPPE (*Ital.*). Gem-engraver of the second half of the eighteenth century. By him are the following productions : Mercury, cornelian ; — Head of Apollo, cameo ; — Head of a Bacchante crowned with vine-leaves, sardonyx ; — Head of young Hercules, signed : **ΤΟΡΡΙΚΕΛΛΙΟC** ; — Psyche and Cupid between Bacchus and Hymen, cameo ; — Cupid embracing Psyche, signed : **ΤΟΡΡΙΚΕΛΛΙΟC ΕΠΟΙCΙ** ; — Perseus holding buckler decorated with head of Medusa ; — Head of Medusa, signed : **ΤΟΡΡΙΚΕΛΛΙΟC** ; — Bust of Solon, topaz ; signed : **ΙΟΣΕΦ ΤΟΡΡΙΚΕΛΛΙ ΕΠΟΙΕΙ** ; — Head of Romulus, signed ; — M. Lock, Portrait-cameo, signed : **ΙΟC. ΤΟΡΡΙΚΕΛΛΙΟC ΕΠΟΙΕΙ** ; — A Roman head, signed : **ΤΟΡΡΙΚΕΛΛΙΟC**. (Raspe, *Tassie Gems*, 1791).

TORRES, MANUEL DE (*Chilian*). Medallist and Die-cutter at the Royal Mint of Santiago de Chili under Charles IV., during the last decade of the eighteenth century. He entered the Mint on 14. February 1791 under the administration of Bernardino de Altolaguirre, Mint-master, and was officially appointed Chief-engraver on 15. February 1797. He was succeeded in this post on 6. November 1797 by his former assistant and colleague, D. Ignacio Arrabal. Torres died in 1804.

Medina ascribes three medals of Charles IV. to Torres : Commercial prosperity, 1799 ; ℞ CAROLI × IIII × ARMA REGALIA × Mercury with the emblems of Commerce above crowned shield of arms supported by Justice and Strength ; signed : **TORRES INCIDIT.** ; — Regeneration of the Kingdoms ; obv. as last ; ℞ Tree with the escutcheons of the twelve Spanish provinces ; — Public prosperity, 1799 ; ℞ BIEN PUDEN ANIMAR SIN DESCONFIANSA. DIES ANOS DE SERVICIO UNA ESPERANSA ; signed : **TORRES INCIDIT.** (Medina, *Medallas Coloniales Hispano-Americanas*, 1900, p. 40 sqq., n^{os} 27-29).

TORRETINO, GIOVANNI (*Ital.*). Mint-master at Milan, appointed on 7. January 1505, and apparently in office until 1547.

TORTORINO, ALESSANDRO (*Ital.*). Medallist of the first half of the sixteenth century, mentioned by Bolzenthal, p. 80.

TORTORINO, FRANCESCO (*Ital.*). A Milanese Gem-engraver of the second half of the sixteenth century. He excelled in cameo-engraving. Mariette records his name in his list of Gem-engravers.

TORWART, HANS (*Austr.*). Mint-master at Eger, 1502.

TOSATI, ANNIBALE (*Ital.*). Medallist of Padua, who was flourishing *circ.* 1590. According to Tomasini (*Illustrium virorum elogia*) he is the author of a Portrait-medal of Girolamo Fabrizio d'Acquapendente ; obv. Bust to r., with the letters **A. P. F.** under the shoulder ; ℞ ANATOMICVS. PATAVINVS. SECVNDVM. DIVOS. Aesculapius and Hygiaea standing ; 38 mill. According to the same authority, Tosati also modelled a Portrait-medal of Sperone Speroni, a Paduan writer, 1500-1588, specimens of which were buried in the latter's tomb. *Vide* Armand, III, 146.

TOSO, PIETRO (*Ital.*). Mint-engraver at Venice, under Doge Marino Grimani, *circ.* 1605, and his successor, Leonardo Donato.

TOTT, B. DE (*French*). Founder of the last quarter of the sixteenth century. His signature occurs on a Plaque representing "Time scared away by a young man, from a group of two female figures ". This Plaque is signed : **PILLON S. THOMIRE C. B. DE TOTT F.** It is preserved in the Victoria and Albert Museum, South Kensington. (Fortnum, *op. cit.*, p. 32.)

TOTTER (*French*). Contemporary Die-sinker, whose signature occurs on several medals : Malades indigents, Paris ; — Conseil d'hygiène de l'Aisne ; — Portrait of M. Pierre T*** ; — Soins gratuits aux malades indigents, Dépt. du Gers ; obv. H. PONSCARME F. ; ℞ TOTTER ; — Parazols, Dentiste et Pédicure, Marseille ; obv. C. T. (the last two medals in Boston Collection).

TOULOUSE (*French*). Die-sinker of Lyons, whose signature occurs on a jeton, dated 1852, commemorating the Erection of an equestrian statue of Napoleon I. on the Place Louis-Napoleon, 21. September 1852. *Vide* Charvet, *Médailles et Jetons de la ville de Lyon*, Gazette numismatique française, 1907, p. 405.

TOUREAU, NICOLAS (*French*). Mint-engraver at La Rochelle, *circ.* 1540.

TOURNAY *Vide* **TORNAY, JEAN DE** *suprâ*.

TOURNIER (*French*). Engraver of the middle years of the nineteenth century. He took part in the 1848 competition for the coinage of the second French Republic, and produced Pattern *AV* 20 Francs, *AR* 5 Francs, and *Æ* 10 Centimes (*illustrated* on Pl. XLV-XLVIII of De Saulcy, *Souvenirs numismatiques de la Révolution de 1848*).

TOURNU, LÉONARD (*French*). Mechanician at Paris, end of the eighteenth century. He offered to the Government of the Republic, in year 5, an improved coining press, and issued a Trial piece showing a coining-press and the legend : BALANCIER PERFECTIONNÉ

PAR LEONARD TOURNU POUR EVITER LES ACCIDENS DES MONNOYEURS ET POUR FRAPPER EN VIROLE. L'AN V DE LA R. F. 1797.

L. Tournu suggested also various new alloys of metals for the striking of coins and medals. His press was not adopted by the authorities.

BIBLIOGRAPHY. — Hennin, *Histoire numismatique de la Révolution française*, 1826.

TOUSSAINT, FRANÇOIS CHRISTOPHE ARMAND (*French*). Sculptor and Medallist, born in Paris, 7. April 1806, died in that city on 24. May 1862. He was a pupil of David d'Angers, and entered the Ecole des Beaux Arts in 1827. In 1832 he won the Second 'Prix de Rome'.

By him are Portrait-medallions in the manner of his master, and also medals.

At the Paris Salon 1845 he exhibited a series of 18 medals illustrative of the history of France.

His signature also occurs on a 'Charity medal' depicting Christ with little children around him.

BIBLIOGRAPHY. — Chavignerie et Auvray, *op. cit.*, II, 587.

TOUTAIN (or **TOUSTAIN**), **RICHARD** (*French*). Goldsmith of the second half of the sixteenth century. The medallist Germain Pillon worked for him (1573). His name is mentioned by Rondot and Mazerolle.

TOWER Mint, London. A medal of the London Medical Lyceum, with heads of Fordyce and Hunter, is signed on Rℒ. · I(ohn) · M(ilton) · F(ecit) · **TOWER**. Milton was an Engraver at the Royal Mint, 1789-1798. *Vide* Vol. IV, 82.

TOZOLI, GASPARO DE' (*Ital.*). Gem-engraver, or possibly a Dealer in gems, whose name is recorded as having supplied intagli to Pope Paul II. (1464-1471).

T. P. TRAVANUS PATER — GIOVANNI FRANCESCO TRAVANI. Medallist at Rome, 1655-1674.

T. R. *Vide* **TIMOTEO REFATI**. Vol. V, p. 56. Certain medals signed **T. R.** have been ascribed to Timotheus Refatus, but Mr. Hill has shown that this identification must be rejected. These medals are : Diego de Solis ; — Benedetto Lomellini ; — Camillo Orsini; — Ulisse di Teseo Aldrovandi; — Diana Ghisi ; — Horatio Tigrino, etc., and are described in Vol. V, p. 57. Cf. *Num. Chronicle*, 1902, pp. 58-61, and *Supino, Il Medagliere Mediceo*, p. 164.

T. R. *Vide* **THOMAS RAWLINS**. Medallist and Coin-engraver in London, 1644-† 1670.

TR. *Vide* **PIERRE JOSEPH TIOLIER**, 1763-1819. Medallist at Paris.

TR. *Vide* **PIERRE NICOLAS TIOLIER**. 1784-1853. Medallist at Paris.

T. R. *Vide* **THOMAS RAMM**. Mint-master at Riga, 1535, 1547-1557.

T. R. *Vide* **TOMMASO ROGLIO**. Mint-engraver at Passerano in Piedmont, 1531.

BIBLIOGRAPHY. — *Schlickeysen-Pallmann*, op. cit.

TRACKH, JOSEPH FRANZ (*Austr.*). Sculptor of Schemnitz, who afterwards was employed as Engraver at the Mint of Kremnitz, in which city he died in 1832. His name appears in the Mint records from 1800 to 1830.

TRAGER, LEOPOLD (*Swiss*). Mint-master to the Bishop of Basle, in conjunction with Georg Vogel, at the Mints of Delémont, and Ste Ursanne, *circ.* 1595.

TRÄGER, WOLFGANG JOHANN (*Austr.*). Engraver, who was apprenticed at the Vienna Mint, 1751-52 under M. Donner. He was dismissed from the Mint in that year.

TRAGBOTT, CONZMAN (*Swiss*), Mint-master at Solothurn, *circ.* 1365-1395.

TRAINEL, PÉRONNEL (*French*). Mint-engraver at Lyons, 1424-1429, when he was appointed Master of the Mint (Rondot, *Les Graveurs de Lyon*).

TRAITEUR (*Swiss*). Medallist of the last quarter of the eighteenth century, whose best known work is an octagonal jeton commemorating the Restoration of the Mint and Coinage of the Bishopric of Basle under the Prince-Bishop Joseph, Baron von Roggenbach, 1788; it is signed : **TRAITEUR FEC**. The Mint-master was Karl Joseph Anton Kohler.

TRAMONTANO, GIAN CARLO (*Ital.*). Mint-master at Naples, and Aquilea under Ferdinand I. of Aragon, *circ.* 1476-1503. His initial letter **T** or also **IT** occur on Ducats of 1488-89, and Carlini of 1503 with bust of Ferdinand on obv. and that of Isabella of Spain on the Rℒ.

TRAP, REINIER (*Dutch*). Mint-engraver at Leyden, some years previous and up to 1662.

TRAPENTIER. *Vide* **DRAPPENTIER, D.** (*Vol.* I, *n. ed.*, p. 613). Beside the medals I have mentioned before, I have seen further : 'Landdags' Medal of Hendrick Casimir, hereditary Stadholder (1679-1696), several varieties, one signed **DT** (*Van Loon*, IV, 169); — Peace of Utrecht, 1713, etc.

TRAPENTIER, JAN (*Vol.* I, *n. ed.*, p. 614). By this artist are further : 1697. Peace of Ryswick (4 var., one signed : **I. DRAPENTIER**) ; — 1714. Peace of the Hague between Spain and the Netherlands; — 1716. Peace of Utrecht (signed : **I. DRAP.**)

The Jubilee medal of the University of Utrecht is dated 1736.

BIBLIOGRAPHY. — A. van Kerkwijk, *Catalogus der Nederlandsche en op Nederland betrekking hebbende Gedenkpenningen*, 1903. — *De Orange-Nassau Penningen*, 1898.

TRASGALLO (*Mexican*). This Engraver's signature occurs amongst others on a Proclamation medal of Emperor Augustin I. of Mexico and his consort Anna Maria, 1822, issued by the town of Guanajuato (A. Rosa, *Monetario Americano*, Buenos Aires, 1892).

TRAUSCH, VALENTIN (*Germ.*). Gem-engraver at Munich, 1580; mentioned in the Munich mint-records (J. V. Kull, *Aus bayerischen Archiven*, 1900).

TRAUTSON, Count **PAUL SIXT** (*Austr.*). Was granted the right of coinage in 1615 by Emperor Mathias, and opened a mint at Falkenstein, the working of which he entrusted to Veit Prod and Abraham Riss. He died 30. July 1621. For further particulars *cf.* C. Oesterreicher, *Regesten aus J. Newald's Publicationen über österreichische Münzprägungen*, Mitt. des Clubs, 1891, p. 80.

TRAVANI, ANTONIO (*Ital.*). Son of Gioacchino Francesco Travani; Goldsmith and Medallist who flourished at Rome where, according to Venuti, he was born in 1674, and died in 1741. He signed his medals **TRAVANVS** like his father. One of his best known works is a medal of Pope Benedict XIII. with EGO SUM PASTOR BONUS, and to him is also given a Portrait-medal of Ippolito Fornasari, 1692. He may be further the author of a medal of Charles VI. of Spain, dated 1710.

Travani worked as Die-engraver at the Papal Zecca, and signed some of the currency of Pope Alexander VIII. (1689-1691) : Quattro scudi d'oro, **A. T. F.** ; Æ. Scudi, varied types, **TRAVANVS**; Portrait-Testone, 1689, **A. T. F.**

He was in 1655 one of the three "Consuls" of the Guild of Goldsmith at Rome.

His best known medallic productions are : Portrait-medal of Cardinal Federigo Cornari, 1647; signed **FRAN. TRAVANVS** ; — Cardinal Alfonso Litta, of Milan, 1672; — Ferdinand II., Grand Duke of Tuscany, 1666; — Cardinal Fr. Barberino; — Four medals of Pope Alexander VII., 1655-1663; — Large Portrait-medallion of Alexander VII., 1663; signed : **TRAVANVS** ; ℞. NOBILIUS PER TE SITUS FLUAM INEXHAUSTUS. The fountain of Santa Maria in Trastevere (Vatican Museum); — Queen Christina of Sweden, 1665; obv. Bust in laureated helmet; signed : **TRAVANVS** ; ℞. **ΜΑΚΕΛΩΣ** (without her equal) Phoenix arising from funereal pyre. Specimens

Queen Christina of Sweden.

exist without the artist's name; all are cast; — Large Portrait-medallion of Queen Christina; 93 mill.; obv. Bust similar to that on the medal, but the helmet is adorned at top with a sphinx; the Queen is represented as the "Pallas Nordica"; uniface, unsigned and undated; — Cardinal Felix Rospigliosi; — Cosimo III., Grand Duke of Tuscany, 1663, etc.

Baron de Bildt remarks : "Gio. Fr. Travani est un travailleur fort consciencieux, qui exécute fidèlement la tâche qu'on lui propose, et qui n'est dépourvu ni de goût ni d'une certaine grâce un peu prétentieuse. Mais on chercherait en vain dans ses œuvres ce précieux sentiment d'individualité et de vérité qui rend si intéressants les médailleurs du XVe siècle."

BIBLIOGRAPHY. — Baron de Bildt, *Les Médailles romaines de Christine de Suède*, Rome, 1908. — Rudolfini-Venuti, *Numismata Romana Pontificum*, Rome, 1744. — Bolzenthal, *op. cit.* — Nagler, *op. cit.* — Hildebrand, *Sveriges och Svenska Konungahusets Minnespenningar*, Stockholm, 1874.

TRAVANI, GIOVANNI PIETRO (*Ital.*). Son of Gioacchino Francesco T., distinguished himself also as a Medallist. He signed in 1689 the account for the medals issued on the Feast of Saints Peter and Paul (Zecca pontificia, busta 28, fasc. 94 : Elenchi e Conti. Arch. di Stato, Rome), and engraved the medal of the *possesso* of Alexander VIII., as well as the Scudo of that Pontiff

TREBBE (*Germ.*). Mint-master in the service of the ruler of Lippe, 1812-1827. His initial occurs on the copper currency.

TRÉBUCHET, CHARLES FRANÇOIS (*French*). Medallist and Die-engraver, born in Paris on 22. February 1751, as the son of François Trébuchet and Marguerite Dallemagne, died at Brussels in poor circumstances on 17. July 1817. Nothing appears to be known of his early life. Three of his first works, executed in France, have been described at various times. They are : A jeton of the States of Cambrai, with bust of Louis XVI. (C. Robert, *Numismatique de Cambrai*, Pl. L, n° 7); — Oval medal, 36 × 30 mill., bearing on obv. a latin inscription, and on ℞ the inscription LA NATION LA LOI ET LE ROY (Hennin, *Histoire de la Révolution française*, n° 284); — Prize Medal of the Literary Society of the Bordeaux Museum (*Trésor de Numismatique et de glyptique*, médailles de la Révolution française, Pl. LIV, n° 5). The Engraver settled at Brussels, at the time of the second French invasion, and spent there the remainder of his life. He was appointed Court-Engraver to William I., 25 June 1815. His first works in Belgium are four medals, only one specimen of each of which were issued, which were ordered by the municipal administration of Brussels to be presented to Laureates of the Fine Arts Academy in the years 1796, 1797, 1801 and 1802. These medals are cast and chased. Another medal, which although unsigned, is ascribed to Trébuchet, was presented by the inhabitants of Brussels to their burgomaster Nicolas-Jean Rouppe, 9. June 1800 (*Revue belge de numismatique*, 1865). It is likewise cast and chased.

The other known medals of Trébuchet are struck and were all issued in Brussels. Among these I have come across : Reunion of the Northern and Southern Netherlands, 1815 ; signed : **TREBUCHET** ; — Loyalist Badge of Louis XVIII., 1815, two types : ℞. FIDÉLITÉ | 1815 within oak-and laurel-wreath, and another, with ℞. AU MEILLEUR ET AU PLUS VERTUEUX DES ROIS Lily ; both are signed on obv. **TREBUCHET F. BRUX.** ; — Jeton with the Arms of France, and signature **TREBUCHET BRUX.** on obv., and on ℞. *Donnée* | *par le* | *Roi de France* | *en 1815* (probably a modern fabrication by Brichaut), etc.

A medal of Napoleon I., 1810, signed : **TREBUCHET F.** ; shows on ℞. Mars standing, and the legend : MARS IN BELGIIS ANNO MDCCCX; 43 mill.

There is a Pattern 5 Franc piece of Louis XVIII., 1815, bearing this signature : **TREBUCHET**. This coin however appears to be a modern fabrication issued by Aug. Brichaut (1836-†1895), who was an official at the Brussels Mint (1866-1893), and to whom a number of other "pièces de fantaisie" are ascribed, such as the 5 Franc piece of Henri de France, comte de Chambord, Pattern 5 Lire of Leo XIII., 1878, Restrike of 5 Franc piece of Berthier, prince of Neuchâtel, Pattern coins of Norodom, King of Cambodgia, etc., the dies for which were probably all cut by Veyrat (1830-1876).

Trébuchet was a mediocre artist, but his work is still imperfectly known.

TREBUS & STEINER. This signature occurs on a Medal or Jeton of St. Louis, of the Missouri Pharmaceutical Association, 1897 (In Boston Collection).

TREGER, WOLFGANG (*Austr.*). Apprentice Engraver at the Vienna Mint, 1751.

TRENT, NEWBURY A. (*Brit.*). Contemporary Sculptor and Medallist, residing at Chelsea, London. He has exhibited at the Royal Academy on several occasions. In 1911 he showed a Medal commemorating the Federation of South Africa, and a Portrait-plaque of Charles William Carver Esq.

TRENTACOSTE DOMENICO (*Ital.*). Contemporary Sculptor and Medallist, born in Sicily, and educated in Paris, but now residing in Florence. At the Salon 1892 he exhibited a Portrait-medallion of Miss Ethel Mary Burgess, signed : **D. TRENTACOSTE** 1892 (Weber, *Medals and Medallions*, p. 76). In 1901 he took part in the compe-

Original from CORNELL UNIVERSITY

tition for the new Italian coinage, and came out victorious, in conjunction with Egidio Boninsegna, of Milan.

TRESTED, R. (*Amer.*). Engraver, Die-sinker, Stamper, and Piercer, of 68 William St., New York; he was flourishing about 1830-1850. His signature occurs amongst others on two rare 'Six Cents' Store Cards. Both have on obv. an Eagle, and the Rℒ is the same with the exception that one has **R. TRESTED**, while the other has simply the word **TRESTED**, a star being placed where the **R** is on the first. These tickets are very rare, and probably date from the period of 1840 to 1845. A third 6 Cents Store card has a shield on obv., at sides of which the inscription TRESTED FECIT; on Rℒ * | SIX | * * * | CENTS | *.

BIBLIOGRAPHY. — *Information kindly obtained from Mr. Henry Chapman, of Philadelphia.*

TREVET, EDOUARD (*French*). Contemporary Sculptor, born in Paris. Pupil of Baudoin. At the Paris Salon 1882 he exhibited a Portrait-medallion.

TREVISANO, FRANCESCO (*Ital.*). Mint-master at Venice, 1756.

(*To be continued.*)

CONTRIBUTION A LA NUMISMATIQUE ORIENTALE.

Nous empruntons ce titre à E. von Zambaur, qui l'employa, en 1904 et 1905 dans la *Numismatische Zeitschrift*, pour faire connaître des monnaies inédites de la numismatique musulmane.

Il y a plus de vingt ans, le savant et regretté Stanley Lane-Poole faisait appel aux collectionneurs, dans le but de réunir et de publier toutes les monnaies musulmanes existant en Europe et ailleurs, en un *Corpus*, sous le titre *Fasti Arabici* : or, the *History of the Mohammadan Empire as established by Coins*.

W. H. Valentine, dans son ouvrage *Modern Copper Coins of the Muhammadan States*, vient d'amorcer ce *Corpus* pour les monnaies de cuivre.

A notre tour de révéler quelques monnaies de cuivre ne semblant pas figurer dans les catalogues du British Museum de Londres, de la Bibliothèque Nationale de Paris et de Valentine.

ESPAGNE.

1 Imitation de la monnaie arabe et d'origine incertaine. Au droit et au revers, caractères informes dans les légendes circulaires et du champ. Deux cercles linéaires. Cuivre. Diamètre 22 mill. 5. Poids 1 gr. 7 (type de Lavoix, II, 1107).

2 Semblable à la précédente, mais avec d'autres caractères informes. Deux cercles linéaires. Cuivre. Diam. 22 mill. Poids 1 gr. 3.

ÉGYPTE.

1 Type 2 de Val., au lotus? MISR. Le Caire, sans date. Diam. 13 mill. Cuivre.

2 A.H. 1285. Abd el Aziz, 10 paras, 9e année du règne. Cuivre.

TUNIS.

1 A.H. 1273. 13 Burben, semblable à B. M. VIII, 1146, mais sans contremarque. Cuivre.

2 1289. ¼ Kharub, semblable à Val. 43, mais le centre vide. Diam. 17 mill. Cuivre.

ALGÉRIE.

1 A.H. 1238. Semblable à Val. 4. *Alger.*

2 1240. Semblable à Val. 4. *Alger.*

3 1254. Semblable à Val. 7. *Takidemt.*

MAROC.

Toutes les monnaies de laiton, coulées en moules, ci-dessous décrites, ont au droit l'empreinte du sceau de Salomon, sceau que Jéhovah est censé avoir donné au roi magicien Salomon pour écarter les maléfices; c'est une figure géométrique en forme d'étoile se ramenant à cinq, six ou huit alpha emboîtés les uns dans les autres, généralement avec un point central, lorsque le champ n'est pas occupé par une inscription.

1 A.H. 1200. Hexagrammme entouré de rayons. Rℒ. MARAKASH, au-dessous, 1200. Diam. 29 mill. Poids 8 gr. 4.

2 1200. Hexa. Rℒ. 1200. Diam. 20 mill. P. 4 gr. 2.

3 A.H. 1203. Hexa. Rℒ. La date. Diam. 18 mill. P. 2 gr. 7.

4 1210. Octo. entouré de rayons; au centre, FEZ. Rℒ. Hexa. entouré de rayons; au centre, la date. Diam. 27 mill.

5 1210. Hexa. Rℒ. 1210. Diam. 20 mill.

6 1210. Hexa. Rℒ. RABATH EL FATH; au-dessous, la date. Diam. 20 mill.

7 1211. Hexa. Rℒ. EL SOUAYR (=Mogador); au-dessous, 1211. Diam. 24 mm.

8 1211. Hexa. Rℒ. En haut, ש (SHIN). Peut-être un différent de monnayeur juif, auquel on abandonnait la fabrication de la monnaie, moyennant une redevance. Au milieu, la date; au-dessous, o. Diam., 25 mill.

9 1211. Hexa. Rℒ. |1211|. Diam., 24 mill.

10 1211. Hexa. Rℒ. EL SOUAYR (=Mogador); au-dessous, la date. Diam., 21 mill.

11 1212. Hexa. Rℒ. Octo.; au centre, 1212. Diam. 24 mill.

12 1212. Hexa. Rℒ. MARAKASH; au-dessous, la date. Diam. 19 mill.

13 1212. Hexa. Rℒ. TETOUAN; au-dessous, la date. Diam. 17 mill.

14 1215. Hexa. Rℒ. EL SOUAYR (=Mogador); au-dessous, 1215. Diam. 22 mill.

15 1216. Hexa. Rℒ. ?; au-dessous, 1216. Diam. 22 mill.

16 122. Hexa. Rℒ. 122. Diam. 20 mill.

17 1220. Hexa. Rℒ. 1220. Diam. 20 mill.

18 1220. Hexa. Rℒ. 0221. Diam. 20 mill.

19 1221. Hexa. Rℒ. 221. Diam. 20 mill.

20 1222. Hexa. Rℒ. 1222. Diam. 19 mill.

21 1230. Hexa. Rℒ. 1230. Diam. 21 mill.

22 1231. Octo. Rℒ. ANNÉE 1231. Diam. 21 mill.

23 1231. Hexa. Rℒ. EL SOUAYR (=Mogador); au-dessous, la date. Diam. 21 mill.

24 1240. Hexa. Rℒ. 0421. Diam. 21 mill.

25 1240. Hexa. Rℒ. En haut, ש (Shin). Voir n° 8; au milieu, 1240; au-dessous, o. Diam. 22 mill.

26 1242. Hexa. Rℒ. 42. Diam. 20 mill.

27 1247. Hexa. Rℒ. 1247. Diam. 20 mill.

28 1250. Hexa. Rℒ. 1350. Diam. 20 mill.

29 1251. Hexa. Rℒ. La date. Diam. 18 mill.

30 1251. Hexa. Rℒ. RABATH EL FATH; au-dessous, la date. Diam. 19 mill.

31 1253. Hexa. ANNÉE 1253. Diam. 21 mill.

32 A.H. 1254. Hexa. Rℒ. ANNÉE 1254. Diam. 20 mill.

33 1255. Hexa. Rℒ. La date dans un octogramme sans traits intérieurs. Diam. 20 mill. (type 90 de Val., mais le milieu des lobes plus angulaires).

34 1257. Hexa. Rℒ. 1257. Diam. 18 mill.

35 1258. Hexa. Rℒ. ANNÉE 1258. Diam. 20 mill.

36 1258. Hexa. Rℒ. 1258. Diam. 20 mill.

37 1258. Hexa. Rℒ. 1528. Diam. 18 mill.

38 1260. Hexa. Rℒ. 1260. Diam. 18 mill.

COUNTERMARKED OR PLUGGED PORTUGUESE GOLD COINS IN THE WEST INDIES AND THE AMERICAN CONTINENT.

(Translation of an article by the late Dr Julius Meili, contributed to *O Archeologo Português*, VII, nos 10-11, 1902.)

Second Instalment.

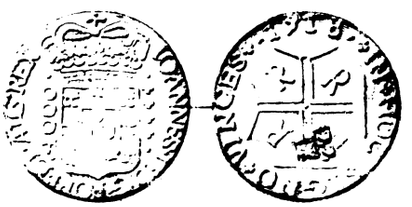
1. COUNTERMARKED COINS.

1. Half Dobra (6 $ 400 Réis), clipped, of D. José, 1778. R.; weight : 9 gr. 80 (instead of legal weight of 14 gr. 34). Countermark stamped in the French island of La Martinique in 1805 : the numeral 20 below which a small eagle, similar to the specimen reproduced below.

Other specimens of this type exist : n° 598 of the Carmo Collection, of D. José, 1769 (letter R?); Collection E. Zay, Paris, of same year, letter R, weighing 10 gr. 90; Collection João Carlos da Silva, Angra do Heroismo (Terceira island) of 1767. R.

Similar countermarks occur on nos 2 and 3.

2. Moeda de ouro (4 $ 800 Réis), clipped, of D. João V, 1718. 4 R.; weight : 8 gr. 85 (instead of 10 gr. 75). Countermark stamped in the French island of La Martinique in 1805; the numeral 22, below which, as on n° 1, a small eagle.



3. Half Dobra, clipped, of D. José, 1765. R.; weight : 11 gr. 70. Same countermark as on the previous coin.

Other specimens, one in my collection, of D. Maria I. and D. Pedro III, 1786, R.; weight : 12 gr. 50; n° 546[b] of the Carmo Collection, of D. João V, 1747. R; Collection of João Carlos da Silva, Angra do Heroismo (Terceira), of 1776, R.; Half Escudo (800 Réis) of D. João V, 1729, weighing 1 gr. 67 (instead of 1 gr. 79) with the same countermark. In the hands of a collector in Guadeloupe who has recently communicated it to me.

The above two countermarks, which are found on coins of varying weights, are among the least rare, as is shown by the number of specimens described, and exist, as we have just seen, not only on Half Dobras, but also on the subdivisions and even on 'Moedas de ouro', from which we may presume that the French term of 'Moëdes' referred originally to that particular series, a term which has since taken the generic meaning of "Monnaies d'or". The French also use the expression "Lisbonnine" or "Portugaise" for the 'Moedas de ouro' of 4 $ 800 Reis as well as for the Half Dobras of 6 $ 400 Réis, whilst the English preserve the name of "Moidor" for the 'Moedas de ouro' of 4 $ 800 Réis.

To the two documents published by E. Zay, which I have transcribed on p. 115 of my work, I am able to add some supplementary information and a correction which the author of *Histoire monétaire des Colonies françaises* has supplied me with, and according to which the two countermarks here described have their origin in the French island of La Martinique (where in 1902 the terrible eruption of Mount Pelée destroyed the prosperous town of St. Pierre with its 20.000 inhabitants). The numerals 20 or 22 were to indicate the value in 'Livres coloniales' of the unit of weight, which was the 'gros' equivalent in weight to 3 gr. 82 (a little more than the Oitava); and the coins were to be stamped 20 or 22 according to their provenance ("marquer du chiffre 22 les moëdes d'or vrai de Portugal, de 20 celles de fabrique d'Amérique, de Genève ou de pays étrangers); finally the proportion between the value of the colonial coins and those of the mother country was fixed in 1805, at the time of the issue of the order for the countermarking, as 3 : 5. To ascertain the value of a coin, after having weighed it carefully, you had to multiply the number of *gros* by the number stamped on the piece, either 20 or 22. Knowing that the legal standard of the Portuguese coins, struck either on the continent or in the Brazilian mints, was uniformly of 22 carats, it seems naturally strange to meet with absolutely genuine specimens bearing some the countermark 20, and others 22. This can only be explained by supposing that the stamping office, having met with some differences in the

1. Un lecteur bienveillant voudra-t-il renseigner l'écrivain ou les éditeurs de cette Circulaire sur les noms des fabricants des pièces marocaines, frappées tant en Angleterre qu'à Berlin?

Original from CORNELL UNIVERSITY

standard, was induced to apply the countermark 20 instead of 22 on the legal Portuguese coins, and that the Brazilian mints did not always strictly adhere to the prescribed standard.

Many imitations of Portuguese coins in base gold [1], issued in America and in England [2], found their way into circulation (and I expect that my specimen of 1773 with the mint-mark R, reproduced on p. 169, n° 94, is one of them). To these the countermark 20 was no doubt officially applied. I should observe here that, reckoning the kilogram of gold of 22 carats at 3157 francs, and taking the relative value of the colonial moeda to that of the mother-country, as regulated in 1805, when the stamping was first begun, as 3 : 5, the result gives a value of 20 livres to the *gros* of 3 gr. 82. It would however appear that already then this relative value tended to go up, rising effectively in 1817 to 100 : 185 in Guadeloupe and 100 : 180 in Martinique, so that in order to obtain the value of 22 colonial livres it is necessary to reckon exactly according to the proportions indicated in the last figures. In 1826 the 'livre coloniale' was abolished.

4. Half Dobra, unclipped, of D. Maria I. and D. Pedro III, 1779, R., weighing 14 gr. 30. Countermark of the French island of Guadeloupe 82.10 (82 *livres* and 10 *sous*, colonial money), and above, a crowned G (George III.) in an oval depression; both countermarks belong to the English administration, probably 1810-1811.

A similar specimen of D. José, 1759, R. in the Carmo collection, n° 597, which I have already reproduced on p. 169, under n° 99. Here the stamp indicates the value in *livres coloniales* of the coin itself, and not the value of the piece by weight. This piece is of the standard weight and value, as shown in my work, p. 116.

1 Meia Dobra	=	4 Oitavas
1 Oitava	=	3.58 grammes
3.82 grammes	=	1 Gros
1 Gros	=	22 livres coloniales
Value of the Meia Dobra	=	82 livres 10 sous.

E. Zay on p. 193 of his work already mentioned tells us that during the British administration Moëdes were stamped in Guadeloupe with a crowned G and the indication of value in *livres*, *sous* and *deniers*. As will be noticed, the crown which surmounts the letter G is indeed English in shape, and the mark of value shows that the English retained the French way of reckoning in livres coloniales just as they kept in Essequibo and Demerara the Dutch guilders.

The island of Guadeloupe passed four times under British rule; from 1759 to 1763; in 1794 for seven months; from 1810 to 1813 when it was ceded to Sweden, which however did remain in possession scarcely a year; and from 1815 to 1816; since it has ever been French.

On p. 191 E. Zay reproduces a decree of the French administration dated 22. April 1803 with respect to the plugged coins, which were beginning to be introduced in Guadeloupe. Some of these plugs being found of inferior quality gold, it was deemed necessary to stop the free circulation of such coins, and to establish a regular verification of them. To this end the decree ordered that the Moëdes of good gold should be stamped with a G and another distinguishing mark. This G countermark accompanied by other marks is among those which we shall proceed to consider.

5. Half Dobra, a little clipped, of D. José 1769, R.; weight 12 gr. 60.

This specimen, in conjunction with n° 6, formed the subject of a short article which I contributed to *Spink's Monthly Numismatic Circular* in July 1901. The coin bears three countermarks; a rectangular one placed over the king's neck, with the number 22 followed by the sign for *livres*, and a small bearded head, facing, representing probably the official government stamp. The two other countermarks are: on the obverse, over the king's head, the number 22, and on the reverse, below the crown, a facing head, of rough workmanship, both within linear squares. Here we seem to have the indication of value twice over; I think however that their meaning is not identical. The first countermark, which bears a certain analogy with n°s 1 to 3, the mark of value of 22 *livres coloniales* per *gros*, thus showing that it was used in the French West Indies, leaving us to conjecture in which of them. The other two countermarks, which were stamped on the coin simultaneously, one on the obverse, and the other on the reverse, do not either clearly give us a clue as to their provenance, not even the small head, which in the meanwhile remains unexplained. We have the alternative of suggesting that they originated in one of the French islands; which I do not consider very probable, or to ascribe them to one of the Dutch possessions, or that were formerly Dutch, either in the same archipelago (Curaçao, St. Eustace, Saba, and a part of St. Martin), or on the American continent (Dutch Guiana, consistly formerly of Berbice, Essequibo, Demerara and Surinam, and now reduced to this last colony, the three first having passed at the beginning of the nineteenth century into British hands), which preserved for a long time the Dutch mode of calculation in *guilders* ot florins, the Joe (or meia Dobra) being equivalent to 22 *guilders* [1]. In my opinion the second indication of value which we see enclosed in a linear square refers to guilders, and this furnishes me with a basis to determine to which of the islands or Dutch colonies it belongs. The island of St. Martin, which was partly under French, and partly under Dutch rule, is suggested, the small facing head of the countermark pointing to a common idea; whereas the square, not-withstanding the omission of E. D. (Essequibo and Demerara) might indicate Essequibo. These are suggestions which future investigators may some day be able to clear.

6. Half Dobra, clipped, of D. José, 1778, R.; weight 10gr. 25. Countermarked E D in cursive characters (Essequibo Demerara), in an oval depression, stamped in the year 1798 in the English colony of Demerara, to give the coin a temporary circulating value of 22 guilders (Dutch florins).

In *Moedas da Colonia do Brasil*, p 116, I have reproduced the interesting information given by Robert Chalmers in his *History of*

1. Une Lisbonnine, ou Portugaise, de 1755, de fausse fabrication, s'est trouvée au titre de 0,699 (16 $\frac{3}{4}$ Karats). *Traité des monnaies d'or et d'argent*, par Pierre Frédéric Bonneville, Paris, 1806, p. 46.

2. Robert Chalmers, p. 20, quoting from a memorandum of Tortola, dated 1802, writes: at the same time a villainous practice was introduced of importing base half-Johannes from Birmingham, Sheffield and America. The word America here refers certainly not to Brazil but to North America.

1. Robert Chalmers, p. 124: These three Colonies (Berbice, Demerara and Essequibo) long retained the mode of reckoning by Guilders which had been in vogue under Dutch rule. A half Johannes (here styled a whole Johannes) passed for 22 Guilders or florins.

Original from CORNELL UNIVERSITY

Currency in the British Colonies, in connection with British Guiana: "Whatever may have been the earlier circulation of Dutch or other coins, in 1798 the Half Dobra was the standard of value, and indeed practically the sole circulating medium. It appears that in the middle of this year there was a great quantity of light and clipped Johanneses in circulation, and the governor had reasons "to apprehend a further importation". Upon his motion the Court of Policy, on 2nd August 1798, passed an Ordinance relating to these light coins, and on 29th October stated that "there are none, or very few other coins than Joes in circulation here". This Dutch ordinance directed that "no other Johanneses shall be legal tender for 22 guilders, but those of gold (i. e. not counterfeits), and weighing 7 engels weight. Also the double, the half, the fourth, and the eighth part in proportion. "But to prevent loss to the inhabitants all Johanneses weighing less than 7 engels weight, at present in the Colonies, and which have not been cut or filed, and on which the letters around the edge are whole, shall be stamped, and after that passed for the full value till 2nd August 1799. After that stamped Johanneses shall cease to be legal tender. Two commissioners shall be appointed to so stamp this coin. The stamp for Essequibo shall be square, with the letters E. D., and that for Demerara round, with the same letters". On the ground of this information, I have no hesitation to ascribe this number to Demerara, hoping to meet also with the countermark for Essequibo, which should consist of the same letters E. D. enclosed in a linear square.

"In 1808, i. e., ten years after the Ordinance respecting the light weight of the Johannes, the Colonial currency was troubled with plugged coins of a very questionable character" (I continue to quote from Chalmer's work). "An enormous quantity of base coin, consisting of Portuguese pieces, plugged with copper or brass slightly gilt over, having lately found its way into general circulation in the colonies of Essequibo and Demerara, it was resolved to call in all joes with plugs whatsoever, whether made of brass, of copper gilt over, or of better materials, and to issue paper money instead. In consequence of this operation, there was withdrawn about 28000 plugged joes, which were sent to England, there to be sold, against an equivalent sum in notes, redeemable in specie in 18 months, or sooner. In forwarding this memorial, the governor said: "Should His British Majesty not think proper to permit the recoinage to be in Portuguese pieces, which is the only kind current here at present, the court of Policy humbly begs that His Majesty may be graciously pleased to allow a Royal colonial gold coin to be struck for the use of these colonies of the same gold which is withdrawn and sent home, and of the same weight and value as that which is now in general circulation". This proposal was not accepted by the metropolis. But a silver coinage was ordered for Essequibo and Demerara. In 1815 followed further important shipments of thousands of Joes (of which to-day a stray specimen is so costly) against further issues of paper money. Of these colonial notes, which in principle were to be redeemed within eighteen months, some were still in circulation as late as 1841. In my collection I have some proofs, "Colony goods of Demerary and Essequibo" for 1, 2, 3 and 20 joes = 22, 44, 66 and 440 guilders.

Now follow two specimens, the countermarks on which give rise to various suppositions. I am unable, however, to offer any positive explanation of their meaning.

7. Half Dobra, not clipped, of D. José, 1769, B.; weight: 14 gr. 25.

Countermark (clearly struck) of a small fleur-de-lys, behind the King's head.

E. Zay reproduced on p. 200 of his work the countermark of a large fleur-de-lys (of coarse workmanship), as belonging to Guadeloupe, and occurring on numerous foreign silver coins, and on p. 207 two others, as belonging to the French portion of St. Martin, on copper and billon coins. It remains to decide to which of these French possessions the countermark on this n° 7 should be attributed to'.

8. Half Dobra, clipped, of D. Maria I and D. Pedro III, 1781 (without mint-mark); weight: 12 gr. 35.

This specimen, which occurred in the Jules Fonrobert Collection is described under n° 8808 in the respective Catalogue. It is countermarked in six places on the obverse and one on the reverse. Those of the obverse are: on the edge, GI, L, MH (in monogram), ꝗ (B reversed); in the centre GM (in monogram), these letters may however be read CH (the last two countermarks within indented borders of dots) and further a small stamp in the form of a rosette or quatrefoil. The countermark on the reverse is not mentioned in the Fonrobert Catalogue; it consists of a small W within a circle. Fonrobert attributes these countermarks to Portuguese authority which in 1823 was still maintained at Bahia (Brazil); I believe, however that there are no reasons to favour such a supposition. I rather think that we must look to the West Indies for the origin of these countermarks.

(*To be continued.*)

THE ENGLISH COINAGE.

By J. B. S. Mac Ilwaine, R. H. A.

It has been well and truly stated that a study of its coins would supply much information even if all other records of a nation were lost.

We have in the Greek coinage a remarkable instance; it alone would show that at the time when other nations "were buried in the barbarism of wild or sunk in the heaviness of sensual life", the Greeks were displaying those qualities which placed them in the position that their art testifies.

Most of us remember the "Jubilee" coinage; how half-sovereigns and sixpences were so much alike that the latter had to be recalled, as they were often gilt and passed as the gold coins to which they bore a ridiculous resemblance. But perhaps we do not all know that this identical mistake had been made before, in 1821, when in this instance the half-sovereign was withdrawn for the same reason.

Popular opinion waxed very strong against the coinage of 1887, with the result that a new issue made its appearance in 1893. An examination of the designs submitted in competition makes some facts clear, that a modern ironclad does not lend itself to artistic treatment, that heraldic designs are hard and that the crown when part of the design is difficult to handle.

The ship is a very old design introduced by Edward III. on his beautiful Noble; it seems to have appeared for the last time (as an important detail) on the Angel by Briot, struck in the reign of Charles I.

Some of the patterns struck about 1863 show that a simple coronet can be satisfactorily dealt with; a pattern shilling of Queen Victoria by C. H. Wiener, and a penny by Wyon are particularly beautiful.

Undoubtedly we are a conservative people: has it not been written that nothing is so distasteful to the average Englishman as having to turn his attention to something new!

We do wake up at times. In the sixteenth century Henry VII.

Original from CORNELL UNIVERSITY

got busy; his chapel in Westminster Abbey shows what he did for Architecture, while his coins bear witness that he not only introduced a new reverse design, but established portraiture; by a master-hand a bust was created that must stand for all time, a monument of what a Kingly effigy should be.

Mr. Lane-Poole stated nothing finer had been done since in its own line, no mean praise. And in addition those who look to the material side of things can reflect although he died somewhat young — for a King — he left what was equal to £18,000,000 of our money!

To-day we find on some of the shillings and sixpences the King's bust shows clearly on the reverse; at first it was only pennies and halfpennies which were at fault, but it looks as if the defect was creeping up.

Attention was called to it during the late King's reign when it was understood to have made its appearance for the first time; now we hear, "It is not new at all, because it has existed right through the coinage of this country, and always when there was a bold design required." The writer having been interested in numismatics for close on half a century cannot remember this defect was noticed before King Edward VII., although it can be detected on pennies of Queen Victoria dated 1901.

When the shilling of William III. was struck in 1700 the mill was a comparatively modern innovation, and the bust was in high relief, yet there is not a trace of this defect showing, while it is well known to have existed on the coins of our late King whose bust is in low relief.

Nor so far as the writer is aware does the defect occur on "Proof" coins of the present reign.

It is some considerable time since 1908 and 1910. On a threepence and shilling of which years respectively (both of which coins have been in circulation) the defect on reverse shows clearly, as also on the pennies of 1901 already referred to, consequently it does not seem that the defect is not permanent, and, "that after a week or two it disappears."

[1]We must be grateful to Mr. J. King, M. P. for bringing up the matter in the House of Commons, and we should not be satisfied with the answers he received, those quoted above go to show for more than two centuries since the introduction of the mill the public have been using coins with a marked defect, *which was seemingly not noticed until the late King's reign*, and that after two or three weeks this defect disappears, while coins are in existence showing it clearly which are two, four and eleven years old! Having regard to the fact that "Proof" coins appear to be issued in a satisfactory condition it was unnecessary for Mr. Masterman to ask that suggestions be made to the authorities as to how perfect coins are to be struck, as clearly they are able to do them.

Still, our shilling is worth twelve pennies, other pieces in proportion; will that be the verdict of the nation now that it is seen the work done in 1912 is not to be compared to that executed in 1700?

It is stated in an article on the designs for the coinage of 1893, that considerable difficulty was experienced in doing at that date what had been well and truly done in 1663, namely placing lettering round the edge of the crown pieces.

Competition did not prove altogether successful for the 1893 coins; much better was the idea of repeating some old designs, one, that on the shilling of the third issue of George III. which is a most excellent device, and has the additional merit of lasting well — an important asset — was used by Queen Victoria, as the reverse of Her "Jubilee" shilling, but why, when it became necessary to change the beautiful "Lion" design which was on the reverse of the shilling and sixpence of George IIII. for that we now have on those coins is a puzzle.

The animal supposed to represent a lion is trying to do two things, balance one crown on top of his head and hold on to another, what might happen if he attempted to wag his tail may be left to the imagination. It must, however, be admitted the design does not look so bad on the sixpence, this can be explained by bearing in mind that not every design is capable of enlargement from an artistic point of view; nothing is so unreasonable as to suppose designs can be enlarged or reduced at the sweet will of a workman in whose hands a proportional compass is like gunpowder in those of a child.

The full stop is placed "after ordinal numbers in Roman characters", yet there is no such stop following the V after the King's name.

Even the beautiful design now used on the reverse of our gold coins, and the silver crowns of the late King, show an extraordinary amount of ignorance, for a nation so wrapped up in horses and racing it is amazing it has been tolerated so long. In Hawkins *Silver Coins of England* (1887 Edition), it is pointed out that the position of the Saint on horseback is such that owing to the placing "of the right leg (which was purposely but unfortunately changed), as the hero now sits upon his horse he must inevitably fall to the ground the moment he attempts to strike the meditated blow with his sword".

That it would be possible to revert to some old designs, making same suitable to modern requirements, is conclusively proved by the pattern struck by Messrs. Spink and Son, after the design prepared by Mr. F. Bowcher for a crown piece of our late King. It is a strikingly beautiful example of that most difficult task, to successfully reproduce the artistic feeling of a bygone age without making the fatal error of endeavouring by slavish copying to obtain the individuality of another person.

TYPE I.

HALF RUPEE, 1912.

O. — Legend: — GEORGE V KING EMPEROR. Truncated bust of the King-Emperor in profile and looking to the left. On the truncation of the bust: B. M. His Majesty is represented wearing the Imperial Crown, and the ermine Robe of State, the Collar of the Most Exalted Order of the Star of India, the Collar of the Most Eminent Order of the Indian Empire and the Badge of the Most Honourable Order of the Bath. The whole within an ornamented rim.

R. — Inscription: — HALF | RUPEE | INDIA | 1912 in four lines, and the denomination of the coin in Persian, beneath the date, encircled by two concentric plain circles around which is carried a Saracenic scroll, encompassed by two concentric plain circles. In the spaces to the left and right between the scroll and the circles are conventional representations of the rose, the shamrock, and the thistle, while above and below, the Indian lotus is shown. The whole within an ornamented rim.

E. — Milled with straight lines.

Original from CORNELL UNIVERSITY

A shield bearing the Arms of the United Kingdom, of Great Britain and Ireland, heraldically coloured, and surmounted by the Royal crown. The shield bears the Arms of England in the first and fourth quarters, Scotland in the second, and Ireland in the third. A branch of laurel on each side of the shield, the lower portions of the branches being crossed below it, and tied together by ribbon, formed into a bow, with hanging ends. Beneath the crossed branches and between two ornaments, the rose, thistle, and shamrock, engrafted upon the same stem. The whole within an ornamented rim.

E. — Milled with straight lines at right angles to the face of the coin.

Similar coins are dated 1839, 1841, 1842, 1843, 1844, 1845, 1846, 1847, 1848, 1849, 1850, 1851, 1852, 1853, 1855 and 1872.

Similar coins, but having a numeral or numerals, above the rose at the foot of the design on the reverse, are dated 1870, 1871, 1872, 1873 and 1874.

Similar coins, but having the initials W. W. incuse, on the truncation of the Queen's neck on the obverse, are dated 1854, 1855, 1856, 1857, 1858, 1859, 1860, 1861, 1862 and 1863.

Similar coins, but having the initials W. W. incuse, on the truncation of the Queen's neck on the obverse, and a numeral or numerals, above the rose at the foot of the design on the reverse, are dated 1863, 1864, 1865, 1866, 1868 and 1869.

I regret that I omitted to give the date 1880 and to state that those dated 1901 are a millimetre less in diameter than those of earlier dates.

HENRY GARSIDE.

NUMISMATIC REFERENCES IN SHAKESPEARE.

KING HENRY VI, CONTINUED.

PARTS II & III.

The Second and Third Parts of King Henry VI are Shakespeare's first attempt at writing historical tragedy, an art which he subsequently brought to so much perfection that his later works have overshadowed the undoubted merit of these earlier plays, which, however, are eclipsed by his forerunner, Marlowe, from whom it is probable Shakespeare derived his bend in this direction and, possibly, first exercised it in conjunction with the earlier dramatist in the First Part of this series of plays, in which we must recognize the apprentice work of Shakespeare.

Even these two plays are not entirely original to Shakespeare since they bear distinct traces of two earlier dramas covering the same ground. This is to be borne in mind in considering the value of the numismatic references contained in them. An interesting research would be to separate the numismatic references traceable to the older plays from that portion of the present drama which undoubtedly was the work of Shakespeare, since 3,241 lines are to be distinguished as belonging to the older dramas from 2,736 assigned to our bard. Unfortunately, neither the means nor time are just now within reach of the writer of these papers for following so interesting a theme and what is here written must be taken with this consideration in mind.

Dowden assigns these two plays as Shakespeare's work to the years 1591-92.

PART II. ACT I.

SCENE I.

" Pirates may make cheap PENNYWORTHS of their pillage ".

PENNYWORTH. — See " Pence ", T. G. V., II, V, *Num. Circular*, May 1912, column 13593.

ACT III.

SCENE I.

Here we have the record of an historical statement connected with money in the form of an accusation when the Duke of York says of Duke Humphrey of Gloucester, —

" And did he not, in his protectorship,
Levy great sums of *money* through the realm,
For soldiers' pay in France, and never sent it?
By means whereof the towns each day revolted ".

Gloucester, however, denies the implication : —

" I never robb'd the soldiers of their pay,
Nor ever had one PENNY bribe from France ".

PENNY. — See " Pence ", T. G. V., II, V, *Num. Circular*, May 1912, c. 13593.

Moreover, he goes on to say : —

" That DOIT that e'er I wrested from the King,
" Or any GROAT I hoarded to my use,
" Be brought against use at my trial-day! "

DOIT. — Here Gloucester wishes to make contrast between two coins of very low denomination and the " many a *Pound* " of his own money in the next quotation and, having already used the denomination of Penny, he refers to the next two lowest coins that he can think of at the spur of the moment.

The Doits of the different provinces of the Netherlands are familiar to every collector of coins. They are either of copper or billon and supplied the small change of these countries, from which they were shipped to England in the reign of Elizabeth and evidently circulated freely there as a convenient medium in small amounts in absence of a regal coinage to meet the petty demands of everyday life among the common people. Their style was influential on the subsequent token coinage of the 17th century and on the first issue of regal copper coinage. Nor is it too great a stretch of probability to see in these humble but interesting issues the direct ancestors of our modern copper and bronze coinage.

GROAT. — When Edward III introduced a regular system of coinage in place of the mere issue of Pennies and their divisions which so long had been the only English coins, the addition he made to the Silver Series was the issue of Groats, four being equivalent to a silver Penny, while the Half-Groat, struck in the subsequent reign, was exactly double the value of that well-recognized coin, from which time the English Coinage was never without these useful multiples of the Penny until the Groat disappeared with the accesion of James I, to return with the first Charles, disappear during the Commonwealth (when, however, the Half-Groat continued to be issued), and be relegated to the Maundy Series, together with its division during the reign of Charles II. It was especially *en evidence* in Shakespeare's time.

To finish our quotation, Gloucester goes on to say that, far from misappropriating the public money, —

" — Many a POUND of mine own proper store,
Because I would not tax the needy commons,
Have I disburséd to the garrisons,
And never ask'd for restitution. "

POUND. — See C. E., IV, i, *Num. Circular*, Dec. 1911, c. 13241. The coin that has been always understood by this name in Modern History is the Sovereign, first struck under Henry VII, in 1489, and valued at 20 shillings, being equivalent to the Double-Ryal or Noble and dealt with in the First Part of these plays under the latter name. So superb a piece was happily fit as a simile for great expenditure, not only for its great value, for it was the highest denomination under Elizabeth, but, still more, for the handsome appearance made by a huge flan of gold bearing the splendid effigy of the reigning monarch, crowned and elaborately enthroned in all his, or her, robes of state. It is interesting to note that the Shilling introduced at the same time into our coinage is to-day the typical silver denomination of that series as the Pound or Sovereign is the gold.

SCENE III.

" I'll give a thousand POUND to look upon him ".

POUND. — See immediately above. Here again Cardinal Beaufort uses this monetary term as the highest he can think of.

ACT IV.

Scene I.

Here we have a dialogue between a Pirate Captain, besides his ship's Master and Mate, and two gentlemen whom he has captured, the subject being the question of their ransom, in which we are able to form some interesting conjectures on the current value during the broad period covered by the composition of the play, of the Crown piece : —

1st Gent. — What is my ransom, Master? Let me know.
" Master. — A thousand Crowns, or else lay down your head.
" Mate [to 2nd Gent]. — And so much shall you give, or off goes yours.
" Captain [as the Gentlemen seem to hesitate]. —
What! think you much to pay two thousand Crowns,
And bear the name and part of Gentlemen? —
Cut both the villains' throats! — for die you shall :
Can lives of those which we have lost in fight,
Be counterpois'd with such a petty sum? "

Crown. — Crowns were first issued in this country under Edward VI both in gold and silver, the gold one as the quarter of the Sovereign, and the silver one as five times the value of the Testoon or Shilling. The latter occupies in the Silver series the position as a *belle pièce par excellence* that was formerly held by the Noble and now is held by the Sovereign in the Gold issues. The nobility of this piece has ever made it a subject of admiration, by no means confined to numismatists and coin collectors, and many persons have in all ages collected the series of it for the beauty of the pieces themselves without any intention of going further into numismatic studies, an artistic honour which these superb medallions of the English Coinage have well deserved since their production has merited the highest efforts of the greatest masters of the art of coin-engraving. No less names than Rawlins, Simon, Pistrucci, Wyon, Briot, Roettier and Croker are conspicuous as their designers and the Oxford Crown, the Petition Crown, the Vigo Crown, the Lima Crown and other equally noble pieces are conspicuous names in the history of English numismatic denominations.

Scene II.

" Cade. — There shall be in England seven Half-Penny loaves sold for a Penny ".

Half-Penny. — This tiny silver coin first makes its appearance under John. In Elizabeth's reign its obverse consisted of a portcullis and its reverse of a cross moline, so that its appearance was conspicuously different to that of the other coins of the realm, all of which bare the portrait of the reigning sovereign, therefore it more resembled a token then a regal issue. Being undated, it is difficult to assign it to the different years of this reign, but it appears to have been struck between the years 1561 and 1584 and, perhaps, earlier and later than these dates. Our Shakespearean reference here is of great value as showing the price of a loaf of bread at the period to which we may assign the play and, as this scene is undoubtedly the work of our bard, we may regard the information as Elizabethan.

Penny. — See " Pence ", T. G. V., II, V, *Num. Circular*, May 1912, c. 13593.

The first trace of this coin which we have is in the " Laws of Ina, King of the West Saxons ", whose reign began in 688. Its weight was 24 grains, which still bears the sign " dwt ", or " pennyweight ", being the 240th part of a pound, even as it still is, and the pound weighed approximately 5,760 grains.

The word is evidently derived from " penig ", " pening " or " pending ", from " pand ", " a pledge ", of which it is the diminutive, or from " pendere ", the verb " to weigh ", and on the Continent we have " pfennige " and " pfenning ".

The idea of " seven halfpenny loaves " being " sold for a penny " in the masterly scene in the play before us, which no hand but Shakespeare's could have drawn, shows that the labouring man's logic in Elizabeth's time was not materially different to what it is at present and the fact that, almost at the same time, Cade should declare that, under his rule, " there shall be no money " is worthy of the same cause and reminds us of the famous observation of the labourer that, if the aspirant to the Tichbourne title and estates had not been the son of a poor butcher, he would not have been done out of them by the House of Lords. However, it has been reserved for the present age to place the franchise in the hands of minds constituted after the manner of Jack Cade's, an act of intelligence only comparable to his own and his followers, when, —

" All scholars, lawyers, courtiers, gentlemen they call false caterpillars and intend their death ".

" Henry the Fifth, in whose time boys went to span-counter for French Crowns ".

French Crown. — Love's Labour's Lost, III, 1. The Ms. of this play having gone astray, it has not been published in the regular order, in which it should precede " The Comedy of Errors ". As, however, it was probably written about the same time as the three plays we are now treating of, its chronology will not be disturbed by its following immediately after them, which will, therefore, be its place. Its abbreviation is " L. L. L. ".

Scene VII.

" Messenger (to Cade). — My lord, a prize, a prize! here's the Lord Say, which sold the towns in France; he that made us pay one and twenty fifteens, and one Shilling to the Pound, the last subsidy ".

Shilling. — This coin, which has survived to the present day, probably because of its great usefulness as the characteristic denomination of the duo-decimal system (the only really practical method of reckoning), entered our coinage under Henry VII, bearing, as well, the name of Testoon, which, strangely enough, has passed out of the language. The name which has survived four centuries is Teutonic in origin, being derived from the Anglo-Saxon " scilling ", possibly from the verb, " scillan ", which means " to sound ", though how this coin of the first Tudor came to be connected with an Anglo-Saxon verb, I leave to the etymologists as an interesting subject in derivation. Its equivalent is, of course, found among other Teutonic nations as a coin in " Schilling " (Germany), " Skilling " (Scandinavia), and it is, perhaps, to this foreign origin that we must look in seeking the source from which our coin derived its name. This would, at least, appear to be more *numismatically* probable.

Pound. — See above Act III, Sc. 1.

" Whereas, before, our fore-fathers had no other books but the Score and the Tally ".

Here Cade refers to the well-known Tally-stick, many of which are preserved in the Guildhall Collection in London, upon which notches were *scored* for the keeping of accounts, hence its other name of " Score ", which, with the customary multiplication of words bearing the same meaning characteristic of labouring people. Cade uses at the same time as though he referred to two different objects.

Scene VIII.

" He that brings his [Cade's] head unto the king, Shall have a thousand Crowns for his reward ".

Crown. — See above, Act IV, Sc. 1.

This, then, was to be the reward for apprehending Cade, truly a great price for those days and clearly demonstrating thereby how dangerous he had made himself to the king and realm.

Scene IX.

" Cade. — Man wilt betray me and get a thousand Crowns of the king by carrying my head to him. "

Crown. — See immediately above, Sc. VIII.

ACT V.

Scene I.

" King Henry. — We give thee for reward a thousand Marks. "

Mark. — See C. E., I, 1, *Num. Circular.*, Dec. 1911, c. 13241.

Here Shakespeare makes Iden receive " a thousand *marks* ", instead of " a thousand *crowns* ", as he had before written twice, as the price for Cade's head. We are to note that " a thousand *crowns* " and " a thousand *marks* " are used by the dramatist as convenient

terms for a large sum of money and that he uses them as equivalent for one another. The half of the same amounts are used in the same manner, as when, in *As You Like It*, Adam offers Orlando the "five hundred crowns", the "thrifty hire", he had "saved under" his "father". This free-and-easy handling of large amounts by dramatists and novelists is one of the most delightful bits of *unconscious* humour that this class of persons are addicted to, though it will be noticed that Shakespeare gives an attention to the relative values of these sums, which is a pleasing contrast to the utter disregard for the purchasing value of coins of most authors especially when the coins spoken of are of an older date than the writer's own times or, else, of a foreign origin. This is a result of Shakespeare's eminent good sense, which the most fertile of imaginations is never for an instant, or in the most apparently trifling detail, able to run away with, and this makes him of more than usual value to those who would investigate the little known but very important question of the relative values of coins in his time.

A. H. Cooper-Prichard.

REVIEWS.

The Standard of Value, by Sir David Barbour (Macmillan. 6s. net).

Victrix causa deis placuit. Sir David Barbour, the Cato of bimetallism, owns in his preface to the volume before us that that particular theory respecting the Standard of Value is "no longer a live issue." Sir David, who sat on the Royal Commission on Gold and Silver of 1886-88, was the Financial Member of the Council of the Viceroy of India when the gold Standard was introduced into that country, and was subsequently a member of the committee which fixed the rupee at 1s. 4d., has decided to put on record his views on the whole subject of the Standard of Value and its application to the needs of India in 1893. He is rather late in the day, but no one will quarrel with him for publishing this book on that account. Perhaps he would not have regarded the final abandonment by the world of "the immortal $15\frac{1}{2}$ to 1" with so much equanimity as he is now able to display if he had described the events, *quorum pars fuit*, at an earlier date. His references to the great battle of the standards, which to the present generation is hardly more than a name, are couched in a tone of proud regret, accompanied by the admission that circumstances made it impossible to hope for the restoration of bimetallism even in the countries where it had existed for many years, and still less for its establishment in India. Sir David was never under any illusions on the latter point. Whatever opinion may be held as to the merit which he may claim as an expounder of abstract economics, there can be no doubt of his shrewdness in practical affairs. In discussing the situation as it existed after the publication of the report of the Gold and Silver Commission in 1888 he remarks that bimetallism could be re-established only an almost universal international agreement, which could not be obtained; and he adds, with a humour which may or may not have been intentional, that "no country had any objection to the re-establishment of a bimetallic system by other countries".

Sir David's exposition of the problem which faced India after 1888 will be read with interest by students of economic history. He was a believer in bimetallism, but his native shrewdness and acquired business instinct, combined with the knowledge of men and things in the world of politics which is part of the equipment of persons in his position, showed him clearly that, to use his own words, he "was bound to reconsider the question of the introduction of a gold standard for India". Once he had come to this conclusion, he rapidly perceived that the sooner India was provided with a gold standard the better, and that as a first step, the coinage of silver at the Indian Mint must be stopped. He also perceived that it would be dangerous to fix a gold price for the rupee at once, though there were some who thought that this could be done safely; an idea was probably encouraged by the provision of the law closing the Mints that rupees should be issued in exchange for gold at 1s. 4d. Five years later, in 1899, this rate was made permanent; gold was made legal tender in India, and arrangements made for providing a gold reserve in London as well as in India. The policy of holding part of the Gold Standard Reserve in London in the form of securities has often been questioned since it was adopted, and at the present moment its opponents are once more mobilizing their forces with the object of getting it abandoned. Sir David's remarks on this subject are worth quoting: —

"It is true that, in so far as he holds gold securities in England, and not gold, the Secretary of State For India does not, when a crisis occurs, release any gold to relieve the London Money Market, and it is conceivable that his failure to do so might tend to prolong for a short time a condition of things having an unfavourable effect on the Indian exchange. The responsible authorities, however, hold that the gain in interest from holding gold securities instead of gold more than counterbalances any possible or probable disavantage, and I see no reason to doubt that, from the Indian point of view, their opinion is sound."

He further says: —

"Gold was accepted by the Secretary of State for India in exchange for drafts on India, and a portion of the Gold Standard Reserve was placed in London because it was more economical to do so than to force the public to send gold to India and afterwards return in to London."

Sir David thinks that no obstacle should be placed in the way of a free circulation of gold in India, but that the sovereign (fifteen rupees) is not the best coin that could be issued by the Indian Mint. He would prefer a gold coin of the value of ten rupees. This is a question which deserves consideration; but there are obvious advantages in having the same coins in use in India as in the United Kingdom.

NUMISMATIC SOCIETIES, MUSEUMS &c.

FRANKFURTER NUMISMATISCHE GESELLSCHAFT.

Besprechung vom 11. Juni 1912.

Her Professor Dr. Müller, Direktor des historischen Museum und Vorsitzender des Comités für die historische Ausstellung gab eine Uebersicht dessen, was für die Austellung geplant sei. Hierauf machte Herr Josef Hamburger Vorschläge wie sich die Numismatische Gesellschaft durch Ausstellung von Schützendenkmünzen an der historischen Ausstellung beteiligen könne, welche Vorschläge auch allgemeinen Beifall fanden. Es wurde ein Spezial-Ausschuss gewählt, der im Auftrag der Numismatischen Gesellschaft die Ausstellung der Münzen überhehmen sollte, bestehend aus den Herren Ernst Lejeune, Paul Joseph und Joseph Hamburger.

In der Sitzung von 9. Juli 1912 erstattete Herr Josef Hamburger Bericht über die historische Ausstellung und die Arbeiten des Comités. Auf Veranlassung der Numismatischen Gesellschaft hatte Herr Paul Joseph die Juli-August Doppelnummer der „Frankfurter Münzzeitung" als Festnummer für das Schützenfest erscheinen lassen.

Am 23. Juli 1912 fand eine Besichtigung der historischen Ausstellung des Schützenfestes durch die Numismatische Gesellschaft statt, Herr Professor Dr. Müller begrüsste die Gesellschaft und leitete die Führung. Er erläuterte an Hand des ungewöhnlich reichen Materials die Entwicklung der Schusswaffe: Armbrust, Handbüchse, Luntenradschlospercussionzündnadelgewer usw. Sodann erläuterte er die übrigen Schützendenkwürdigkeiten, Becher, Ketten, Kleinodien, Schützenbriefe, Abbildungen und Beschreibungen von Schützenfesten u. dgl. Im Anschluss daran erläuterte Herr Josef Hamburger die ausgestellten Schützendenkmünzen. Herr Justizrat Dr. Hæberlin sprach den beiden Rednern den Dank des Vereins für das Geleistete aus. Nach Schluss der Besichtigung fand ein gemeinsames Abendessen der Numismatischen Gesellschaft im Weinrestaurant auf dem Festplatz statt.

OBITUARY

Mr. J. M. Cameron.

Mr. John Mac Donald Cameron died on Tuesday, September 3rd, 1912, at his residence, Castle Hill House, Tain, Ross-shire, Scotland. Mr. Cameron was born in Kilmuir Easter, Ross-shire, in the year 1847. He was formerly in the Inland Revenue Service in Somerset House, London, and afterwards became an analyst, assayer and mining engineer. He represented the Northern Burghs in the Imperial Parliament from 1885 until 1892. He was appointed Deputy Master of the Sydney branch of the Royal Mint in 1892 but resigned in 1898. The writer will ever gratefully remember the kindly help Mr. Cameron gave him when compiling some information on the gold currency of Australia.

CATALOGUE

OF

COINS and MEDALS for SALE

Special attention is directed to the fact that every coin or medal catalogued in the following lists is guaranteed to be absolutely genuine (except when expressly stated in the description to be otherwise) and if not approved of can be returned, when the full amount paid will be refunded.

Collectors will also kindly note that every care is taken when compiling the catalogues not to overrate the condition of the pieces but to faithfully represent them according to their merits.

All orders should be sent to Spink & Son Ltd., 17 and 18, Piccadilly, London, W.

(For further particulars see first page of this Circular.)

COINS OF THE MOST FAMOUS RULERS IN THE WORLD'S HISTORY.

(Continued from col. 13916.)

VICTORIA QUEEN OF GREAT BRITAIN, AND EMPRESS OF INDIA.

1837—1901.

This popular princess was the granddaughter of King George III, and the only child of that monarch's fourth son Edward Augustus Duke of Kent (died 1820). She was born at Kensington Palace on the 24th May 1819, and baptized (24th June) as Alexandrina Victoria. The early education of Princess Victoria was carefully undertaken by English and German tutors, and her favourite studies were music and art; she was confirmed at the Chapel Royal St. James in 1835, celebrated her coming of age in 1837, and on the 20th June of that year succeeded to the throne on the death of her uncle King William IV.

On her accession, the union between England and Hanover, which had existed since 1714, was dissolved, owing to the prevalence of the Salic law in the latter country.

In such a long reign as this is, we have only space to give a chronological epitome of the principal interesting events at home and abroad, that happened during Her Majesty's beneficent rule:

1837. Her Majesty's Accession 20th June.
1838. Her Majesty's Coronation 28th June.
1839. First Chinese War.
1840. Marriage to Prince Albert—Penny Postage.
1841. Birth of Prince of Wales (Edward VII) Novr 9th.
1842. Income Tax Act—Visit of H. M. to Scotland.
1843. Opening of Thames Tunnel.
1844. Opening of Royal Exchange.
1845. Queen's visit to Germany.
1846. Sikh War — Commercial Panic.
1847. Great famine in Ireland.
1848. Chartist Riots in London.
1849. London Coal Exchange opened.
1850. Death of Sir Robert Peel.
1851. The Great Exhibition (London).
1852. Death of the "Iron Duke" — Gold found in Australia.
1853. Marriage of Napoleon III and Eugénie.
1854. The Crimean War.
1855. Queen and Prince Consort visit Paris.
1856. Proclamation of Peace.
1857. Great Indian Mutiny.
1858. Marriage of the Princess Royal (German Empress).
1859. Formation of Volunteer Rifle Corps.
1860. Prince of Wales visits Canada, and U.S.A.
1861. Death of Albert Prince Consort.
1862. Princess Alice married Grand Duke of Hesse.
1863. Prince of Wales married to Princess Alexandra.
1864. Visit of General Garibaldi to England.

Only a few specimens were struck of this date, two of which are in the Royal Mint (cf. *Cat.*, 2013-14), but none were issued for currency. The may have been struck on the occasion of the International Exhibition of 1862.

106142 Shilling pattern 1863 by *Chᵃˢ Wiener*. VICTORIA.DEI.GRATIA. BRITANNIAR.REG.F.D. Bust of Queen wearing wreath of roses, thistles, and shamrocks with tie end laying on left shoulder, without artist's initials. Rℒ. ONE SHILLING under crown, within a wreath of oak and laurel, with date below, plain edge. V. R. 4 » »

106143 Shilling pattern 1863, by *Chᵃˢ Wiener*, legends and type as before, but bust of Queen with tiara and C.H.W. in *incuse* letters on truncation, plain edge. V. R. 4 4 »

106144 Shilling pattern 1863, by *Chᵃˢ. Wiener*, type as before with bust of Queen wearing tiara, but CH.W in *raised* letters on truncation, and reading VICTORIA DEI.GRATIA, plain edge. V. R. 4 » »

* *The above three patterns were executed by Ch. Wiener, engraver to the Belgian Mint, who was employed by Mr. Graham (then Master of the Royal Mint London) to submit designs for the silver coinage).*

106145 Halfcrown pattern 1864, by *W. Wyon*, legends and type as Halfcrown 1862, bust with ornamental diadem and plain fillet, and W.W. in raised letters on truncation, but with grained edge. V. R. 4 10 »

Halfcrowns of this date were only struck on the occasion of the foundation of the Albert Memorial, and very few specimens are known.

106146 Florin pattern 1867, by *.W. Wyon*, legends and type as Florin 1853, but reading BRITT (instead of BRIT), grained edge. V. R. 4 10 »

* No florins reading "BRITT" were issued for currency until the following year (1868), only very few specimens are known to exist.

106147 Florin pattern 1867, by *W. Wyon*, as before but with plain edge. V. R. 3 » »

* *Of this year, 423,720 pieces were struck for currency of the value £ 42,372.*

106148 Shilling 1867, by *W. Wyon*, legends and type as Shilling 1853, without W.W. on truncation of bust, grained edge. V. R. 4 10 »

* *Of this year 2,166,120 pieces were struck for currency of the value £ 108,306.*

106149 Sixpence 1867, by *W. Wyon*, as before. V. R. 2 10 »

* *1,362,240 pieces were struck for currency, value £ 34,056.*

106150 Tenpence, International pattern 1867, by *W. Wyon*. VICTORIA. D.G.BRITANNIAR.REG.F.D. Bust of Queen with tiara, and tye ends, date below. Rℒ. ONE.FRANC—TENPENCE. Shield of arms crowned within oak wreath, plain edge. V. R. 5 » »

106151 Shilling 1871, by *W. Wyon*, legends and type as Shilling 1853, without W.W. on truncation of bust, plain edge. V. R. 4 10 »

* 4,819,320 shillings were struck for currency in this year, value £ 240,966.

106152 Halfcrown pattern 1875, by *L. C. Wyon*. VICTORIA.DEI.GRATIA.BRITANNIAR.REG.F.D. Bust of Queen with tiara, and tye ends, no artist's initials on truncation. Rℒ. St. George and the dragon to r. with date, and B P, in minute letters below, plain edge. E. R. 15 » »

* This is only the second specimen that we have seen or heard of, the other piece being in the Royal Mint (cf. *Cat.*, 2213).

106153 Shilling pattern 1875, by *L. C. Wyon*, legend and type as before, but with grained edge. E. R. 10 » »

* Only one other specimen of this type in the Royal Mint collection (cf. *Cat.*, 2244).

106154 Halfcrown pattern 1876, by *L. C. Wyon*. VICTORIA D.G.BRITANNIAR REG.F.D. bust of Queen with tiara, L.C.W below truncation. Rℒ. St. George spearing the dragon to *left*, with ground extending to edge of coin, and below the dragon, L.C.W. in minute letters, plain edge. E. R. 15 » »

* There are only *eight* specimens known of this rare pattern, six of which are in the Royal Mint (cf. *Cat.* 2192-4, *and* 2214-16), and the other two that have passed through our hands from the Murdoch and Saward Collections.

106155 Halfcrown 1879, by *L. C. Wyon*, legends and type as Halfcrown 1853, with plain diadem and fillet, and no artist's initials on truncation of bust, grained edge. V. R. 3 10 »

* There is no specimen in the Royal Mint Collection, and it is the only proof we have seen of this date.

106156 Shilling 1879, by *L. C. Wyon*, legends and type as Shilling 1853, without artist's initials on truncation of bust, grained edge. V. R. 2 » »

* This is very rare as a proof, as neither Montagu nor Murdoch possessed a specimen.

VICTORIA CROSSES & FIELD OFFICERS GOLD MEDALS &c.

106555 Field Officers Gold Medal for Talavera 1809 (23rd Light Dragoons). 75 » »
106556 — Salamanca (Royal Arty.). 75 » »
106557 — Toulouse (4th Dragoons). 75 » »
106558 Victoria Cross Group. — Victoria Cross, Gold Cross of the Bath (C.B.) Indian Mutiny Medal 2 bars, Defence of Lucknow, Lucknow (Captain afterwards Colonel Royal Artillery). V. R. V. F. 140 » »

⁂ This Officer commanded a battery in the force led by Outram and Havelock to the relief of the Lucknow Residency. His fearless behaviour under a most terrific fire of cannon and musketry was most noticeable on every occasion during that trying time, and his name was constantly mentioned in despatches.

He was entrusted with the terrible duty of blowing the mutineers from the guns, when that drastic and frightful punishment was meted out to the murderers of our helpless women and children. Sir James Outram, in his report, referring to the splendid, conduct of this officer during the relief says.

"This attack appeared to him to indicate no reckless or foolhardy daring, but the calm heroism of a true soldier, who fully appreciates the difficulties and dangers of the task he has undertaken, and that, but for this officers nerve and coolness on this trying occasion, the army could not have advanced".

106559 Victoria Cross Group. Victoria Cross; China Medal, 2 bars, Taku Forts 1860, Pekin 1860 (Lieutenant afterwards Colonel 67th Foot, South Hampshire Regiment). V. R. V. F. 125 » »

⁂ On August 21st, 1860, the Taku Forts were attacked and captured—about 500 of our men being killed and

Original from CORNELL UNIVERSITY

wounded. When the moment of assault came this officer with some others, sprang into the ditch, which was filled with water, and swam across, entering thro the embrasures. He was the third to gain a footing on the walls.

106560 Victoria Cross Group. Victoria Cross; Afghan Medal, 1 bar, Kandahar; Long Service & Good Conduct (Sergeant, Royal Horse Arty.) V. R. V. F. 85 » »

On July 27th 1880, after the disaster at Maiwand, our small force was retreating to Kandahar, when Driver P.I. fell badly wounded. Although the enemy was only ten or fifteen yards distant Pat seeing the driver's danger unhesitatingly ran back two yards and lifted him on to the limber of his gun, where he unfortunately died almost immediately.

Later this brave Irishman volunteered to fetch water for the wounded, going for it to a village near, where already so many of our men had been killed.

106561 Victoria Cross Group. Victoria Cross; Afghan 1878-80, 4 bars, Peiwar Kotal, Charasia, Cabul, Kandahar; bronze star Kabul to Kandahar, Egypt 1882, 1 bar, Tel-El-Kebir; Khedive star 1882. (Lance-Corpl. 1st Batn Seaforth Highlanders.) V. R. F. 125 » »

*** On December 14th 1879, during the attack on Asmai Heights, round Cabul the above N.C. Officer in a most gallant manner, led the attack and under a very severe fire dashed up the slope in front of his party, and engaged in a desperate hand to hand combat with an Afghan who sprang out to meet him. He was severely wounded.

106562 Victoria Cross Group. Victoria Cross; Indian Mutiny Medal, 2 bars, Defence of Lucknow, Lucknow (Bombardier, Bengal Artv.). V. R. V. F. 85 » »

On September 27, 1857, the party to which the Bombardier belonged was returning from a sortie and one of his comrades fell severely wounded. He took the injured man on his back and carried him a long distance, under a very heavy fire and in circumstances of considerable difficulty, to prevent him from falling into the hands of the Sepoys, who would otherwise have despatched him by their own slow methods of torture.

A UNIQUE GOLD MEDAL.

106563 Presented to a Captain of the Brentford Volunteers. Obv. A volunteer taking aim, above on a scroll AIM STEADY, below, PRO PATRIA THE BRENTFORD VOLUNTEERS. Rx. GIVEN AS A TOKEN OF ESTEEM TO CAPTAIN..... FROM HIS GRATEFUL COMPANY 1803. Oval with ornamental border and loop. V. F. 15 » »

VARIA

INTERESTING ROMAN DISCOVERIES.

Excavations at the Roman City of Uriconium, Shropshire, are revealing interesting discoveries. The work, which is being carried out by the Society of Antiquaries under the supervision of Mr. J. P. Bushe Fox, will extend over a hundred and seventy acres. The area within the city walls, the frontages of houses, and a fine portico, all facing Watling-street, have been unearthed, together with four wells with cistern intact and also furnace. Eighty gold coins, large wine jars, beautiful Samian ware, a Roman candlestick in pottery, and many other interesting articles have already been found.

Morning Post.

MONTHLY

NUMISMATIC CIRCULAR

THE *Monthly Numismatic Circular* will be forwarded post free on receipt of half-a-crown (= 3 francs = 2 ½ marks = 60 U. S. A. cents, in P. O. O. or stamps) for one year's subscription.

Should any applicant not receive it regularly by post, please notify the omission to us, when it shall be at once rectified. All communications respecting the Numismatic Circular (either referring to its literary portion or to its catalogue of coins, &c. for sale) should be made to our West-End house, 17 and 18 Piccadilly, London, W., where all letters and orders will receive immediate attention.

Cheques crossed National Provincial Bank of England, Piccadilly Branch.

Any coins or medals can be had on approval if the applicant is known to us, or, if not, on receipt of references. Postage on coins, as a rule, is paid out.

Orders for coins from the annexed list will be executed in rotation, but preference will be given to clients who are willing to purchase outright, providing the coins answer to the description.

Coins not approved of can be returned.

LA *Circulaire mensuelle de Numismatique* sera adressée franco à toutes les personnes qui voudront bien en faire la demande en nous faisant parvenir 3 francs 20 centimes par mandat postal pour un abonnement annuel.

Nous prions nos correspondants d'adresser toutes lettres et communications relatives à la partie littéraire du journal ou au catalogue des monnaies et médailles, à notre établissement, 17 et 18, Piccadilly, Londres, W.; nous y répondrons immédiatement.

Les ordres seront exécutés à tour de rôle en donnant la préférence aux commandes effectives.

Toutes les pièces seront envoyées *à condition*, si le client le désire, mais le port de retour est à sa charge.

Les personnes qui ne nous seraient pas connues sont priées de nous fournir des références.

DAS *Numismatische Circular* wird portofrei, nach Empfang von 2 ½ Mark (3 Kronen ö. W.) als Jahresbetrag, geschickt.

Sollte jedoch ein Abonnent dasselbe nicht regelmässig erhalten, so bitten wir, uns gefälligst Anzeige davon zu machen, um weitere Unregelmässigkeiten zu verhüten.

Alle Mittheilungen, welche dieses "Numismatische Circular" betreffen (gleichviel ob dieselben sich auf den literarischen Teil oder auf das Verzeichnis der Münzen, &c. zum Verkauf beziehen), sollten an unser West End Etablissement, 17 und 18 Piccadilly, London, W., gerichtet werden, wo Briefe und Aufträge sofortige Erledigung finden.

Jede Münze oder Medaille wird zur Ansicht gesandt. Bestellungen werden nach Reihenfolge des Einganges effectuirt und Nichtconvenirendes zurückgenommen.

Rückporto zu Lasten der Herren Besteller.

Uns unbekannte Herren Sammler werden um Aufgabe genügender Referenzen ersucht.

GREEK COINS.
THE ANCIENT COINS OF SICILY.

(*Continued from col. 13940.*)

HIMERA.

HIMERA IN THE FINE ART PERIOD.

The great event of this period which influenced the men of Himera was the invasion of the Athenians 415 B.C., which met with their firm opposition. When Niceas the Athenian appeared before the port with his fleet he was refused admission to the harbour. A little later the citizens willingly received Gylippus who came to assist the Sicilians, and aided him with men so well that his force was chiefly composed of Himeræan troops. From Thucydides (VI, 62) we learn that Niceas sailed on to Segesta, and that it was summer time. The same author (VII, 1) relates that Gylippus persuaded them to furnish arms for such of the seamen as had none, for the ships were drawn up on shore at Himera.

He says the Himeræan heavy and light troops mustered about a thousand men, with a hundred horse.

From Diodorus Siculus (XIII, c. VII) we learn that the ships then drawn up were four triremes.

Only seven years after this the Carthaginian invasion put an end to the prosperity of Himera.

The Carthaginians came to assist the Segestans against the men of Selinus, and immediately after the destruction of that city their leader Hannibal advanced to Himera. The city was not strongly fortified, but the citizens made a desperate resistance and inflicted great loss upon their enemies. They were at first assisted by 4000 men of Syracuse, under Diocles, who, fearing for the safety of his own city, left the Himeræans to their fate. Three thousand citizens were slain in cold blood by the Carthaginians after being taken prisoners, as a sacrifice to Hannibal's grandfather Hamilcar.

Diodorus Siculus tells the story (XIII, 59), explaining the hatred of Hannibal towards the Himeræans who had been the cause of his father's exile, and his grandfather's defeat under Gelon. He says the dead numbered 150,000 and the prisoners nearly as many. Happily many of the women and children escaped with Diocles on board the triremes and were landed at Messina. Diodorus says the city was destroyed two hundred and forty years after its foundation. Hannibal embarked on board his ships and sailed to Carthage.

In another Book Diodorus tells us the site of Himera remained uninhabited until his time (XI, 49), yet at the same time he tells us that when the treaty of peace was made with the Carthaginians, in 405 B.C, the Himeræans as well as the Selinuntines, and Agrigentines were allowed to return to their homes on condition of paying tribute, and promising not to fortify their cities (XIII, 114).

That they did return appears to be a fact from the mention of Himeræans declaring in favour of Dionysius when he began his war with Carthage in 397 B.C., though they were obliged to side with the Carthaginians in the next year (XIX, 47, 56).

Cicero explains the apparent contradiction by telling us that "after the destruction of Himera those citizens who had survived the calamity of the war established themselves at Thermæ within the confines of the same territory, and not far from their old town. They thought they were recovering the fortune and dignity of their fathers when those ornaments of their ancestors were being placed in the town of Thermæ. In Verrem, act. II, lib. II, ed. Ernesti, p. 221, Vol. II.

From this passage it appears that the destruction of the treasures of the citizens was not complete.

Cicero mentions a statue in bronze of the nymph Himera and another of the poet Stesichorus, a citizen of Himera, who died about 560 B.C., aged 80 years, represented as aged and stooping, with the greatest skill; and another of a she-goat. These were restored to Himera by Scipio after his victory over the Carthaginians in 202 B.C.

Another Stesichorus of Himera in 369 B.C. obtained a prize at Athens in the Dithyrambic contests. Diodorus gives another account of the foundation of Himera (XIII, 79); he says the Carthaginians "had chosen some citizens and Libyan volunteers to found in Sicily the town Thermæ situated near to some hot springs". This may have been done to prevent the old city from being refounded and the Himeræans who returned may have regarded themselves as still the same people of Himera. Thermæ was some times called Himera as in 314 when Agathocles made a treaty with the Carthaginians. Himera was to be still subject to Carthage (XIX, 71).

SILVER COINS OF THE FINE ART PERIOD.

TETRADRACHMS.

Normal weight 268 grains.

I. Obv. Nymph standing facing with her head turned to the left, wearing sleeved chiton and peplos, the ends of which fall over the right arm; she holds in her right hand a patera, over an altar with square horns; behind her a small figure of Seilen, facing, bending sideways to receive on his left shoulder a jet of water issuing from a lion's head water spout.

Illustration of a finer Reverse of same type.

Rev. Quadriga to right driven by a charioteer wearing long chiton, holding the reins in both hands; the horses in high action; above, Nike flying to left, holding wreath in her right hand and a tablet inscribed **ΜΑΙ** in her left, in exergue a sea-horse to left.

The inscription of the Artist's name was discovered by Sir A. J. Evans and published in the *Num. Chron.* (1890, p. 292, plate XVIII, fig. 2). The letters **ΜΑΙ** may perhaps represent the name Maeon or Maethion. The prototype for this design was that of the artist Evainetus of Syracuse; confer the notes of L. Forrer, p. 240–241 "Notes sur les signatures de graveurs sur les monnaies grecques", 1905.

OBOLS.

II. Obv. **ΙΜΕΡΑΙΩ Ν.** Head of young Heracles to right, wearing lion's skin : border of dots.

Rev. Pallas standing, facing, wearing chiton with diploïs, aegis, and three-crested helmet; she holds in her raised right hand a spear by the middle, and on her left arm a round shield : border of dots.

LITRA.

III. Obv. **ΚΡΟΝΟΣ.** Bearded head to right.
Rev. **ΙΜΕΡΑΙΩΝ.** Fulmen between two ears of corn.
Imhoof, Berlin Bl. 1869. Tafel 53, 9 : Gabricci IX, 19.
IV. Obv. Wild boar to left.
Rev. Female figure bending near lion's head water spout.
S. Imhoof, Z. Mkde. Tafel VI, 8.

Imhoof has written concerning the Kronos at Himera in the Berlin Bl. 8.13 and also Gabricci 68. 69. Diodorus Siculus witnesses to the cult of Kronos in Sicily saying "Kronos reigned over Sicily, Libya, and also Italy, in fact he extended his empire over all the lands in the West.

He built forts in these lands and confided them to guards, and at the same time fortified all high places. That is why they now call Kronia (Κρόνια) the high places which we see in Sicily and in western lands (Lib. III, c. LXI).

Original from CORNELL UNIVERSITY

Such a Kronion is mentioned by Diodorus as the scene of a battle between the Syracusans and Carthaginians in which the latter were victorious (Lib. XV, c. xvi). The hill near Himera is called S. Caligero, and another hill near Selinus is so called; both are near warm springs of water.

Pelops, the grandson of Zeus, who was called Kronios by Pindar (Ol. III, 41), was represented on an earlier coin of Himera.

Pindar and Pausanias tell us that Pelops restored the Olympian games with greater splendour than they had formerly.

In Ol. IX, 16, Pindar speaks of Olympia " the hill of Kronos ", and of " the jutting headland of Elis, which erst the Lydian hero Pelops selected for himself as a most beautiful dower with Hippodamia." Pausanias (Bk. V., c. 1) relates that Pelops after the death of Œnomaus obtained Pisæa, and added Olympia to his own dominions.

Mr. G. F. Hill says in his work " Coins of Anc. Sic. ", p. 128, " we cannot say whether the Cronium which we know to have existed at Himera was called into being by some special relations with the Cronium at Olympia or whether it existed independently so that it was a mere coincidence that suggested to the Himerians the type of the founder of the Olympian games".

SILVER COINS OF THERMAE HIMERAEAE.

DIDRACHMS.

Normal weight 134 grains.

Obv. **ΘEPMITAN.** Head of Hera to right, wearing earring necklace, and stephanos ornamented with the foreparts of griffins; behind a dolphin with head downwards : border of dots.

Rev. Young Heracles, nude, seated to left on a rock covered with the lion's skin, holding the club downwards in his right hand, his left hand resting on the rock; behind him, a strung bow and quiver with strap : border of dots.

Tetradrachms exist the genuineness of which is suspected.

BRONZE COINS.

Adolf Holm and Imhoof consider the bronze coins bearing a Gorgon's head belong to Himera because some specimens bear the legend **HIMEPA.**

In the British Museum Catalogue these coins are on p. 39 attributed to Camarina and to the period of transition, but in the trays they are among coins of Himera.

I. Size 1.1. Obv. Gorgon's head.
Rev. ⁘ between lines two obelisks.

PENTUNCIA.

II. Size .9. Obv. Gorgon's head.
Rev. ⁘

TRIAS.

III. Size .9. Obv. Gorgon's head.
Rev. ⁘ on triangular incuse,
or with ⁘

Of course those which bear the legend **KAMA** belong to Camarina.

In the B. M. Catalogue the following coins are attributed to the transitional Period, but Adolf Holm places them later.

Size .8. Obv. Naked male figure seated on a he-goat running to right; he holds in his right hand a buccinum aloft, and in his left a caduceus; beneath, a grasshopper to right; plain border.

Rev. **KIM AP ∀** : N. B. the first letter probably shows the pronunciation of the name Himera was a harsh sound.

Nike wearing chiton and peplos, the ends of which fall over her right arm, advancing to left; she holds in her right hand an aplustre to the top of which is attached a wreath, to the bottom a fillet, with

her left hand she raises her dress : in the field to left ⁘ : border of dots.

IV. Size .8. Obv. Similar type, but the rider wears chlamys, beneath, a Corinthian helmet to right : plain border.

Rev. **IMEPA.** Similar type, but no wreath.

TRIAS.

Size .6. Obv. Similar type : beneath •••
Rev. Similar type but aplustre not seen.

HEXAS.

Size .55. Obv. Similar type; beneath, grasshopper : border of dots.
Rev. [HIMER]IOИ. Similar type but aplustre seen; in field to left ⁘
In B. M. Catalogue " Period of Finest Art ".

HEMILITRON.

Size .65. Obv. **IME.** Head of Nymph to left wearing sphendone earring and necklace; in front •••••• placed perpendicularly.
Rev. ⁘ within laurel-wreath.

Size .5. Obv. Head of Nymph three-quarter-face towards left wearing ornamented ampyx and earring. The ampyx was a broad plate or band of metal worn by ladies as a head-dress.

Rev. **IME.** A cray-fish to left; above •••••• This coin is illustrated on p. 70 of A. J. Evans, *Syracusan Medallions*, where he says " There can be no doubt that the head of the nymph on this Himerian *hemilitron* is directly and very literally copied from Kimon's head of Arethusa ".

The importance of this type consists in the evidence it gives of the date of Kimon's work; as Himera was destroyed in 409 B. C. the coin from which it was copied must have thus been issued probably very recently.

(*To be continued.*)

BIOGRAPHICAL NOTICES OF MEDALLISTS
Coin, Gem, and Seal Engravers, Ancient and Modern, with References to their Works.

B.C. 500 — A.D. 1900.

(*Including the names of several hitherto unpublished artists.*)

One-hundred-and-sixty-ninth article.

(*Continued from col. 13955.*)

TREZZO, JACOPO NIZZOLA, better known as **JACOPO DA TREZZO** (*Ital.*). Milanese Sculptor, Gem-engraver and Medallist; born circ. 1515, died at Madrid in 1589. His medals bear dates comprized between 1552 and 1578, but the artist had already won fame before 1550 when his name is mentioned in the first edition of Vasari's work. He first distinguished himself as a Gem-engraver, and belonged to the school of Filippo Negroli, Gasparo and Girolamo Misuroni. Armand's suggestion that he was a pupil of Leone Leoni is now considered as doubtful.

The earliest medal known by the artist is that of the Cremonese military architect Gianello della Torre, who was in the service of Charles V. and Philip II. of Spain from 1550 onwards, † at Toledo 1583; obv. Bust to r.; ℞. VIRTVS. NVNQ. DEFICIT. The Fountain of

Original from CORNELL UNIVERSITY

Learning; 81 mill. (*illustrated*). This medal has also been ascribed to Leone Leoni. "In the vigorously handled life-like portrait", says

Portrait-medal of Jacopo da Trezzo, by Abondio.

Fabriczy, "Trezzo closely approaches the best work of Leoni; the reverse is stylised in the spirit of the antique, and is not wholly uninfluenced by the art of Michael Angelo. It represents the Fountain of Learning, whose streams, springing from an urn on the head of a female figure, are caught and eagerly swallowed by those thirsting for knowledge". 'The medals of Isabella Gonzaga, the wife of Ferrante, and of her daughter Ippolita (1552), wife of the celebrated Papal general Fabrizio Colonna, were also produced in

Gianello della Torre.

Milan'. Isabella Gonzaga, † 1559; obv. Bust to r., signed: **IAC. TREZO**. ℞. CASTE.ET.SUPPLICITER. Vestal Virgin standing to r.; 70 mill. (*illustrated*); — Ippolita Gonzaga, † 1563; obv. Bust to l., signed: **IAC. TREZ.**; ℞. VIRTVTIS.FORMÆQ.PRÆVIA, Aurora in her chariot; signed in minute characters **IA. TREZ.**; 70 mill. Possibly modelled after a design by Leoni.

Isabella Gonzaga.

In 1555 Trezzo went to the Netherlands; his name occurs in the State records from 1555 to 1559. In 1557 he was entrusted with the cutting of a Seal of State and Signet for Philip II. During that period he made five medals of Philip II. and his consort Mary Tudor.

Philip II. of Spain, 1555; obv. Bust to r., signed: **IAC.TREZZO. F.** 1555; ℞. IAM.ILLVSTRABIT.OMNIA. Apollo in quadriga; 70 mill. (*illustrated*); — Mary I. Tudor, of England, † 1558, State of England; obv. Bust to l.; signed: **IAC. TREZ.**; ℞. CECIS.VISVS. TIMIDIS.QVIES. Female figure seated to r. holding palm-branch and with a torch setting fire to arms; 70 mill. (*illustrated*); — Philip II

Philip II. of Spain, 1555.

and Mary, 1555; obverses of the last two medals, with the exception that the King is wearing the collar of the Golden Fleece; signed on obv. **IAC. TREZZO F.** 1555 and on Rℒ. **IAC. TREZ.**; 70 mill.; — Philip II., Satirical medal on the Defeat of the Spanish Armada, 1588. This medal, although bearing the name of the artist, was made in Holland and is not by him. Obv. Bust to r., older, signed:

Mary I. of England.

IAC. TRICI. F.(this form of signature was never used by Trezzo); Rℒ. SIC. ERAT. IN. FATIS. Globe released from bands; 31 mill.

In 1559 Trezzo followed Philip II. to Spain, and took an important part in the decoration of the Escurial. To this later period belong the medals of the English envoy, Anthony Brown, Viscount Montagu (after 1560); obv. Bust to r.; Rℒ. Mars seated facing; 65 mill. (*Numismatic Chronicle*, 1886, pl. VIII), that of Ascanio Padula, 1577; obv. Bust to r., signed: **IAC. TR.**; Rℒ. NON. AB. RE. Apollo standing; 50 mill., and lastly that of Juan de Herrera, architect of the Escurial, 1578; obv. Bust to l., signed: **IAC. TR.** 1578.; Rℒ. DEO. ET. OPT. PRINC. Architecture seated to left; 50 mill. 'In their make and style', remarks Fabriczy, "these pieces are similar to the medal of Philip, and are far from attaining the effect and the artistic value of his earlier creations".

Philip and Mary, 1555.

As a gem-engraver, Trezzo stood in very high esteem. The Archives at Florence preserve a number of letters addressed by the artist to the Grand Duke, relating to acquisitions of gems, the restoration of antique marbles, and various works in commission or already executed. In 1552 he wrote from Milan for the payment of 850 scudi, which he said had been owed to him a long time for a crystal vase. Further letters dated from Madrid in 1572 and 1575 refer to a medal (sestertius?) of Otho with Rℒ. SALVS AVGVSTVS, and two reliquaries set in precious stones, which he had mounted for the King of Spain.

Amongst his most famous gems are the beautiful Portraits of Philip II. and his son Don Carlos, cut on a fine Oriental topaz, a cameo in the Imperial Collection at Vienna representing Charles V., Isabella and their son Philip, a Tabernaculum in precious stones executed for an altar piece of the chapel of the Escurial Palace, and numerous cameos, intaglios, cups and other jewels in jasper and onyx. Clemente Birago was da Trezzo's colleague artist at the court of Philip II., who patronized them to a great extent.

Baldinucci in 'Vita di Bernardino Campi' praises Trezzo as an excellent die-engraver and founder in metal. This testimony is amply justified by the medals which he modelled with exquisite taste and delicacy in details.

Domanig (*Porträtmedaillen des Erzhauses Oesterreich*, 1896) gives to Jacopo da Trezzo an oval medal of Philip II. (n° 47), which is more likely by Poggini, a Medal of Joan of Austria, daughter of

Charles V., and another, small, of Mary of Austria. None of these however seem to be by that artist.

In the Lanna Sale (Berlin, May 1911) a specimen of the medal of Gianello della Torre brought 800 Marks. The other specimens of this artist's work in the sale were not of the highest quality, and fetched relatively low prices.

TRIANGEL, BARTHEL (*Germ.*). Mint-master at Neuburg a. Inn, 1664-1666.

TRICARD, LOUIS VICTOR (*French*). Contemporary Sculptor and Medallist, born at Paris. Pupil of Bonnassieux, Gauthier, and Ponscarme. He has exhibited at the Paris 'Salon des Artistes français' since 1892 numerous Portrait-medallions, Plaquettes, and Medals, some representing religious subjects, etc.

TRIEPPI, GIACOMO (*Ital.*). Mint-master at Milan, 10. September 1712 to 18. January 1719. He succeeded in the office his brother Giuseppe.

TRIEPPI, GIUSEPPE (*Ital.*). Mint-master at Milan, 22. December 1710 to 10. September 1712.

TRIER, ANTHONIS VAN (*Dutch*). Mint-engraver (tailleur des coingz et fers) at Campen appointed in 1529, under Margaret of Austria. The Mint of Campen was opened on 22. June 1529, and between that date and 7. September 1538 the following currency was issued there : Gold Half Reals and Carolus; Silver Reals, Half Reals and Double Flemish Gros; Billon Duits (= 6 Flemish mites) and Deniers of 3 mites (Hollantsche Penninckskens).

BIBLIOGRAPHY. — Pinchart, *Biographies des graveurs belges*, Revue num. belge, 1854, p. 112.

TRIFONOFF, A. (*Russ.*). Mint-master at Tiflis, 1812-1832, under Alexander I. and Nicholas I. of Russia. He struck the well-known Georgian currency of Tahegans.

TRINDER, JOHN (*Brit.*). Master of the Mint, London, anno IV of James II., 1690.

TRINQUET, GORDIEN (*French*). Contemporary Sculptor, born at Luchon (Hte-Garonne); pupil of Maurette, Ponsin, and Andaraly.

At the Paris Salon 1897 he exhibited a Portrait-medallion of Mme Trinquet.

TRINKLER, ULRICH (*Swiss*). Goldsmith, Wood carver, and Engraver at Zurich, during the first half of the sixteenth century; said to have been Mint-master there, *circ.* 1550.

TRINKS, W. (*Austr.*). Contemporary coin-dealer of Vienna, who has edited a number of medals, one of these, with portrait of Dr Jellinek, 1894, in conjunction with the firm of D. Kallai.

TRIQUEL, JEHAN (*French*). Mint-master at Angers, *circ.* 1396.

TRODOUX, HENRI EMILE ADRIEN (*French*). Sculptor and Medallist, born at St. Petersburg, of French parents; pupil of his father, and the St. Petersburg School of Fine Arts. He is the author of a number of Portrait-medallions, some of which were exhibited at the Paris Salon : 1874. M. B. V***; — 1875. M. V. B***; — 1877. Mme A. L'H***, etc.

TROETWINUS (*Austr.*). Moneyer at Vienna, 1295-1305.

TROJANOWSKI, WINCENTY (*Polish*). Sculptor, Medallist and Painter, born at Warsaw, in Poland, on 22. January 1859. Pupil of the School of Fine Arts of Warsaw, and later of the Academies of Fine Arts of St. Petersburg and Munich. He first practised painting, and produced over a hundred religious pictures, portraits, scenery, interiors, etc., and later devoted himself more especially to sculpture and statuary. He went to France in 1893. He was awarded a Bronze Medal at the Universal Exhibition, Paris, 1900. The French Government appointed him Officier d'Académie.

From 1894 the artist sent to the annual exhibitions of the Salon des Artistes français almost every year : 1894. Bust of Dervish; — 1895. Portrait-plaquettes of Seweryna Duchinska, Polish poetess; — Kossuth; — 1896. Ten Portrait-medallions and Plaquettes (Mention honorable); — 1897. Twelve Medallions and Plaquettes in silver and bronze plated, amongst which portraits of Matejko, Chopin, Liszt, Wagner, Paul Verlaine; — 1898. Nineteen Medals and Plaquettes in gold, silver and bronze : Felix Faure (in commission for Mme Félix Faure), Dante, Shakespeare, Berlioz, Paderewski; — 1899. Nine Medallions and Plaquettes in silver, bronze, copper, and gilt bronze : La Parisienne, Romeo and Juliet, Jesus Christ, Joan of Arc, Mary Magdalen; — 1900. Thirty-nine Medallions and Plaquettes in gold, silver and bronze : H. H. Princess Radziwill,

Gœthe (150th Anniversary of his birth), Arlam Mickiewicz, Peter Plauszewski, Delilah, Regina cœli, Ecce homo, Holy Communion, and Portrait Medallion of Jean Matejko, painter of Polish history; — 1901. Portrait-medal of Henryk Sienkiewicz; — Portrait-medallion of H. I. H. Prince Victor Napoleon (belongs to His Imperial Highness); — 500th Anniversary of the University of Cracow; — Copernicus; — Four types of Polish mountain-peasants; — 1902. Fourteen medals and Portrait-plaquettes; — 1903. Sigismund I. of Poland receiving hommage from his vassal Albrecht of Brandenburg; — Portrait-medals of Copernicus, Mickiewicz, Slovacki, Krasinski, and Chopin.

In 1904, M. Trojanowski returned to Warsaw, wherefrom he sent in 1910 the following exhibit to the Brussels "Salon de la Médaille": Quo Vadis? (Rx. of the Sienkiewicz medal); — F. Liszt; — University of Cracow; — Richard Wagner; — Witold and Paula; — Goethe; — Peter Plauszewski; — Félix Faure, 1898; — Thaïs (small gilt plaquette); — Salambo; — Romeo; — Juliet; — Portrait of young Woman; — Masonic Insignia; — Delilah (small gilt plaquette); — Princess Cécile Sigismond Radziwill, 1900; — The artist's sister-in-law, 1898; — Adam Mickiewicz, 1900; — Henryk Sienkiewicz; — H. Berlioz; — Prince Victor Napoleon; — F. Chopin; — Witold Stanislas Trojanowski; — Jan Matejko Malarz; — Medal of the University of Cracow; — St. Mary Magde-

lene; — I. J. Paderewski; — The artist, his wife and son; — Dante Alighieri; — The Genius of Painting, large cast medal.

Portrait-medallion of Hector Berlioz.

M. Trojanowski is also the author of a bust 'Derviche du Beloutschistan', executed from life in the East; — Portrait-medallion of Kosciuszko, the Polish hero, Plaquette to commemorate the Centenary of the Polish Revolution under Kosciuszko; — Large Urn in bronze containing the heart of Kosciuszko, in the Polish National Museum at Rapperschwyl, Switzerland; — Portrait-medallion of Chopin, presented to the City of Paris, for a commemorative Plaque of the famous musician on the Place Vendôme; — Portrait-medallion of Kossuth, the Hungarian hero; — Medal on the 5th centenary of the Foundation of Cracow University (specimens offered by the University to Francis Joseph, Emperor of Austria, and to Pope Leo XIII.); — Bust of Wagner; — Various silver Vases; — Large Portrait-medallion for the tombstone of Dr Jasiewicz; — Statue of Pax; — Plaquette of Notre-Dame des Colonies; — Plaquette of Notre-Dame de France; — Medallion of Christ dying, for the tombstone of Dr Szwykowski, etc. and numerous Portrait-medallions, medals, and plaquettes of private persons; many of which have proved very successful works, well commented on by the public press.

Specimens of M. Trojanowski's works are on exhibit at the Luxembourg Museum, Paris; Victoria and Albert Museum, South Kensington; Royal Museum, Berlin; Royal Museum, The Hague; Royal Museum, Brussels.

TROMSCHITZ, SAMUEL. *Vide* **TOMSCHÜTZ.** Mint-warden at Frankfort-on-M., 1825-1841, when he was appointed Mint-master.

TRONCEO, or **TRONO, GUGLIELMO** (*Ital.*). Administrator of the Papal Zecca at Rome, 1578-1598. He issued currency of Clement VIII. signed **G. T.**, also **G. ⊥ T**, or ⊕, *viz.* Scudi d'oro, Æ Testone, Double Giulios, etc. in great variety. Tronceo was a native of Pisa.

TRONO, PRIAMO (*Ital.*). Venetian administrator at Cattaro, 1488-1489. He issued currency bearing his initials.

TRONO, VINCENZO (*Ital.*). Venetian administrator at Cattano, 1517-1520. His initials occur on coins minted under his governorship.

TROSELIUS, C. (*Med.*). Goldsmith of Stockholm, *circ.* 1850-1875. His full signature occurs on obv. and ℞ of a Portrait-medal of Charles XIV. and Queen with Crown Prince Oscar; also on a uniface Portrait-medal of Charles XIV. and on another with conjoined busts of King Oscar I. and Queen Josephina. Cf. Hildebrand, *Sveriges och Svenska Konungahusets Minnespenningar*, II, pp. 380, 382, 440.

TROTAULT, or **TOINTAULT, JEAN** (*French*). Mint-engraver at Bordeaux, 1519-1524, was accused in 1524 of making false money and imprisoned.

TROTIN, CHARLES (*French*). Contemporary Medallist and Die-sinker, born in 1833 and residing at Paris. He was apprenticed at Falconnet's works, and founded in 1858 the firm which he still directs in conjunction with his son, Paul Trotin. Between 1875 and 1883 he regularly exhibited at the Salon des Artistes français: 1875. Religion and Science; — 1877. Portrait-medal of Adolphe Thiers; — Jeton of the 'Argyrine' Company; — Military Medal of Prince Couza; — 1878. Portraits of Alfonso XII. of Spain and Queen Mercedes; — Narcisse de Caumont, after Leharivel-Durocher (dies belonging to M. Bescher for whom Trotin worked for several years); — 1879. The Terms of Luxeuil, medal of award of the Municipal Council of Luxeuil; — 1880. Head of the Republic; — Head of Minerva; — 1883. Thomas de Luxeuil; — Head of the Republic; — 1898. Communion; — Sauveteurs décorés de Saône-et-Loire.

About 1860, Trotin engraved for the Persian government, unsigned Trial-pieces of 20, 10, and 5 Francs in gold, 2 and 1 Francs, 50 and 25 Centimes in silver, 10 and 5 Centimes in copper. By him are also the Havre Exhibition medal 1868; — Jeton of the Gomen-Ouaco nickel mines in New Caledonia, signed: **C. T.**; — Erection of a Monument to H. B. de Saussure at Chamonix, 1887; — Ambulance de l'Eglise de Rosny (Paris), 1870; signed **F. T.**; — Defence of Paris, Les marins de la gloire et de la dévastation ont repoussés (*sic*) les Prussiens avec une grosse locomotive blindée le 2 décembre 1870; signed: **F. T.**

Bibliography. — Chavignerie et Auvray, *op. cit.* — J. Florange, *Jetons et Médailles de Mines françaises*, 1904.

TROTTER, JOHN (*Brit.*). Mint-master at Calcutta, from 28. February 1825 to 7. April 1826.

TROUCHOV (*Canad.*). Die-sinker at Ottawa, *circ.* 1847. His signature is found on a medal of that date commemorating the Foundation of University College, Ottawa (Leroux, *Le Médaillier du Canada*, p. 296).

TROUTTET, Mlle LOUISE (*French*). Contemporary Sculptor, born at Puteaux (Paris). At the 'Salon des Artistes français' this artist exhibited a fine Portrait-medallion of Mlle E. Breuiller.

TRUCHSESS, MEISTER DES KARDINAL (*Germ.*). An unknown Medallist of the second quarter of the sixteenth century, so-called after his medal of Bishop Otto Truchsess of Augsburg, 1543. By him, or in his style, is also a Portrait-medal of King Christian III. of Denmark, 1545, and others described in *Danske Medailler og Mynter*, Pl. VI, 4, VIII, 1-3, 6, and Revue belge 1872, Pl. D, no 19.

TRUE, BENJAMIN C. and **DANIEL** (*Amer.*). There were two die-cutters in Troy named True, — Benjamin C. and Daniel; judging by the appearance of their names in the Directories, the first was the elder, but whether relatives or not, I have not found. Benjamin C. was a "letter cutter," having a shop at 7 Beaver Street, and residence at 134 Lydius Street, as early as 1832; in 1834 he is called a gunsmith, and in 1835 a die-cutter, at 7 Beaver Street, "up-stairs"; in 1840 he added to his business as a die-cutter that of a "military store keeper," — perhaps making military buttons — and his store was 88 North Market Street, if the notes furnished me are correct. In 1842-4 he was in business with J. Roseboom & Co., on Church and Division Streets, but I have not been able to trace him further. Daniel True was a die-cutter at 48 Union Street as early as 1837, and continues to do business as such at various locations, in time adding that of seal engraving, until 1856, when he seems to have been the senior partner in the firm of True & Pilkington, and his address was "Bleecker Hall;" in 1858 he was at the same location, alone; in 1868, the same name, — presumably the same person — appears as a die-cutter and steel engraver, on Hudson Street, and afterwards at 396 Broadway until 1879. The work of this engraver

(whether Benjamin or Daniel is uncertain), as shown on the tokens, is not of a very high order.

A number of Tokens signed **T** are described in *American Journal of Numismatics*, 1899, p. 119. The above notes are extracted from this paper.

TRUFFIER, ADOLPHE (*French*). Contemporary Sculptor, born and residing in Paris. At the 'Salon des Artistes français' 1909 he exhibited two Plaquettes : Trianon, and Entente cordiale.

TRÜMMER, JOHANN-OTTO (*Germ.*). Mint-master at Frankfort-on-M., 1762-1764. He signed currency with **O. T.**, and also **I. O. T.** Cf. Joseph u. Fellner, *Die Münzen von Frankfurt-am-Mein*, p. 351.

TRYLNER, HANUSZ (*Polish*). Die-cutter at the Mint of Wilna, 1621. His initials **H. T.** occur amongst others on a Portrait-badge of Christoph II., Prince Radziwill, 1626. (Cf. Merzbacher *Kunst-Medaillen-Katalog*, 1900, lot 437; *Chelminski Sale Catalogue*, lot 1871; Czapski 4005).

TRYPHON (*Greck*). The signature **ΤΡΥΦΩΝ ΕΠΟΙΕΙ** occurs on a cameo of the former Marlborough Collection, representing the Marriage of Eros and Psyche : the latter holding a dove, is conducted

Eros and Psyche.

towards the nuptial couch by two Cupids and Hymen bearing a torch. The figures flesh colour, on a black ground of sardonyx. The gem once belonged to the famous forger Pietro Ligorio. Babelon praises the work, but doubts the genuineness of the inscription.

"Die Arbeit," says Furtwängler, "ist ganz vortrefflich, virtuos und doch lebendig, frisch und ohne zu glatte Eleganz. Story-Maskelyne sagt im Katalog der Marlborough'schen Sammlung von diesem Cameo "in point of technique it has never been surpassed in any age". Eine Entstehung im 16. Jahrhundert ist, wie Stephani mit Recht a. a. O. bemerkt, ganz ausgeschlossen, da der Stil durchaus antik und in der Renaissance gar nicht denkbar ist.

"Im Felde oben steht die Signatur des Künstlers in zwei Zeilen, etwas anspruchsvoller als sonst, da sie einem so ausgezeichneten Schaustücke gilt $\frac{\text{ΤΡΥΦΩΝ}}{\text{ΕΠΟΙΕΙ}}$. Die Buchstaben sind auf dem mir vorliegenden Cades' schen Abdrucke sehr schön, tief, fest und sicher eingegraben; an den Enden der Kasten befinden sich die üblichen kleinen Kugeln. Die Inschrift ist ebenso zweifellos ächt wie das Bild, und nichts kann verkehrter sein als wenn Stephani behauptet, die Buchstaben trügen den Charakter von Ligorio's Zeit, da die Inschriften des 16. Jahrhunderts auf Gemmen vielmehr total verschieden sind." (*Jahrbuch des Kais. deutschen Archäologischen Instituts*, Bd. IV, p. 59).

A copy of the same subject, but of inferior work exists at Naples.

The Anthologia mentions a Gem-engraver of the name of Tryphon, who had engraved on a beryl the figure of the Nereid Galene.

Other gems bear this signature, but they are not antique : Cupid riding a lion : sard (The Hague); — Triumphal procession, jasper (Raspe); — Combat of Aeneas and Diomed : sard (Caylus).

A sard in the British Museum, from the Castellani Collection, signed **ΤΡΥΦΩΝΑ** shows Isis standing (Murray, *Cat. Gems*, 1221).

In the Poniatowsky Collection was an oriental sardonyx with Nessus giving the poisoned tunic to Dejanira.

The age of Tryphon says King, is fixed by the epigram of Addeus, a court-poet of the Ptolemies (*Anthol.*, IX, 544).

Bibliography. — Furtwängler, *Antike Gemmen*. — Ibid., *Künstlerinschriften* &c. — Murray, *Catalogue of Gems*. — Babelon, *Pierres gravées*. — King, *op. cit.* — Reinach, *op. cit.* — Raspe, *Tassie Gems*, 1791. — *Marlborough Gems*, I, Pl. L.

T. S., also **T. ST. F.** *Vide* **THEODOR STOCKMAR** at Dusseldorf, 1805-1818.

T. S. *Vide* **TERENZ SCHMIDT.** Mint-master at Cassel, 1621-1634.

T. S. *Vide* **THOMAS SIMON.** Die-engraver and Medallist in London, 1649-† 1665.

T. S. I. F. These initials occur on Maria Theresia Thalers of 1780.

TSCHADOFF, ALEXEI (*Russ.*). Mint-master at St. Petersburg, 1843. He signed : А.Ч.

TSCHAENDIK, NIKLAS (*Austr.*). 'Hofpfenningmeister', *circ.* 1589-1603.

TSCHERNISCHEF, JACOB (*Russ.*). Mint-master at St. Petersburg, 1770-1776. He signed : Я.Ч.

TSCHETREUS, FEODOR (*Russ.*). Mint-master at St. Petersburg, 1797-1801. He signed : Ф.Ч.

TSCHORR, ANDREAS (*Germ.*). A Burgher of Breslau, who in conjunction with Andreas Steinbrecher contracted to work the city mint, 1625. His privy-mark is a Lion in the shield of arms and on the helmet. On Gröschl of Breslau 1625 his initials **AT** occur.

TSCHUKMASSOFF, J. (*Russ.*). Mint-engraver at St. Petersburg, *circ.* 1860, and Medallist there. By him is a Prize Medal of the St. Petersburg Academy of Sciences, with bust of Dr Carl Ernst von Baer, the embryologist (*In Boston Collection*), and a Memorial medal of the Czarina Alexandra Feodorowna, 1860 (signed : РЪЗ. ЧУКМАСОВЪ.).

TSENG CHI TSE (*Chinese*) 1837-1890. Eldest son of Tsêng Kuo-fan; appointed Envoy to England and France 1878, Ambassador to Russia 1880; filled numerous official posts, and in 1887 was Vice-President of the Board of Revenue, with special control over the Coinage department, and died in 1890.

Bibliography. — Herbert A. Giles, *Chinese Biographical Dictionary*.

T. T. *Vide* **THOMAS TYMPF.** Mint-master at Bromberg, under John Casimir of Poland, 1655-68.

T. V. These initials occur on on a Portrait-medal of Franz Kram, of Sagan, advocate at Leipzig, † 1568. *Cf.* Friedensburg u. Seger, *Medaillen auf schlesische Personen*, n° 3840.

TUAL, ERNEST (*French*). Contemporary Sculptor, born at Nantes, pupil of Mathurin-Moreau and Gossin. At the Salon 1890 he exhibited a Portrait-medallion of M. Blondat.

TVB. *Vide* **THEODORE VAN BERCKEL.** Belgian Medallist, 1739-† 1808.

TUBERT, PAUL (*French*). Die-engraver at the Mint of Montpellier, 1730-32; he was succeeded by Jean André Brondes.

TUCHMANN, AUGUST (*Germ.*). Mint-warden at Oppeln, appointed on Nov. 2, 1624. He had previously been serving in the Imperial mints of Breslau and Sagan.

TUCHMANN, CHRISTOPH (*Germ.*). Administrator of the Mint at Reichenstein (Silesia), *circ.* 1593.

TUCHMANN, HANS (I) (*Germ.*). Mint-master at Teschen, *circ.* 1608-1611. His initials **H T** occur on currency of Frederick Casimir, Double Thaler 1608, AV 8 and 5 Ducats, AR Treble Thaler Klippe, Double Thaler, Thaler, Klippe Thaler, Billon 3 Kreutzer, and Dreier of 1609, 3 Kreutzer and Dreier 1610 and 1611.

TUCHMANN, HANS (II). (*Germ.*) Mint-master and Warden at Oels, 1614-22, Bernstadt 1611, Breslau, 1623, Zweibrücken and Meisenheim, 1623-24. In 1624 he farmed the Oppeln mint. Exter II 57 (*note*) mentions a **CHRISTMANN TUCHER** or **DUCNER**, cf. Friedensburg, XVIII, 25. Kull remarks : Hans Tuchmann's change of residence from Oels to Zweibrücken after the defeat of Frederick V. at Prague is accounted for by the fact that Count Palatine John II. of Zweibrücken was brother-in-law and former tutor of Frederick V. There is a Portrait-jeton of Tuchmann with **H. T** on either side of bust.

Original from CORNELL UNIVERSITY

His initials **H. T.** or in monogram occur on the following currency: Breslau. Ferdinand II., February to July 1623: Vierundzwanziger 1623; as Warden in conjunction with Balthasar Zwirner, Vierundzwanziger 1623, and 3 Kreutzer 1624. — Oels. Charles II., 1614. 3 Kreutzer; 1615. *AV* 6, 5, 4, 2 and 1 Ducats, *AR* Thaler, and 3 Kreutzer; 1616. *AV*. 6. 5, 1 and ½ Ducats, *AR* Thaler, and 3 Kreutzer. — Henry Wenceslaus and Charles Frederick, 1620; 3 Kreutzer; 1621. *AV* 4, and 3 Ducats, *AR* Achtundvierziger, Vierundzwanziger, 3 Kreutzer; 1622. *AV* 3 Ducats, *AR* Vierundzwanziger, and 3 Kreutzer, etc.

It is not absolutely certain that the two Hans Tuchmann were distinct persons. The Breslau Hans Tuchmann describes himself as "der Jüngere", and it is therefore possible that the Teschen Mintmaster was "der Aeltere". A certain "Hans Münzmeister", who was previously a baker, and suffered capital punishment in 1611 for counterfeiting may be the Hans Tuchmann who coined at Teschen from 1608 to 1611.

Bibliography. — F. Friedensburg, *Schlesiens neuere Münzgeschichte*, Breslau, 1899. — Friedensburg u. Seger, *Schlesiens Münzen und Medaillen der neueren Zeit*, Breslau, 1901.

TUFFET, HENRI (*French*). Ivory-carver, born at Lyons; pupil of Moreau-Vauthier. He exhibited at the Paris Salon in 1879, A sixteenth century Woman, portrait in ivory; — 1882. Portrait-medallion of M^me^ P. M***.

TUILERIE, JEHAN DE LA (*French*). Mint-master at Angers, 1398.

TUNCKHEL, MERT (*Austr.*). Moneyer at Vienna, 1446; died on 8. May of that year.

TUNKL VON BRNICKO, HEINRICH (*Bohem.*). Mint-master general in Bohemia, 1513-14; a second time, 1514-15, a third time, 1518, a fourth time, 1521-22, and a fifth time, 1525-27. His arms appear on the currency of Wadislaus II., Ludwig II., and Emperor Ferdinand I.

TUNKHER, PETER (*Bohem.*). Mint-warden to the Counts of Schlick at Joachimsthal, *circ.* 1528-44; privy-mark, a Moor's head. Cf. E. Fiala, *Das Münzwesen der Grafen Schlick*, Wiener Num. Zeits., 1890, pp. 204-9.

TURBA, MARTIN (*Austr.*). Warden of the Spanish Mint at Vienna, 1621; later Mint-master at Pölten, 1624; died in April 1626. Privy-mark, a full-blown rose. Kipperthaler of the Spanish Mint at Vienna, dated 1622 and 1623 bear his distinctive sign.

TÜRBITZ, ANDREAS (*Germ.*). Mint-official at Oels (Silesia), 1704, 1706. His initials appears in currency.

TURGOT, LOUIS (*French*). Administrator-general of the coinage, 1627.

TURINI, GIOVANNI (*Ital.*). Sculptor and Founder of the fifteenth century, born about 1384; son of the Sienese goldsmith, Turino di Sano di Tura of Vignano. In 1414 and 1416 Giovanni was already employed on the Dome of Siena, with his father, and Ambrogio di Andrea. A little later he carved wooden statues intended to decorate a fountain at Siena, and a silver gilt helmet for an officer of the Republic. But his most important works are connected with the font of the Baptistry of Siena, to which Lorenzo Ghiberti, Giacomo della Quercia, and Donatello also collaborated. His bas-reliefs representing the Birth of St. John and his preaching in the desert are world renowned.

Basing his attribution on the general style of the work, Courajod ascribed to this artist a bronze Plaque, enamelled, representing the Risen Christ, in the Belvedere Museum, Vienna (formerly Ambras Collection); 363 × 249 mill. (Molinier, *Les Plaquettes*, I, p. 48).

TÜRK, JOACHIM (*Austr.*). 'Hofpfenningmeister', 1581.

TURNEMIRE, WILLIAM DE (*Brit.*). A native of Marseilles. Mint-master to Edward I., appointed in his 8th year, "to make his coins for that present time", in London, where he was to have as many furnaces as he could employ; in Canterbury, where he should cause to be worked and maintained eight furnaces, besides the three belonging to the Archbishop; in Bristol and York, twelve furnaces each. In every one of the three latter places he was to have under him a master to take charge of the mint, and all things thereunto appertaining. He was to bear, at his own cost, the expenses and charges of his servants; that is to say, of the aforesaid master of the mint, of the keeper of the bullion, of the assistant in the melting house, and all other persons by him employed; so that he should discharge all burthens and expenses in the aforesaid four places, and deliver the money to the King, purified by fire, blanched, and prepared at his own cost. The King was to give to him for every pound of sterlings, sevenpence: that is to say, threepence and one farthing for wages to the moneyers, for striking and working the money; one penny farthing for the loss of silver in the fire; and one penny halfpenny for adjusting the coins in every pound of money. So that, for sizing of the coins, and for the loss by the fire, there should be allowed to him, in every pound, eleven farthings, as is aforesaid. One penny, in every pound, was allowed to the said master of his wages and expenses, and for those of the other masters under him, and for all his servants, as well in meat and drink as in their liveries and other things, and for charcoal, for the repairing of dies, for meltings, and other charges about the money.

"It was also agreed that the King should provide for the said master, in every of the aforesaid four places, houses convenient for his working, and take upon himself the payment of the fee which the Lord Hugh Fitz Otho, guardian of Otho, his nephew, claimed for keeping the dies, or otherwise to satisfy the same Hugh for that fee.

"The utensils which the King had in his houses in London were to be delivered to the aforesaid master, in the state they then were; and he was bound to restore them, at the end of the year, or when he should quit his office, in the state they the should be.

"It was also agreed with the said Master William, that he should make a great sterling, to be of value of four lesser sterlings throughout England, at the same rate, and on the same condition, that he should make the aforesaid smaller sterling; with this further provision, that, as the said great penny would be more easily made than the common sterling, whatever advantage might accrue should be yielded by him to the King's profit.

"It was further agreed that he should make farthings throughout England (which at that time were round, and were called Lundrenses) in such manner as that the king should have of every pound the same profit as he received from common sterlings; that is to say, twelve sterlings.

"And it was ordained that every pound should contain twenty-four londrenses, and three shillings for the assay beyond the number appointed for sterlings, on account on the great expenses which must be incurred in making the said small money. And it was estimated that in every pound of that small money there should be allowed to be master ten-pence-halfpenny for the making, and all charge in working the said pound; and then should remain to the king twelve pence, at the least, for his profit out of every pound.

"The said master was to begin to work on the morrow of the Circumcision, in the year above-mentioned, according to the form inrolled in the Exchequer upon all the coins before recited.

"The dies of this new money were delivered to Gregory de Rokesley, mayor of London, and Rolandine de Podio, the keepers of the mint, on the 17th of May, A.D. 1279, who took an oath before the barons of the exchequer for the due performance of their Office.

"The peculiarities of this coinage, and also the severe punishment which Edward inflicted upon the debasers of his money, are related in various chronicles. Langtoft says,

> Now turnes Eduard ageyn to London his cite,
> & wille wite certeyn who schent has his mone.
> Of clippers, of roungers, of suilk takes he questis.
> Olde used traitoures ilk at other hand kestis.
> Ilk these other out said, ilk a schrewe other greues,
> Of fele wer handes laid, & hanged ther as theues,
> Eduard did smyte rounde peny, halfpenny, ferthyng,
> the croice passed the bounde of all thorghout the ryng.
> the kynges side salle be the hede & his name writen.

(Ruding. *Annals of the Coinage*, I, p. 193.)

"In the year 1285, William de Turnemire, the king's moneyer, was sent into Gascony to be master of the mint there, that the money might be better made" (*loc. cit.*, p. 197).

Great Sterling or Groat of Edward I.

TÜRPE, PAUL (*Germ.*). Contemporary Sculptor of Berlin; whose signature appears on medals issued by the Oertel private mint on the 90th Anniversary of Moltke, 1890, and on his Death, 1891, also on a Portrait-medal of Prof. Dr R. Koch, of Berlin.

TURNERELLI, PETER (*Brit.*). Sculptor and Modeller to H.R.H. the Princess of Wales, 1774-1839. His bust of Princess Charlotte was used as a model by T. Wyon for his Memorial medal of the Princess, 1817. Both signatures : **P. TURNERELLI DES T. WYON F.** occur on the obv.

He was a grandson of an Italian refugee; gained medal at Royal Academy; instructor to princesses, 1797-1801; executed busts, including those of Wellington, Blücher, George III., O'Connell, Princess Charlotte, and Prince Leopold, and Memorials, including that of Burns at Dumfries; represented sitters in ordinary costume (Sydney Lee, *Dict. Nat. Biog.*, LVII, 365).

TURNPENNY (*Brit.*). Die-sinker of the early part of the nineteenth century. He engraved the dies for the following tokens : Nottingham Penny Token, 1813, issued by G. W. Baker; — Staffordshire County Penny Token, 1811; — Bilston Penny Token, 1812, of Edw. Beebee; — Bilston Penny Token, 1811, with bust of George III and Royal Exchange on Rℒ.; Burton Penny Token, 1814; — Walsall Penny Tokens, 1811 (several varieties); — Walsall Halfpenny Token, 1811; — Swansea Penny Token, 1813, of the Nantrhydnyvilas Air Furn Face C°; — Jersey, Guernsey and Alderney Penny Token, undated and 1814 (Obv. from Turnpenny's die of a Burton token; Rℒ. by Halliday; — Non Local Halfpenny Token, 1815, with busts of Wellington and Blücher (described as 'of fine workmanship').

BIBLIOGRAPHY. — Davis, *Nineteenth Century Token Coinage*, 1904. — *Chetwynd Catalogue*, n° 198.

TURPIN, CLAUDE (*French*). Engraver, mentioned in 1590.

TURPIN, ERNEST ÉLIE (*French*). Medallist and Gem-engraver, of the second half of the nineteenth century; he was born at Audeville (Oise) and resided in Paris. He exhibited at the Salon in 1874 Portraits of Rubens, and Pierre Corneille, carved in mother-of-pearl. In 1883 he showed a portrait-medal of M. T***.

TURPIN, MATHURIN (*French*). Mint-master at Angers, 1566.

TURPIN, PIERRE (*French*). Mint-master at Angers, 1534-49; privy-mark, fir-cone.

TURPIN, PIERRE (*French*). 1595-1630. Seal-engraver to H.M. the King of France from 1599 to 1626. He engraved the Seals of chancery of Auxerre, Chaumont, and Rheims. On 2 July 1606 he was directed by letters patent to make "coings et marteaux pour marquer cuirs, etc." in the room of the late Philippe Danfrie. Nicholas Briot, engraver general of the coins, opposed the appointment, but the State Council maintained Turpin in his office, 30. May 1670. Pierre Turpin was in 1613 Engraver at the Paris "Monnaie du moulin". He also engraved Jetons for Marie de' Medici, 1601, and for the Council of Navarre, 1613. Cf. also Mazerolle, *Les Médailleurs français*, I, CLXVIII.

A document, mentioned by M. Blanchet proves that Turpin was Engraver at the Mint in 1630 : "Au sieur Turpin, graveur de la moline de Paris, la somme de soixante-douze livres tournois, etc." (Blanchet, *Les Graveurs en Béarn*, 1888).

TURQUAN, THOMAS (*French*). Général des Monnaies, 1559-1560.

TUSCHER, MARCUS (*Germ.*). Gem-engraver of the first half of the eighteenth century. He was a native of Nuremberg, and worked in succession at Rome, in England, and in Denmark. Some of his gems are signed in Greek letters **ΜΑΡΚΟC.**

King states that "being at Rome in 1733, the artist engraved his own portrait, signed **ΜΑΡΚΟΣ** both in sard and beryl, and probably some other gems, including a reduced copy of Aspasius's Minerva, but that he is chiefly known for his admirable series of plates of the coins of Sicily and Magna Graecia."

"Tuscher is related by his friend Gori to have learned the art by watching Natter at work. Natter himself asserts that the above-mentioned gems are no more than *pastes*, made from a wax model, and retouched by Ghingi the engraver. Tuscher collected antiques, as is proved by a fine Greek intaglio of Mars, formerly in King's possession, on the back of which Tuscher's name is scratched in with the diamond point" (King, *Antique Gems and Rings*, 1872, p. 437).

BIBLIOGRAPHY. — Mariette, *op. cit.* — Babelon, *Pierres gravées*. — King, *Antique Gems*, 1860. — Raspe, *Tassie Gems*, 1791.

TÜTSCH, ALEXIUS (*Swiss*). Mint-master at Bellinzona, 1550.

TUUK, EDEMA VAN DER (*Dutch*). Contemporary Sculptor, by whom is a Portrait-medal of Eugen Gugel, 1902, at the Hague Museum. Roger Marx illustrates in *Médailleurs modernes en France et à l'étranger*, 1900, a medal by this artist, representing a charge of cavalry (Pl. XXXI).

T. W. *Vide* **TOBIAS WOLF.** Goldsmith and Medallist of the early part of the seventeenth century. The father, of the same name, who also practised the art of die-sinking, died about 1600.

T. W. (*Brit?*). Initials of an Engraver, which occur on a medal of William and Mary, 1690, commemorating the Suppression of the Rebellion in Ireland : Obv. Busts conjoined to r.; Rℒ. PACEM. ARROGAT. ARMIS. William III. on horseback to r. A specimen of this rare medal was lately in the collection of Messr. Spink of Piccadilly.

T. W J. K. S. (*Amer.*). These initials occur on a Portrait-medal of Washington, dated 1783 (Snowden, *Washington Medals*, p. 39, n° 44).

TWEDY, or **TWEDDY, HENRY** (*Brit.*). Warden of the London Mint, 23rd year of James I., Mint-master in conjunction with Sir Edward Villiers, 22nd year.

TWEED, JOHN (*Brit.*). Contemporary Sculptor and Medallist, residing in London. He was one of the members of the London Society of Medallists which was formed in the nineties, but did not have a very long existence.

At the Royal Academy Exhibition 1906, Mr. Tweed showed a fine Portrait-medallion in bronze of M. August Rodin, the famous French sculptor, and he is the author of other medallic works of similar character.

TWIGG (*Amer.*). This Die-engraver's signature occurs on a Portrait-medal of Washington, 1789, with bust on Obv. and Inscription on Rℒ.; diam. 34 mill.

TYERY, NICHOLAS (*Brit.*). Described by Ruding as one of Henry VIII.'s. Mint-masters, a statement founded on Nicolson's assertion to that effect (*English Historical Library*, ed. 1776, p. 205).

The Oxford University Library preserves a 4to manuscript of Nicholas Tyery, giving a list of the coins lawfully or unlawfully in circulation in France about the year 1526. This is followed by an address to Henry VIII., deploring the abuses connected with the

currency in Ireland, and suggesting the issue of a new coinage for that Island, designs for which are inscribed on two leaves.

This Manuscript was published in the *Cambridge Antiquarian Society's Proceedings*, N° XXII, 1886, and, thanks to Dr L. A. Lawrence's courtesy, who brought this paper to my notice, I am able to give a description of the proposed coinage, which was to consist of :

Gold Coins.

1. *Royal.* ; wt. : III deniers VI. grains, worth 50 Sols 6 deniers tournois.

Obv. HENRICVS : DEI GRA ANGLIE : FRAN Z HYB : R : Lion rampant holding shield of arms.

℟. XPS VINCIT : XPS : REGNAT : XPS : IMPERAT. King on horseback to left.

2. *Noble*; wt. : 2 deniers XXI grains, worth 4 sols 6 deniers tournois.

Obv. HENRICVS DEI GRA ANGLIE FRA Z HYBER : R. Cross fleurdelisée.

℟. XPC VINCIT etc. King seated on throne, to right, holding orb and sceptre.

3. *Saluti*; wt. : 11 deniers 17 grains worth 41 sols 6 deniers tournois.

Obv. HENRICVS : DEI GRA : etc. Lion rampant, holding two shields of arms in front of him.

℟. XPS VINCIT etc. The Annunciation.

4. *Maille*; wt. : 11 deniers 16 grains, worth 33 sols IX deniers tournois.

Obv. HENRICVS DEI etc. Portcullis.

℟. XPS VINCIT etc. Tudor rose.

Æ. Maille for Ireland.

Silver Coins.

1. *Teston*; wt. : VII d. XIJ gr., worth VIII sterlings, The half equivalent to 4 sols tournois.

Obv. HENRICVS : DEI GRA etc. Portcullis.

℟. HONNY SOIT : QVI : MAL : Y : PENSE : inscribed on a garter around Royal arms.

2. *Groat*; wt. : 11 d.; worth 6 sols t. The half in proportion.

Obv. HENRICVS : etc. Crowned bust to left.

℟. POSVI : DEVM etc. Royal arms.

Æ. Irish Groat.

3. *Chateau* (or Chasteaulx) for Jersey, worth V st.

Obv. HENRICVS etc. Cross fleurdelisée.

℟. POSVI DEVM : ADIVTOREM : MEVM : Castle with three towers.

4. *Lyon*, for Ireland; worth ij s. VI d.

Obv. HENRICVS etc. Shield of arms, with St. George's cross.

℟. POSVI : DEVM : etc. Lion holding of St. George's flag and shield of arms.

5. *Eglise*, for Ireland; worth 11 sols.

Obv. HENRICVS : DEI : etc. Cross fleurdelisée.

℟. POSVI : DEVM. etc. Church.

6. *Treizain*, for Ireland ; worth XIII d.

Obv. HENRICVS etc. Two crowns and leopard rampant within tressure of three curves.

℟. POSVI : DEVM. Cross fleurdelisée in alternates angles of which are two crowns and two leopards.

7. Denier (or Penny) for Ireland = XI d.

King seated facing; shield of arms.

8. Demy Treizain = VI d. ob'.

Tressure of three curves; cross fleurdelisée.

9. Demy part = VIII d. t.

Cross of St. George ; Tudor rose.

10. Demy Patart = iijjd.

Tudor rose ; Portcullis.

11. Liart = VII d. t.

Cross of St. George; Lion rampant to left.

12. Double = X d. t.

Tudor rose ; Portcullis.

The legends on Obv. and Rev. of n^{os} 7-12 are similar to those of the larger silver coins.

BIBLIOGRAPHY. — *As above. Pamphlet kindly lent by Dr L. A. Lawrence.*

TYLO (*Germ.*). Mint-master at Rostock, 1361-72.

TYMPF (originally **TYMPE**), **ANDREAS**. Mint-master and Contractor at Posen and Fraustadt 1650-1660, Mint-master at Krakau and Lemberg, 1660-1667, general Mint-warden to the Kingdom of Poland 1659-1667 are signed **A.T**.

He belonged to an old family of coiners in lower Saxony, and was a brother of Thomas Tympf. *Vide* **TIMPF** and **TIMPE** *supra*.

Ammon remarks : " Er trug aber den Nahmen eines Betrügers mit aus der Welt, weil er die Polen mit seiner schlechten Münze um viele Millionen betrogen, " but Timpf was probably not responsible for the issue of base currency and only acted in conformity with the requirements of the depleted treasury of the Kingdom of Poland.

TYMPF(?), **JOHANN** (*Germ.*). Mint-master at Fraustadt, 1655.

IT—MW JOHANN TYMPF MONETA WSCHOVIENSIS.

TYMPF, THOMAS (*Germ.*). Brother of the last, " Münzarendator " or Mint-master at Königsberg, 1669-1672. He signed **T.T**.

Seger, *Schlesiens Münzen- und Medaillen der neueren Zeit.*

TYRNA, HANS VON (*Austr.*). Mint-master in Vienna, 1358-1378. Also named **JANS VON TYRNACH**, **JANS VON TIERNA** and **JOHANN VON TIERNA.**

TYRNA, JACOB VON (*Austr.*). Mint-master in Vienna, 1377-78; died in 1388.

(*To be continued.*)

COUNTERMARKED OR PLUGGED PORTUGUESE GOLD COINS IN THE WEST INDIES AND THE AMERICAN CONTINENT.

(Translation of an article by the late Dr Julius Meili, contributed to *O Archeologo Português*, VII, n^{os} 10-11, 1902.)

Third Instalment.

2. PLUGGED COINS.

9. Half Dobra, clipped, of D. José, 1771, R. ; weight : 10 gr. 95 (circa 3 oitavas).

This coin, which has already been reproduced in *Moedas da Colonia da Brasil*, pl. XV, n° 3, bears a very prominent plug over the bust in centre of which are the letters I.H within a rectangular depression, which letters represent the initials of the official who plugged the coin. In some islands this operation was done officially

Generated at Washington University in St. Louis on 2022-05-13 02:14 GMT / https://hdl.handle.net/2027/coo.31924069735599

Digitized by Google
Original from CORNELL UNIVERSITY

and in others by private individuals. The plug, which should naturally be of fine gold, is sometimes in very base gold, or even of a different metal altogether, slightly gilt. The plug was intended to give the coin the standard weight recognized by the various

islands, within the limit of circulation, which limit differed from island to island; it was 7 dwts (penny-weights) in St. Kitts, Antigua, Montserrat and Nevis, or about 3 oitavas (1 pennyweight = 1 gr. 555), whilst passing to Tortola it was fixed at 8 penny weights or about 3, 5 oitavas.

10. Half Dobra, slightly clipped, of D. José, 1757, R.; weight : 14 gr. 20 (nearly 4 oitavas).

This piece has also been reproduced, on p. 168, n° 294, of the work above quoted from. The reverse shows that it has been plugged; on the obverse, in the centre of the plug, are the letters F & G within an oval depression. The plug had to be affixed to give the coin again its primitive weight of 4 oitavas (or nearly as much); and we are led to suppose that the coin was plugged for one of the islands where only Joes of the legal weight were allowed to circulate, as the Barbadoes. Cf. Robert Chalmers, *op. cit.*, p. 20.

3. COUNTERMARKED AND PLUGGED COINS.

11. Half Dobra, clipped, of D. John V, 1747, R.; weight : 11 gr. 50.

This coin was officially plugged in the British island of Grenada (which like those of St. Vincent and St. Lucia forms one of the group of the Windward Islands), because the weight did not reach the prescribed limit of 7 dwts. 12 grs (7 penny-weights and 12 grains, or 11 gr. 66). The side of the plug on the King's bust bears the initials *J. W.* (in cursive letters). Around the edge are three countermarks, which date from the year 1798, and consist of the letter G. (Grenada), giving the coin a current value of 3 Pounds and 6 Shillings.

With reference to this specimen, which is in a private collection in London and which I have already made known on p. 174 of *Moedas da Colonia da Brasil*, I think opportune to repeat here the information collected in the work of Robert Chalmers, p. 83, which, as will be seen, applies exactly to the case in question. On 31st July 1798 a proclamation was issued in Grenada, in view of the impaired and diminished state of the coins usually current, and in order to prevent the island from being flooded with the light Portuguese gold coins then being decried in the neighbouring colonies. The list which accompanied the ordinance gave the following ratings of the Half Dobras :

Johannes, weighing not less than 7 dwts. 12 grs (11 gr. 66) at 3 *l.* 6 *s.* currency; Johannes, weighing not less than 8 dwts. 12 grs (13 gr. 20) at 3 *l.* 12 *s.* currency.

And as great inconvenience and obstruction to trade might arise from the small number of Johanneses in circulation equal to the prescribed weight of 7 dwts. 12 grs., it was ordered that the Johannes of 6 dwts (9 gr. 33) and upwards may be plugged by prescribed officers up to the standard weight. And in order to facilitate the currency of the Johannes and its aliquot parts, as well those at present of the prescribed weights as those which are allowed to be plugged, the Johannes weighing 8 dwts. 12 grs, or more, and the aliquot parts of a Johannes, shall be stamped with the letter G in the centre of the face side, and the Johannes weighing 7 dwts. 12 grs with the like letter in three places on the face side and as near the edge as possible ". The last instruction was evidently intended to prevent further clipping.

The weight of the present specimen is 11 gr. 50. After being stamped it was bored through and thus the weight was made to correspond to 7 dwts. 12 grs. The stamp is a G, applied in three places, and gives the coin an official current value of 3 *l.* 6 *s.* *I have not yet met with the variety of countermark presenting a G in the centre, with which those coins were to be stamped which were to attain the weight of 8 dwts. 12 grs, or 13 gr. 20, equivalent to 3 l. 12 sh.* The value was naturally understood in colonial money, the proportion of which to that of the mother country stood at 36 : 72 or 1 : 2, and even higher, as 100 : 210, if was take into account that the legal weight of the Half-Dobra was not 8 dwts. 12 grs (13 gr. 21), but 9 dwts. 5 grs (14 gr. 34).

12. Half Dobra, clipped, of D. José, 1767. R.; weight : 11 gr. 60 (7 dwts. 12 grs). Letters G H on the head of the plug, and around the edge in three places the letters S.

I have already published this coin in Spink & Son's *Numismatic Circular* for August 1899, and explained that the letters S indicates the British possession of Somers Islands, or Bermuda Islands, and I mentioned on that occasion some cut silver coins (fractions of Spanish Patacas) countermarked with an S, sometimes alone, and sometimes accompanied by the word *Tortola*, but I have not met since with any further pieces which may contribute a better interpretation ot this stamp.

N^os^ 5 to 12 represent the only specimens I know of with these countermarks.

It is worth noting that the coins mentioned here, with the exception of n° 8, are of Brazilian origin., i. e. struck at the Mint of Rio de Janeiro or Bahia.

REVIEWS.

Chinese Early Barter and Uninscribed Money. By H. A. Ramsden, F.R.N.S. Jun. Kobayagawa Co., Yokohama, 1912. 34 pages, with 3 plates and 65 illustrations in the text.

The present monograph is the second of the series of 'Manuals of Far Eastern Numismatics', which the enterprising firm of Kobayagawa & Co. are bringing out. Like the former, it is by the able pen of Mr. H. A. Ramsden, who is rendering such inestimable service to numismatic Science by supplying his Western fellow-students with reliable information on the subject of the coinage of the Far East, which has hitherto been to most of them a sealed book.

The origin of the Chinese coinage is traced to the needs of trade. The earliest specimens of a currency consist in uninscribed metal objects, which assume different shapes. Mr. Ramsden describes them under three main groups, according to whether they

Generated at Washington University in St. Louis on 2022-05-13 02:14 GMT / https://hdl.handle.net/2027/coo.31924069735599

Digitized by Google
Original from CORNELL UNIVERSITY

represent Domestic implements, Warlike Weapons, or Miscellaneous Utensils. The first category comprises : *a*. Spade money; *b*. Knife money; *c*. Bell money; *d*. Gridiron money; *e*. Nutmeg Grater money; *f*. Weight money. The second : *g*. Arrow head money; *h*. Halbert head money; *i*. Sword money; *j*. Shield (or Carapace) money. The third : *k*. Ring or Disc money; *l*. Lily Rood money; *m*. Bridge money; *n*. Comb money; *o*. Cicada money.

Representative varieties of these different types are illustrated in their actual size, wherever possible. Some of them are very interesting and even artistic in design.

Mr. Ramsden rejects many of the suggestions of Lacouperie and other writers on this primitive currency, and formulates his own conclusions based on authentic documents and intimate knowledge of Chinese archaeology.

To the Rings and Armlets used by the prehistoric Chinese as ornaments is to be traced the ultimate origin of the early circular money, and consequently also of the common cash, which appears to have been first issued as far back as the begining of the Chou dynasty (B.C. 1122).

Mr. Ramsden has dealt with a difficult subject in a thoroughly competent manner, and again deserves the praise and gratitude of his fellow-numismatists.

Portrait Medals of Italian Artists of the Renaissance. By G. F. Hill, Keeper of Coins in the British Museum. Philip Lee Warner, London, 1912. Large 4to buckram. With a coloured Frontispiece and 32 pages in monochrome Collotype, reproducing some 65 medals and 20 other Portraits, large crown 4to (10½ by 7¾ in.), printed on pure rag antique laid paper, cloth gilt. 16 s. net; green parchment £ 1 2 s. 6 d. net (postage, 5 d.).

"This book" states the publishers' preface" gives a description, in more or less chronological order, of between sixty and seventy contemporary medals with portraits of Italian artists of the Renaissance. They are chosen solely with an iconographic intention; the question whether they are good or bad examples of the art of the medallist is but secondary. They often represent our only opportunity of knowing what the features of the person in question were like; within their limitations, which are discussed in the introduction, they are usually the most trustworthy documents.

"The Introduction deals generally with the Italian portrait medal of the fifteenth and sixteenth centuries in its relation to the culture of the Renaissance; it also discusses the value of medals as evidence for portraiture. In addition to the actual medals, a certain number of supplementary illustrations are introduced: these will be welcome to those who usually find objects so small as medals a trial to their patience. But the primary object of the book is to make accessible to students of Italian iconography a comparatively neglected branch ofthe evidence available for study.

"Many of the pieces described have never been illustrated before, and an attempt has been made to give thorough numismatic descriptions of all of them. In the case of the more obscure artists, the biographical information which research has revealed is set down briefly, and to each number a bibliography is appended. The illustrations are in collotype, with a frontispiece in colour after the portrait of Niccolò di Forzore Spinelli, by Hans Memlinc (Royal Museum, Antwerp), and have been taken from medals in some seventeen different collections, both public and private."

Mr. Hill's method of treating his subject is most fascinating, and we are grateful to him for presenting to us so interesting a series of portraits of Italian Renaissance medallists, taken chiefly from medals modelled by the artists themselves. The book is to the purpose, of profitable and enjoyable reading; the illustrations are well chosen and excellent, and this authoritative work will no doubt prove of signal value to all students interested in questions of Italian art.

L. F.

PORTRAIT MEDALS OF ITALIAN ARTISTS

An interesting exhibition of casts of portrait-medals of Italian artists of the Renaissance, dating from about 1435 to 1625 took place in the beginning of October at the Galleries of the Medici Society, 7, Grafton-street. The scientific study of this particular phase of artistic expression is of our own day. The research of students like J. Friedlander, A. Armand, A Heiss, A. Venturi, Dr. Bode, and G. F. Hill has brought to general knowledge the splendid work of Pisanello, who at the beginning of the last century was classed lower than Sperandio. If Pisanello was not the "inventor" of the medal in its modern sense, his genius gave to the medal an independence which distinguishes it from the few Greek coins of a medallic character, the Roman "medallions", and Mediæval pieces like the gold doubloon of Peter the Cruel, issued in 1360 and reproduced by Heiss. The great medal of the Renaissance was the counterpart of the great miniature of the same period. The medals of Pisanello, Leone Battista Alberti, Matteo de Pasti, Vettor Gambello, Riccio, and Leone Leoni correspond to the "paintings in little" of Nicholas Hilliard, Holbein, the Olivers, Hoskin and Samuel Cooper. In the case of both forms of portraiture it was princes and potentates who were the principal patrons of the artists. The medallist immortalised people like John Palæologus, Alphonso of Naples, Niccolo III. d'Este, Lorenzo de' Medici. Sigismondo Malatesta, and Cecilia Gonzago; the miniaturist painted Henry VII., Henry VIII., Anne of Cleves, Queen Elizabeth, the Earl of Essex, and Charles I. In this fashion we have a pictorial or plastic record of many of the men and women who helped to make history at important periods of the Christian era.

But rulers and men of State were not the only persons thus perpetuated. In their spare time, it may have been, the medallists of the Renaissance sought to satisfy their own ego and that of their fellow-artists by reproducing their features in wax, plaster, or bronze. The series at the Medici Galleries renews our acquaintance with familiar faces and introduces us to others wholly unknown. Most of these medals are of more value as historical than artistic evidence. Still, all are welcome. From them we may learn something of the personality of a number of the artists who were the glory of the Renaissance. There are three heads of Leone Battista Alberti which are attributed to himself with more reason than their ascription to Pisanello. A fourth of Alberti is by Matteo de Pasti, and it brings a grossness into the face which is absent from the others. On the reverse of the Gentile Bellini medal by Vettor Gambello we learn that "Nature gave to Gentile all that she could give to man; equal gifts and more did Victor give to him." The two medals of Giovanni Boldu, by himself, are curious effigies, the first austere, the second pagan in its buoyant expression and ornament. The face of Lysippus. jun., looks strangely modern in its Fifteenth Century setting; while the portraits of Pisanello are frequently ascribed to himself, but Mr. G. F. Hill suggests that they are the work of Antonio Marescotti. The larger medal (5) with a hat that would appeal to Mr. Albert Rothenstein has a resemblance to the conventional face of a French Judge, just as the face and beard of Sansovino, with the Tam o' Shanter-like cap, might be mistaken for a character from "Bunty Pulls the Strings" or "Auld Licht Idyls". In the same way Giulio Della Torre reminds us of the late Earl of Lytton, and Giorgio Vasari of William Morris. Eastern and African types are recalled by Antonio da San Gallo, the architect, and one of the many enemies of Michael Angelo, and Giovanni Paolo Lomazzo. These and other faces, not entirely of the accepted Italian cast, hint at the mixture of races that quickened the blood of Northern Italy before the dawn of the Renaissance.

The tragic features of Michael Angelo may be studied in the medal by Leone Leoni, and Caradosso's shows us the profile of Donato di Angelo Bramante, who tried hard to effect the ruin of Michael Angelo. The *impresa* on the reverse of these Renaissance medals are, as Mr. Hill says, occasionally childish and wilfully obscure. Few are of high artistic merit. The horse and rider on the Lancilotti reverse (16) is spirited, the Giovanni Caroto lacks distinction, and the Lavina Fontana is comically serious.

NUMISMATIC REFERENCES IN SHAKESPEARE.

THE THIRD PART OF KING HENRY VI.

Abbreviation : H.VI, Pt. III.

ACT II.

Scene II.

"A wisp of straw were worth a thousand Crowns
To make this shameless callat know herself."

Crown. — See H.VI, Pt. II, IV, 1 and Love's Labour's Lost (hereafter to be published), II, 1.

Scene V.

"This man whom hand to hand I slew in fight,
May be possessed with some store of Crowns".

Crown. — See H.VI, Pt. II, IV, 1; L.L.L. II, 1.

A. H. Cooper-Prichard.

*
* *

LOVE'S LABOUR'S LOST.

According to Prof. Dowden, this is the first play entirely the work of Shakespeare. He believes it to have been written in 1590. The first edition is in 1598 and it was first staged in 1597. Symbol : L.L.L.

ACT I.

Scene II.

"crosses love not him".

The Cross on Anglo-Saxon coins was borrowed from the contemporary Byzantine issues. In various combinations, it came down to the reign of Queen Elizabeth and extended beyond, occurring as late as the reign of Queen Victoria. A reference in "As You Like It", to be referred to when we come to consider that play, together with this play on words, shows that coins were popularly known as "crosses" from this symbol, which in Elizabeth's time covered the entire reverse type and extended to the very edge of the piece, although one is inclined to think that the origin of the popular name is rather to be traced to the coins of the Henries and Edwards, if not earlier, when the cross constituted the reverse type itself. We have every reason to believe that such coins, in more or less clipped condition, were still in circulation at the time when Shakespeare wrote this play. How without a knowledge of these numismatic facts would a Shakespeare reader be able to understand the poverty of Don Adriano de Armado, which is summed up so concisely by this phrase ?

ACT II.

Scene I.

"The payment of a hundred thousand Crowns".

The Crown made its first appearance in the English coinage in the reign of Henry VIII. It was of gold and either owed its name to its type, the royal shield crowned, or to the standard of metal, of which it was composed, which was called "crown gold" to distinguish it from the older and purer gold which preceded it. In the following reign, that of the sixth Edward, begins the noble series of silver Crowns, which is still continued, or was until recently. It was probably to this coin that Shakespeare refers unless, as is still more probable, he refers to French Écus, which in England were at that period called "French Crowns".

ACT III.

Scene I.

"Sir, your Pennyworth is good, an your goose be fat".

Pennyworth, see Pence, T.G.V., Act. II, Sc. v.

"Remuneration! Oh, that's the Latin word for three Farthings : three farthings, remuneration!"

Farthing. — The word is derived from the Anglo-Saxon "feörthing", itself from "feörtha", fourth, "meaning "the fourth thing". The first English coin since the Conquest of this denomination was struck by Edward I and continued to be regularly issued up to the time of Elizabeth, except in the brief period of Edward V and the reign of Mary. In Elizabeth's reign appeared for the first time the piece of Three-Farthings. It was contained in the first issue of her reign, so that it must have been well known to Shakespeare at the time this play is supposed to have been written. It was of silver and its small size fitted it as an appropriate "tip" from the impecunious but swaggering Don Adriano. As it lay in the large hand of Costard it must have seemed doubly ludicrous. The coin from its inconvenient size was probably unpopular and Shakespeare's allusion intended for the sympathies of his audience in this respect. It was not continued after the Queen's reign.

"What's the price of this inkle ? A Penny. — No, I'll give you a remuneration; why, it carries it. — Remuneration ! — why it is a fairer name than French Crown".

The above further bears out the notes we have given under Three-Farthings.

Penny. — See T.G.V., Act. II, Sc. v, under Pence.

French Crown. — On the origin of the Écu d'Or, Engel and Serrure say (*Traité de numismatique du moyen âge*, t. 3, p. 958). — "Le 1 janvier 1337 (n. st.), Philippe VI ordonne la fabrication de monnaies nouvelles sur le pied de 60 gros tournois d'argent-le-roi au marc de Paris. Le rapport de l'or à l'argent était douzième. ...Écu d'or ou denier d'or à l'écu, à 54 au marc de Paris, ayant cours pour 20 sols tournois.... Ce type monétaire obtint une grande faveur à l'étranger, notamment aux Pays-Bas, en Navarre, en Aquitaine et jusqu'en Portugal".

At the time when this play is supposed to have been written, Henry IV was newly on the French throne. His Écus d'or are striking coins, with the crowned shield of France (from whence they derived their name, although this had at first been merely an assessory of the type), on one side and his initial in the centre of a cross composed of fleurs-de-lis on the other

"Marry, sir, Half-Penny Farthing".
"Oh! why then, Three-Farthing worth of silk".

Three-Farthings. — See above, same scene, under "Farthing".
"— — eleven-pence farthing better".

Pence. — T.G.V., Act. II, Scene v.

Farthing. — Above, same scene.

ACT IV.

Scene III.

"If so, our Copper buys no better treasure".

Copper. — It is strange that Shakespeare should speak of copper as money with a purchasing value in the reign of Elizabeth, when this play was undoubtedly written, acted and printed, since no coin of that metal was struck by the Crown of England until the succeeding reign, when, in 1613, the "Harrington" Farthings introduced copper into the English series of Coinage. Nor can this curious anticipation of a later event be explained by the token coinage of the day, which, though of many base metals, was not of copper. In an admirable little pamphlet published some years ago, "English Coins, Copper, Tin and Brass", Mr J. Henry says, —

"From the Norman Conquest until James I, a period of upwards of five centuries, no coins other than those of gold and silver were issued in this country by the Crown or with its Sanction. During this long period, provisions and other necessaries of life were comparatively of little cost, and could be purchased at a far less rate than even a farthing's value, the smallest authorized silver coin then in circulation, and which was first issued by Edward I. The consequence being that the people, as appears from the many complaints recorded in the Parliamentary proceedings of the 14th and later centuries, had to use the base coins issued on the Continent and which were originally known as Suskines, Doitkins, Crockards, Galley-halfpence, etc., all of which were brought here by the merchants trading to London from the Continent, and in the absence of small money were used by the people, notwithstanding the many enactions to the contrary. Abbey pieces or jettons, and tokens

Original from CORNELL UNIVERSITY

of lead, latten (a better kind of brass), and even, it is stated, of leather, were also current in the 15th century.

"Although frequently forbidden by proclamation and otherwise, these tokens and jettons, as well as the Continental coins, appear to have enjoyed a very considerable circulation, probably arising from the smaller silver coins, the halfpence and farthings, being never two plentifully coined, and also that from their thin and minute size they were extremely liable to get lost. Thus anything representing a monetary value and of decent size would be readily current, especially among the lower orders, few of whom would be able to real, or perhaps care to distinguish between the English and French coins, so long as the persons to whom they were tendered did not refuse them at the value at which they were current. The leaden and brass tokens and jettons seem to have been in general circulation all over the country".

ACT V.

SCENE I.

"An I had but one PENNY in the world thou shouldst have it to buy gingerbread".

PENNY. — See T.G.V., Act II, Scene v "Pence".

Here we have the price of gingerbread in Elizabeth's time and are able to note that this choice article of juvenile gastronomic desires has not altered its nominal price in three hundred years, though, when we take into account the alteration in the purchasing value of money, we cannot think the modern schoolboy in the gingerbread stage of youthful developement has much to complain of in the increased prices of to-day.

"Thou HALFPENNY purse of wit!"

HALFPENNY. — This coin first makes its appearance in the reign of John and at the period of this play it still continued to be coined in its original metal, silver. Its insignificant size is the point of wit in the above quotation and not the lowliness of its purchasing value, which was not, of course, so inconsiderable in Shakespeare's time as at the present. This is further borne out by the succeeding line, — "thou pigeon-egg of discretion".

SCENE II.

"My hat to a HALFPENNY!" see immediately above.

The next quotation is a particularly interesting one as illustrating the existence of an interest in coins as a study or as a subject for a collector's interest, viz: —

"The face of an old Roman coin, scarce seen".

That an interest in Roman Numismatics existed in the learned world of that time, especially in Italy and the Low Countries, as well as in France, is sufficiently attested by books on that subject and on Roman Antiquities. In the case of England, although the evidence is not absolutely unique, it is considerably rarer, and a Shakespearean contribution to that evidence has an interest all its own.

A. H. COOPER-PRICHARD.

OBITUARY

We record with regret the death of Mr. James H. B. Christie, the last of the firm of Messrs. Christie, Manson & Woods to bear that time-honoured name. James Christie had retired from activity in the saleroom so long ago as 1889. The few years before his retirement were marked by the great Hamilton Palace, Fountaine, and Blenheim Palace sales, and the treasures then offered were distributed under his hammer.

NUMISMATIC SOCIETIES, MUSEUMS &c.

SOCIÉTÉ FRANÇAISE DE NUMISMATIQUE.

Séance du 1er Juin.

La Société entend une communication de M. Bordeaux sur les coins d'une pièce de douze deniers à l'effigie de Louis XIII commandée par la Cour des Monnaies à Armand l'Orphelin, et une seconde sur les quatre émissions de grands blancs qui ont eu lieu en 1423 et 1426, avec indication des signes qui les différencient.

M. Bouclier fait connaître des documents relatifs à la fête des Bonnes Gens, créée à Canon, en Normandie, par M. et Mme de Beaumont et présente la médaille originale de l'une des lauréates de 1776.

M. Blanchet fait circuler un *triens* mérovingien de Melde et une empreinte de sceau normand au nom et aux armes de François Baliach.

M. Richebé présente quelques jetons rares de sa collection.

*

YORKSHIRE NUMISMATIC FELLOWSHIP.

On Saturday September 28th a meeting was held in the rooms of the Barnsley Naturalists' Society, the President Mr. T. Sheppard, F.G S., in the chair. He read a letter from Mr. H. B. Earle Fox in reference to the reopening of the Mint at various places, including Kingston-upon-Hull and York, in March 1299. The Friscobaldi Merchants of Venice farmed the Mints; there were four furnaces at Kingston-upon-Hull. The joint output of the two mints between April 27 and December 31st of the same year was 17,285 lb of silver pennies; and at 243 pennies to the pound means over four million two hundred thousand. The dies when done with were delivered to the Archbishop of York.

Mr. S. Kirkwood read a paper on "Transport Tokens" and exhibited and described of 18th century tokens issued by carriers, or having relation or reference to the transit of goods.

Mr. T. Pickersgill exhibited two 17th century tokens having thereon representations of a packhorse. Mr. A. Knight exhibited siege pieces of Newark for 6d. 9 d. and xii. d. Mr. J. Digby Firth exhibited new Colonial Bronze Coins, viz. 1 cent Ceylon, 1-12 shilling, 1-24 shilling struck for Jersey, 1 penny of the Commonwealth of Australia, a Flintshire Bank Token for 6 d, and a number of foreign coins, viz. those of Russia, Malta, China, Japan, and Brabant. Mr. E. Croft four silver Edward I. pennies of London, Bristol, Canterbury and Waterford.

Mr. S. H. Hamer, exhibited siege pieces of Newark for xxx. d. and xii. d., a Pontefract shilling of octagonal shape, and an Ormonde shilling. He also exhibited two 17th century unpublished tokens of Almondbury, one, by reason of being heart-shaped, by Nicholas Greaves; the other, by John Kaye, is not included in Williamson's list; also the exceedingly rare half-crown issued in 1811 by the proprietors of the Staverton Factory near Bradford, in Wiltshire; and three trays of farthing and halfpenny tokens of the 18th century. He also read a paper descriptive of the designs and in reference to the circumstances connected therewith.

On the motion of Mr. T. Pickersgill, seconded by Mr. A. Knight the readers of the papers were thanked for so doing and for their exhibitions. Mr. and Mrs. Knight kindly entertained the members to tea.

CORRESPONDENCE.

THE ENGLISH COINAGE.

Gentlemen,

As the *Numismatic Circular* is a recognised repository for numismatic details of some importance in their sum, I venture to offer the subjoined observations of my own in the hope that they may be useful.

I have in my possession two pennies of 1860 approximating to Mr. Garside's number 5. The letters *L. C. Wyon* are partly on the truncation and partly on the flat surface, in this respect differing sharply from another specimen in which they lie entirely on the truncation. The two specimens, however, are not identical, for in one the raised circular line stops short of the rose on the Queen's breast, in the other it passes beyond it. Such differences appear to me of greater interest than the presence or absence of initials, as they indicate pretty clearly the shifts to which the die-sinker was put to relieve the strain on the edge of the die.

Original from CORNELL UNIVERSITY

In Mr. Mac Ilwaine's contribution in the October number of the Circular, one of the references seems to suggest that some of the weaknesses of our later coinage are new things. I am personally of opinion that the flattening and crushing out of the detail in the centre of the field, which was so notable a feature of many of the bronze coins of Edward VII, reminds one of nothing so much as the weirdly distorted pieces turned out for some of the American Colonies in the late 18th Century. On the other hand, the appearance of the obverse on the reverse is not new. I have a bronze farthing of Victoria of date 1860, in which an almost perfect outline of the Queen's head is visible on the reverse. Another of 1862 is only less perfect. In some early copper farthings of Victoria, the slim Britannia in high relief is surrounded by a circular mark indicating the boundary of the much wider spread Queen's head. In two fairly worn farthings of Charles II., I find the nose and chin of the monarch showing as relatively deep depressions alongside of the bust of Britannia. In one Fugio cent of 1787 which I happen to possess the detail of the obverse is almost entirely suppressed, but it appears almost entirely, as if incuse, on the reverse.

In the *N. C.* for February 1908 there is an illustration of a so-called countermarked piece of Jamaica. It now appears to me to be simply the mould for some heart-shaped leaden token, the cut towards the edge being the gate by which the excess of metal escaped. The half-skilled workman has muddled the diagonal stroke of the *N.* I have a George III. penny of 1797 which has been similarly hollowed out, and I recognize it as the mould for the reverse of Haven's Edinburgh farthing, a leaden production of the late 18th century.

One has got to be careful, however, in such deductions. In one piece I possess there is a circular depression inscribed TIB. It took me some little time to decide that it was probably at one time in the possession of some numismatic student who records that it is a coin of Tiberius.

I am,
Gentlemen,
Yours Faithfully,
G. Guthrie Roger.

CATALOGUE

OF

COINS and MEDALS for SALE

Special attention is directed to the fact that every coin or medal catalogued in the following lists is guaranteed to be absolutely genuine (except when expressly stated in the description to be otherwise) and if not approved of can be returned, when the full amount paid will be refunded.

Collectors will also kindly note that every care is taken when compiling the catalogues not to overrate the condition of the pieces but to faithfully represent them according to their merits.

All orders should be sent to Spink & Son Ltd., 17 and 18, Piccadilly, London, W.

(For further particulars see first page of this Circular.)

ENGLISH HISTORICAL MEDALS.

Medals commemorating the operations of Vice-Admiral Edward Vernon, 1739-1741.

Extract from *Historical Medals of American* : C. Wyllys Betts.

"It would seem that no event in English naval history, from the defeat of the Spanish Armada to the victory of Nelson at Trafalgar, aroused the popular enthusiasm throughout Great Britain and her colonies to so great a degree as the capture of Porto Bello by Admiral Vernon in 1739. Certainly no event in English history has evoked so many commemorative medals. They were worn by all classes to express the national joy, and execrably executed as many of them are, the number sold must have been enormous.

The scene of the conflict was on the American shores, and the American Colonies, at that time a part of the British Empire, may rightfully claim a share in the glory of the mother country, since Lawrence Washington took part in one of these expeditions, and, as is well known, gave to his estate on the Potomac the name of Mount Vernon in compliment to the Admiral.

The strongly fortified harbour of Porto Bello for two centuries had been one of the most important outposts of Spain in the New World. Its situation was at the Northern point of the great bend of the Isthmus of Panama, and there the galleons filled with treasure from Vera Cruz, took shelter and refitted before beginning their perilous voyage across the ocean; to this port also they sailed from Spain, bringing merchandise for sale or exchange; and at their leaving, a great fair was held, lasting many weeks, and attended by the inhabitants of the surrounding country. Here too, the *guarda costas*, or Spanish gunboats, congregated, and put to sea in search of prizes, and under the guard of its powerful fortresses they took refuge when they were pursued.

At the time of the capture (1739) peace had reigned for a quarter of a century. To the generation born within that period the "British Glory" was scarcely more than a tradition, and to the older generation, Ramillies, and Malplaquet, and Blenheim — the victories of Marlborough — had become a dream of the past. No remarkable action by sea or land had occurred since the Peace of Utrecht in 1713, and the prospect of distinction for the British arms, under the temporizing and peace-loving administration of Walpole, seemed almost hopeless. The nation, however, was restless under this long repose, and longed for opportunity to redress real and fancied wrongs inflicted by its neighbours. Spain in particular seems to have been the object of popular indignation. The monthly magazines, which alone represented the press, were filled with accounts of Spanish outrages, and Parliament was flooded with petitions, and resounded with speeches denouncing the cruelties inflicted upon English merchantmen upon the high seas, and the searching of British vessels for good claimed to be contrabrand.

At this time Mr Edward Vernon was in Parliament. He had spent many years in the service of England under Queen Anne, and under the first two Georges. In 1706 he commanded the frigate *Dolphin* on the Lisbon and Mediterannean stations, and in 1707 he was promoted to the frigate *Jersey* and sent to the West Indies. There he remained for a number of years engaged in watching the enemy's fleet at Carthagena; but no action of moment is recorded, except in 1711, the capture of a ship of thirty guns, bound for Brest from the French West Indies.

After the Peace of Utrecht he was sent to the Baltic in command of the *Assistance* of fifty guns, and we next hear of him at the same station in 1726, with the *Grafton* of seventy guns.

His oratorical efforts in Parliament do not seem to have made sufficient impression to be recorded; but his bitter criticisms on what be considered the pusillanimous policy of the Goverment made him hated by the Ministry, and won the popular applause. Admiral Hosier, with twenty ships, made an unsuccessful attempt to capture Porto Bello in 1726, and thirteen years after, in a debate on Spanish aggressions, Vernon declared that *with six ships of the line he would take the place*.

The desired opportunity came not long after. On July 9th 1739 Vernon was made Admiral of the Blue, and on July 20th he sailed for the West Indies with nine men-of-war, but he did not reach Jamaica until October 23rd, the very day that war was declarated with Spain. On the fifth of November he sailed for Porto Bello, and as if to carry out his boast, he took with him six ships only, leaving the remainder in Jamaica.

The names of the six ships were : the *Burford* (flagship), the *Hampton Court* (Commodore Brown), the *Norwich*, the *Worcester*, the *Strafford*, and the *Louisa*.

The last ship was sent by Vernon to cruise off Carthagena and did not actually take part in the engagement. When the tidings of the capture of Porto Bello reached England, the whole nation made Vernon and Brown their idols. This was the first victory the British arms had achieved since Marlborough's day, and Vernon who revived the nation's glory, and Vernon who humbled the pride of its hated enemy, was the name upon everybody's lips.

Admiral Vernon's subsequent career was somewhat of a disappointment. In March 1740 he captured Fort Chagre. In January 1741 he was largely reinforced by a fleet under Sir Chaloner Ogle, and found himself in command of thirty ships of the line and eighty-five other vessels, aided by 12,000 soldiers under General Wentworth; but there was a lack of harmony between the naval and military commanders. It was decided to attack Carthagena, and some success was gained in the following March. The Admiral sent home a premature despatch announcing his victory, and once more the popular enthusiasm was ablaze, and again the medallists proclaimed his glory, but Fort St. Lazar, the citadel, was too strong for the forces which were brought against it, and the disputes which followed prevented the necessary co-operation of the fleet and the army, and they were obliged to retire".

107583 ADMIRAL VERNON TOOK PORTO BELLO. (Rosette stops). Half-length figure of the Admiral three quarters to left, baton in left hand. ℞. WITH SIX SHIPS ONLY (Rosette stops).

COINS OF THE MOST FAMOUS RULERS IN THE WORLD'S HISTORY

(*Continued from col. 13992.*)

GEORGE WASHINGTON, PRESIDENT OF THE UNITED STATES OF AMERICA.

1732-1799.

This great patriot, one of the founders, and first President of the United States, was born in 1732, at Bridges Creek, Westmoreland Co. Virginia, of a family from the north of England, which emigrated in the middle of the 17th century.

He was the great-grandson of John Washington, who was the son of a mayor of Northampton in England, and whose elder brother Sir Wm Washington married a half-sister of George Villiers Duke of Buckingham.

The father of George Washington died when his son was only a boy of eleven years of age, leaving him heir to considerable landed property.

He commenced his public life in defending the colony against the encroachments of the French, and served as a captain in a campaign against them under the British General Braddock.

In the contest between the colony and the mother country, he warmly espoused the cause of the former, and was in 1775, appointed Commander-in-chief: his first important operation in that capacity, was to drive the British out of Boston, but on their rallying, he was defeated at Brandywine and Grahamstown in 1777; the next year in alliance with the French, he drove the British out of Philadelphia, and in 1781 compelled Cornwallis to capitulate in an attack he made on Yorktown, this event virtually closing the war.

On the evacuation of New York by the British in 1783, the Independence of America was achieved, and Washington with the Civil Authorities, made a public

Original from CORNELL UNIVERSITY

entry into the Empire city; but on the 4th of December in the same year, he took a personal farewell of the principal officers of the American army, formally resigning in the Hall of Congress, his commission as Commander-in-chief.

In 1789, Washington was elected to the Presidency of the Republic, and in 1793, he was re-elected; at the end of his last term of office, he retired into private life, and in 1799, his death took place after a brief illness.

In his devotion to duty, as in some other characteristics, he resembles, of the famous men of modern times, our own "Iron Duke" the most strongly, although inferior to the famous British soldier in the highest qualities of a great commander.

WILLIAM I. (THE CONQUEROR) KING OF ENGLAND.

1066-1087.

The Conqueror was descended from Rollo a renowned sea-king who flourished at the beginning of the tenth century, and having been expelled from Norway, succeeded by his enterprise and valour, in establishing himself in that province of France, which in course of time came to bear the name of Normandy.

William was born in 1027, and was the illegitimate son of Duke Robert the Magnificent (the fourth in descent from the redoubtable ancestor of the Normans) by Orlotta the daughter of a tanner of Falaise.

On the death of his father, he became Duke of Normandy, and being an illegitimate son, he had to establish his power by the sword, so he set himself vigourously to suppress internal disturbances, and to repel foreign invasion; and by his combined courage and sagacity succeeded in making himself respected and feared by all the neighbouring princes, and established a degree of order in his duchy which was unknown at that time in the rest of Europe.

William was the cousin of Edward the Confessor of England, and was nominated by him, his successor to the English throne. On the death of King Edward however (January 1066), Harold Earl of Wessex the King's brother-in-law, at once ascended the vacant throne with the apparent hearty consent both of the nobles and people of England; as soon as this event reached the ears of William, he made preparations on a huge scale for the invasion of England, and awaiting fair weather, he landed at Pevensey, and gave battle to Harold at Senlac (near Hastings), where after a desperate combat of nine hours duration, the last Saxon King was defeated and slain, and the Norman duke became King of England. On his assumption of the royal power, he rewarded his followers with grants of land and lordships over them subject to the crown, introducing the feudal system and Norman manners in the habits and speech of the English people.

Doomsday Book was compiled by his order, and the Kingdom brought into closer relation with the Church of Rome. He died through a fall from his horse, when suppressing a rebellion in Normandy, and was buried at Caen. He was, as characterised by Carlyle "In rude outline a true God-made King, of most flashing discernment, of most strong lion-heart in whom, as it were within a frame of oak and iron the gods had planted the soul of 'a man of genius' ... the essential element, as of all such men, not scorching fire (merely), but shining illuminative light ... the most sure-eyed perception of what *is* what on this God's earth".

∴ *The mints of this King are so numerous, but at the same time so locally interesting to county collectors, that we have decided to arrange them alphabetically under counties and towns.*

WILLIAM THE LION, KING OF SCOTLAND.

1165-1214.

This Scottish King was the second son of Prince Henry, and grandson of David I. He was born about 1142, and ascended the throne on the death of his elder brother Malcolm in 1165. William began his reign by courting the friendship of Henry II of England; but finding that that monarch was not disposed to restore to him, the county of Northumberland, he sent ambassadors to France in 1168, to negotiate an alliance with the French King — the first negotiation between Scotland and France, of which we have any authentic information. In 1170 when a quarrel broke out between Henry II and his son, William joined in confederacy with the latter, and invaded England.

In 1174, he made another incursion into the northern counties, but while lying in careless security near Alnwick, he was surprised and made prisoner by a party of Yorkshire barons, who carried him to Northampton to meet Henry, who shortly afterwards confined him in the strong fortress of Falaise in Normandy.

In order to regain his liberty, William with the consent of the Scottish barons and clergy, agreed to become the liegeman of Henry for Scotland, and all his other territories, and also promised to deliver up to the English King, the principal fortresses of his Kingdom, and a number of his nobles as securities.

William returned to his own country in the early part of 1176, and with exception of some temporary disputes arising out of an insurrection in Galloway, perfect harmony subsisted between England and Scotland during the remainder of Henry's reign.

On John's accession to the English throne, some misunderstandings arose between him and William, but by the intervention of the barons of both countries, hostilities were happily averted, and a treaty of peace renewed.

The last act of William was the suppression of an insurrection among the inhabitants of Ross-shire.

107662 Perth penny, legend illegible, crowned bust to left, with cross potent sceptre. Ɍ. FOLP[OLT] DƕPƕ. Cross potent with crescent and pellet in each angle (*Burns.*, figs. 30, 31). F. R. 1 1 »

Capt. J. B. Barré; 16-gun brigs Jena and Mercure, and Mamelouck of 8-guns, with two gun boats.

The whole had sailed that morning from Venice, bound to the Port of Pola, in Istria. At 4 h. 15 m. A. M. On the 22nd the Weazel overtook the Mercure, and after, engaging within pistol shot for half an hour, the French brig blew up. At 4 h. 30 m. A.M., the Victorious having arrived within pistol-shot of the larboard quarter of the Rivoli, a furious combat commenced, the two ships standing towards the Gulf of Trieste, with royals set and courses brailed up. In the early part of the action Captain Talbot received a severe contusion from a splinter which nearly deprived him of his sight and the command devolved upon Lieut. Thos Ladd Peake.

After the action had continued three hours and the Rivoli had become unmanageable Lieut. Peake recalled the Weazel, which at 8 h. A. M. stood across the bows of the Rivoli, and raked her twice. Meanwhile the Victorious maintained a steady cannonade, and a 8 h. 5 m. shot away the mizen-mast of the French ship. In another quarter of an hour the Rivoli fired a lee gun hailed the Victorious that she had struck. Her loss amounted to 400 killed and wounded, out of a crew of 810 men. The Victorious had 27 killed, her captain and 98 wounded.

VARIA

THE BEHAVIOUR OF COINAGE ALLOYS.

At the autumn meeting of the Institute of Metals, September 26th, Mr. T. Kirke Rose, read a paper on the annealing of coinage alloys. He said that the softening caused by annealing the alloys used in coinage had been studied with the aid of the scleroscope, an instrument by which the hardness of metals is measured. It was found that at moderate temperatures annealing began almost imperceptibly, but was hastened as the temperature rose until at much higher temperatures metals and alloys reverted from the hard state to the soft state instantaneously. Pure gold could be softened in about 100 hours at 100deg. C, in one hour at 150deg. C, and in a few seconds at 200 deg. C. Lead softened instantaneously. and zinc, cadmium, and tin gradually at 15deg. C. Alloys generally required a higher temperature for annealing than their constituent metals. Softening was accompanied by recrystallisation, the large distorted primary crystals in the hardened metal being broken up into microscopic ones.

BRITISH MUSEUM.

Two appointments of interest at the British Museum are announced (dated 25th Sept.). Mr. H. A. Grueber, the leading authority on coins in this country, who has been for forty-six years associated with the Museum, and keeper of its department of coins and medals since 1906, retires, and is succeeded by Mr. George Francis Hill, his chief assistant. Mr. Grueber has been a prolific writer upon the subject with which his life's work has been concerned, and is author of the numerous guides to the coins, medals, and Roman medallions that have been published by the Museum trustees, and are so much appreciated by students. In the department of manuscripts Mr. John A. Herbert is promoted from assistant, first-class, to be assistant keeper.

NUMISMATIC FIND.

A jug nearly filled with coins of the time of Henry VIII, 1509-1547, has been unearthed in a farmyard at Frieston, in Lincolnshire, September, 1912.

*
* *

RECEIVED FROM A CORRESPONDENT.

At a sale of Medals &c. the property of James Brindley, Esq. M. A., & F. S. A., by Messrs Sotheby on Wednesday March 3, 1819, and seven following days a remarkable Gun money shilling was included in lot 787, which was as follows:

A fine and rare Set of the Distressed Money for Ireland of James II. commonly called his Gun-money, consisting of Five Crowns, thirty-three Half Crowns and thirty eight Shillings, *including the September, with Castle under Head,* seventeen Sixpences 93

The lot evidently contained 93 pieces and from the figures "5 18 —" marked with ink in the margin of the Catalogue we may infer the lot was sold for £5-18-0, no name is mentioned.

No such shilling is mentioned by Dr. Nelson in his list of Gun-Money, while he does give a shilling with Castle under Head for November.

The printing of the description in italics indicates the importance of the piece.

NOTE. At the period the gun-money was issued the first month of the year was March and November the 9th month. All the shillings of the type in question are dated 9r for November Old style, and an error has crept in by mistaking this for the 9th month New Style.

SALE-PRICES A HUNDRED YEARS AGO.

The following is written on a piece of loose paper which at one time was attached to the Catalogue of the Brindley collection of Coins Sold by Mr. Sotheby on Wednesday, March 3, 1819, and seven following days (Sunday excepted).

March 1st 1787. At the sale of the late Mr. Bartlet's coins which terminated this day, a copper halfpenny sold for two pound sixteen shillings; a penny of one of our first Kings for eight pounds seven shillings and sixpence; another for ten guineas; a third for ten pounds fifteen; an eighteen penny piece for sixteen guineas; the Oxford crown (dog cheap) at twenty six pounds ten shillings; (The purchaser declared he was determined to have it, had it cost him an hundred guineas!) A Ramage's half-crown for thirty pounds.

Such is the love of vertu.

(*European Magazine*, for June 1787.)

ADVERTISEMENTS

NOTICE TO SUBSCRIBERS.

In order that future volumes of the NUMISMATIC CIRCULAR may run concurrently with the year, the first number of the New Volume for 1913 will not be issued until 1st January next, but a complete Index to Volumes I to XX has been prepared and will be forwarded gratis to all subscribers on 1st December 1912.

NOW READY

PARTS I and II

MONNAIES BYZANTINES

BY

COUNT JOHN TOLSTOY

Large 8vo, numerous plates. Price 6/6 nett. each.

Extract from Prospectus:
"Subscribers will receive the parts as soon as published, on the following terms: the first, second and third parts for 6/6 (1 dollar 60 cents) net, each part; the subsequent parts for 5/6 each (1 dollar 30 cents), and the last for 2/2 (60 cents).

The price of each part to non-subscribers will be 8/6 (2 dollars 10).

Once the complete work is published the price will be raised.

N. B. Although the work is written in Russian, the author thinks that persons quite ignorant of the Russian language will be able to use it, as it contains reproductions of all the described coin-types and of over half the varieties. The text of the plates is in Latin or Greek, the values of the coins given in francs, and the weight in grammes. All the legends are reproduced in the text in fac-simile, and transcribed in Latin and Greek.

As all the parts will have one common pagination, and the plates enumerated in sequence, subscribers and purchasers will be able to bind the parts as they please.

The work will comprise the description of all the Byzantine coins known to the author, as well as those of the Empires of Thessalonica, Nicaea, Trebizond, and the imitations of Byzantine types issued by the Goths and Lombards of Italy".

The work will consist of 9 to 12 parts, two or three appearing yearly.
